

Social Studies

Effective November 2021
Rule 6A-1.09412, F.A.C.

Social Studies Grade K (#5021020) 2015 - 2022 (current)

Course Standards

Name	Description
SS.K.A.1.1:	Develop an understanding of how to use and create a timeline. Clarifications: May include, but are not limited to: Put in order three things that happened during the school day.
SS.K.A.1.2:	Develop an awareness of a primary source. Clarifications: Examples may include, but are not limited to, photographs, a letter from a grandparent, or other artifacts.
SS.K.A.2.1:	Compare children and families of today with those in the past. Clarifications: Examples may include, but are not limited to, family life now versus family life when grandparents were young.
SS.K.A.2.2:	Recognize the importance of celebrations and national holidays as a way of remembering and honoring people, events, and our nation's ethnic heritage. Clarifications: Examples may include, but are not limited to, federal holidays and ethnic celebrations..
SS.K.A.2.3:	Compare our nation's holidays with holidays of other cultures. Clarifications: Examples may include, but are not limited to, National holidays are different in other countries.
SS.K.A.2.4:	Listen to and retell stories about people in the past who have shown character ideals and principles including honesty, courage, and responsibility. Clarifications: Examples may include, but are not limited to, Presidents, war veterans, community members, and leaders.
SS.K.A.2.5:	Recognize the importance of U.S. symbols. Clarifications: Examples may include, but are not limited to, the Statue of Liberty, the bald eagle, the Star Spangled Banner, and national and state flags, the pledge of allegiance, and the national anthem.
SS.K.A.3.1:	Use words and phrases related to chronology and time to explain how things change and to sequentially order events that have occurred in school. Clarifications: Examples may include, but are not limited to, before, after; morning, afternoon, evening; today, tomorrow, yesterday; past, present, future; last week, this week, next week; day, week, month, year.
SS.K.A.3.2:	Explain that calendars represent days of the week and months of the year.
SS.K.C.1.1:	Define and give examples of rules and laws, and why they are important. Clarifications: Examples are standing in line at school and wearing a bike helmet.
SS.K.C.1.2:	Explain the purpose and necessity of rules and laws at home, school, and community. Clarifications: Examples are attending school and wearing a seat belt.
SS.K.C.2.1:	Demonstrate the characteristics of being a good citizen. Clarifications: Examples are taking turns, sharing, taking responsibility, following rules, understanding the consequences of breaking rules, practicing honesty, self-control, and participating in classroom decision making.
SS.K.C.2.2:	Demonstrate that conflicts among friends can be resolved in ways that are consistent with being a good citizen.
SS.K.C.2.3:	Describe fair ways for groups to make decisions. Clarifications: Examples are voting, taking turns, and coming to an agreement.
SS.K.E.1.1:	Describe different kinds of jobs that people do and the tools or equipment used. Clarifications: Examples are community helpers, firefighter and fire truck).
SS.K.E.1.2:	Recognize that United States currency comes in different forms. Clarifications: Examples are coins and bills.
SS.K.E.1.3:	Recognize that people work to earn money to buy things they need or want.
SS.K.E.1.4:	Identify the difference between basic needs and wants. Clarifications: Examples of needs are clothing and shelter and examples of wants are video games and toys.
SS.K.G.1.1:	Describe the relative location of people, places, and things by using positional words. Clarifications:

	Examples are near/far; above/below, left/right and behind/front.
SS.K.G.1.2:	Explain that maps and globes help to locate different places and that globes are a model of the Earth.
SS.K.G.1.3:	Identify cardinal directions (north, south, east, west).
	Differentiate land and water features on simple maps and globes.
SS.K.G.1.4:	Clarifications: Examples are blue is water and green/brown is land.
	Locate and describe places in the school and community.
SS.K.G.2.1:	Clarifications: Examples are the cafeteria, library, office, restrooms, and classroom.
SS.K.G.2.2:	Know one's own phone number, street address, city or town and that Florida is the state in which the student lives.
	Identify basic landforms.
SS.K.G.3.1:	Clarifications: Examples are hills, forests, wetlands, and coasts.
	Identify basic bodies of water.
SS.K.G.3.2:	Clarifications: Examples are rivers, lakes, oceans, and gulfs.
SS.K.G.3.3:	Describe and give examples of seasonal weather changes, and illustrate how weather affects people and the environment.
LAFS.K.RI.1.1:	With prompting and support, ask and answer questions about key details in a text.
LAFS.K.RI.1.2:	With prompting and support, identify the main topic and retell key details of a text.
LAFS.K.RI.1.3:	With prompting and support, describe the connection between two individuals, events, ideas, or pieces of information in a text.
LAFS.K.RI.2.4:	With prompting and support, ask and answer questions about unknown words in a text.
LAFS.K.RI.3.7:	With prompting and support, describe the relationship between illustrations and the text in which they appear (e.g., what person, place, thing, or idea in the text an illustration depicts).
LAFS.K.RI.3.8:	With prompting and support, identify the reasons an author gives to support points in a text.
LAFS.K.RI.4.10:	Actively engage in group reading activities with purpose and understanding.
LAFS.K.SL.1.1:	Participate in collaborative conversations with diverse partners about <i>kindergarten topics</i> and texts with peers and adults in small and larger groups. <ul style="list-style-type: none"> a. Follow agreed-upon rules for discussions (e.g., listening to others and taking turns speaking about the topics and texts under discussion). b. Continue a conversation through multiple exchanges.
LAFS.K.SL.1.2:	Confirm understanding of a text read aloud or information presented orally or through other media by asking and answering questions about key details and requesting clarification if something is not understood.
LAFS.K.SL.1.3:	Ask and answer questions in order to seek help, get information, or clarify something that is not understood.
LAFS.K.SL.2.4:	Describe familiar people, places, things, and events and, with prompting and support, provide additional detail.
LAFS.K.W.1.2:	Use a combination of drawing, dictating, and writing to compose informative/explanatory texts in which they name what they are writing about and supply some information about the topic.
LAFS.K.W.1.3:	Use a combination of drawing, dictating, and writing to narrate a single event or several loosely linked events, tell about the events in the order in which they occurred, and provide a reaction to what happened.
LAFS.K.W.2.5:	With guidance and support from adults, respond to questions and suggestions from peers and add details to strengthen writing as needed.
MAFS.K.MD.1.1:	Describe measurable attributes of objects, such as length or weight. Describe several measurable attributes of a single object. Standard Relation to Course: Supporting
MAFS.K.MD.1.2:	Directly compare two objects with a measurable attribute in common, to see which object has "more of"/"less of" the attribute, and describe the difference. <i>For example, directly compare the heights of two children and describe one child as taller/shorter.</i> Standard Relation to Course: Supporting
MAFS.K.MD.1.a:	Express the length of an object as a whole number of length units, by laying multiple copies of a shorter object (the length unit) end to end; understand that the length measurement of an object is the number of same-size length units that span it with no gaps or overlaps. <i>Limit to contexts where the object being measured is spanned by a whole number of length units with no gaps or overlaps.</i> Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Explain the importance of rules to maintain health.
HE.K.C.2.4:	Clarifications: Walk don't run, wait your turn, keep your hands and feet to yourself, and play fair.

General Course Information and Notes

GENERAL NOTES

Living, Learning and Working Together: Kindergarten students will learn about themselves, their families, and the community. Students will be introduced to basic concepts related to history, geography, economics, and citizenship.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

SS.K.A.3.2:	<p>Explain that calendars represent days of the week and months of the year.</p>
SS.K.C.1.1:	<p>Define and give examples of rules and laws, and why they are important.</p> <p>Clarifications: Examples are standing in line at school and wearing a bike helmet.</p>
SS.K.C.1.2:	<p>Explain the purpose and necessity of rules and laws at home, school, and community.</p> <p>Clarifications: Examples are attending school and wearing a seat belt.</p>
SS.K.C.2.1:	<p>Demonstrate the characteristics of being a good citizen.</p> <p>Clarifications: Examples are taking turns, sharing, taking responsibility, following rules, understanding the consequences of breaking rules, practicing honesty, self-control, and participating in classroom decision making.</p>
SS.K.C.2.2:	<p>Demonstrate that conflicts among friends can be resolved in ways that are consistent with being a good citizen.</p>
SS.K.C.2.3:	<p>Describe fair ways for groups to make decisions.</p> <p>Clarifications: Examples are voting, taking turns, and coming to an agreement.</p>
SS.K.E.1.1:	<p>Describe different kinds of jobs that people do and the tools or equipment used.</p> <p>Clarifications: Examples are community helpers, firefighter and fire truck).</p>
SS.K.E.1.2:	<p>Recognize that United States currency comes in different forms.</p> <p>Clarifications: Examples are coins and bills.</p>
SS.K.E.1.3:	<p>Recognize that people work to earn money to buy things they need or want.</p>
SS.K.E.1.4:	<p>Identify the difference between basic needs and wants.</p> <p>Clarifications: Examples of needs are clothing and shelter and examples of wants are video games and toys.</p>
SS.K.G.1.1:	<p>Describe the relative location of people, places, and things by using positional words.</p> <p>Clarifications:</p>

	Examples are near/far; above/below, left/right and behind/front.
SS.K.G.1.2:	Explain that maps and globes help to locate different places and that globes are a model of the Earth.
SS.K.G.1.3:	Identify cardinal directions (north, south, east, west).
	Differentiate land and water features on simple maps and globes.
SS.K.G.1.4:	<p>Clarifications: Examples are blue is water and green/brown is land.</p>
	Locate and describe places in the school and community.
SS.K.G.2.1:	<p>Clarifications: Examples are the cafeteria, library, office, restrooms, and classroom.</p>
SS.K.G.2.2:	Know one's own phone number, street address, city or town and that Florida is the state in which the student lives.
	Identify basic landforms.
SS.K.G.3.1:	<p>Clarifications: Examples are hills, forests, wetlands, and coasts.</p>
	Identify basic bodies of water.
SS.K.G.3.2:	<p>Clarifications: Examples are rivers, lakes, oceans, and gulfs.</p>
SS.K.G.3.3:	Describe and give examples of seasonal weather changes, and illustrate how weather affects people and the environment.
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.

- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

ELA.K.12.EE.4.1:	In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.K.C.2.4:	Explain the importance of rules to maintain health. Clarifications: Walk don't run, wait your turn, keep your hands and feet to yourself, and play fair.

General Course Information and Notes

GENERAL NOTES

Living, Learning and Working Together: Kindergarten students will learn about themselves, their families, and the community. Students will be introduced to basic concepts related to history, geography, economics, and citizenship.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.K.A.1.1:	<p>Develop an understanding of how to use and create a timeline.</p> <p>Clarifications: May include, but are not limited to: Put in order three things that happened during the school day.</p>
SS.K.A.1.2:	<p>Develop an awareness of a primary source.</p> <p>Clarifications: Examples may include, but are not limited to, photographs, a letter from a grandparent, or other artifacts.</p>
SS.K.A.2.1:	<p>Compare children and families of today with those in the past.</p> <p>Clarifications: Examples may include, but are not limited to, family life now versus family life when grandparents were young.</p>
SS.K.A.2.2:	<p>Recognize the importance of celebrations and national holidays as a way of remembering and honoring people, events, and our nation's ethnic heritage.</p> <p>Clarifications: Examples may include, but are not limited to, federal holidays and ethnic celebrations..</p>
SS.K.A.2.3:	<p>Compare our nation's holidays with holidays of other cultures.</p> <p>Clarifications: Examples may include, but are not limited to, National holidays are different in other countries.</p>
SS.K.A.2.4:	<p>Listen to and retell stories about people in the past who have shown character ideals and principles including honesty, courage, and responsibility.</p> <p>Clarifications: Examples may include, but are not limited to, Presidents, war veterans, community members, and leaders.</p>
SS.K.A.2.5:	<p>Recognize the importance of U.S. symbols.</p> <p>Clarifications: Examples may include, but are not limited to, the Statue of Liberty, the bald eagle, the Star Spangled Banner, and national and state flags, the pledge of allegiance, and the national anthem.</p>
SS.K.A.3.1:	<p>Use words and phrases related to chronology and time to explain how things change and to sequentially order events that have occurred in school.</p> <p>Clarifications: Examples may include, but are not limited to, before, after; morning, afternoon, evening; today, tomorrow, yesterday; past, present, future; last week, this week, next week; day, week, month, year.</p>
SS.K.A.3.2:	<p>Explain that calendars represent days of the week and months of the year.</p>
SS.K.CG.1.1:	<p>Identify the purpose of rules and laws in the home and school.</p> <ul style="list-style-type: none"> • Students will define rules as standards of responsible behavior (e.g., rules for home and school). • Students will define laws as a system of rules intended to protect people and property that are created and enforced by government (e.g., speed limit). • Students will identify what can happen without rules and laws.
SS.K.CG.1.2:	<p>Identify people who have the authority and power to make and enforce rules and laws.</p> <ul style="list-style-type: none"> • Students will identify authority figures in their school and community including, but not limited to, parents, teachers and law enforcement officers.
SS.K.CG.2.1:	<p>Describe and demonstrate the characteristics of being a responsible citizen.</p> <ul style="list-style-type: none"> • Students will identify examples of responsible citizenship. • Students will demonstrate that conflicts can be resolved in ways that are consistent with being a responsible citizen. • Students will explain why it is important to take responsibility for one's actions.
SS.K.CG.2.2:	<p>Describe ways for groups to make decisions.</p> <ul style="list-style-type: none"> • Students will practice decision-making in small and large groups through voting, taking turns, class meetings and discussion. • Students will identify examples of responsible decisions.
SS.K.CG.2.3:	<p>Define patriotism as the allegiance to one's country.</p> <ul style="list-style-type: none"> • Students will identify patriotic holidays and observances (e.g., American Founders Month, Celebrate Freedom Week, Constitution Day, Independence Day, Martin Luther King Jr. Day, Medal of Honor Day, Memorial Day, Patriot Day, Veterans Day). • Students will recognize that the Pledge of Allegiance is an oath that affirms American values and freedom. • Students will identify "I pledge allegiance to the flag of the United States of America and to the republic for which it stands, one nation under God, indivisible, with liberty and justice for all" as the Pledge of Allegiance.
SS.K.CG.2.4:	<p>Recognize symbols that represent the United States.</p> <ul style="list-style-type: none"> • Students will recognize the American flag, the bald eagle and the U.S. President as symbols that represent the United States.
SS.K.CG.2.5:	<p>Recognize symbols that represent Florida.</p> <ul style="list-style-type: none"> • Students will recognize Florida's state flag and state nickname ("The Sunshine State") as symbols that represent the state.
SS.K.E.1.1:	<p>Describe different kinds of jobs that people do and the tools or equipment used.</p> <p>Clarifications: Examples are community helpers, firefighter and fire truck).</p>

SS.K.E.1.2:	Recognize that United States currency comes in different forms. Clarifications: Examples are coins and bills.
SS.K.E.1.3:	Recognize that people work to earn money to buy things they need or want.
SS.K.E.1.4:	Identify the difference between basic needs and wants. Clarifications: Examples of needs are clothing and shelter and examples of wants are video games and toys.
SS.K.G.1.1:	Describe the relative location of people, places, and things by using positional words. Clarifications: Examples are near/far; above/below, left/right and behind/front.
SS.K.G.1.2:	Explain that maps and globes help to locate different places and that globes are a model of the Earth.
SS.K.G.1.3:	Identify cardinal directions (north, south, east, west).
SS.K.G.1.4:	Differentiate land and water features on simple maps and globes. Clarifications: Examples are blue is water and green/brown is land.
SS.K.G.2.1:	Locate and describe places in the school and community. Clarifications: Examples are the cafeteria, library, office, restrooms, and classroom.
SS.K.G.2.2:	Know one's own phone number, street address, city or town and that Florida is the state in which the student lives.
SS.K.G.3.1:	Identify basic landforms. Clarifications: Examples are hills, forests, wetlands, and coasts.
SS.K.G.3.2:	Identify basic bodies of water. Clarifications: Examples are rivers, lakes, oceans, and gulfs.
SS.K.G.3.3:	Describe and give examples of seasonal weather changes, and illustrate how weather affects people and the environment.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications:</p>

	See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.K.C.2.4:	<p>Explain the importance of rules to maintain health.</p> <p>Clarifications: Walk don't run, wait your turn, keep your hands and feet to yourself, and play fair.</p>

General Course Information and Notes

GENERAL NOTES

Living, Learning and Working Together: Kindergarten students will learn about themselves, their families, and the community. Students will be introduced to basic concepts related to history, geography, economics, and citizenship.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Path: Section: Grades PreK to 12 Education

Course Number: 5021020

Courses > **Grade Group:** Grades PreK to 5 Education

Courses > **Subject:** Social Studies > **SubSubject:**

General >

Abbreviated Title: SOC STUDIES K

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Status: Draft - Course Pending Approval

Grade Level(s): K

Educator Certifications

Social Studies (Elementary Grades 1-6)
Primary Education (K-3)
Prekindergarten/Primary Education (Age 3 through Grade 3)
Elementary Education (Elementary Grades 1-6)
Early Childhood Education (Early Childhood)
Elementary Education (Grades K-6)

Social Studies Grade 1 (#5021030) 2015 - 2022 (current)

Course Standards

Name	Description
SS.1.A.1.1:	Develop an understanding of a primary source. Clarifications: Examples may include, but are not limited to, pictures, letters, audio/video recordings, and other artifacts.
SS.1.A.1.2:	Understand how to use the media center/other sources to find answers to questions about a historical topic. Clarifications: Examples may include, but are not limited to, databases, audio or video recordings, and books.
SS.1.A.2.1:	Understand history tells the story of people and events of other times and places.
SS.1.A.2.2:	Compare life now with life in the past. Clarifications: Examples may include, but are not limited to, comparing school, families, work, and community life.
SS.1.A.2.3:	Identify celebrations and national holidays as a way of remembering and honoring the heroism and achievements of the people, events, and our nation's ethnic heritage. Clarifications: Examples may include, but are not limited to, federal holidays and ethnic celebrations.
SS.1.A.2.4:	Identify people from the past who have shown character ideals and principles including honesty, courage, and responsibility. Clarifications: Examples may include, but are not limited to, Presidents, war veterans, community members, and leaders.
SS.1.A.2.5:	Distinguish between historical fact and fiction using various materials. Clarifications: Examples may include, but are not limited to, tall tales, fables and non-fiction (expository) text.
SS.1.A.3.1:	Use terms related to time to sequentially order events that have occurred in school, home, or community. Clarifications: Examples may include, but are not limited to, days, weeks, months, and years.
SS.1.A.3.2:	Create a timeline based on the student's life or school events, using primary sources. Clarifications: Examples of sources may include, but are not limited to, photographs, birth certificates, report cards, and diaries.
SS.1.C.1.1:	Explain the purpose of rules and laws in the school and community. Clarifications: Examples are keeping order and ensuring safety.
SS.1.C.1.2:	Give examples of people who have the power and authority to make and enforce rules and laws in the school and community. Clarifications: Examples are principals, teachers, parents, government leaders, and police.
SS.1.C.1.3:	Give examples of the use of power without authority in the school and community. Clarifications: Examples are bullying, stealing, and peer pressure.
SS.1.C.2.1:	Explain the rights and responsibilities students have in the school community. Clarifications: Examples are not littering, coming to school on time, and having a safe learning environment.
SS.1.C.2.2:	Describe the characteristics of responsible citizenship in the school community. Clarifications: Examples are follow rules, care about the environment, and respect others.
SS.1.C.2.3:	Identify ways students can participate in the betterment of their school and community. Clarifications: Examples are responsible decision making, classroom jobs, and school service projects.
SS.1.C.2.4:	Show respect and kindness to people and animals.
SS.1.C.3.1:	Explain how decisions can be made or how conflicts might be resolved in fair and just ways. Clarifications: Examples are talking about problems, role playing, listening, and sharing.
SS.1.C.3.2:	Recognize symbols and individuals that represent American constitutional democracy. Clarifications: Examples are United States flag, Pledge of Allegiance, National Anthem, Statue of Liberty, bald eagle, George Washington, Abraham Lincoln, and the current President.
	Recognize that money is a method of exchanging goods and services.

