

**STATE BOARD OF EDUCATION**  
**Consent Item**  
April 11, 2014

**SUBJECT:** Approval of Repeal of Rule 6A-6.0651, Alternative Credit Pilot Program

---

**PROPOSED BOARD ACTION**

For Approval

**AUTHORITY FOR STATE BOARD ACTION**

Section 1001.02, Florida Statutes

**EXECUTIVE SUMMARY**

The rule was enacted in 2008 in response to Section 1002.375, Alternative Credit for High School Courses; Pilot Project, Florida Statutes. The rule defined the requirements for school districts in the implementation of this alternative credit pilot program. Section 1002.375, Florida Statutes, was repealed by the 2013 legislative session and the pilot programs implemented in school districts created under this statute no longer exist.

---

**Supporting Documentation Included:** Rule 6A-6.0651, Alternative Credit Pilot Program

**Facilitator:** Rod Duckworth, Chancellor, Career and Adult Education

**6A-6.0651 Alternative Credit Pilot Program.**

The purpose of this rule is to provide requirements for pilot districts in the implementation of this pilot program.

(1) At a minimum, the term of this pilot program will be through December 2009.

(2) Eligible core courses for which students may receive alternative credit are Algebra 1a, Algebra 1b, Algebra 1, Geometry, and Biology.

(3) In order for a student enrolled in a pilot course to receive alternative credit, the student must pass the respective end-of-course assessment approved by the Department of Education. Assessments may be developed by the Florida Virtual School or adopted or developed by the Department.

(4) The minimum passing scores for each end-of-course assessment will be determined by the Department based on the recommendations of a committee of Florida educators through a standard-setting procedure. Minimum passing scores must be no lower than those expected of students enrolled in the credit bearing course for which the alternative credit is sought.

(5) The end-of-course assessments for alternative core credit may be administered at any point during a student's enrollment in the career course. The Department will approve the method of administration of the end-of-course assessment for each pilot district.

(6) If a student does not meet the minimum passing scores established by the Department, and has participated in the remediation provided by the district, the student may retake the assessment multiple times during the duration of the career course, provided that there are at least thirty-one (31) calendar days between administrations and a different form of the assessment is administered each time.

(7) Although the career course descriptions must include a minimum of fifty (50) percent of the alternative credit core course benchmarks, the district is responsible for providing students access to resources aligned to all of the core course benchmarks to assist students in preparing for the respective end-of-course assessment.

(8) Remediation in the core course for which alternative credit is sought must be provided after each unsuccessful attempt to pass the end-of-course assessment. The district is responsible for providing this remediation.

(9) A student enrolled in the career course is not required to take the end-of-course assessment for alternative core credit unless the student is seeking such alternative credit.

(10)(a) If a student is not successful in passing the end-of-course assessment, the student will not receive alternative credit for the core course. However, the student's credit for the career course is not affected by the score on the alternative credit end-of-course assessment.

(b) If a student passes the end-of-course assessment in the core course, but does not earn a passing grade in the career course, the student's alternative core credit is not affected.

(11) If a student is successful in passing the alternative credit end-of-course assessment, the student will receive credit for the core course and a 'P' will appear on the student's transcript as the grade. There is no penalty on the transcript if a student is not successful after the allotted attempts to retake the assessment.

(12) The district must report alternative credit awarded for core courses on the student transcript according to Department requirements in the DOE Information Data Base Requirements: Volume I – Automated Student Information System, 2008 as incorporated by reference in Rule 6A-1.0014, FAC.

(13) The Florida Virtual School will provide the Department and pilot districts with electronic student test results. They will also report diagnostic information to districts detailing how students performed on each benchmark tested using secure measures to protect the identity of students, and summary level information to the state.
