Each set of materials submitted for adoption is evaluated based on each benchmark for that course and the Content, Presentation, and Learning items included in this rubric.

A. Alignment with curriculum 1. A. The content aligns with the state's standards and benchmarks for subject, grade level and learning outcomes.

VERY GOOD ALIGNMENT GOOD ALIGNMENT FAIR ALIGNMENT POOR ALIGNMENT VERY POOR/NO ALIGNMENT

Justification:

Excellent job on standard alignment. On the lesson on Air the assessment under Evaluation is three pictures leaf, brick, and box and students are asked which one can be moved by wind and why? Teachers guides says, the leaf can be moved the box maybe move also if wind is strong. However in the pictures and video they demonstrate wind can move little things and big things. In other words the big things are moved when there are strong winds. So I think that should be added as a possible answer students my say if the winds are very strong like a hurricane or tornado the brick can be move by the wind too.

When looking at standards alignment reviewers should consider not only the robustness of the standard coverage but also the content complexity (depth of knowledge level) if appropriate. More information on content complexity as it relates to Florida standards can be found at:

http://www.cpalms.org/Uploads/docs/CPALMS/initiatives/contentcomplexity/CPALMS_ccdefinitions_140711.pdf

For example, if the standard is marked as a level 3 (strategic reasoning and complex thinking) then the materials coverage should reflect this. If the materials coverage is only sufficient to allow for recall (level 1) then this should be reflected in the points assigned.