SS.1.E.1.1:	Clarifications: An example is coins/bills versus bartering or trading.
	Define opportunity costs as giving up one thing for another.
SS.1.E.1.2:	Clarifications: Examples are giving up television to do homework and buying candy versus saving for later purchase.
	Distinguish between examples of goods and services.
SS.1.E.1.3:	Clarifications: Examples are goods: hamburger; services: sweeping the floor.
SS.1.E.1.4:	Distinguish people as buyers, sellers, and producers of goods and services.
SS.1.E.1.5:	Recognize the importance of saving money for future purchases.
	Identify that people need to make choices because of scarce resources.
SS.1.E.1.6:	Clarifications: Examples are not enough time to do all activities or not enough red crayons.
	Use physical and political/cultural maps to locate places in Florida.
SS.1.G.1.1:	Clarifications: Examples are Tallahassee, student's hometown, Lake Okeechobee, Florida Keys, and the Everglades.
SS.1.G.1.2:	Identify key elements (compass rose, cardinal directions, title, key/legend with symbols) of maps and globes .
	Construct a basic map using key elements including cardinal directions and map symbols.
SS.1.G.1.3:	Clarifications: Examples are map of bedroom, classroom, or route to school
	Identify a variety of physical features using a map and globe.
SS.1.G.1.4:	Clarifications: Examples are oceans, peninsulas, lakes, rivers, swamps, and gulfs.
SS.1.G.1.5:	Locate on maps and globes the student's local community, Florida, the Atlantic Ocean, and the Gulf of Mexico.
	Describe how location, weather, and physical environment affect the way people live in our community.
SS.1.G.1.6:	Clarifications: Examples are effects on their food, clothing, shelter, transportation, and recreation
LAFS.1.RI.1.1:	Ask and answer questions about key details in a text.
LAFS.1.RI.1.2:	Identify the main topic and retell key details of a text.
LAFS.1.RI.1.3:	Describe the connection between two individuals, events, ideas, or pieces of information in a text.
LAFS.1.RI.2.4:	Ask and answer questions to help determine or clarify the meaning of words and phrases in a text.
LAFS.1.RI.2.5:	Know and use various text features (e.g., headings, tables of contents, glossaries, electronic menus, icons) to locate key facts or information in a text.
LAFS.1.RI.2.6:	Distinguish between information provided by pictures or other illustrations and information provided by the words in a text.
LAFS.1.RI.3.7:	Use the illustrations and details in a text to describe its key ideas.
LAFS.1.RI.3.8:	Identify the reasons an author gives to support points in a text.
LAFS.1.RI.3.9:	Identify basic similarities in and differences between two texts on the same topic (e.g., in illustrations, descriptions, or procedures).
LAFS.1.RI.4.10:	With prompting and support, read informational texts appropriately complex for grade 1.
LAFS.1.SL.1.1:	Participate in collaborative conversations with diverse partners about grade 1 topics and texts with peers and adults in small and larger groups. <ul style="list-style-type: none"> a. Follow agreed-upon rules for discussions (e.g., listening to others with care, speaking one at a time about the topics and texts under discussion). b. Build on others' talk in conversations by responding to the comments of others through multiple exchanges. c. Ask questions to clear up any confusion about the topics and texts under discussion.
LAFS.1.SL.1.2:	Ask and answer questions about key details in a text read aloud or information presented orally or through other media.
LAFS.1.SL.1.3:	Ask and answer questions about what a speaker says in order to gather additional information or clarify something that is not understood.
LAFS.1.SL.2.4:	Describe people, places, things, and events with relevant details, expressing ideas and feelings clearly.
LAFS.1.W.1.1:	Write opinion pieces in which they introduce the topic or name the book they are writing about, state an opinion, supply a reason for the opinion, and provide some sense of closure.
LAFS.1.W.1.2:	Write informative/explanatory texts in which they name a topic, supply some facts about the topic, and provide some sense of closure.
LAFS.1.W.1.3:	Write narratives in which they recount two or more appropriately sequenced events, include some details regarding what happened, use temporal words to signal event order, and provide some sense of closure.
LAFS.1.W.2.5:	With guidance and support from adults, focus on a topic, respond to questions and suggestions from peers, and add details to strengthen writing as needed.
LAFS.1.W.2.6:	With guidance and support from adults, use a variety of digital tools to produce and publish writing, including in collaboration with peers.
LAFS.1.W.3.7:	Participate in shared research and writing projects (e.g., explore a number of "how-to" books on a given topic and use them to write a sequence of instructions).
LAFS.1.W.3.8:	With guidance and support from adults, recall information from experiences or gather information from provided sources to answer a question.
MAFS.1.MD.3.4:	Organize, represent, and interpret data with up to three categories; ask and answer questions about the total number of data points, how many in each category, and how many more or less are in one category than in another. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems

using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

MAFS.K12.MP.3.1:

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

MAFS.K12.MP.5.1:

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

MAFS.K12.MP.6.1:

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Recognize health consequences for not following rules.

HE.1.C.2.4:

Clarifications:

Injuries, arguments, hurt feelings, and pollution.

General Course Information and Notes

GENERAL NOTES

Our Community and Beyond: First grade students will expand their knowledge of family and community through explorations in history, geography, and economics and learn about their role as a citizen in their home, school, and community.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Elementary Education (Grades K-6)

Social Studies Grade 1 (#5021030) 2022 - 2023

Course Standards

Name	Description
SS.1.A.1.1:	Develop an understanding of a primary source. Clarifications: Examples may include, but are not limited to, pictures, letters, audio/video recordings, and other artifacts.
SS.1.A.1.2:	Understand how to use the media center/other sources to find answers to questions about a historical topic. Clarifications: Examples may include, but are not limited to, databases, audio or video recordings, and books.
SS.1.A.2.1:	Understand history tells the story of people and events of other times and places.
SS.1.A.2.2:	Compare life now with life in the past. Clarifications: Examples may include, but are not limited to, comparing school, families, work, and community life.
SS.1.A.2.3:	Identify celebrations and national holidays as a way of remembering and honoring the heroism and achievements of the people, events, and our nation's ethnic heritage. Clarifications: Examples may include, but are not limited to, federal holidays and ethnic celebrations.
SS.1.A.2.4:	Identify people from the past who have shown character ideals and principles including honesty, courage, and responsibility. Clarifications: Examples may include, but are not limited to, Presidents, war veterans, community members, and leaders.
SS.1.A.2.5:	Distinguish between historical fact and fiction using various materials. Clarifications: Examples may include, but are not limited to, tall tales, fables and non-fiction (expository) text.
SS.1.A.3.1:	Use terms related to time to sequentially order events that have occurred in school, home, or community. Clarifications: Examples may include, but are not limited to, days, weeks, months, and years.
SS.1.A.3.2:	Create a timeline based on the student's life or school events, using primary sources. Clarifications: Examples of sources may include, but are not limited to, photographs, birth certificates, report cards, and diaries.
SS.1.C.1.1:	Explain the purpose of rules and laws in the school and community. Clarifications: Examples are keeping order and ensuring safety.
SS.1.C.1.2:	Give examples of people who have the power and authority to make and enforce rules and laws in the school and community. Clarifications: Examples are principals, teachers, parents, government leaders, and police.
SS.1.C.1.3:	Give examples of the use of power without authority in the school and community. Clarifications: Examples are bullying, stealing, and peer pressure.
SS.1.C.2.1:	Explain the rights and responsibilities students have in the school community. Clarifications: Examples are not littering, coming to school on time, and having a safe learning environment.
SS.1.C.2.2:	Describe the characteristics of responsible citizenship in the school community. Clarifications: Examples are follow rules, care about the environment, and respect others.
SS.1.C.2.3:	Identify ways students can participate in the betterment of their school and community. Clarifications: Examples are responsible decision making, classroom jobs, and school service projects.
SS.1.C.2.4:	Show respect and kindness to people and animals.
SS.1.C.3.1:	Explain how decisions can be made or how conflicts might be resolved in fair and just ways. Clarifications: Examples are talking about problems, role playing, listening, and sharing.
SS.1.C.3.2:	Recognize symbols and individuals that represent American constitutional democracy. Clarifications: Examples are United States flag, Pledge of Allegiance, National Anthem, Statue of Liberty, bald eagle, George Washington, Abraham Lincoln, and the current President.
	Recognize that money is a method of exchanging goods and services.

SS.1.E.1.1:	<p>Clarifications: An example is coins/bills versus bartering or trading.</p>
	Define opportunity costs as giving up one thing for another.
SS.1.E.1.2:	<p>Clarifications: Examples are giving up television to do homework and buying candy versus saving for later purchase.</p>
	Distinguish between examples of goods and services.
SS.1.E.1.3:	<p>Clarifications: Examples are goods: hamburger; services: sweeping the floor.</p>
SS.1.E.1.4:	Distinguish people as buyers, sellers, and producers of goods and services.
SS.1.E.1.5:	Recognize the importance of saving money for future purchases.
	Identify that people need to make choices because of scarce resources.
SS.1.E.1.6:	<p>Clarifications: Examples are not enough time to do all activities or not enough red crayons.</p>
	Use physical and political/cultural maps to locate places in Florida.
SS.1.G.1.1:	<p>Clarifications: Examples are Tallahassee, student's hometown, Lake Okeechobee, Florida Keys, and the Everglades.</p>
SS.1.G.1.2:	Identify key elements (compass rose, cardinal directions, title, key/legend with symbols) of maps and globes .
	Construct a basic map using key elements including cardinal directions and map symbols.
SS.1.G.1.3:	<p>Clarifications: Examples are map of bedroom, classroom, or route to school</p>
	Identify a variety of physical features using a map and globe.
SS.1.G.1.4:	<p>Clarifications: Examples are oceans, peninsulas, lakes, rivers, swamps, and gulfs.</p>
SS.1.G.1.5:	Locate on maps and globes the student's local community, Florida, the Atlantic Ocean, and the Gulf of Mexico.
	Describe how location, weather, and physical environment affect the way people live in our community.
SS.1.G.1.6:	<p>Clarifications: Examples are effects on their food, clothing, shelter, transportation, and recreation</p>
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:	Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.1.C.2.4:	Recognize health consequences for not following rules. Clarifications: Injuries, arguments, hurt feelings, and pollution.

General Course Information and Notes

GENERAL NOTES

Our Community and Beyond: First grade students will expand their knowledge of family and community through explorations in history, geography, and economics and learn about their role as a citizen in their home, school, and community.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.1.A.1.1:	Develop an understanding of a primary source. Clarifications: Examples may include, but are not limited to, pictures, letters, audio/video recordings, and other artifacts.
SS.1.A.1.2:	Understand how to use the media center/other sources to find answers to questions about a historical topic. Clarifications: Examples may include, but are not limited to, databases, audio or video recordings, and books.
SS.1.A.2.1:	Understand history tells the story of people and events of other times and places.
SS.1.A.2.2:	Compare life now with life in the past. Clarifications: Examples may include, but are not limited to, comparing school, families, work, and community life.
SS.1.A.2.3:	Identify celebrations and national holidays as a way of remembering and honoring the heroism and achievements of the people, events, and our nation's ethnic heritage. Clarifications: Examples may include, but are not limited to, federal holidays and ethnic celebrations.
SS.1.A.2.4:	Identify people from the past who have shown character ideals and principles including honesty, courage, and responsibility. Clarifications: Examples may include, but are not limited to, Presidents, war veterans, community members, and leaders.
SS.1.A.2.5:	Distinguish between historical fact and fiction using various materials. Clarifications: Examples may include, but are not limited to, tall tales, fables and non-fiction (expository) text.
SS.1.A.3.1:	Use terms related to time to sequentially order events that have occurred in school, home, or community. Clarifications: Examples may include, but are not limited to, days, weeks, months, and years.
SS.1.A.3.2:	Create a timeline based on the student's life or school events, using primary sources. Clarifications: Examples of sources may include, but are not limited to, photographs, birth certificates, report cards, and diaries.
SS.1.CG.1.1:	Explain the purpose of rules and laws in the home, school and community. <ul style="list-style-type: none"> Students will explain the role that rules and laws play in their daily life. Students will explain the difference between rules and laws.
SS.1.CG.1.2:	Describe how the absence of rules and laws impacts individuals and the community. <ul style="list-style-type: none"> Students will provide examples of rules and laws in their lives and in the community. Students will recognize that disorder, injustice and harm to people can occur when there is an absence of rules and laws.
SS.1.CG.2.1:	Explain the rights and responsibilities students have in the school community. <ul style="list-style-type: none"> Students will identify the rights (e.g., treated with respect, physically safe learning environment) and responsibilities (e.g., come to school on time, do not damage school property) students have as members of their school community. Students will define rights as freedoms protected by laws in society and protected by rules in the school community. Students will define responsibilities as things citizens should do to benefit the community.
SS.1.CG.2.2:	Describe the characteristics of citizenship in the school community. <ul style="list-style-type: none"> Students will identify characteristics of responsible citizenship (e.g., respect others' property, treat people with dignity, care for environment, treat animals with kindness). Students will identify characteristics of irresponsible citizenship (e.g., damaging school property, bullying).
SS.1.CG.2.3:	Recognize ways citizens can demonstrate patriotism. <ul style="list-style-type: none"> Students will discuss appropriate ways to show respect during the Pledge of Allegiance and National Anthem (e.g., stand at attention, face the flag, pause conversations). Students will discuss how to show respect for the American flag (e.g., how to properly display and dispose of the American flag). Students will discuss how to demonstrate patriotism during patriotic holidays and observances (e.g., American Founders Month, Celebrate Freedom Week, Constitution Day, Independence Day, Martin Luther King Jr. Day, Medal of Honor Day, Memorial Day, Patriot Day, Veterans Day).
SS.1.CG.2.4:	Recognize symbols and individuals that represent the United States. <ul style="list-style-type: none"> Students will recognize the national motto ("In God We Trust") and "We the People" as symbols that represent the United States. Students will recognize Benjamin Franklin, George Washington, Daniel Webster and Martin Luther King Jr. as individuals who represent the United States.
SS.1.CG.2.5:	Recognize symbols and individuals that represent Florida. <ul style="list-style-type: none"> Students will recognize that the state motto ("In God We Trust") and the state day (Pascua Florida Day) are symbols that represent Florida. Students will identify the current Florida governor and recognize the governor as an individual who represents the state.
SS.1.CG.3.1:	Recognize that the United States and Florida have Constitutions. <ul style="list-style-type: none"> Students will define a constitution as an agreed-upon set of rules or laws. Students will recognize that the U.S. Constitution starts with "We the People."

SS.1.CG.3.2:	<p>Explain responsible ways for individuals and groups to make decisions.</p> <ul style="list-style-type: none"> • Students will demonstrate characteristics of responsible decision-making. • Students will explain how multiple perspectives contribute to the unity of the United States.
SS.1.E.1.1:	<p>Recognize that money is a method of exchanging goods and services.</p> <p>Clarifications: An example is coins/bills versus bartering or trading.</p>
SS.1.E.1.2:	<p>Define opportunity costs as giving up one thing for another.</p> <p>Clarifications: Examples are giving up television to do homework and buying candy versus saving for later purchase.</p>
SS.1.E.1.3:	<p>Distinguish between examples of goods and services.</p> <p>Clarifications: Examples are goods: hamburger; services: sweeping the floor.</p>
SS.1.E.1.4:	Distinguish people as buyers, sellers, and producers of goods and services.
SS.1.E.1.5:	Recognize the importance of saving money for future purchases.
SS.1.E.1.6:	<p>Identify that people need to make choices because of scarce resources.</p> <p>Clarifications: Examples are not enough time to do all activities or not enough red crayons.</p>
SS.1.G.1.1:	<p>Use physical and political/cultural maps to locate places in Florida.</p> <p>Clarifications: Examples are Tallahassee, student's hometown, Lake Okeechobee, Florida Keys, and the Everglades.</p>
SS.1.G.1.2:	Identify key elements (compass rose, cardinal directions, title, key/legend with symbols) of maps and globes .
SS.1.G.1.3:	<p>Construct a basic map using key elements including cardinal directions and map symbols.</p> <p>Clarifications: Examples are map of bedroom, classroom, or route to school</p>
SS.1.G.1.4:	<p>Identify a variety of physical features using a map and globe.</p> <p>Clarifications: Examples are oceans, peninsulas, lakes, rivers, swamps, and gulfs.</p>
SS.1.G.1.5:	Locate on maps and globes the student's local community, Florida, the Atlantic Ocean, and the Gulf of Mexico.
SS.1.G.1.6:	<p>Describe how location, weather, and physical environment affect the way people live in our community.</p> <p>Clarifications: Examples are effects on their food, clothing, shelter, transportation, and recreation</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications:</p>

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

ELA.K12.EE.1.1:

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.1.C.2.4:	Recognize health consequences for not following rules. Clarifications: Injuries, arguments, hurt feelings, and pollution.

General Course Information and Notes

GENERAL NOTES

Our Community and Beyond: First grade students will expand their knowledge of family and community through explorations in history, geography, and economics and learn about their role as a citizen in their home, school, and community.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.2.A.1.1:	Examine primary and secondary sources. Clarifications: Examples may include, but are not limited to, artifacts, photographs, newspapers, audio/video recordings, documents, maps, coins, and stamps, textbooks and reference books.
SS.2.A.1.2:	Utilize the media center, technology, or other informational sources to locate information that provides answers to questions about a historical topic.
SS.2.A.2.1:	Recognize that Native Americans were the first inhabitants in North America.
SS.2.A.2.2:	Compare the cultures of Native American tribes from various geographic regions of the United States. Clarifications: Examples may include, but are not limited to, location, clothing, housing, food, major beliefs and practices, language, art, and music.
SS.2.A.2.3:	Describe the impact of immigrants on the Native Americans. Clarifications: Examples are location, clothing, housing, food, major beliefs and practices, art, and music.
SS.2.A.2.4:	Explore ways the daily life of people living in Colonial America changed over time. Clarifications: Examples may include, but are not limited to, food, shelter, clothing, education, and settlements.
SS.2.A.2.5:	Identify reasons people came to the United States throughout history. Clarifications: Examples may include, but are not limited to, war, hunger, natural disasters, voluntary and involuntary servitude, political or religious freedom, land, and jobs.
SS.2.A.2.6:	Discuss the importance of Ellis Island and the Statue of Liberty to immigration from 1892 - 1954.
SS.2.A.2.7:	Discuss why immigration continues today. Clarifications: Examples may include, but are not limited to, jobs, war, hunger, natural disasters, political or religious freedom, and jobs.
SS.2.A.2.8:	Explain the cultural influences and contributions of immigrants today. Clarifications: Examples may include, but are not limited to, food, language, music, art, beliefs and practices, literature, education, and clothing.
SS.2.A.3.1:	Identify terms and designations of time sequence. Clarifications: Examples may include, but are not limited to, years, decades, centuries.
SS.2.C.1.1:	Explain why people form governments. Clarifications: Examples are create laws, provide services and structure, safety.
SS.2.C.1.2:	Explain the consequences of an absence of rules and laws. Clarifications: Examples are lack of order and people get hurt.
SS.2.C.2.1:	Identify what it means to be a United States citizen either by birth or by naturalization.
SS.2.C.2.2:	Define and apply the characteristics of responsible citizenship. Clarifications: Examples are respect, responsibility, participation, self-reliance, patriotism, and honesty.
SS.2.C.2.3:	Explain why United States citizens have guaranteed rights and identify rights. Clarifications: Examples are right to vote, freedom of speech, and freedom of religion.
SS.2.C.2.4:	Identify ways citizens can make a positive contribution in their community. Clarifications: Examples are volunteering and recycling.
SS.2.C.2.5:	Evaluate the contributions of various African Americans, Hispanics, Native Americans, veterans, and women.
SS.2.C.3.1:	Identify the Constitution as the document which establishes the structure, function, powers, and limits of American government.
SS.2.C.3.2:	Recognize symbols, individuals, events, and documents that represent the United States. Clarifications: Examples are White House, Capitol, Supreme Court, Washington Monument, Statue of Liberty, Ellis Island, Liberty Bell, Constitution.
SS.2.E.1.1:	Recognize that people make choices because of limited resources.
SS.2.E.1.2:	Recognize that people supply goods and services based on consumer demands. Clarifications: Examples are housing and jobs.

