Students: Describe the type(s) of students for which this submission is intended.

McGraw-Hill Education's Spotlight on Music is intended for the general music education of all students from PreKindergarten through 5th grade.

1. IDENTIFY AND DESCRIBE THE COMPONENTS OF THE MAJOR TOOL.

The Major Tool is comprised of the items necessary to meet the standards and requirements of the category for which it is designed and submitted. As part of this section, include a description of the educational approach of the submission.

Educational Approach (The information provided here will be used in the instructional materials catalog in the case of adoption of the program. Please limit your response to 500 words or less.)

The multi-faceted best-practices approaches used in the United States are embodied in Spotlight on Music. They include the educational approaches of Carl Orff and Zoltan Kodály, as applied through sequenced learning that adheres to the National Core Arts Standards. Emphases are on singing, playing instruments, improvising melodies, composing and arranging, reading and notating music, listening and analyzing or describing music, evaluating performances, relating music to the other arts, and understanding music in relation to history and culture.

Orff's methods offer children endless opportunities for early success in learning and playing rhythms and pitches on an array of pitched and unpitched percussion instruments. Spotlight on Music includes a wealth of materials from the leading Orff authors, master teachers, and clinicians. The program features Orff parts to play at point of use within the Pupil Edition and a Creative Unit Project that is initiated at the beginning of each unit, reinforced throughout the lessons of the unit, and culminates in a final performance that is tied to the end-of-unit assessment. Rubrics included in the Resource Masters guide both students and teachers in assessing and critiquing their projects.

The Kodály approach to music reading has a long history of success with teaching students to read pitches and rhythms from notation. Pre-reading activities presented in Kindergarten (including iconic representation of pitches and rhythms) form the basis for the music literacy program in Grades K–5 of Spotlight on Music. A Music Reading Enrichment section is included in each K–5 grade-level book. This section provides reinforcement of reading skills introduced in the lessons of each unit and offers a multitude of "reading songs" that contain only the rhythms and pitches learned to that point. These reading lessons are arranged in the same learning sequence as the lessons in the Concepts section units. Movable do is the solfège pitch-naming system used consistently in the program. It enables students to learn to read melodies with success before they have learned about key signatures and note names.

Spotlight on Music learning sequence provides an array of instructional strategies and support materials to ensure development of technical skills in music. Each lesson addresses a concept and skill. The learning sequence of Explore (including Experience, Imitate, and Describe), Label (including Identify and Label), and Practice (including Apply the concept, Reinforce, Read or Interpret, Create, and Maintain) carries students through a cumulative development of technical music skills throughout the entire program. Technical music skills taught follow those outlined in the National Core Arts Standards. These include singing on pitch and in rhythm with good breath

support and appropriate articulation and phrasing; match pitches; performing on pitched and unpitched instruments with proper technique; improvising instrumentally and vocally; composing; reading and performing pitches and rhythms from standard music notation; writing pitches and rhythms using standard music notation; listening to analyze, describe, evaluate, compare, and classify; and moving (including creative, patterned, games, body percussion, dance, locomotor, nonlocomotor, and American Sign Language).

Major Tool - Student Components

Describe each of the components, including a format description.

Student Experience

The online Student Experience offers a wealth of songs, listening selections, movement, instrumental parts to play, and other music activities in a student-engaging, 21st Century format.

3. HOW MUCH INSTRUCTIONAL TIME IS NEEDED FOR THE SUCCESSFUL IMPLEMENTATION OF THIS PROGRAM?

Identify and explain the suggested instructional time for this submission. If a series, state the suggested time for each level. The goal is to determine whether the amount of content is suitable to the length of the course for which it is submitted.

This program is intended for a standard two-semester course at each grade level K-5. Since there is an increasing non-conformity of minutes per week that music classes are taught, the courses are organized for flexibility. The four-section organization permits teachers to teach according to the specific demands of their district curriculum.

McGraw-Hill Education's Spotlight on Music offers suggestions for pacing with the Options for Scheduling document found under the Professional Resources link.

4. WHAT PROFESSIONAL DEVELOPMENT IS AVAILABLE? Describe the ongoing learning opportunities available to teachers and other education personnel that will be delivered through their schools and districts as well as the training/in-service available directly from the publisher for successful implementation of the program. Also provide details of the type of training/in-service available and how it may be obtained. (The information provided here will be used in the instructional materials catalog in the case of adoption of the program.)

McGraw-Hill Education is an established company in music education with a history of providing the finest products and service. We are committed to assisting teachers, administrators, and district leaders in achieving their music curriculum goals. Our comprehensive plan includes both program in-service and professional staff development.

- McGraw-Hill Education in-service allows teachers to learn the program philosophy, components, instructional methods, how to plan and pace, how the program meets state and local standards, and so on.
- McGraw-Hill Education professional staff development focuses on best pedagogical practices, current issues/trends in music education, classroom management, and various workshops and interactive trainings of interest to teachers.
- McGraw-Hill Education offers online resources for continuous, independent development of skills and program comprehension

McGraw-Hill Education's dedicated sales representatives will work one on one to:

- Plan and arrange in-service and staff development with district personnel.
- Stay in touch to monitor the success of the in-service and staff development and to answer questions and solve any problems.
- Provide schools and districts with implementation training so that teachers are trained in using the new program.

McGraw-Hill Education's authors and consultants are a comprehensive team of nationally recognized music educators who bring many years of experience as teachers, supervisors, and scholars to the development of the program. These authors/practitioners contributed pedagogical, cultural, and professional music industry expertise to the development process and will be available to you for in-service and professional staff development.

Upon the adoption of McGraw-Hill Education's Spotlight on Music an initial meeting can be scheduled with district curriculum leaders and the McGraw-Hill Education's team to discuss the specific needs and objectives of the district. The purpose of the Planning Meeting is to collaborate on a comprehensive plan for the initial implementation of McGraw-Hill Education's Spotlight on Music and the on-going staff development options.

5. WHAT HARDWARE/EQUIPMENT IS REQUIRED? List and describe the hardware/equipment needed to implement the submission in the classroom. REMEMBER: Florida law does not allow hardware/equipment to be included on the bid! However, schools and districts must be made aware of the hardware/equipment needed to fully implement this program.

Computer or tablet with access to the Internet. There are countless ways teachers can deliver instruction using Music Studio products, including:

- Presenting using a projector and whiteboard or interactive whiteboard
- Presenting in a 1:1 environment
- Presenting in a computer lab

Music Studio products are built on HTML5 technology, and work on any device, 7" or larger.

6. WHAT LICENSING POLICIES AND/OR AGREEMENTS APPLY? If software is being submitted, please attach a copy of the company's licensing policies and/or agreements.