	Recognize that the United States trades with other nations to exchange goods and services.
SS.2.E.1.3:	<p>Clarifications: Examples are clothing, food, toys, cars.</p>
SS.2.E.1.4:	Explain the personal benefits and costs involved in saving and spending.
	Use different types of maps (political, physical, and thematic) to identify map elements.
SS.2.G.1.1:	<p>Clarifications: Examples are coordinate grids, title, compass rose, cardinal and intermediate directions, key/legend with symbols and scale.</p>
SS.2.G.1.2:	Using maps and globes, locate the student's hometown, Florida, and North America, and locate the state capital and the national capital.
SS.2.G.1.3:	Label on a map or globe the continents, oceans, Equator, Prime Meridian, North and South Pole.
SS.2.G.1.4:	Use a map to locate the countries in North America (Canada, United States, Mexico, and the Caribbean Islands).
LAFS.2.RI.1.1:	Ask and answer such questions as <i>who</i> , <i>what</i> , <i>where</i> , <i>when</i> , <i>why</i> , and <i>how</i> to demonstrate understanding of key details in a text.
LAFS.2.RI.1.2:	Identify the main topic of a multiparagraph text as well as the focus of specific paragraphs within the text.
LAFS.2.RI.1.3:	Describe the connection between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text.
LAFS.2.RI.2.4:	Determine the meaning of words and phrases in a text relevant to a <i>grade 2 topic or subject area</i> .
LAFS.2.RI.2.5:	Know and use various text features (e.g., captions, bold print, subheadings, glossaries, indexes, electronic menus, icons) to locate key facts or information in a text efficiently.
LAFS.2.RI.2.6:	Identify the main purpose of a text, including what the author wants to answer, explain, or describe.
LAFS.2.RI.3.7:	Explain how specific images (e.g., a diagram showing how a machine works) contribute to and clarify a text.
LAFS.2.RI.3.8:	Describe how an author uses reasons to support specific points in a text.
LAFS.2.RI.3.9:	Compare and contrast the most important points presented by two texts on the same topic.
LAFS.2.RI.4.10:	By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 2–3 text complexity band proficiently, with scaffolding as needed at the high end of the range.
	Participate in collaborative conversations with diverse partners about grade 2 topics and texts with peers and adults in small and larger groups.
LAFS.2.SL.1.1:	<p>a. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion).</p> <p>b. Build on others' talk in conversations by linking their comments to the remarks of others.</p> <p>c. Ask for clarification and further explanation as needed about the topics and texts under discussion.</p>
LAFS.2.SL.1.2:	Recount or describe key ideas or details from a text read aloud or information presented orally or through other media.
LAFS.2.SL.1.3:	Ask and answer questions about what a speaker says in order to clarify comprehension, gather additional information, or deepen understanding of a topic or issue.
LAFS.2.SL.2.4:	Tell a story or recount an experience with appropriate facts and relevant, descriptive details, speaking audibly in coherent sentences.
LAFS.2.W.1.2:	Write informative/explanatory texts in which they introduce a topic, use facts and definitions to develop points, and provide a concluding statement or section.
LAFS.2.W.1.3:	Write narratives in which they recount a well-elaborated event or short sequence of events, include details to describe actions, thoughts, and feelings, use temporal words to signal event order, and provide a sense of closure.
LAFS.2.W.2.5:	With guidance and support from adults and peers, focus on a topic and strengthen writing as needed by revising and editing.
LAFS.2.W.3.7:	Participate in shared research and writing projects (e.g., read a number of books on a single topic to produce a report; record science observations).
MAFS.2.MD.3.7:	Tell and write time from analog and digital clocks to the nearest five minutes.
	Standard Relation to Course: Supporting
MAFS.2.MD.3.8:	<p>Solve one- and two-step word problems involving dollar bills (singles, fives, tens, twenties, and hundreds) or coins (quarters, dimes, nickels, and pennies) using \$ and ¢ symbols appropriately. Word problems may involve addition, subtraction, and equal groups situations¹. <i>Example: The cash register shows that the total for your purchase is 59¢. You gave the cashier three quarters. How much change should you receive from the cashier?</i></p> <p>a. Identify the value of coins and paper currency.</p> <p>b. Compute the value of any combination of coins within one dollar.</p> <p>c. Compute the value of any combinations of dollars (e.g., If you have three ten-dollar bills, one five-dollar bill, and two one-dollar bills, how much money do you have?).</p> <p>d. Relate the value of pennies, nickels, dimes, and quarters to other coins and to the dollar (e.g., There are five nickels in one quarter. There are two nickels in one dime. There are two and a half dimes in one quarter. There are twenty nickels in one dollar).</p> <p>(¹See glossary Table 1)</p>
	Standard Relation to Course: Supporting
MAFS.2.MD.4.9:	Generate measurement data by measuring lengths of several objects to the nearest whole unit, or by making repeated measurements of the same object. Show the measurements by making a line plot, where the horizontal scale is marked off in whole-number units.
	Standard Relation to Course: Supporting
MAFS.2.MD.4.10:	Draw a picture graph and a bar graph (with single-unit scale) to represent a data set with up to four categories. Solve simple put-together, take-apart, and compare problems using information presented in a bar graph.
	Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
	Standard Relation to Course: Supporting
	Construct viable arguments and critique the reasoning of others.

MAFS.K12.MP.3.1:	<p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p> <p>Standard Relation to Course: Supporting</p> <p>Use appropriate tools strategically.</p>
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p> <p>Standard Relation to Course: Supporting</p> <p>Attend to precision.</p>
MAFS.K12.MP.6.1:	<p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p> <p>Standard Relation to Course: Supporting</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.2.C.2.4:	<p>Explain the ways that rules make the classroom, school, and community safer.</p> <p>Clarifications: Walking not running, waiting your turn, and following traffic laws.</p>

General Course Information and Notes

GENERAL NOTES

Who We Are As Americans: Second grade students will investigate the impact of immigration over time in the United States, explore the geography of North America, and discover the foundations of American citizenship.

Mathematics Benchmark Guidance – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Name	Description
SS.2.A.1.1:	Examine primary and secondary sources. Clarifications: Examples may include, but are not limited to, artifacts, photographs, newspapers, audio/video recordings, documents, maps, coins, and stamps, textbooks and reference books.
SS.2.A.1.2:	Utilize the media center, technology, or other informational sources to locate information that provides answers to questions about a historical topic.
SS.2.A.2.1:	Recognize that Native Americans were the first inhabitants in North America.
SS.2.A.2.2:	Compare the cultures of Native American tribes from various geographic regions of the United States. Clarifications: Examples may include, but are not limited to, location, clothing, housing, food, major beliefs and practices, language, art, and music.
SS.2.A.2.3:	Describe the impact of immigrants on the Native Americans. Clarifications: Examples are location, clothing, housing, food, major beliefs and practices, art, and music.
SS.2.A.2.4:	Explore ways the daily life of people living in Colonial America changed over time. Clarifications: Examples may include, but are not limited to, food, shelter, clothing, education, and settlements.
SS.2.A.2.5:	Identify reasons people came to the United States throughout history. Clarifications: Examples may include, but are not limited to, war, hunger, natural disasters, voluntary and involuntary servitude, political or religious freedom, land, and jobs.
SS.2.A.2.6:	Discuss the importance of Ellis Island and the Statue of Liberty to immigration from 1892 - 1954.
SS.2.A.2.7:	Discuss why immigration continues today. Clarifications: Examples may include, but are not limited to, jobs, war, hunger, natural disasters, political or religious freedom, and jobs.
SS.2.A.2.8:	Explain the cultural influences and contributions of immigrants today. Clarifications: Examples may include, but are not limited to, food, language, music, art, beliefs and practices, literature, education, and clothing.
SS.2.A.3.1:	Identify terms and designations of time sequence. Clarifications: Examples may include, but are not limited to, years, decades, centuries.
SS.2.C.1.1:	Explain why people form governments. Clarifications: Examples are create laws, provide services and structure, safety.
SS.2.C.1.2:	Explain the consequences of an absence of rules and laws. Clarifications: Examples are lack of order and people get hurt.
SS.2.C.2.1:	Identify what it means to be a United States citizen either by birth or by naturalization.
SS.2.C.2.2:	Define and apply the characteristics of responsible citizenship. Clarifications: Examples are respect, responsibility, participation, self-reliance, patriotism, and honesty.
SS.2.C.2.3:	Explain why United States citizens have guaranteed rights and identify rights. Clarifications: Examples are right to vote, freedom of speech, and freedom of religion.
SS.2.C.2.4:	Identify ways citizens can make a positive contribution in their community. Clarifications: Examples are volunteering and recycling.
SS.2.C.2.5:	Evaluate the contributions of various African Americans, Hispanics, Native Americans, veterans, and women.
SS.2.C.3.1:	Identify the Constitution as the document which establishes the structure, function, powers, and limits of American government.
SS.2.C.3.2:	Recognize symbols, individuals, events, and documents that represent the United States. Clarifications: Examples are White House, Capitol, Supreme Court, Washington Monument, Statue of Liberty, Ellis Island, Liberty Bell, Constitution.
SS.2.E.1.1:	Recognize that people make choices because of limited resources.
SS.2.E.1.2:	Recognize that people supply goods and services based on consumer demands. Clarifications: Examples are housing and jobs.

	Recognize that the United States trades with other nations to exchange goods and services.
SS.2.E.1.3:	<p>Clarifications: Examples are clothing, food, toys, cars.</p>
SS.2.E.1.4:	Explain the personal benefits and costs involved in saving and spending.
	Use different types of maps (political, physical, and thematic) to identify map elements.
SS.2.G.1.1:	<p>Clarifications: Examples are coordinate grids, title, compass rose, cardinal and intermediate directions, key/legend with symbols and scale.</p>
SS.2.G.1.2:	Using maps and globes, locate the student's hometown, Florida, and North America, and locate the state capital and the national capital.
SS.2.G.1.3:	Label on a map or globe the continents, oceans, Equator, Prime Meridian, North and South Pole.
SS.2.G.1.4:	Use a map to locate the countries in North America (Canada, United States, Mexico, and the Caribbean Islands).
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems.

MA.K12.MTR.5.1:

- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they

ELA.K12.EE.5.1:

	must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.2.C.2.4:	Explain the ways that rules make the classroom, school, and community safer. Clarifications: Walking not running, waiting your turn, and following traffic laws.

General Course Information and Notes

GENERAL NOTES

Who We Are As Americans: Second grade students will investigate the impact of immigration over time in the United States, explore the geography of North America, and discover the foundations of American citizenship.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.2.A.1.1:	Examine primary and secondary sources. Clarifications: Examples may include, but are not limited to, artifacts, photographs, newspapers, audio/video recordings, documents, maps, coins, and stamps, textbooks and reference books.
SS.2.A.1.2:	Utilize the media center, technology, or other informational sources to locate information that provides answers to questions about a historical topic.
SS.2.A.2.1:	Recognize that Native Americans were the first inhabitants in North America.
SS.2.A.2.2:	Compare the cultures of Native American tribes from various geographic regions of the United States. Clarifications: Examples may include, but are not limited to, location, clothing, housing, food, major beliefs and practices, language, art, and music.
SS.2.A.2.3:	Describe the impact of immigrants on the Native Americans. Clarifications: Examples are location, clothing, housing, food, major beliefs and practices, art, and music.
SS.2.A.2.4:	Explore ways the daily life of people living in Colonial America changed over time. Clarifications: Examples may include, but are not limited to, food, shelter, clothing, education, and settlements.
SS.2.A.2.5:	Identify reasons people came to the United States throughout history. Clarifications: Examples may include, but are not limited to, war, hunger, natural disasters, voluntary and involuntary servitude, political or religious freedom, land, and jobs.
SS.2.A.2.6:	Discuss the importance of Ellis Island and the Statue of Liberty to immigration from 1892 - 1954.
SS.2.A.2.7:	Discuss why immigration continues today. Clarifications: Examples may include, but are not limited to, jobs, war, hunger, natural disasters, political or religious freedom, and jobs.
SS.2.A.2.8:	Explain the cultural influences and contributions of immigrants today. Clarifications: Examples may include, but are not limited to, food, language, music, art, beliefs and practices, literature, education, and clothing.
SS.2.A.3.1:	Identify terms and designations of time sequence. Clarifications: Examples may include, but are not limited to, years, decades, centuries.
SS.2.CG.1.1:	Explain why people form governments. <ul style="list-style-type: none"> Students will explain the role of laws in government. Students will define and provide examples of laws at the state and national levels. Students will use scenarios to identify the impact of government on daily life.
SS.2.CG.1.2:	Explain how the U.S. government protects the liberty and rights of American citizens. <ul style="list-style-type: none"> Students will recognize that the equal rights of citizens are protected by the U.S. Constitution.
SS.2.CG.2.1:	Explain what it means to be a U.S. citizen. <ul style="list-style-type: none"> Students will recognize that there are multiple ways to obtain citizenship.
SS.2.CG.2.2:	Describe the characteristics of responsible citizenship at the local and state levels. <ul style="list-style-type: none"> Students will identify characteristics of responsible citizenship (e.g., peaceable assembly, obeying the law, community involvement). Students will identify characteristics of irresponsible citizenship (e.g., disorderly assembly, breaking the law). Students will describe the contributions of the diverse individuals and groups that contribute to civic life in the United States and Florida.
SS.2.CG.2.3:	Explain how citizens demonstrate patriotism. <ul style="list-style-type: none"> Students will explain why reciting the Pledge of Allegiance daily is an act of patriotism. Students will explain the importance of recognizing patriotic holidays or observances (e.g., American Founders Month, Celebrate Freedom Week, Constitution Day, Independence Day, Martin Luther King Jr. Day, Medal of Honor Day, Memorial Day, Patriot Day, Veterans Day).
SS.2.CG.2.4:	Recognize symbols, individuals and documents that represent the United States. <ul style="list-style-type: none"> Students will recognize the U.S. Capitol, the White House, the U.S. Supreme Court building and the Statue of Liberty as symbols that represent the United States. Students will recognize Rosa Parks and Thomas Jefferson as individuals who represent the United States. Students will recognize the Declaration of Independence as a document that represents the United States.
SS.2.CG.2.5:	Recognize symbols, individuals and documents that represent Florida. <ul style="list-style-type: none"> Students will recognize the Florida State Capitol and the Everglades National Park as symbols of Florida. Students will recognize Andrew Jackson and Marjory Stoneman Douglas as individuals who represent Florida. Students will recognize the Florida Constitution as a document that represents Florida.
SS.2.CG.3.1:	Identify the Constitution of the United States as the supreme law of the land. <ul style="list-style-type: none"> Students will recognize that the United States has a written constitution. Students will identify the United States as a constitutional republic.

SS.2.E.1.1:	Recognize that people make choices because of limited resources.
SS.2.E.1.2:	Recognize that people supply goods and services based on consumer demands. Clarifications: Examples are housing and jobs.
SS.2.E.1.3:	Recognize that the United States trades with other nations to exchange goods and services. Clarifications: Examples are clothing, food, toys, cars.
SS.2.E.1.4:	Explain the personal benefits and costs involved in saving and spending.
SS.2.G.1.1:	Use different types of maps (political, physical, and thematic) to identify map elements. Clarifications: Examples are coordinate grids, title, compass rose, cardinal and intermediate directions, key/legend with symbols and scale.
SS.2.G.1.2:	Using maps and globes, locate the student's hometown, Florida, and North America, and locate the state capital and the national capital.
SS.2.G.1.3:	Label on a map or globe the continents, oceans, Equator, Prime Meridian, North and South Pole.
SS.2.G.1.4:	Use a map to locate the countries in North America (Canada, United States, Mexico, and the Caribbean Islands).
MA.K.12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K.12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K.12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K.12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.2.C.2.4:	Explain the ways that rules make the classroom, school, and community safer. Clarifications: Walking not running, waiting your turn, and following traffic laws.

General Course Information and Notes

GENERAL NOTES

Who We Are As Americans: Second grade students will investigate the impact of immigration over time in the United States, explore the geography of North America, and discover the foundations of American citizenship.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. Course Standards

Name	Description
SS.3.A.1.1:	Analyze primary and secondary sources. Clarifications: Examples may include, but are not limited to, artifacts, photographs, paintings, maps, images, documents, audio and video recordings.
SS.3.A.1.2:	Utilize technology resources to gather information from primary and secondary sources.
SS.3.A.1.3:	Define terms related to the social sciences. Clarifications: Examples may include, but are not limited to, history, geography, civics, government, economics.
SS.3.C.1.1:	Explain the purpose and need for government. Clarifications: Examples are safety, organization, services, protection of rights.
SS.3.C.1.2:	Describe how government gains its power from the people.
SS.3.C.1.3:	Explain how government was established through a written Constitution.
SS.3.C.2.1:	Identify group and individual actions of citizens that demonstrate civility, cooperation, volunteerism, and other civic virtues. Clarifications: Examples are food drives, book drives, community, clean-up, voting.
SS.3.C.3.1:	Identify the levels of government (local, state, federal).
SS.3.C.3.2:	Describe how government is organized at the local level. Clarifications: Examples are executive branch - mayor; legislative branch - city commission; judicial branch - county and circuit courts.
SS.3.C.3.3:	Recognize that every state has a state constitution.
SS.3.C.3.4:	Recognize that the Constitution of the United States is the supreme law of the land.
SS.3.E.1.1:	Give examples of how scarcity results in trade. Clarifications: Examples are oil, video games, food.
SS.3.E.1.2:	List the characteristics of money. Clarifications: Examples are portable, divisible, recognizable, durable.
SS.3.E.1.3:	Recognize that buyers and sellers interact to exchange goods and services through the use of trade or money.
SS.3.E.1.4:	Distinguish between currencies used in the United States, Canada, Mexico, and the Caribbean.
SS.3.G.1.1:	Use thematic maps, tables, charts, graphs, and photos to analyze geographic information. Clarifications: Types of photographs may include satellite or aerial.
SS.3.G.1.2:	Review basic map elements (coordinate grid, cardinal and intermediate directions, title, compass rose, scale, key/legend with symbols) .
SS.3.G.1.3:	Label the continents and oceans on a world map.
SS.3.G.1.4:	Name and identify the purpose of maps (physical, political, elevation, population).
SS.3.G.1.5:	Compare maps and globes to develop an understanding of the concept of distortion.
SS.3.G.1.6:	Use maps to identify different types of scale to measure distances between two places. Clarifications: Examples are linear, fractional, word.
SS.3.G.2.1:	Label the countries and commonwealths in North America (Canada, United States, Mexico) and in the Caribbean (Puerto Rico, Cuba, Bahamas, Dominican Republic, Haiti, Jamaica).
SS.3.G.2.2:	Identify the five regions of the United States. Clarifications: (i.e., Northeast, Southeast, Midwest, Southwest, West)
SS.3.G.2.3:	Label the states in each of the five regions of the United States.
SS.3.G.2.4:	Describe the physical features of the United States, Canada, Mexico, and the Caribbean. Clarifications: Examples are lakes, rivers, oceans, mountains, deserts, plains, and grasslands.
SS.3.G.2.5:	Identify natural and man-made landmarks in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g. Grand Canyon, Gateway Arch, Mount Rushmore, Devil's Tower, Mt. Denali, Everglades, Niagara Falls)
SS.3.G.2.6:	Investigate how people perceive places and regions differently by conducting interviews, mental mapping, and studying news, poems, legends, and songs about a region or area.
SS.3.G.3.1:	Describe the climate and vegetation in the United States, Canada, Mexico, and the Caribbean. Clarifications:

	(e.g., tundra, sandy soil, humidity, maritime climate)
SS.3.G.3.2:	Describe the natural resources in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g., water, arable land, oil, phosphate, fish)
SS.3.G.4.1:	Explain how the environment influences settlement patterns in the United States, Canada, Mexico, and the Caribbean. Clarifications: Examples are settlements near water for drinking, bathing, cooking, agriculture and land for farming.
SS.3.G.4.2:	Identify the cultures that have settled the United States, Canada, Mexico, and the Caribbean.
SS.3.G.4.3:	Compare the cultural characteristics of diverse populations in one of the five regions of the United States with Canada, Mexico, or the Caribbean. Clarifications: Examples are housing, music, transportation, food, recreation, language, holidays, beliefs and customs.
SS.3.G.4.4:	Identify contributions from various ethnic groups to the United States. Clarifications: Examples are Native Americans, Hispanics/Latinos, Africans, Asians, Europeans.
LAFS.3.RI.1.1:	Ask and answer questions to demonstrate understanding of a text, referring explicitly to the text as the basis for the answers.
LAFS.3.RI.1.2:	Determine the main idea of a text; recount the key details and explain how they support the main idea.
LAFS.3.RI.1.3:	Describe the relationship between a series of historical events, scientific ideas or concepts, or steps in technical procedures in a text, using language that pertains to time, sequence, and cause/effect.
LAFS.3.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a grade 3 topic or subject area.
LAFS.3.RI.2.5:	Use text features and search tools (e.g., key words, sidebars, hyperlinks) to locate information relevant to a given topic efficiently.
LAFS.3.RI.2.6:	Distinguish their own point of view from that of the author of a text.
LAFS.3.RI.3.7:	Use information gained from illustrations (e.g., maps, photographs) and the words in a text to demonstrate understanding of the text (e.g., where, when, why, and how key events occur).
LAFS.3.RI.3.8:	Describe the logical connection between particular sentences and paragraphs in a text (e.g., comparison, cause/effect, first/second/third in a sequence).
LAFS.3.RI.3.9:	Compare and contrast the most important points and key details presented in two texts on the same topic.
LAFS.3.RI.4.10:	By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the grades 2–3 text complexity band independently and proficiently.
LAFS.3.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 3 <i>topics and texts</i> , building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions (e.g., gaining the floor in respectful ways, listening to others with care, speaking one at a time about the topics and texts under discussion). c. Ask questions to check understanding of information presented, stay on topic, and link their comments to the remarks of others. d. Explain their own ideas and understanding in light of the discussion.
LAFS.3.SL.1.2:	Determine the main ideas and supporting details of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.3.SL.1.3:	Ask and answer questions about information from a speaker, offering appropriate elaboration and detail.
LAFS.3.SL.2.4:	Report on a topic or text, tell a story, or recount an experience with appropriate facts and relevant, descriptive details, speaking clearly at an understandable pace.
LAFS.3.W.1.1:	Write opinion pieces on topics or texts, supporting a point of view with reasons. a. Introduce the topic or text they are writing about, state an opinion, and create an organizational structure that lists reasons. b. Provide reasons that support the opinion. c. Use linking words and phrases (e.g., because, therefore, since, for example) to connect opinion and reasons. d. Provide a concluding statement or section.
LAFS.3.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas and information clearly. a. Introduce a topic and group related information together; include illustrations when useful to aiding comprehension. b. Develop the topic with facts, definitions, and details. c. Use linking words and phrases (e.g., also, another, and, more, but) to connect ideas within categories of information. d. Provide a concluding statement or section.
LAFS.3.W.1.3:	Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences. a. Establish a situation and introduce a narrator and/or characters; organize an event sequence that unfolds naturally. b. Use dialogue and descriptions of actions, thoughts, and feelings to develop experiences and events or show the response of characters to situations. c. Use temporal words and phrases to signal event order. d. Provide a sense of closure.
LAFS.3.W.2.4:	With guidance and support from adults, produce writing in which the development and organization are appropriate to task and purpose. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.3.W.2.5:	With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing.
LAFS.3.W.2.6:	With guidance and support from adults, use technology to produce and publish writing (using keyboarding skills) as well as to interact and collaborate with others.
LAFS.3.W.3.7:	Conduct short research projects that build knowledge about a topic.
LAFS.3.W.3.8:	Recall information from experiences or gather information from print and digital sources; take brief notes on sources and sort evidence into provided categories.
LAFS.3.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

MAFS.3.MD.2.3:	<p>Draw a scaled picture graph and a scaled bar graph to represent a data set with several categories. Solve one- and two-step “how many more” and “how many less” problems using information presented in scaled bar graphs. <i>For example, draw a bar graph in which each square in the bar graph might represent 5 pets.</i></p> <p>Standard Relation to Course: Supporting</p>
MAFS.3.MD.2.4:	<p>Generate measurement data by measuring lengths using rulers marked with halves and fourths of an inch. Show the data by making a line plot, where the horizontal scale is marked off in appropriate units— whole numbers, halves, or quarters.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.3.C.2.4:	<p>Identify classroom and school rules that promote health and disease prevention.</p> <p>Clarifications: Following rules for walking in hallways, keeping areas clean, listening to crossing guard, and bike safety.</p>

General Course Information and Notes

GENERAL NOTES

Third Grade: The United States Regions and Its Neighbors - The third grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Third grade students will learn about North America and the Caribbean. They will focus on the regions of the United States, Canada, Mexico, and the Caribbean Islands. Their study will include physical and cultural characteristics as they learn about our country and its neighbors.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Social Studies Grade 3 (#5021050) 2022 - 2023

Course Standards

Name	Description
SS.3.A.1.1:	Analyze primary and secondary sources. Clarifications: Examples may include, but are not limited to, artifacts, photographs, paintings, maps, images, documents, audio and video recordings.
SS.3.A.1.2:	Utilize technology resources to gather information from primary and secondary sources.
SS.3.A.1.3:	Define terms related to the social sciences. Clarifications: Examples may include, but are not limited to, history, geography, civics, government, economics.
SS.3.C.1.1:	Explain the purpose and need for government. Clarifications: Examples are safety, organization, services, protection of rights.
SS.3.C.1.2:	Describe how government gains its power from the people.
SS.3.C.1.3:	Explain how government was established through a written Constitution.
SS.3.C.2.1:	Identify group and individual actions of citizens that demonstrate civility, cooperation, volunteerism, and other civic virtues. Clarifications: Examples are food drives, book drives, community, clean-up, voting.
SS.3.C.3.1:	Identify the levels of government (local, state, federal).
SS.3.C.3.2:	Describe how government is organized at the local level. Clarifications: Examples are executive branch - mayor; legislative branch - city commission; judicial branch - county and circuit courts.
SS.3.C.3.3:	Recognize that every state has a state constitution.
SS.3.C.3.4:	Recognize that the Constitution of the United States is the supreme law of the land.
SS.3.E.1.1:	Give examples of how scarcity results in trade. Clarifications: Examples are oil, video games, food.
SS.3.E.1.2:	List the characteristics of money. Clarifications: Examples are portable, divisible, recognizable, durable.
SS.3.E.1.3:	Recognize that buyers and sellers interact to exchange goods and services through the use of trade or money.
SS.3.E.1.4:	Distinguish between currencies used in the United States, Canada, Mexico, and the Caribbean.
SS.3.G.1.1:	Use thematic maps, tables, charts, graphs, and photos to analyze geographic information. Clarifications: Types of photographs may include satellite or aerial.
SS.3.G.1.2:	Review basic map elements (coordinate grid, cardinal and intermediate directions, title, compass rose, scale, key/legend with symbols) .
SS.3.G.1.3:	Label the continents and oceans on a world map.
SS.3.G.1.4:	Name and identify the purpose of maps (physical, political, elevation, population).
SS.3.G.1.5:	Compare maps and globes to develop an understanding of the concept of distortion.
SS.3.G.1.6:	Use maps to identify different types of scale to measure distances between two places. Clarifications: Examples are linear, fractional, word.
SS.3.G.2.1:	Label the countries and commonwealths in North America (Canada, United States, Mexico) and in the Caribbean (Puerto Rico, Cuba, Bahamas, Dominican Republic, Haiti, Jamaica).
SS.3.G.2.2:	Identify the five regions of the United States. Clarifications: (i.e., Northeast, Southeast, Midwest, Southwest, West)
SS.3.G.2.3:	Label the states in each of the five regions of the United States.
SS.3.G.2.4:	Describe the physical features of the United States, Canada, Mexico, and the Caribbean. Clarifications: Examples are lakes, rivers, oceans, mountains, deserts, plains, and grasslands.
SS.3.G.2.5:	Identify natural and man-made landmarks in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g. Grand Canyon, Gateway Arch, Mount Rushmore, Devil's Tower, Mt. Denali, Everglades, Niagara Falls)
SS.3.G.2.6:	Investigate how people perceive places and regions differently by conducting interviews, mental mapping, and studying news, poems, legends, and songs about a region or area.
SS.3.G.3.1:	Describe the climate and vegetation in the United States, Canada, Mexico, and the Caribbean. Clarifications:

	(e.g., tundra, sandy soil, humidity, maritime climate)
SS.3.G.3.2:	Describe the natural resources in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g., water, arable land, oil, phosphate, fish)
SS.3.G.4.1:	Explain how the environment influences settlement patterns in the United States, Canada, Mexico, and the Caribbean. Clarifications: Examples are settlements near water for drinking, bathing, cooking, agriculture and land for farming.
SS.3.G.4.2:	Identify the cultures that have settled the United States, Canada, Mexico, and the Caribbean.
SS.3.G.4.3:	Compare the cultural characteristics of diverse populations in one of the five regions of the United States with Canada, Mexico, or the Caribbean. Clarifications: Examples are housing, music, transportation, food, recreation, language, holidays, beliefs and customs.
SS.3.G.4.4:	Identify contributions from various ethnic groups to the United States. Clarifications: Examples are Native Americans, Hispanics/Latinos, Africans, Asians, Europeans.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills.

	Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.3.C.2.4:	Identify classroom and school rules that promote health and disease prevention. Clarifications: Following rules for walking in hallways, keeping areas clean, listening to crossing guard, and bike safety.

General Course Information and Notes

GENERAL NOTES

Third Grade: The United States Regions and Its Neighbors - The third grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Third grade students will learn about North America and the Caribbean. They will focus on the regions of the United States, Canada, Mexico, and the Caribbean Islands. Their study will include physical and cultural characteristics as they learn about our country and its neighbors.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.3.A.1.1:	Analyze primary and secondary sources. Clarifications: Examples may include, but are not limited to, artifacts, photographs, paintings, maps, images, documents, audio and video recordings.
SS.3.A.1.2:	Utilize technology resources to gather information from primary and secondary sources.
SS.3.A.1.3:	Define terms related to the social sciences. Clarifications: Examples may include, but are not limited to, history, geography, civics, government, economics.
SS.3.CG.1.1:	Explain how the U.S. Constitution establishes the purpose and fulfills the need for government. <ul style="list-style-type: none"> Students will explain the purpose of and need for government in terms of protection of rights, organization, security and services.
SS.3.CG.1.2:	Describe how the U.S. government gains its power from the people. <ul style="list-style-type: none"> Students will recognize what is meant by "We the People" and "consent of the governed." Students will identify sources of consent (e.g., voting and elections). Students will recognize that the U.S. republic is governed by the "consent of the governed" and government power is exercised through representatives of the people.
SS.3.CG.2.1:	Describe how citizens demonstrate civility, cooperation, volunteerism and other civic virtues. <ul style="list-style-type: none"> Students will identify examples including, but not limited to, food drives, book drives, community clean-ups, voting, blood donation drives, volunteer fire departments and neighborhood watch programs.
SS.3.CG.2.2:	Describe the importance of voting in elections. <ul style="list-style-type: none"> Students will recognize that it is every citizen's responsibility to vote. Students will explain the importance of voting in a republic.
SS.3.CG.2.3:	Explain the history and meaning behind patriotic holidays and observances. <ul style="list-style-type: none"> Students will identify patriotic holidays and observances to include, but not limited to, American Founders Month, Celebrate Freedom Week, Constitution Day, Independence Day, Martin Luther King Jr. Day, Medal of Honor Day, Memorial Day, Patriot Day, Veterans Day.
SS.3.CG.2.4:	Recognize symbols, individuals, documents and events that represent the United States. <ul style="list-style-type: none"> Students will recognize Mount Rushmore, Uncle Sam and the Washington Monument as symbols that represent the United States. Students will recognize James Madison, Alexander Hamilton, Booker T. Washington and Susan B. Anthony as individuals who represent the United States. Students will recognize the U.S. Constitution as a document that represents the United States. Students will recognize the Constitutional Convention (May 1787 – September 1787) and the signing of the U.S. Constitution (September 17, 1787) as events that represent the United States.
SS.3.CG.2.5:	Recognize symbols, individuals, documents and events that represent the State of Florida. <ul style="list-style-type: none"> Students will recognize the Great Seal of the State of Florida as a symbol that represents the state. Students will recognize William Pope Duval, William Dunn Moseley and Josiah T. Walls as individuals who represent Florida. Students will identify the Declaration of Rights in the Florida Constitution as a document that represents Florida. Students will recognize that Florida became the 27th state of the United States on March 3, 1845.
SS.3.CG.3.1:	Explain how the U.S. and Florida Constitutions establish the structure, function, powers and limits of government. <ul style="list-style-type: none"> Students will recognize that the U.S. Constitution and the Florida Constitution establish the framework for national and state government. Students will recognize how government is organized at the national level (e.g., three branches of government). Students will provide examples of people who make and enforce rules and laws in the United States (e.g., congress and president) and Florida (e.g., state legislature and governor).
SS.3.CG.3.2:	Recognize that government has local, state and national levels. <ul style="list-style-type: none"> Students will recognize that each level of government has its own unique structure and responsibilities. Students will distinguish between the responsibilities of the local, state and national governments in the United States.
SS.3.E.1.1:	Give examples of how scarcity results in trade. Clarifications: Examples are oil, video games, food.
SS.3.E.1.2:	List the characteristics of money. Clarifications: Examples are portable, divisible, recognizable, durable.
SS.3.E.1.3:	Recognize that buyers and sellers interact to exchange goods and services through the use of trade or money.
SS.3.E.1.4:	Distinguish between currencies used in the United States, Canada, Mexico, and the Caribbean.
SS.3.G.1.1:	Use thematic maps, tables, charts, graphs, and photos to analyze geographic information. Clarifications: Types of photographs may include satellite or aerial.
SS.3.G.1.2:	Review basic map elements (coordinate grid, cardinal and intermediate directions, title, compass rose, scale, key/legend with symbols) .
SS.3.G.1.3:	Label the continents and oceans on a world map.
SS.3.G.1.4:	Name and identify the purpose of maps (physical, political, elevation, population).
SS.3.G.1.5:	Compare maps and globes to develop an understanding of the concept of distortion.

SS.3.G.1.6:	Use maps to identify different types of scale to measure distances between two places. Clarifications: Examples are linear, fractional, word.
SS.3.G.2.1:	Label the countries and commonwealths in North America (Canada, United States, Mexico) and in the Caribbean (Puerto Rico, Cuba, Bahamas, Dominican Republic, Haiti, Jamaica).
SS.3.G.2.2:	Identify the five regions of the United States. Clarifications: (i.e., Northeast, Southeast, Midwest, Southwest, West)
SS.3.G.2.3:	Label the states in each of the five regions of the United States.
SS.3.G.2.4:	Describe the physical features of the United States, Canada, Mexico, and the Caribbean. Clarifications: Examples are lakes, rivers, oceans, mountains, deserts, plains, and grasslands.
SS.3.G.2.5:	Identify natural and man-made landmarks in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g. Grand Canyon, Gateway Arch, Mount Rushmore, Devil's Tower, Mt. Denali, Everglades, Niagara Falls)
SS.3.G.2.6:	Investigate how people perceive places and regions differently by conducting interviews, mental mapping, and studying news, poems, legends, and songs about a region or area.
SS.3.G.3.1:	Describe the climate and vegetation in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g., tundra, sandy soil, humidity, maritime climate)
SS.3.G.3.2:	Describe the natural resources in the United States, Canada, Mexico, and the Caribbean. Clarifications: (e.g., water, arable land, oil, phosphate, fish)
SS.3.G.4.1:	Explain how the environment influences settlement patterns in the United States, Canada, Mexico, and the Caribbean. Clarifications: Examples are settlements near water for drinking, bathing, cooking, agriculture and land for farming.
SS.3.G.4.2:	Identify the cultures that have settled the United States, Canada, Mexico, and the Caribbean.
SS.3.G.4.3:	Compare the cultural characteristics of diverse populations in one of the five regions of the United States with Canada, Mexico, or the Caribbean. Clarifications: Examples are housing, music, transportation, food, recreation, language, holidays, beliefs and customs.
SS.3.G.4.4:	Identify contributions from various ethnic groups to the United States. Clarifications: Examples are Native Americans, Hispanics/Latinos, Africans, Asians, Europeans.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence.

MA.K12.MTR.3.1:

- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K.12.EE.1.1:	4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.3.C.2.4:	Identify classroom and school rules that promote health and disease prevention. Clarifications: Following rules for walking in hallways, keeping areas clean, listening to crossing guard, and bike safety.

General Course Information and Notes

GENERAL NOTES

Third Grade: The United States Regions and Its Neighbors - The third grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Third grade students will learn about North America and the Caribbean. They will focus on the regions of the United States, Canada, Mexico, and the Caribbean Islands. Their study will include physical and cultural characteristics as they learn about our country and its neighbors.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support,

students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 5021050

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades PreK to 5 Education
Courses > **Subject:** Social Studies > **SubSubject:**
General >

Abbreviated Title: SOC STUDIES 3

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Status: Draft - Course Pending Approval

Grade Level(s): 3

Educator Certifications

Elementary Education (Elementary Grades 1-6)

Social Studies (Elementary Grades 1-6)

Primary Education (K-3)

Prekindergarten/Primary Education (Age 3 through Grade 3)

Elementary Education (Grades K-6)

Social Studies Grade 4 (#5021060) 2015 - 2022 (current)

Course Standards

Name	Description
SS.4.A.1.1:	Analyze primary and secondary resources to identify significant individuals and events throughout Florida history. Clarifications: Examples may include, but are not limited to, photographs, paintings, maps, artifacts, timelines, audio and video, letters and diaries, periodicals, newspaper articles, etc.
SS.4.A.1.2:	Synthesize information related to Florida history through print and electronic media. Clarifications: Examples may include, but are not limited to, encyclopedias, atlases, newspapers, websites, databases, audio, video, etc.
SS.4.A.2.1:	Compare Native American tribes in Florida. Clarifications: Examples may include, but are not limited to, Apalachee, Calusa, Tequesta, Timucua, Tocobaga.
SS.4.A.3.1:	Identify explorers who came to Florida and the motivations for their expeditions. Clarifications: Examples may include, but are not limited to, Ponce de Leon, Juan Garrido, Esteban Dorantes, Tristan deLuna, and an understanding that 2013 is the quincentennial of the founding of Florida.
SS.4.A.3.2:	Describe causes and effects of European colonization on the Native American tribes of Florida. Clarifications: Examples may include, but are not limited to, protection of ships, search for gold, glory of the mother country, disease, death, and spread of religion.
SS.4.A.3.3:	Identify the significance of St. Augustine as the oldest permanent European settlement in the United States. Clarifications: Examples may include, but are not limited to, the 450th anniversary of the founding of St. Augustine in 2015 as the first continuous town in the United States, predating other colonial settlements.
SS.4.A.3.4:	Explain the purpose of and daily life on missions (San Luis de Talimali in present-day Tallahassee).
SS.4.A.3.5:	Identify the significance of Fort Mose as the first free African community in the United States. Clarifications: Examples may include, but are not limited to, the differences between Spanish and English treatment of enslavement.
SS.4.A.3.6:	Identify the effects of Spanish rule in Florida. Clarifications: Examples may include, but are not limited to, names of cities such as Pensacola, etc., agriculture, weapons, architecture, art, music, and food.
SS.4.A.3.7:	Identify nations (Spain, France, England) that controlled Florida before it became a United States territory.
SS.4.A.3.8:	Explain how the Seminole tribe formed and the purpose for their migration.
SS.4.A.3.9:	Explain how Florida (Adams-Onis Treaty) became a U.S. territory.
SS.4.A.3.10:	Identify the causes and effects of the Seminole Wars. Clarifications: Examples may include, but are not limited to, Jackson's invasion of Florida (First Seminole War), without federal permission.
SS.4.A.4.1:	Explain the effects of technological advances on Florida. Clarifications: Examples may include, but are not limited to, steam engine, steamboats, delivery of water to some areas of the state.
SS.4.A.4.2:	Describe pioneer life in Florida. Clarifications: Examples may include, but are not limited to, the role of men, women, children, Florida Crackers, Black Seminoles.
SS.4.A.5.1:	Describe Florida's involvement (secession, blockades of ports, the battles of Ft. Pickens, Olustee, Ft. Brooke, Natural Bridge, food supply) in the Civil War. Clarifications: Additional examples may also include, but are not limited to, Ft. Zachary Taylor, the plantation culture, the First Florida Cavalry.
SS.4.A.5.2:	Summarize challenges Floridians faced during Reconstruction. Clarifications: Examples may include, but are not limited to, sharecropping, segregation, and black participation in state and federal governments.
SS.4.A.6.1:	Describe the economic development of Florida's major industries. Clarifications: Examples of industries may include, but are not limited to, timber, citrus, cattle, tourism, phosphate, cigar, railroads, bridges, air conditioning, sponge, shrimping, and wrecking (pirating).
	Summarize contributions immigrant groups made to Florida.

SS.4.A.6.2:	Clarifications: Examples may include, but are not limited to, language, food, art, beliefs and practices, literature, education, and clothing.
	Describe the contributions of significant individuals to Florida.
SS.4.A.6.3:	Clarifications: Examples may include, but are not limited to, John Gorrie, Henry Flagler, Henry Plant, Lue Gim Gong, Vicente Martinez Ybor, Julia Tuttle, Mary McLeod Bethune, Thomas Alva Edison, James Weldon Johnson, Marjorie Kinnan Rawlings.
	Describe effects of the Spanish American War on Florida.
SS.4.A.6.4:	Clarifications: Examples may include, but are not limited to, cigar industry, temporary economic boom at Ft. Brooke due to Rough Riders, Cuban immigration.
	Describe the causes and effects of the 1920's Florida land boom and bust.
SS.4.A.7.1:	Clarifications: Examples may include, but are not limited to, land speculation.
	Summarize challenges Floridians faced during the Great Depression.
SS.4.A.7.2:	Clarifications: Examples may include, but are not limited to, the Labor Day hurricane of 1935 and the Mediterranean fruit fly.
	Identify Florida's role in World War II.
SS.4.A.7.3:	Clarifications: Examples may include, but are not limited to, warfare near Florida's shores and training bases in Florida (Miami, Tampa, Tallahassee, etc.), spying near the coast, Mosquito Fleet.
	Identify Florida's role in the Civil Rights Movement.
SS.4.A.8.1:	Clarifications: Examples may include, but are not limited to, Tallahassee Bus Boycotts, civil disobedience, and the legacy of early civil rights pioneers, Harry T. and Harriette V. Moore.
SS.4.A.8.2:	Describe how and why immigration impacts Florida today.
SS.4.A.8.3:	Describe the effect of the United States space program on Florida's economy and growth.
SS.4.A.8.4:	Explain how tourism affects Florida's economy and growth.
SS.4.A.9.1:	Utilize timelines to sequence key events in Florida history.
SS.4.C.1.1:	Describe how Florida's constitution protects the rights of citizens and provides for the structure, function, and purposes of state government.
	Discuss public issues in Florida that impact the daily lives of its citizens.
SS.4.C.2.1:	Clarifications: (e.g., taxes, school accountability)
	Identify ways citizens work together to influence government and help solve community and state problems.
SS.4.C.2.2:	Clarifications: Examples are voting, petitioning, conservation, recycling.
SS.4.C.2.3:	Explain the importance of public service, voting, and volunteerism.
SS.4.C.3.1:	Identify the three branches (Legislative, Judicial, Executive) of government in Florida and the powers of each.
SS.4.C.3.2:	Distinguish between state (governor, state representative, or senator) and local government (mayor, city commissioner).
	Identify entrepreneurs from various social and ethnic backgrounds who have influenced Florida and local economy.
SS.4.E.1.1:	Clarifications: Examples are Henry Flagler, Walt Disney, Ed Ball, Alfred Dupont, Julia Tuttle, Vicente Martinez Ybor.
	Explain Florida's role in the national and international economy and conditions that attract businesses to the state.
SS.4.E.1.2:	Clarifications: Examples are tourism, agriculture, phosphate, space industry.
	Identify physical features of Florida.
SS.4.G.1.1:	Clarifications: Examples are bodies of water, location, landforms.
	Locate and label cultural features on a Florida map.
SS.4.G.1.2:	Clarifications: Examples are state capitals, major cities, tourist attractions.
	Explain how weather impacts Florida.
SS.4.G.1.3:	Clarifications: Examples are hurricanes, thunderstorms, drought, mild climate.
SS.4.G.1.4:	Interpret political and physical maps using map elements (title, compass rose, cardinal directions, intermediate directions, symbols, legend, scale, longitude, latitude).
LAFS.4.RI.1.1:	Refer to details and examples in a text when explaining what the text says explicitly and when drawing inferences from the text.
LAFS.4.RI.1.2:	Determine the main idea of a text and explain how it is supported by key details; summarize the text.
LAFS.4.RI.1.3:	Explain events, procedures, ideas, or concepts in a historical, scientific, or technical text, including what happened and why, based on specific information in the text.
LAFS.4.RI.2.4:	Determine the meaning of general academic and domain-specific words or phrases in a text relevant to a <i>grade 4 topic or subject area</i> .
LAFS.4.RI.2.5:	Describe the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in a text or part of a text.
LAFS.4.RI.2.6:	Compare and contrast a firsthand and secondhand account of the same event or topic; describe the differences in focus and the information provided.
LAFS.4.RI.3.7:	Interpret information presented visually, orally, or quantitatively (e.g., in charts, graphs, diagrams, time lines, animations, or interactive elements on Web pages) and explain how the information contributes to an understanding of the text in which it appears.

LAFS.4.RI.3.8:	Explain how an author uses reasons and evidence to support particular points in a text.
LAFS.4.RI.3.9:	Integrate information from two texts on the same topic in order to write or speak about the subject knowledgeably.
LAFS.4.RI.4.10:	By the end of year, read and comprehend informational texts, including history/social studies, science, and technical texts, in the grades 4–5 text complexity band proficiently, with scaffolding as needed at the high end of the range.
LAFS.4.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 4 <i>topics and texts</i> , building on others’ ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about the topic to explore ideas under discussion. b. Follow agreed-upon rules for discussions and carry out assigned roles. c. Pose and respond to specific questions to clarify or follow up on information, and make comments that contribute to the discussion and link to the remarks of others. d. Review the key ideas expressed and explain their own ideas and understanding in light of the discussion.
LAFS.4.SL.1.2:	Paraphrase portions of a text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.4.SL.1.3:	Identify the reasons and evidence a speaker provides to support particular points.
LAFS.4.SL.2.4:	Report on a topic or text, tell a story, or recount an experience in an organized manner, using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.
LAFS.4.W.1.1:	Write opinion pieces on topics or texts, supporting a point of view with reasons and information. <ul style="list-style-type: none"> a. Introduce a topic or text clearly, state an opinion, and create an organizational structure in which related ideas are grouped to support the writer’s purpose. b. Provide reasons that are supported by facts and details. c. Link opinion and reasons using words and phrases (e.g., <i>for instance, in order to, in addition</i>). d. Provide a concluding statement or section related to the opinion presented.
LAFS.4.W.1.2:	Write informative/explanatory texts to examine a topic and convey ideas and information clearly. <ul style="list-style-type: none"> a. Introduce a topic clearly and group related information in paragraphs and sections; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension. b. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic. c. Link ideas within categories of information using words and phrases (e.g., <i>another, for example, also, because</i>). d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Provide a concluding statement or section related to the information or explanation presented.
LAFS.4.W.1.3:	Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences. <ul style="list-style-type: none"> a. Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. b. Use dialogue and description to develop experiences and events or show the responses of characters to situations. c. Use a variety of transitional words and phrases to manage the sequence of events. d. Use concrete words and phrases and sensory details to convey experiences and events precisely. e. Provide a conclusion that follows from the narrated experiences or events.
LAFS.4.W.2.4:	Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.4.W.2.5:	With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, and editing.
LAFS.4.W.2.6:	With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of one page in a single sitting.
LAFS.4.W.3.7:	Conduct short research projects that build knowledge through investigation of different aspects of a topic.
LAFS.4.W.3.8:	Recall relevant information from experiences or gather relevant information from print and digital sources; take notes and categorize information, and provide a list of sources.
LAFS.4.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. <ul style="list-style-type: none"> a. Apply grade 4 Reading standards to literature (e.g., “Describe in depth a character, setting, or event in a story or drama, drawing on specific details in the text [e.g., a character’s thoughts, words, or actions].”). b. Apply grade 4 Reading standards to informational texts (e.g., “Explain how an author uses reasons and evidence to support particular points in a text”).
LAFS.4.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.4.MD.2.4:	Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Solve problems involving addition and subtraction of fractions by using information presented in line plots. <i>For example, from a line plot find and interpret the difference in length between the longest and shortest specimens in an insect collection.</i> Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches. Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze

MAFS.K12.MP.3.1:	situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.	
	Use appropriate tools strategically.	
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.	
	Attend to precision.	
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.	
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.	
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.	
	Recognize types of school rules and community laws that promote health and disease prevention.	
HE.4.C.2.4:	<table border="1"> <tr> <td> Clarifications: Helmet law, clean indoor-air laws, and speed limits. </td> </tr> </table>	Clarifications: Helmet law, clean indoor-air laws, and speed limits.
Clarifications: Helmet law, clean indoor-air laws, and speed limits.		

General Course Information and Notes

GENERAL NOTES

Fourth Grade: Florida Studies - The fourth grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Fourth grade students will learn about Florida history focusing on exploration and colonization, growth, and the 20th Century and beyond. Students will study the important people, places, and events that helped shape Florida history.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be contained in the NAEP Grade 4 Civics assessment includes:

- Definition of government
- American identity
- Costs, benefits of unity/diversity
- Contacting public officials, agencies
- The concept of nation
- Interaction among nations in the areas of trade, diplomacy, cultural context, treaties and agreements, and military force
- Importance of peaceful resolution of international conflicts
- Healthy functioning of American constitutional democracy
- Criteria for selecting leaders

The NAEP frameworks for Civics may be accessed at

<http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Additional content that may be contained in the NAEP Grade 4 Geography assessment includes:

- spatial units, features, and patterns
- the earth's environment, its limited capacity, human effect on it
- relationships between and among places, changes in technology affecting connections among people and places
- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at

<http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Additional content that may be contained in the NAEP Grade 4 United States History assessment includes:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas

- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at

<http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.4.A.1.1:	Analyze primary and secondary resources to identify significant individuals and events throughout Florida history. Clarifications: Examples may include, but are not limited to, photographs, paintings, maps, artifacts, timelines, audio and video, letters and diaries, periodicals, newspaper articles, etc.
SS.4.A.1.2:	Synthesize information related to Florida history through print and electronic media. Clarifications: Examples may include, but are not limited to, encyclopedias, atlases, newspapers, websites, databases, audio, video, etc.
SS.4.A.2.1:	Compare Native American tribes in Florida. Clarifications: Examples may include, but are not limited to, Apalachee, Calusa, Tequesta, Timucua, Tocobaga.
SS.4.A.3.1:	Identify explorers who came to Florida and the motivations for their expeditions. Clarifications: Examples may include, but are not limited to, Ponce de Leon, Juan Garrido, Esteban Dorantes, Tristan deLuna, and an understanding that 2013 is the quincentennial of the founding of Florida.
SS.4.A.3.2:	Describe causes and effects of European colonization on the Native American tribes of Florida. Clarifications: Examples may include, but are not limited to, protection of ships, search for gold, glory of the mother country, disease, death, and spread of religion.
SS.4.A.3.3:	Identify the significance of St. Augustine as the oldest permanent European settlement in the United States. Clarifications: Examples may include, but are not limited to, the 450th anniversary of the founding of St. Augustine in 2015 as the first continuous town in the United States, predating other colonial settlements.
SS.4.A.3.4:	Explain the purpose of and daily life on missions (San Luis de Talimali in present-day Tallahassee).
SS.4.A.3.5:	Identify the significance of Fort Mose as the first free African community in the United States. Clarifications: Examples may include, but are not limited to, the differences between Spanish and English treatment of enslavement.
SS.4.A.3.6:	Identify the effects of Spanish rule in Florida. Clarifications: Examples may include, but are not limited to, names of cities such as Pensacola, etc., agriculture, weapons, architecture, art, music, and food.
SS.4.A.3.7:	Identify nations (Spain, France, England) that controlled Florida before it became a United States territory.
SS.4.A.3.8:	Explain how the Seminole tribe formed and the purpose for their migration.
SS.4.A.3.9:	Explain how Florida (Adams-Onis Treaty) became a U.S. territory.
SS.4.A.3.10:	Identify the causes and effects of the Seminole Wars. Clarifications: Examples may include, but are not limited to, Jackson's invasion of Florida (First Seminole War), without federal permission.
SS.4.A.4.1:	Explain the effects of technological advances on Florida. Clarifications: Examples may include, but are not limited to, steam engine, steamboats, delivery of water to some areas of the state.
SS.4.A.4.2:	Describe pioneer life in Florida. Clarifications: Examples may include, but are not limited to, the role of men, women, children, Florida Crackers, Black Seminoles.
SS.4.A.5.1:	Describe Florida's involvement (secession, blockades of ports, the battles of Ft. Pickens, Olustee, Ft. Brooke, Natural Bridge, food supply) in the Civil War. Clarifications: Additional examples may also include, but are not limited to, Ft. Zachary Taylor, the plantation culture, the First Florida Cavalry.
SS.4.A.5.2:	Summarize challenges Floridians faced during Reconstruction. Clarifications: Examples may include, but are not limited to, sharecropping, segregation, and black participation in state and federal governments.
SS.4.A.6.1:	Describe the economic development of Florida's major industries. Clarifications: Examples of industries may include, but are not limited to, timber, citrus, cattle, tourism, phosphate, cigar, railroads, bridges, air conditioning, sponge, shrimping, and wrecking (pirating).
	Summarize contributions immigrant groups made to Florida.

SS.4.A.6.2:	<p>Clarifications: Examples may include, but are not limited to, language, food, art, beliefs and practices, literature, education, and clothing.</p>
SS.4.A.6.3:	<p>Describe the contributions of significant individuals to Florida.</p> <p>Clarifications: Examples may include, but are not limited to, John Gorrie, Henry Flagler, Henry Plant, Lue Gim Gong, Vincente Martinez Ybor, Julia Tuttle, Mary McLeod Bethune, Thomas Alva Edison, James Weldon Johnson, Marjorie Kinnan Rawlings.</p>
SS.4.A.6.4:	<p>Describe effects of the Spanish American War on Florida.</p> <p>Clarifications: Examples may include, but are not limited to, cigar industry, temporary economic boom at Ft. Brooke due to Rough Riders, Cuban immigration.</p>
SS.4.A.7.1:	<p>Describe the causes and effects of the 1920's Florida land boom and bust.</p> <p>Clarifications: Examples may include, but are not limited to, land speculation.</p>
SS.4.A.7.2:	<p>Summarize challenges Floridians faced during the Great Depression.</p> <p>Clarifications: Examples may include, but are not limited to, the Labor Day hurricane of 1935 and the Mediterranean fruit fly.</p>
SS.4.A.7.3:	<p>Identify Florida's role in World War II.</p> <p>Clarifications: Examples may include, but are not limited to, warfare near Florida's shores and training bases in Florida (Miami, Tampa, Tallahassee, etc.), spying near the coast, Mosquito Fleet.</p>
SS.4.A.8.1:	<p>Identify Florida's role in the Civil Rights Movement.</p> <p>Clarifications: Examples may include, but are not limited to, Tallahassee Bus Boycotts, civil disobedience, and the legacy of early civil rights pioneers, Harry T. and Harriette V. Moore.</p>
SS.4.A.8.2:	Describe how and why immigration impacts Florida today.
SS.4.A.8.3:	Describe the effect of the United States space program on Florida's economy and growth.
SS.4.A.8.4:	Explain how tourism affects Florida's economy and growth.
SS.4.A.9.1:	Utilize timelines to sequence key events in Florida history.
SS.4.C.1.1:	Describe how Florida's constitution protects the rights of citizens and provides for the structure, function, and purposes of state government.
SS.4.C.2.1:	<p>Discuss public issues in Florida that impact the daily lives of its citizens.</p> <p>Clarifications: (e.g., taxes, school accountability)</p>
SS.4.C.2.2:	<p>Identify ways citizens work together to influence government and help solve community and state problems.</p> <p>Clarifications: Examples are voting, petitioning, conservation, recycling.</p>
SS.4.C.2.3:	Explain the importance of public service, voting, and volunteerism.
SS.4.C.3.1:	Identify the three branches (Legislative, Judicial, Executive) of government in Florida and the powers of each.
SS.4.C.3.2:	Distinguish between state (governor, state representative, or senator) and local government (mayor, city commissioner).
SS.4.E.1.1:	<p>Identify entrepreneurs from various social and ethnic backgrounds who have influenced Florida and local economy.</p> <p>Clarifications: Examples are Henry Flagler, Walt Disney, Ed Ball, Alfred Dupont, Julia Tuttle, Vincente Martinez Ybor.</p>
SS.4.E.1.2:	<p>Explain Florida's role in the national and international economy and conditions that attract businesses to the state.</p> <p>Clarifications: Examples are tourism, agriculture, phosphate, space industry.</p>
SS.4.G.1.1:	<p>Identify physical features of Florida.</p> <p>Clarifications: Examples are bodies of water, location, landforms.</p>
SS.4.G.1.2:	<p>Locate and label cultural features on a Florida map.</p> <p>Clarifications: Examples are state capitals, major cities, tourist attractions.</p>
SS.4.G.1.3:	<p>Explain how weather impacts Florida.</p> <p>Clarifications: Examples are hurricanes, thunderstorms, drought, mild climate.</p>
SS.4.G.1.4:	Interpret political and physical maps using map elements (title, compass rose, cardinal directions, intermediate directions, symbols, legend, scale, longitude, latitude).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	<ul style="list-style-type: none"> • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.4.C.2.4:	<p>Recognize types of school rules and community laws that promote health and disease prevention.</p> <p>Clarifications: Helmet law, clean indoor-air laws, and speed limits.</p>

General Course Information and Notes

GENERAL NOTES

Fourth Grade: Florida Studies - The fourth grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Fourth grade students will learn about Florida history focusing on exploration and colonization, growth, and the 20th Century and beyond. Students will study the

important people, places, and events that helped shape Florida history.

Special Notes:

Additional content that may be contained in the NAEP Grade 4 Civics assessment includes:

- Definition of government
- American identity
- Costs, benefits of unity/diversity
- Contacting public officials, agencies
- The concept of nation
- Interaction among nations in the areas of trade, diplomacy, cultural context, treaties and agreements, and military force
- Importance of peaceful resolution of international conflicts
- Healthy functioning of American constitutional democracy
- Criteria for selecting leaders

The NAEP frameworks for Civics may be accessed at

<http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Additional content that may be contained in the NAEP Grade 4 Geography assessment includes:

- spatial units, features, and patterns
- the earth's environment, its limited capacity, human effect on it
- relationships between and among places, changes in technology affecting connections among people and places
- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at

<http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Additional content that may be contained in the NAEP Grade 4 United States History assessment includes:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at

<http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.4.A.1.1:	Analyze primary and secondary resources to identify significant individuals and events throughout Florida history. Clarifications: Examples may include, but are not limited to, photographs, paintings, maps, artifacts, timelines, audio and video, letters and diaries, periodicals, newspaper articles, etc.
SS.4.A.1.2:	Synthesize information related to Florida history through print and electronic media. Clarifications: Examples may include, but are not limited to, encyclopedias, atlases, newspapers, websites, databases, audio, video, etc.
SS.4.A.2.1:	Compare Native American tribes in Florida. Clarifications: Examples may include, but are not limited to, Apalachee, Calusa, Tequesta, Timucua, Tocobaga.
SS.4.A.3.1:	Identify explorers who came to Florida and the motivations for their expeditions. Clarifications: Examples may include, but are not limited to, Ponce de Leon, Juan Garrido, Esteban Dorantes, Tristan deLuna, and an understanding that 2013 is the quincentennial of the founding of Florida.
SS.4.A.3.2:	Describe causes and effects of European colonization on the Native American tribes of Florida. Clarifications: Examples may include, but are not limited to, protection of ships, search for gold, glory of the mother country, disease, death, and spread of religion.
SS.4.A.3.3:	Identify the significance of St. Augustine as the oldest permanent European settlement in the United States. Clarifications: Examples may include, but are not limited to, the 450th anniversary of the founding of St. Augustine in 2015 as the first continuous town in the United States, predating other colonial settlements.
SS.4.A.3.4:	Explain the purpose of and daily life on missions (San Luis de Talimali in present-day Tallahassee).
SS.4.A.3.5:	Identify the significance of Fort Mose as the first free African community in the United States. Clarifications: Examples may include, but are not limited to, the differences between Spanish and English treatment of enslavement.
SS.4.A.3.6:	Identify the effects of Spanish rule in Florida. Clarifications: Examples may include, but are not limited to, names of cities such as Pensacola, etc., agriculture, weapons, architecture, art, music, and food.
SS.4.A.3.7:	Identify nations (Spain, France, England) that controlled Florida before it became a United States territory.
SS.4.A.3.8:	Explain how the Seminole tribe formed and the purpose for their migration.
SS.4.A.3.9:	Explain how Florida (Adams-Onis Treaty) became a U.S. territory.
SS.4.A.3.10:	Identify the causes and effects of the Seminole Wars. Clarifications: Examples may include, but are not limited to, Jackson's invasion of Florida (First Seminole War), without federal permission.
SS.4.A.4.1:	Explain the effects of technological advances on Florida. Clarifications: Examples may include, but are not limited to, steam engine, steamboats, delivery of water to some areas of the state.
SS.4.A.4.2:	Describe pioneer life in Florida. Clarifications: Examples may include, but are not limited to, the role of men, women, children, Florida Crackers, Black Seminoles.
SS.4.A.5.1:	Describe Florida's involvement (secession, blockades of ports, the battles of Ft. Pickens, Olustee, Ft. Brooke, Natural Bridge, food supply) in the Civil War. Clarifications: Additional examples may also include, but are not limited to, Ft. Zachary Taylor, the plantation culture, the First Florida Cavalry.
SS.4.A.5.2:	Summarize challenges Floridians faced during Reconstruction. Clarifications: Examples may include, but are not limited to, sharecropping, segregation, and black participation in state and federal governments.
SS.4.A.6.1:	Describe the economic development of Florida's major industries. Clarifications: Examples of industries may include, but are not limited to, timber, citrus, cattle, tourism, phosphate, cigar, railroads, bridges, air conditioning, sponge, shrimping, and wrecking (pirating).
	Summarize contributions immigrant groups made to Florida.

SS.4.A.6.2:	<p>Clarifications: Examples may include, but are not limited to, language, food, art, beliefs and practices, literature, education, and clothing.</p>
	Describe the contributions of significant individuals to Florida.
SS.4.A.6.3:	<p>Clarifications: Examples may include, but are not limited to, John Gorrie, Henry Flagler, Henry Plant, Lue Gim Gong, Vincente Martinez Ybor, Julia Tuttle, Mary McLeod Bethune, Thomas Alva Edison, James Weldon Johnson, Marjorie Kinnan Rawlings.</p>
	Describe effects of the Spanish American War on Florida.
SS.4.A.6.4:	<p>Clarifications: Examples may include, but are not limited to, cigar industry, temporary economic boom at Ft. Brooke due to Rough Riders, Cuban immigration.</p>
	Describe the causes and effects of the 1920's Florida land boom and bust.
SS.4.A.7.1:	<p>Clarifications: Examples may include, but are not limited to, land speculation.</p>
	Summarize challenges Floridians faced during the Great Depression.
SS.4.A.7.2:	<p>Clarifications: Examples may include, but are not limited to, the Labor Day hurricane of 1935 and the Mediterranean fruit fly.</p>
	Identify Florida's role in World War II.
SS.4.A.7.3:	<p>Clarifications: Examples may include, but are not limited to, warfare near Florida's shores and training bases in Florida (Miami, Tampa, Tallahassee, etc.), spying near the coast, Mosquito Fleet.</p>
	Identify Florida's role in the Civil Rights Movement.
SS.4.A.8.1:	<p>Clarifications: Examples may include, but are not limited to, Tallahassee Bus Boycotts, civil disobedience, and the legacy of early civil rights pioneers, Harry T. and Harriette V. Moore.</p>
SS.4.A.8.2:	Describe how and why immigration impacts Florida today.
SS.4.A.8.3:	Describe the effect of the United States space program on Florida's economy and growth.
SS.4.A.8.4:	Explain how tourism affects Florida's economy and growth.
SS.4.A.9.1:	Utilize timelines to sequence key events in Florida history.
	Explain why the Florida government has a written Constitution.
SS.4.CG.1.1:	<ul style="list-style-type: none"> • Students will recognize that every state has a state constitution. • Students will explain the relationship between a written constitution, the government established and the citizens.
	Identify and describe how citizens work with local and state governments to solve problems.
SS.4.CG.2.1:	<ul style="list-style-type: none"> • Students will explain how public issues, such as taxation, roads, zoning and schools, impact citizens' daily lives. • Students will describe how citizens can help solve community and state problems (e.g., attending government meetings, communicating with their elected representatives).
	Explain the importance of voting, public service and volunteerism to the state and nation.
SS.4.CG.2.2:	<ul style="list-style-type: none"> • Students will explain how voting, public service and volunteerism contribute to the preservation of the republic. • Students will discuss different types of public service and volunteerism.
	Identify individuals who represent the citizens of Florida at the state level.
SS.4.CG.2.3:	<ul style="list-style-type: none"> • Students will identify their local state senator and state representative. • Students will identify appropriate methods for communicating with elected officials. • Students will recognize that Florida has a representative government.
	Explain the structure and functions of the legislative, executive and judicial branches of government in Florida.
SS.4.CG.3.1:	<ul style="list-style-type: none"> • Students will compare the powers of Florida's three branches of government. • Students will explain how the Declaration of Rights in the Florida Constitution protects the rights of citizens.
	Compare the structure, functions and processes of local and state government.
SS.4.CG.3.2:	<ul style="list-style-type: none"> • Students will identify how government is organized at the local and state level including, but not limited to, legislative branch (e.g., legislature, city/county commission), executive branch (e.g., governor, mayor) and judicial branch (e.g., county and circuit courts).
	Identify entrepreneurs from various social and ethnic backgrounds who have influenced Florida and local economy.
SS.4.E.1.1:	<p>Clarifications: Examples are Henry Flagler, Walt Disney, Ed Ball, Alfred Dupont, Julia Tuttle, Vincente Martinez Ybor.</p>
	Explain Florida's role in the national and international economy and conditions that attract businesses to the state.
SS.4.E.1.2:	<p>Clarifications: Examples are tourism, agriculture, phosphate, space industry.</p>
	Identify physical features of Florida.
SS.4.G.1.1:	<p>Clarifications: Examples are bodies of water, location, landforms.</p>
	Locate and label cultural features on a Florida map.
SS.4.G.1.2:	<p>Clarifications: Examples are state capitals, major cities, tourist attractions.</p>
	Explain how weather impacts Florida.
SS.4.G.1.3:	<p>Clarifications: Examples are hurricanes, thunderstorms, drought, mild climate.</p>
SS.4.G.1.4:	Interpret political and physical maps using map elements (title, compass rose, cardinal directions, intermediate directions, symbols, legend, scale, longitude, latitude).
	Mathematicians who participate in effortful learning both individually and with others:

MA.K12.MTR.1.1:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.4.C.2.4:	<p>Recognize types of school rules and community laws that promote health and disease prevention.</p> <p>Clarifications: Helmet law, clean indoor-air laws, and speed limits.</p>

General Course Information and Notes

GENERAL NOTES

Fourth Grade: Florida Studies - The fourth grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Fourth grade students will learn about Florida history focusing on exploration and colonization, growth, and the 20th Century and beyond. Students will study the important people, places, and events that helped shape Florida history.

Special Notes:

Additional content that may be contained in the NAEP Grade 4 Civics assessment includes:

- Definition of government
- American identity
- Costs, benefits of unity/diversity
- Contacting public officials, agencies
- The concept of nation
- Interaction among nations in the areas of trade, diplomacy, cultural context, treaties and agreements, and military force
- Importance of peaceful resolution of international conflicts
- Healthy functioning of American constitutional democracy
- Criteria for selecting leaders

The NAEP frameworks for Civics may be accessed at

<http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Additional content that may be contained in the NAEP Grade 4 Geography assessment includes:

- spatial units, features, and patterns
- the earth's environment, its limited capacity, human effect on it
- relationships between and among places, changes in technology affecting connections among people and places
- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at

<http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Additional content that may be contained in the NAEP Grade 4 United States History assessment includes:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at

<http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 5021060

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades PreK to 5 Education
Courses > **Subject:** Social Studies > **SubSubject:**
General >

Abbreviated Title: SOC STUDIES 4

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Status: Draft - Course Pending Approval

Grade Level(s): 4

Educator Certifications

Elementary Education (Elementary Grades 1-6)

Social Studies (Elementary Grades 1-6)

Elementary Education (Grades K-6)

Social Studies Grade 5 (#5021070) 2015 - 2022 (current)

Course Standards

Name	Description
SS.5.A.1.1:	Use primary and secondary sources to understand history. Clarifications: Examples may include, but are not limited to, diaries, letters, newspapers, audio/video recordings, pictures, photographs, maps, graphs. Examples of all of these forms of primary sources may be found on various websites such as the site for The Kinsey Collection.
SS.5.A.1.2:	Utilize timelines to identify and discuss American History time periods.
SS.5.A.2.1:	Compare cultural aspects of ancient American civilizations (Aztecs/Mayas; Mound Builders/Anasazi/Inuit). Clarifications: Examples may include, but are not limited to, those listed in the benchmark.
SS.5.A.2.2:	Identify Native American tribes from different geographic regions of North America (cliff dwellers and Pueblo people of the desert Southwest, coastal tribes of the Pacific Northwest, nomadic nations of the Great Plains, woodland tribes east of the Mississippi River). Clarifications: Examples may include, but are not limited to, those listed in the benchmark.
SS.5.A.2.3:	Compare cultural aspects of Native American tribes from different geographic regions of North America including but not limited to clothing, shelter, food, major beliefs and practices, music, art, and interactions with the environment.
SS.5.A.3.1:	Describe technological developments that shaped European exploration. Clarifications: Examples may include, but are not limited to, orienteering compass, sextant, astrolabe, seaworthy ships, and gunpowder.
SS.5.A.3.2:	Investigate (nationality, sponsoring country, motives, dates and routes of travel, accomplishments) the European explorers. Clarifications: In addition to those listed in the benchmark, examples may include, but are not limited to, Spanish, English, Dutch, Icelandic (Viking), and Swedish explorers.
SS.5.A.3.3:	Describe interactions among Native Americans, Africans, English, French, Dutch, and Spanish for control of North America. Clarifications: Examples may include, but are not limited to, diseases, agriculture, slavery, fur trade, military alliances, treaties, cultural interchanges.
SS.5.A.4.1:	Identify the economic, political and socio-cultural motivation for colonial settlement. Clarifications: Examples may include, but are not limited to, Puritans, Quakers, and Catholics fleeing from religious persecution, debtor settlements in Georgia, military stronghold and protection of trade routes at St. Augustine, establishment of the Jamestown colony for profit, and French and Dutch competition for the fur trade..
SS.5.A.4.2:	Compare characteristics of New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, resources and economic systems, occupations, religion, education, and social patterns.
SS.5.A.4.3:	Identify significant individuals responsible for the development of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, William Penn, Pontiac, Olaudah Equiano, George Whitefield, Roger Williams, John Winthrop, John Smith, John Rolfe, James Oglethorpe, Anne Hutchinson, Lord Baltimore.
SS.5.A.4.4:	Demonstrate an understanding of political, economic, and social aspects of daily colonial life in the thirteen colonies. Clarifications: Examples may include, but are not limited to, town meetings, farming, occupation, slavery, bartering, education, games, science, technology, transportation, religion.
SS.5.A.4.5:	Explain the importance of Triangular Trade linking Africa, the West Indies, the British Colonies, and Europe.
SS.5.A.4.6:	Describe the introduction, impact, and role of slavery in the colonies. Clarifications: Examples may include, but are not limited to, cultural contributions, skilled labor, the move away from indentured servitude, growth of plantations, differences in treatment of slaves by region and assigned job (house slave v. field slave).
SS.5.A.5.1:	Identify and explain significant events leading up to the American Revolution. Clarifications: Examples may include, but are not limited to, the French and Indian War, the Stamp Act, the Townshend Acts, the Boston Massacre, the Boston Tea Party, the Coercive Acts, the Powder Alarms.
SS.5.A.5.2:	Identify significant individuals and groups who played a role in the American Revolution. Clarifications: Examples may include, but are not limited to, King George III, Patrick Henry, Thomas Jefferson, George Washington, John Adams, John Hancock, Crispus Attucks, Ben Franklin, Paul Revere and Patriots, Sons of Liberty, Daughters of Liberty, Continental Congress, James Armistead, Francis Marion.
	Explain the significance of historical documents including key political concepts, origins of these concepts, and their role in American independence.

SS.5.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, the Magna Carta, the English Bill of Rights, the Mayflower Compact, Common Sense, the Declaration of Independence.</p>
	Examine and explain the changing roles and impact of significant women during the American Revolution.
SS.5.A.5.4:	<p>Clarifications: Examples may include, but are not limited to, Abigail Adams, Martha Washington, Phyllis Wheatley, Mercy Otis Warren, Molly Pitcher, Deborah Sampson, Margaret Gage.</p>
	Examine and compare major battles and military campaigns of the American Revolution.
SS.5.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, Lexington and Concord, Saratoga, Valley Forge, Yorktown, Savannah, Charleston, Trenton, Princeton, Bunker Hill.</p>
	Identify the contributions of foreign alliances and individuals to the outcome of the Revolution.
SS.5.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, France, Lafayette, Spain, de Galvez, von Stueben (aka de Steuben), Pulaski, Haiti.</p>
	Explain economic, military, and political factors which led to the end of the Revolutionary War.
SS.5.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, foreign alliances, rising cost for England, Treaty of Paris.</p>
	Evaluate the personal and political hardships resulting from the American Revolution.
SS.5.A.5.8:	<p>Clarifications: Examples may include, but are not limited to, financing the war effort, war time inflation, profiteering, loss of family and property, dissent within families and between colonies.</p>
	Discuss the impact and significance of land policies developed under the Confederation Congress (Northwest Ordinance of 1787).
SS.5.A.5.9:	<p>Clarifications: Examples may include, but are not limited to, those listed in the benchmark.</p>
	Examine the significance of the Constitution including its key political concepts, origins of those concepts, and their role in American democracy.
SS.5.A.5.10:	<p>Clarifications: Examples may include, but are not limited to, liberty, representative government, limited government, individual rights, "bundle of compromises."</p>
SS.5.A.6.1:	Describe the causes and effects of the Louisiana Purchase.
	Identify roles and contributions of significant people during the period of westward expansion.
SS.5.A.6.2:	<p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacagawea, York, Thomas Jefferson, Andrew Jackson, Tecumseh, Jean Baptiste Point Du Sable.</p>
	Examine 19th century advancements (canals, roads, steamboats, flat boats, overland wagons, Pony Express, railroads) in transportation and communication.
SS.5.A.6.3:	<p>Clarifications: In addition to those listed in the benchmark, examples may include, but are not limited to, the telegraph, Morse Code.</p>
	Explain the importance of the explorations west of the Mississippi River.
SS.5.A.6.4:	<p>Clarifications: Examples may include, but are not limited to, Meriwether Lewis and William Clark, Zebulon Pike, John Fremont, the Mormon migration, the Forty-niners, the Oregon Trail.</p>
	Identify the causes and effects of the War of 1812.
SS.5.A.6.5:	<p>Clarifications: Examples may include, but are not limited to, nationalism, neutrality in trade, impressment, border forts.</p>
	Explain how westward expansion affected Native Americans.
SS.5.A.6.6:	<p>Clarifications: Examples may include, but are not limited to, the Trail of Tears and Indian Removal Act.</p>
SS.5.A.6.7:	Discuss the concept of Manifest Destiny.
SS.5.A.6.8:	Describe the causes and effects of the Missouri Compromise.
	Describe the hardships of settlers along the overland trails to the west.
SS.5.A.6.9:	<p>Clarifications: Examples may include, but are not limited to, location of routes, terrain, rivers, climate, vegetation, conflicts with Native Americans.</p>
SS.5.C.1.1:	Explain how and why the United States government was created.
SS.5.C.1.2:	Define a constitution, and discuss its purposes.
	Explain the definition and origin of rights.
SS.5.C.1.3:	<p>Clarifications: Examples are John Locke's "state of nature" philosophy, natural rights: rights to life, liberty, property.</p>
SS.5.C.1.4:	Identify the Declaration of Independence's grievances and Articles of Confederation's weaknesses.
SS.5.C.1.5:	Describe how concerns about individual rights led to the inclusion of the Bill of Rights in the U.S. Constitution.
SS.5.C.1.6:	Compare Federalist and Anti-Federalist views of government.
SS.5.C.2.1:	Differentiate political ideas of Patriots, Loyalists, and "undecideds" during the American Revolution.
	Compare forms of political participation in the colonial period to today.
SS.5.C.2.2:	<p>Clarifications: Examples are who participated and how they participated.</p>

SS.5.C.2.3:	Analyze how the Constitution has expanded voting rights from our nation's early history to today. Evaluate the importance of civic responsibilities in American democracy.
SS.5.C.2.4:	Clarifications: Examples are respecting the law, voting, serving on a jury, paying taxes, keeping informed on public issues, protesting.
SS.5.C.2.5:	Identify ways good citizens go beyond basic civic and political responsibilities to improve government and society. Clarifications: Examples are running for office, initiating changes in laws or public policy, working on political campaigns, working with others on civic issues.
SS.5.C.3.1:	Describe the organizational structure (legislative, executive, judicial branches) and powers of the federal government as defined in Articles I, II, and III of the U.S. Constitution.
SS.5.C.3.2:	Explain how popular sovereignty, rule of law, separation of powers, checks and balances, federalism, and individual rights limit the powers of the federal government as expressed in the Constitution and Bill of Rights.
SS.5.C.3.3:	Give examples of powers granted to the federal government and those reserved for the states. Clarifications: Examples are coining money, declaring war, creating public schools, making traffic laws.
SS.5.C.3.4:	Describe the amendment process as defined in Article V of the Constitution and give examples. Clarifications: Examples are the Bill of Rights and 26th Amendment.
SS.5.C.3.5:	Identify the fundamental rights of all citizens as enumerated in the Bill of Rights.
SS.5.C.3.6:	Examine the foundations of the United States legal system by recognizing the role of the courts in interpreting law and settling conflicts.
SS.5.E.1.1:	Identify how trade promoted economic growth in North America from pre-Columbian times to 1850. Clarifications: Examples are Triangular Trade and tobacco.
SS.5.E.1.2:	Describe a market economy, and give examples of how the colonial and early American economy exhibited these characteristics.
SS.5.E.1.3:	Trace the development of technology and the impact of major inventions on business productivity during the early development of the United States. Clarifications: Examples are Franklin stove, bifocals, double sided needle, cotton gin, Turtle submarine.
SS.5.E.2.1:	Recognize the positive and negative effects of voluntary trade among Native Americans, European explorers, and colonists.
SS.5.G.1.1:	Interpret current and historical information using a variety of geographic tools. Clarifications: Examples are maps, globes, Geographic Information Systems (GIS).
SS.5.G.1.2:	Use latitude and longitude to locate places.
SS.5.G.1.3:	Identify major United States physical features on a map of North America. Clarifications: Examples are Rocky Mountains, Appalachian Mountains, Mississippi River, Great Lakes, Great Plains, Rocky Mountains, Rio Grande, Lake Okeechobee, Mojave Desert.
SS.5.G.1.4:	Construct maps, charts, and graphs to display geographic information.
SS.5.G.1.5:	Identify and locate the original thirteen colonies on a map of North America.
SS.5.G.1.6:	Locate and identify states, capitals, and United States Territories on a map.
SS.5.G.2.1:	Describe the push-pull factors (economy, natural hazards, tourism, climate, physical features) that influenced boundary changes within the United States.
SS.5.G.3.1:	Describe the impact that past natural events have had on human and physical environments in the United States through 1850. Clarifications: An example is the harsh winter in Jamestown.
SS.5.G.4.1:	Use geographic knowledge and skills when discussing current events. Clarifications: Examples are recognizing patterns, mapping, graphing.
SS.5.G.4.2:	Use geography concepts and skills such as recognizing patterns, mapping, graphing to find solutions for local, state, or national problems.
LAFS.5.RI.1.1:	Quote accurately from a text when explaining what the text says explicitly and when drawing inferences from the text.
LAFS.5.RI.1.2:	Determine two or more main ideas of a text and explain how they are supported by key details; summarize the text.
LAFS.5.RI.1.3:	Explain the relationships or interactions between two or more individuals, events, ideas, or concepts in a historical, scientific, or technical text based on specific information in the text.
LAFS.5.RI.2.4:	Determine the meaning of general academic and domain-specific words and phrases in a text relevant to a <i>grade 5 topic or subject area</i> .
LAFS.5.RI.2.5:	Compare and contrast the overall structure (e.g., chronology, comparison, cause/effect, problem/solution) of events, ideas, concepts, or information in two or more texts.
LAFS.5.RI.2.6:	Analyze multiple accounts of the same event or topic, noting important similarities and differences in the point of view they represent.
LAFS.5.RI.3.7:	Draw on information from multiple print or digital sources, demonstrating the ability to locate an answer to a question quickly or to solve a problem efficiently.
LAFS.5.RI.3.8:	Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point(s).
LAFS.5.RI.3.9:	Integrate information from several texts on the same topic in order to write or speak about the subject knowledgeably.
LAFS.5.RI.4.10:	By the end of the year, read and comprehend informational texts, including history/social studies, science, and technical texts, at the high end of the <i>grades 4–5 text complexity band independently and proficiently</i> . Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on <i>grade 5 topics and texts</i> , building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation and other information known about

LAFS.5.SL.1.1:	<p>the topic to explore ideas under discussion.</p> <ol style="list-style-type: none"> Follow agreed-upon rules for discussions and carry out assigned roles. Pose and respond to specific questions by making comments that contribute to the discussion and elaborate on the remarks of others. Review the key ideas expressed and draw conclusions in light of information and knowledge gained from the discussions.
LAFS.5.SL.1.2:	Summarize a written text read aloud or information presented in diverse media and formats, including visually, quantitatively, and orally.
LAFS.5.SL.1.3:	Summarize the points a speaker makes and explain how each claim is supported by reasons and evidence.
LAFS.5.SL.2.4:	Report on a topic or text or present an opinion, sequencing ideas logically and using appropriate facts and relevant, descriptive details to support main ideas or themes; speak clearly at an understandable pace.
LAFS.5.W.1.1:	<p>Write opinion pieces on topics or texts, supporting a point of view with reasons and information.</p> <ol style="list-style-type: none"> Introduce a topic or text clearly, state an opinion, and create an organizational structure in which ideas are logically grouped to support the writer's purpose. Provide logically ordered reasons that are supported by facts and details. Link opinion and reasons using words, phrases, and clauses (e.g., consequently, specifically). Provide a concluding statement or section related to the opinion presented.
LAFS.5.W.1.2:	<p>Write informative/explanatory texts to examine a topic and convey ideas and information clearly.</p> <ol style="list-style-type: none"> Introduce a topic clearly, provide a general observation and focus, and group related information logically; include formatting (e.g., headings), illustrations, and multimedia when useful to aiding comprehension. Develop the topic with facts, definitions, concrete details, quotations, or other information and examples related to the topic. Link ideas within and across categories of information using words, phrases, and clauses (e.g., in contrast, especially). Use precise language and domain-specific vocabulary to inform about or explain the topic. Provide a concluding statement or section related to the information or explanation presented.
LAFS.5.W.1.3:	<p>Write narratives to develop real or imagined experiences or events using effective technique, descriptive details, and clear event sequences.</p> <ol style="list-style-type: none"> Orient the reader by establishing a situation and introducing a narrator and/or characters; organize an event sequence that unfolds naturally. Use narrative techniques, such as dialogue, description, and pacing, to develop experiences and events or show the responses of characters to situations. Use a variety of transitional words, phrases, and clauses to manage the sequence of events. Use concrete words and phrases and sensory details to convey experiences and events precisely. Provide a conclusion that follows from the narrated experiences or events.
LAFS.5.W.2.4:	Produce clear and coherent writing in which the development and organization are appropriate to task, purpose, and audience. (Grade-specific expectations for writing types are defined in standards 1–3 above.)
LAFS.5.W.2.5:	With guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach.
LAFS.5.W.2.6:	With some guidance and support from adults, use technology, including the Internet, to produce and publish writing as well as to interact and collaborate with others; demonstrate sufficient command of keyboarding skills to type a minimum of two pages in a single sitting.
LAFS.5.W.3.7:	Conduct short research projects that use several sources to build knowledge through investigation of different aspects of a topic.
LAFS.5.W.3.8:	Recall relevant information from experiences or gather relevant information from print and digital sources; summarize or paraphrase information in notes and finished work, and provide a list of sources.
LAFS.5.W.3.9:	<p>Draw evidence from literary or informational texts to support analysis, reflection, and research.</p> <ol style="list-style-type: none"> Apply grade 5 Reading standards to literature (e.g., "Compare and contrast two or more characters, settings, or events in a story or a drama, drawing on specific details in the text [e.g., how characters interact]"). Apply grade 5 Reading standards to informational texts (e.g., "Explain how an author uses reasons and evidence to support particular points in a text, identifying which reasons and evidence support which point[s]").
LAFS.5.W.4.10:	Write routinely over extended time frames (time for research, reflection, and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.5.MD.2.2:	<p>Make a line plot to display a data set of measurements in fractions of a unit ($\frac{1}{2}$, $\frac{1}{4}$, $\frac{1}{8}$). Use operations on fractions for this grade to solve problems involving information presented in line plots. <i>For example, given different measurements of liquid in identical beakers, find the amount of liquid each beaker would contain if the total amount in all the beakers were redistributed equally.</i></p> <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies.</p>

Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

MAFS.K12.MP.5.1:

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

MAFS.K12.MP.6.1:

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Give examples of school and public health policies that influence health promotion and disease prevention.

HE.5.C.2.4:

Clarifications:

Head-lice guidelines, seat-belt and child-restraint laws, helmet laws, fire/severe weather/lockdown drills, school-bus rules, and immunization requirements.

General Course Information and Notes

GENERAL NOTES

Fifth Grade: United States History - The fifth grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Fifth grade students will study the development of our nation with emphasis on the people, places and events up to approximately 1850. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the initial inhabitation, exploration, colonization, and early national periods of American History. So that students can see clearly the relationship between cause and effect in history, students should also have the opportunity to understand how individuals and events of this period influenced later events in the development of our nation.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 5021070

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades PreK to 5 Education
Courses > **Subject:** Social Studies > **SubSubject:**
General >

Abbreviated Title: SOC STUDIES 5

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Status: Course Approved

Grade Level(s): 5

Educator Certifications

Elementary Education (Elementary Grades 1-6)

Social Studies (Elementary Grades 1-6)

Elementary Education (Grades K-6)

Social Science (Grades 5-9)

Social Studies Grade 5 (#5021070) 2022 - 2023

Course Standards

Name	Description
SS.5.A.1.1:	Use primary and secondary sources to understand history. Clarifications: Examples may include, but are not limited to, diaries, letters, newspapers, audio/video recordings, pictures, photographs, maps, graphs. Examples of all of these forms of primary sources may be found on various websites such as the site for The Kinsey Collection.
SS.5.A.1.2:	Utilize timelines to identify and discuss American History time periods.
SS.5.A.2.1:	Compare cultural aspects of ancient American civilizations (Aztecs/Mayas; Mound Builders/Anasazi/Inuit). Clarifications: Examples may include, but are not limited to, those listed in the benchmark.
SS.5.A.2.2:	Identify Native American tribes from different geographic regions of North America (cliff dwellers and Pueblo people of the desert Southwest, coastal tribes of the Pacific Northwest, nomadic nations of the Great Plains, woodland tribes east of the Mississippi River). Clarifications: Examples may include, but are not limited to, those listed in the benchmark.
SS.5.A.2.3:	Compare cultural aspects of Native American tribes from different geographic regions of North America including but not limited to clothing, shelter, food, major beliefs and practices, music, art, and interactions with the environment.
SS.5.A.3.1:	Describe technological developments that shaped European exploration. Clarifications: Examples may include, but are not limited to, orienteering compass, sextant, astrolabe, seaworthy ships, and gunpowder.
SS.5.A.3.2:	Investigate (nationality, sponsoring country, motives, dates and routes of travel, accomplishments) the European explorers. Clarifications: In addition to those listed in the benchmark, examples may include, but are not limited to, Spanish, English, Dutch, Icelandic (Viking), and Swedish explorers.
SS.5.A.3.3:	Describe interactions among Native Americans, Africans, English, French, Dutch, and Spanish for control of North America. Clarifications: Examples may include, but are not limited to, diseases, agriculture, slavery, fur trade, military alliances, treaties, cultural interchanges.
SS.5.A.4.1:	Identify the economic, political and socio-cultural motivation for colonial settlement. Clarifications: Examples may include, but are not limited to, Puritans, Quakers, and Catholics fleeing from religious persecution, debtor settlements in Georgia, military stronghold and protection of trade routes at St. Augustine, establishment of the Jamestown colony for profit, and French and Dutch competition for the fur trade..
SS.5.A.4.2:	Compare characteristics of New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, resources and economic systems, occupations, religion, education, and social patterns.
SS.5.A.4.3:	Identify significant individuals responsible for the development of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, William Penn, Pontiac, Olaudah Equiano, George Whitefield, Roger Williams, John Winthrop, John Smith, John Rolfe, James Oglethorpe, Anne Hutchinson, Lord Baltimore.
SS.5.A.4.4:	Demonstrate an understanding of political, economic, and social aspects of daily colonial life in the thirteen colonies. Clarifications: Examples may include, but are not limited to, town meetings, farming, occupation, slavery, bartering, education, games, science, technology, transportation, religion.
SS.5.A.4.5:	Explain the importance of Triangular Trade linking Africa, the West Indies, the British Colonies, and Europe.
SS.5.A.4.6:	Describe the introduction, impact, and role of slavery in the colonies. Clarifications: Examples may include, but are not limited to, cultural contributions, skilled labor, the move away from indentured servitude, growth of plantations, differences in treatment of slaves by region and assigned job (house slave v. field slave).
SS.5.A.5.1:	Identify and explain significant events leading up to the American Revolution. Clarifications: Examples may include, but are not limited to, the French and Indian War, the Stamp Act, the Townshend Acts, the Boston Massacre, the Boston Tea Party, the Coercive Acts, the Powder Alarms.
SS.5.A.5.2:	Identify significant individuals and groups who played a role in the American Revolution. Clarifications: Examples may include, but are not limited to, King George III, Patrick Henry, Thomas Jefferson, George Washington, John Adams, John Hancock, Crispus Attucks, Ben Franklin, Paul Revere and Patriots, Sons of Liberty, Daughters of Liberty, Continental Congress, James Armistead, Francis Marion.
	Explain the significance of historical documents including key political concepts, origins of these concepts, and their role in American independence.

SS.5.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, the Magna Carta, the English Bill of Rights, the Mayflower Compact, Common Sense, the Declaration of Independence.</p>
	Examine and explain the changing roles and impact of significant women during the American Revolution.
SS.5.A.5.4:	<p>Clarifications: Examples may include, but are not limited to, Abigail Adams, Martha Washington, Phyllis Wheatley, Mercy Otis Warren, Molly Pitcher, Deborah Sampson, Margaret Gage.</p>
	Examine and compare major battles and military campaigns of the American Revolution.
SS.5.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, Lexington and Concord, Saratoga, Valley Forge, Yorktown, Savannah, Charleston, Trenton, Princeton, Bunker Hill.</p>
	Identify the contributions of foreign alliances and individuals to the outcome of the Revolution.
SS.5.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, France, Lafayette, Spain, de Galvez, von Stueben (aka de Steuben), Pulaski, Haiti.</p>
	Explain economic, military, and political factors which led to the end of the Revolutionary War.
SS.5.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, foreign alliances, rising cost for England, Treaty of Paris.</p>
	Evaluate the personal and political hardships resulting from the American Revolution.
SS.5.A.5.8:	<p>Clarifications: Examples may include, but are not limited to, financing the war effort, war time inflation, profiteering, loss of family and property, dissent within families and between colonies.</p>
	Discuss the impact and significance of land policies developed under the Confederation Congress (Northwest Ordinance of 1787).
SS.5.A.5.9:	<p>Clarifications: Examples may include, but are not limited to, those listed in the benchmark.</p>
	Examine the significance of the Constitution including its key political concepts, origins of those concepts, and their role in American democracy.
SS.5.A.5.10:	<p>Clarifications: Examples may include, but are not limited to, liberty, representative government, limited government, individual rights, "bundle of compromises."</p>
SS.5.A.6.1:	Describe the causes and effects of the Louisiana Purchase.
	Identify roles and contributions of significant people during the period of westward expansion.
SS.5.A.6.2:	<p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacagawea, York, Thomas Jefferson, Andrew Jackson, Tecumseh, Jean Baptiste Point Du Sable.</p>
	Examine 19th century advancements (canals, roads, steamboats, flat boats, overland wagons, Pony Express, railroads) in transportation and communication.
SS.5.A.6.3:	<p>Clarifications: In addition to those listed in the benchmark, examples may include, but are not limited to, the telegraph, Morse Code.</p>
	Explain the importance of the explorations west of the Mississippi River.
SS.5.A.6.4:	<p>Clarifications: Examples may include, but are not limited to, Meriwether Lewis and William Clark, Zebulon Pike, John Fremont, the Mormon migration, the Forty-niners, the Oregon Trail.</p>
	Identify the causes and effects of the War of 1812.
SS.5.A.6.5:	<p>Clarifications: Examples may include, but are not limited to, nationalism, neutrality in trade, impressment, border forts.</p>
	Explain how westward expansion affected Native Americans.
SS.5.A.6.6:	<p>Clarifications: Examples may include, but are not limited to, the Trail of Tears and Indian Removal Act.</p>
SS.5.A.6.7:	Discuss the concept of Manifest Destiny.
SS.5.A.6.8:	Describe the causes and effects of the Missouri Compromise.
	Describe the hardships of settlers along the overland trails to the west.
SS.5.A.6.9:	<p>Clarifications: Examples may include, but are not limited to, location of routes, terrain, rivers, climate, vegetation, conflicts with Native Americans.</p>
SS.5.C.1.1:	Explain how and why the United States government was created.
SS.5.C.1.2:	Define a constitution, and discuss its purposes.
	Explain the definition and origin of rights.
SS.5.C.1.3:	<p>Clarifications: Examples are John Locke's "state of nature" philosophy, natural rights: rights to life, liberty, property.</p>
SS.5.C.1.4:	Identify the Declaration of Independence's grievances and Articles of Confederation's weaknesses.
SS.5.C.1.5:	Describe how concerns about individual rights led to the inclusion of the Bill of Rights in the U.S. Constitution.
SS.5.C.1.6:	Compare Federalist and Anti-Federalist views of government.
SS.5.C.2.1:	Differentiate political ideas of Patriots, Loyalists, and "undecideds" during the American Revolution.
	Compare forms of political participation in the colonial period to today.
SS.5.C.2.2:	<p>Clarifications: Examples are who participated and how they participated.</p>

SS.5.C.2.3:	Analyze how the Constitution has expanded voting rights from our nation's early history to today. Evaluate the importance of civic responsibilities in American democracy.
SS.5.C.2.4:	Clarifications: Examples are respecting the law, voting, serving on a jury, paying taxes, keeping informed on public issues, protesting.
SS.5.C.2.5:	Identify ways good citizens go beyond basic civic and political responsibilities to improve government and society. Clarifications: Examples are running for office, initiating changes in laws or public policy, working on political campaigns, working with others on civic issues.
SS.5.C.3.1:	Describe the organizational structure (legislative, executive, judicial branches) and powers of the federal government as defined in Articles I, II, and III of the U.S. Constitution.
SS.5.C.3.2:	Explain how popular sovereignty, rule of law, separation of powers, checks and balances, federalism, and individual rights limit the powers of the federal government as expressed in the Constitution and Bill of Rights. Give examples of powers granted to the federal government and those reserved for the states.
SS.5.C.3.3:	Clarifications: Examples are coining money, declaring war, creating public schools, making traffic laws.
SS.5.C.3.4:	Describe the amendment process as defined in Article V of the Constitution and give examples. Clarifications: Examples are the Bill of Rights and 26th Amendment.
SS.5.C.3.5:	Identify the fundamental rights of all citizens as enumerated in the Bill of Rights.
SS.5.C.3.6:	Examine the foundations of the United States legal system by recognizing the role of the courts in interpreting law and settling conflicts.
SS.5.E.1.1:	Identify how trade promoted economic growth in North America from pre-Columbian times to 1850. Clarifications: Examples are Triangular Trade and tobacco.
SS.5.E.1.2:	Describe a market economy, and give examples of how the colonial and early American economy exhibited these characteristics.
SS.5.E.1.3:	Trace the development of technology and the impact of major inventions on business productivity during the early development of the United States. Clarifications: Examples are Franklin stove, bifocals, double sided needle, cotton gin, Turtle submarine.
SS.5.E.2.1:	Recognize the positive and negative effects of voluntary trade among Native Americans, European explorers, and colonists. Interpret current and historical information using a variety of geographic tools.
SS.5.G.1.1:	Clarifications: Examples are maps, globes, Geographic Information Systems (GIS).
SS.5.G.1.2:	Use latitude and longitude to locate places.
SS.5.G.1.3:	Identify major United States physical features on a map of North America. Clarifications: Examples are Rocky Mountains, Appalachian Mountains, Mississippi River, Great Lakes, Great Plains, Rocky Mountains, Rio Grande, Lake Okeechobee, Mojave Desert.
SS.5.G.1.4:	Construct maps, charts, and graphs to display geographic information.
SS.5.G.1.5:	Identify and locate the original thirteen colonies on a map of North America.
SS.5.G.1.6:	Locate and identify states, capitals, and United States Territories on a map.
SS.5.G.2.1:	Describe the push-pull factors (economy, natural hazards, tourism, climate, physical features) that influenced boundary changes within the United States. Describe the impact that past natural events have had on human and physical environments in the United States through 1850.
SS.5.G.3.1:	Clarifications: An example is the harsh winter in Jamestown.
SS.5.G.4.1:	Use geographic knowledge and skills when discussing current events. Clarifications: Examples are recognizing patterns, mapping, graphing.
SS.5.G.4.2:	Use geography concepts and skills such as recognizing patterns, mapping, graphing to find solutions for local, state, or national problems.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or

MA.K12.MTR.7.1:	<p>efficiency.</p> <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.5.C.2.4:	<p>Give examples of school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Head-lice guidelines, seat-belt and child-restraint laws, helmet laws, fire/severe weather/lockdown drills, school-bus rules, and immunization requirements.</p>

General Course Information and Notes

GENERAL NOTES

Fifth Grade: United States History - The fifth grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Fifth grade students will study the development of our nation with emphasis on the people, places and events up to approximately 1850. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the initial habitation, exploration, colonization, and early national periods of American History. So that students can see clearly the relationship between cause and effect in history, students should also have the opportunity to understand how individuals and events of this period influenced later events in the development of our nation.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida’s Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida’s B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 5021070

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades PreK to 5 Education Courses > **Subject:** Social Studies > **SubSubject:** General >

Abbreviated Title: SOC STUDIES 5

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Status: State Board Approved

Grade Level(s): 5

Educator Certifications

Elementary Education (Elementary Grades 1-6)
Social Studies (Elementary Grades 1-6)
Elementary Education (Grades K-6)
Social Science (Grades 5-9)

Social Studies Grade 5 (#5021070) 2023 - And Beyond

Course Standards

Name	Description
SS.5.A.1.1:	Use primary and secondary sources to understand history. Clarifications: Examples may include, but are not limited to, diaries, letters, newspapers, audio/video recordings, pictures, photographs, maps, graphs. Examples of all of these forms of primary sources may be found on various websites such as the site for The Kinsey Collection.
SS.5.A.1.2:	Utilize timelines to identify and discuss American History time periods.
SS.5.A.2.1:	Compare cultural aspects of ancient American civilizations (Aztecs/Mayas; Mound Builders/Anasazi/Inuit). Clarifications: Examples may include, but are not limited to, those listed in the benchmark.
SS.5.A.2.2:	Identify Native American tribes from different geographic regions of North America (cliff dwellers and Pueblo people of the desert Southwest, coastal tribes of the Pacific Northwest, nomadic nations of the Great Plains, woodland tribes east of the Mississippi River). Clarifications: Examples may include, but are not limited to, those listed in the benchmark.
SS.5.A.2.3:	Compare cultural aspects of Native American tribes from different geographic regions of North America including but not limited to clothing, shelter, food, major beliefs and practices, music, art, and interactions with the environment.
SS.5.A.3.1:	Describe technological developments that shaped European exploration. Clarifications: Examples may include, but are not limited to, orienteering compass, sextant, astrolabe, seaworthy ships, and gunpowder.
SS.5.A.3.2:	Investigate (nationality, sponsoring country, motives, dates and routes of travel, accomplishments) the European explorers. Clarifications: In addition to those listed in the benchmark, examples may include, but are not limited to, Spanish, English, Dutch, Icelandic (Viking), and Swedish explorers.
SS.5.A.3.3:	Describe interactions among Native Americans, Africans, English, French, Dutch, and Spanish for control of North America. Clarifications: Examples may include, but are not limited to, diseases, agriculture, slavery, fur trade, military alliances, treaties, cultural interchanges.
SS.5.A.4.1:	Identify the economic, political and socio-cultural motivation for colonial settlement. Clarifications: Examples may include, but are not limited to, Puritans, Quakers, and Catholics fleeing from religious persecution, debtor settlements in Georgia, military stronghold and protection of trade routes at St. Augustine, establishment of the Jamestown colony for profit, and French and Dutch competition for the fur trade..
SS.5.A.4.2:	Compare characteristics of New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, resources and economic systems, occupations, religion, education, and social patterns.
SS.5.A.4.3:	Identify significant individuals responsible for the development of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, William Penn, Pontiac, Olaudah Equiano, George Whitefield, Roger Williams, John Winthrop, John Smith, John Rolfe, James Oglethorpe, Anne Hutchinson, Lord Baltimore.
SS.5.A.4.4:	Demonstrate an understanding of political, economic, and social aspects of daily colonial life in the thirteen colonies. Clarifications: Examples may include, but are not limited to, town meetings, farming, occupation, slavery, bartering, education, games, science, technology, transportation, religion.
SS.5.A.4.5:	Explain the importance of Triangular Trade linking Africa, the West Indies, the British Colonies, and Europe.
SS.5.A.4.6:	Describe the introduction, impact, and role of slavery in the colonies. Clarifications: Examples may include, but are not limited to, cultural contributions, skilled labor, the move away from indentured servitude, growth of plantations, differences in treatment of slaves by region and assigned job (house slave v. field slave).
SS.5.A.5.1:	Identify and explain significant events leading up to the American Revolution. Clarifications: Examples may include, but are not limited to, the French and Indian War, the Stamp Act, the Townshend Acts, the Boston Massacre, the Boston Tea Party, the Coercive Acts, the Powder Alarms.
SS.5.A.5.2:	Identify significant individuals and groups who played a role in the American Revolution. Clarifications: Examples may include, but are not limited to, King George III, Patrick Henry, Thomas Jefferson, George Washington, John Adams, John Hancock, Crispus Attucks, Ben Franklin, Paul Revere and Patriots, Sons of Liberty, Daughters of Liberty, Continental Congress, James Armistead, Francis Marion.
	Explain the significance of historical documents including key political concepts, origins of these concepts, and their role in American independence.

SS.5.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, the Magna Carta, the English Bill of Rights, the Mayflower Compact, Common Sense, the Declaration of Independence.</p>
	Examine and explain the changing roles and impact of significant women during the American Revolution.
SS.5.A.5.4:	<p>Clarifications: Examples may include, but are not limited to, Abigail Adams, Martha Washington, Phyllis Wheatley, Mercy Otis Warren, Molly Pitcher, Deborah Sampson, Margaret Gage.</p>
	Examine and compare major battles and military campaigns of the American Revolution.
SS.5.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, Lexington and Concord, Saratoga, Valley Forge, Yorktown, Savannah, Charleston, Trenton, Princeton, Bunker Hill.</p>
	Identify the contributions of foreign alliances and individuals to the outcome of the Revolution.
SS.5.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, France, Lafayette, Spain, de Galvez, von Stueben (aka de Steuben), Pulaski, Haiti.</p>
	Explain economic, military, and political factors which led to the end of the Revolutionary War.
SS.5.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, foreign alliances, rising cost for England, Treaty of Paris.</p>
	Evaluate the personal and political hardships resulting from the American Revolution.
SS.5.A.5.8:	<p>Clarifications: Examples may include, but are not limited to, financing the war effort, war time inflation, profiteering, loss of family and property, dissent within families and between colonies.</p>
	Discuss the impact and significance of land policies developed under the Confederation Congress (Northwest Ordinance of 1787).
SS.5.A.5.9:	<p>Clarifications: Examples may include, but are not limited to, those listed in the benchmark.</p>
	Examine the significance of the Constitution including its key political concepts, origins of those concepts, and their role in American democracy.
SS.5.A.5.10:	<p>Clarifications: Examples may include, but are not limited to, liberty, representative government, limited government, individual rights, "bundle of compromises."</p>
SS.5.A.6.1:	Describe the causes and effects of the Louisiana Purchase.
	Identify roles and contributions of significant people during the period of westward expansion.
SS.5.A.6.2:	<p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacagawea, York, Thomas Jefferson, Andrew Jackson, Tecumseh, Jean Baptiste Point Du Sable.</p>
	Examine 19th century advancements (canals, roads, steamboats, flat boats, overland wagons, Pony Express, railroads) in transportation and communication.
SS.5.A.6.3:	<p>Clarifications: In addition to those listed in the benchmark, examples may include, but are not limited to, the telegraph, Morse Code.</p>
	Explain the importance of the explorations west of the Mississippi River.
SS.5.A.6.4:	<p>Clarifications: Examples may include, but are not limited to, Meriwether Lewis and William Clark, Zebulon Pike, John Fremont, the Mormon migration, the Forty-niners, the Oregon Trail.</p>
	Identify the causes and effects of the War of 1812.
SS.5.A.6.5:	<p>Clarifications: Examples may include, but are not limited to, nationalism, neutrality in trade, impressment, border forts.</p>
	Explain how westward expansion affected Native Americans.
SS.5.A.6.6:	<p>Clarifications: Examples may include, but are not limited to, the Trail of Tears and Indian Removal Act.</p>
SS.5.A.6.7:	Discuss the concept of Manifest Destiny.
SS.5.A.6.8:	Describe the causes and effects of the Missouri Compromise.
	Describe the hardships of settlers along the overland trails to the west.
SS.5.A.6.9:	<p>Clarifications: Examples may include, but are not limited to, location of routes, terrain, rivers, climate, vegetation, conflicts with Native Americans.</p>
	Recognize that the Declaration of Independence affirms that every U.S. citizen has certain unalienable rights.
SS.5.CG.1.1:	<ul style="list-style-type: none"> • Students will identify the grievances detailed in the Declaration of Independence. • Students will describe the idea of "unalienable rights" in the Declaration of Independence as it relates to each citizen. • Students will discuss the consequences of governments not recognizing that citizens have certain unalienable rights.
	Explain how and why the U.S. government was created by the U.S. Constitution.
SS.5.CG.1.2:	<ul style="list-style-type: none"> • Students will identify the strengths and weaknesses of the Articles of Confederation. • Students will explain the goals of the 1787 Constitutional Convention. • Students will describe why compromises were made during the writing of the Constitution and identify compromises (e.g., Great Compromise, the Three-Fifths Compromise, the Electoral College). • Students will identify Federalist and Anti-Federalist arguments supporting and opposing the ratification of the U.S. Constitution.
SS.5.CG.1.3:	<p>Discuss arguments for adopting a representative form of government.</p> <ul style="list-style-type: none"> • Students will explain what is meant by a representative government.

SS.5.CG.1.4:	Describe the history, meaning and significance of the Bill of Rights. <ul style="list-style-type: none"> Students will describe how concerns about individual rights led to the inclusion of the Bill of Rights in the U.S. Constitution.
SS.5.CG.2.1:	Discuss the political ideas of Patriots, Loyalists and other colonists about the American Revolution. <ul style="list-style-type: none"> Students will describe the political philosophy of American Patriots and why those ideas led them to declare independence from the British Empire. Students will explain why colonists would choose to side with the British during the American Revolution. Students will examine motivations for the decision to not take a side during the American Revolution.
SS.5.CG.2.2:	Compare forms of political participation in the colonial period to today. <ul style="list-style-type: none"> Students will describe forms of political participation in the colonial period (e.g., serving on juries, militia service, participation in elections for government). Students will identify ways citizens participate in the political process today (e.g., serving on juries, participation in elections for government).
SS.5.CG.2.3:	Analyze how the U.S. Constitution expanded civic participation over time. <ul style="list-style-type: none"> Students will describe how the U.S. Constitution expanded voting rights through amendments and legislation including, but not limited to, the 15th, 19th, 24th and 26th Amendments, and the Voting Rights Act of 1965.
SS.5.CG.2.4:	Evaluate the importance of civic duties and responsibilities to the preservation of the United States' constitutional republic. <ul style="list-style-type: none"> Students will explain what it means for the United States to be a constitutional republic. Students will identify duties (e.g., obeying the law, paying taxes, serving on a jury) and responsibilities (e.g., voting, keeping informed on public issues) that citizens are expected to fulfill. Students will explain what could happen to the United States if citizens did not fulfill their civic duties and responsibilities.
SS.5.CG.2.5:	Identify individuals who represent the citizens of Florida at the national level. <ul style="list-style-type: none"> Students will identify Florida's U.S. senators and the U.S. representative for their district. Students will discuss the constitutional qualifications for office, term length, authority, duties, activities and compensation.
SS.5.CG.2.6:	Explain symbols and documents that represent the United States. <ul style="list-style-type: none"> Students will recognize the Great Seal of the United States and the Star-Spangled Banner as symbols that represent the United States. Students will recognize the U.S. Constitution (specifically the Bill of Rights) and the Emancipation Proclamation as documents that represent the United States.
SS.5.CG.3.1:	Describe the organizational structure and powers of the national government as defined in Articles I, II and III of the U.S. Constitution. <ul style="list-style-type: none"> Students will identify legislative, executive and judicial branch functions of the U.S. government as defined in Articles I, II and III of the U.S. Constitution. Students will explain why the Constitution divides the national government into three branches.
SS.5.CG.3.2:	Analyze how the U.S. Constitution and Bill of Rights limit the power of the national government and protect citizens from an oppressive government. <ul style="list-style-type: none"> Students will recognize examples of what to include, but not be limited to, popular sovereignty, rule of law, separation of powers, checks and balances, federalism, the amendment process, and the fundamental rights of citizens in the Bill of Rights.
SS.5.CG.3.3:	Explain the role of the court system in interpreting law and settling conflicts. <ul style="list-style-type: none"> Students will explain why the U.S. Supreme Court is the highest court in the system. Students will explain why both the United States and Florida have a Supreme Court.
SS.5.CG.3.4:	Describe the process for amending the U.S. Constitution. <ul style="list-style-type: none"> Students will explain why the U.S. Constitution includes the amendment process. Students will identify amendments to the U.S. Constitution.
SS.5.CG.3.5:	Explain how the U.S. Constitution influenced the Florida Constitution. <ul style="list-style-type: none"> Students will identify the purpose of a constitution (e.g., provides a framework for government, limits government authority, protects the rights of the people). Students will recognize the basic outline of the U.S. and Florida Constitutions (both have articles, amendments and preambles).
SS.5.CG.3.6:	Explain the relationship between the state and national governments. <ul style="list-style-type: none"> Students will define federalism as it applies to the United States. Students will provide examples of powers granted to the national government and those reserved to the states. Students will provide examples of cooperation between the U.S. and Florida governments.
SS.5.E.1.1:	Identify how trade promoted economic growth in North America from pre-Columbian times to 1850. <p>Clarifications: Examples are Triangular Trade and tobacco.</p>
SS.5.E.1.2:	Describe a market economy, and give examples of how the colonial and early American economy exhibited these characteristics.
SS.5.E.1.3:	Trace the development of technology and the impact of major inventions on business productivity during the early development of the United States. <p>Clarifications: Examples are Franklin stove, bifocals, double sided needle, cotton gin, Turtle submarine.</p>
SS.5.E.2.1:	Recognize the positive and negative effects of voluntary trade among Native Americans, European explorers, and colonists.
SS.5.G.1.1:	Interpret current and historical information using a variety of geographic tools. <p>Clarifications: Examples are maps, globes, Geographic Information Systems (GIS).</p>
SS.5.G.1.2:	Use latitude and longitude to locate places.
SS.5.G.1.3:	Identify major United States physical features on a map of North America. <p>Clarifications: Examples are Rocky Mountains, Appalachian Mountains, Mississippi River, Great Lakes, Great Plains, Rocky Mountains, Rio Grande, Lake Okeechobee, Mojave Desert.</p>
SS.5.G.1.4:	Construct maps, charts, and graphs to display geographic information.
SS.5.G.1.5:	Identify and locate the original thirteen colonies on a map of North America.
SS.5.G.1.6:	Locate and identify states, capitals, and United States Territories on a map.
SS.5.G.2.1:	Describe the push-pull factors (economy, natural hazards, tourism, climate, physical features) that influenced boundary changes within the United States.

SS.5.G.3.1:	<p>Describe the impact that past natural events have had on human and physical environments in the United States through 1850.</p> <p>Clarifications: An example is the harsh winter in Jamestown.</p>
SS.5.G.4.1:	<p>Use geographic knowledge and skills when discussing current events.</p> <p>Clarifications: Examples are recognizing patterns, mapping, graphing.</p>
SS.5.G.4.2:	<p>Use geography concepts and skills such as recognizing patterns, mapping, graphing to find solutions for local, state, or national problems.</p>
SS.5.HE.1.1:	<p>Define the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will define antisemitism as prejudice against or hatred of the Jewish people. • Students will recognize the Holocaust as history's most extreme example of antisemitism. • Students will identify examples of antisemitism (e.g., calling for, aiding, or justifying the killing or harming of Jews).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p>

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	<p>Use the accepted rules governing a specific format to create quality work.</p>

ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Give examples of school and public health policies that influence health promotion and disease prevention.
HE.5.C.2.4:	Clarifications: Head-lice guidelines, seat-belt and child-restraint laws, helmet laws, fire/severe weather/lockdown drills, school-bus rules, and immunization requirements.

General Course Information and Notes

GENERAL NOTES

Fifth Grade: United States History - The fifth grade Social Studies curriculum consists of the following content area strands: American History, Geography, Economics, and Civics. Fifth grade students will study the development of our nation with emphasis on the people, places and events up to approximately 1850. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the initial inhabitation, exploration, colonization, and early national periods of American History. So that students can see clearly the relationship between cause and effect in history, students should also have the opportunity to understand how individuals and events of this period influenced later events in the development of our nation.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Social Science (Grades 5-9)

M/J United States History (#2100010) 2018 - 2022 (current)

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.
	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects

SS.8.A.3.4:	on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
SS.8.A.4.9:	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements. Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles

	Grandison Finney, the Beecher family.
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications:

	Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
	Evaluate domestic and international interdependence.
SS.8.E.3.1:	Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
	Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.

LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and

efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.
HE.8.C.2.4:	Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Mathematics Benchmark Guidance - Instruction of U.S. History should include opportunities for students to interpret and create representations of historical events using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100010

Course Path: **Section:** Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
American and Western Hemispheric Histories >
Abbreviated Title: M/J US HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J United States History (#2100010) 2022 - 2023

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.
	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects

SS.8.A.3.4:	<p>on the outcome of the war.</p> <p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
SS.8.A.3.5:	<p>Describe the influence of individuals on social and political developments during the Revolutionary era.</p> <p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
SS.8.A.3.6:	<p>Examine the causes, course, and consequences of the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	<p>Examine the structure, content, and consequences of the Declaration of Independence.</p>
SS.8.A.3.8:	<p>Examine individuals and groups that affected political and social motivations during the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	<p>Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.</p>
SS.8.A.3.10:	<p>Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).</p>
SS.8.A.3.11:	<p>Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.</p>
SS.8.A.3.12:	<p>Examine the influences of George Washington's presidency in the formation of the new nation.</p> <p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
SS.8.A.3.13:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
SS.8.A.3.14:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.1:	<p>Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>
SS.8.A.4.6:	<p>Identify technological improvements (inventions/inventors) that contributed to industrial growth.</p> <p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
SS.8.A.4.7:	<p>Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.</p>
SS.8.A.4.8:	<p>Describe the influence of individuals on social and political developments of this era in American History.</p> <p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
SS.8.A.4.9:	<p>Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.</p> <p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles</p>

	Grandison Finney, the Beecher family.
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications:

	Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
	Evaluate domestic and international interdependence.
SS.8.E.3.1:	Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
	Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence.

MA.K12.MTR.3.1:

- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:	<p>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	<p>Critique school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.

4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100010

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 6 to 8 Education
Courses > Subject: Social Studies > **SubSubject:** American and Western Hemispheric Histories >
Abbreviated Title: M/J US HIST
Course Length: Year (Y)
Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved
Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J United States History (#2100010) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.8.A.1.1:	<p>Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	<p>Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.</p>
SS.8.A.1.3:	<p>Analyze current events relevant to American History topics through a variety of electronic and print media resources.</p> <p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	<p>Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.</p>
SS.8.A.1.5:	<p>Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.</p> <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.8.A.1.6:	<p>Compare interpretations of key events and issues throughout American History.</p> <p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	<p>View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.</p>
SS.8.A.2.1:	<p>Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.</p> <p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
SS.8.A.2.2:	<p>Compare the characteristics of the New England, Middle, and Southern colonies.</p> <p>Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.</p>
SS.8.A.2.3:	<p>Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.</p> <p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
SS.8.A.2.4:	<p>Identify the impact of key colonial figures on the economic, political, and social development of the colonies.</p> <p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
SS.8.A.2.5:	<p>Discuss the impact of colonial settlement on Native American populations.</p> <p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
SS.8.A.2.6:	<p>Examine the causes, course, and consequences of the French and Indian War.</p> <p>Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.</p>
SS.8.A.2.7:	<p>Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.</p>
SS.8.A.3.1:	<p>Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.</p> <p>Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.</p>
SS.8.A.3.2:	<p>Explain American colonial reaction to British policy from 1763 - 1774.</p> <p>Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.</p>
	<p>Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas</p>

SS.8.A.3.3:	Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.
SS.8.A.3.4:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/Industrial Lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick

	Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
SS.8.A.4.9:	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements. Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.
SS.8.A.4.10:	Analyze the impact of technological advancements on the agricultural economy and slave labor. Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy. Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.
SS.8.A.4.16:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
SS.8.A.4.17:	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period. Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.4.18:	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period. Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
SS.8.A.5.3:	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency. Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.
SS.8.A.5.6:	Compare significant Civil War battles and events and their effects on civilian populations. Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.
SS.8.A.5.7:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.CG.1.1:	Compare the views of Patriots, Loyalists and other colonists on limits of government authority, inalienable rights and resistance to tyranny. <ul style="list-style-type: none"> • Students will describe colonial forms of government prior to the American Revolution. • Students will evaluate the Loyalists' and Patriots' arguments for remaining loyal to the British Crown or seeking independence from Britain.
SS.8.CG.1.2:	Compare and contrast the 1838 Florida Constitution and 1868 Florida Constitution. <ul style="list-style-type: none"> • Students will explain how the 1868 Florida Constitution conformed with the Reconstruction Era amendments to the U.S. Constitution (e.g., citizenship, equal protection, suffrage).
SS.8.CG.1.3:	Explain the importance of the rule of law in the United States' constitutional republic. <ul style="list-style-type: none"> • Students will discuss the impact of the rule of law on U.S. citizens and government. • Students will recognize how the rule of law influences a society. • Students will identify how the rule of law protects citizens from arbitrary and abusive government. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, fair procedures, decisions based on the law, consistent application and enforcement of the law, transparency of institutions).

SS.8.CG.2.1:	Identify the constitutional provisions for establishing citizenship. <ul style="list-style-type: none"> Students will explain how the 14th Amendment establishes citizenship.
SS.8.CG.2.2:	Compare the responsibilities of citizens at the local, state and national levels. <ul style="list-style-type: none"> Students will recognize responsibilities of citizens (e.g., obeying the law, paying taxes, serving on a jury when summoned, registering with the Selective Service).
SS.8.CG.2.3:	Analyze the role of civic virtue in the lives of citizens and leaders from the Colonial period through Reconstruction. <ul style="list-style-type: none"> Students will understand how the idea of civic virtue changes in response to the attitudes of citizens and leaders over time.
SS.8.CG.2.4:	Explain how forms of civic and political participation changed from the Colonial period through Reconstruction. <ul style="list-style-type: none"> Students will describe significant acts of civic and political participation from the Colonial period through Reconstruction.
SS.8.CG.2.5:	Analyze how the Bill of Rights guarantees civil rights and liberties to citizens. <ul style="list-style-type: none"> Students will explain the meaning and purpose of each amendment in the Bill of Rights. Students will describe how the Bill of Rights affects citizens and government.
SS.8.CG.2.6:	Evaluate how amendments to the U.S. Constitution expanded opportunities for civic participation through Reconstruction. <ul style="list-style-type: none"> Students will identify constitutional amendments that address voting rights. Students will describe how specific constitutional amendments expanded access to the political process for various groups over time.
SS.8.CG.3.1:	Trace the foundational ideals and principles related to the U.S. government expressed in primary sources from the colonial period to Reconstruction. <ul style="list-style-type: none"> Students will identify foundational ideals and principles related to the U.S. government expressed in primary sources (e.g., the Mayflower Compact (1620); Common Sense (1776); the Declaration of Independence (1776); the U.S. Constitution (1789); the Declaration of Rights and Sentiments (1848); the Gettysburg Address (1863); Lincoln's Second Inaugural Address (1865)).
SS.8.E.1.1:	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects. <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
SS.8.E.2.2:	Explain the economic impact of government policies. <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
SS.8.E.3.1:	Evaluate domestic and international interdependence. <p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
SS.8.G.2.1:	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history. <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications. <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
SS.8.G.5.2:	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history. <p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
SS.8.G.6.2:	Illustrate places and events in U.S. history through the use of narratives and graphic representations. <p>Clarifications: Examples are maps, graphs, tables.</p>
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task.

MA.K12.MTR.1.1:

- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.</p>
HE.8.C.2.4:	<p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**
American and Western Hemispheric Histories >

Abbreviated Title: M/J US HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J United States History & Career Planning (#2100015) 2019 - 2022 (current)

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.

SS.8.A.3.4:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.

SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
SS.8.A.5.7:	Examine key events and peoples in Florida history as each impacts this era of American history. <p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	<p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.

	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
	Evaluate domestic and international interdependence.
SS.8.E.3.1:	Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
	Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their

MAFS.K12.MP.6.1:	own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.
HE.8.C.2.4:	Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Mathematics Benchmark Guidance - Instruction of U.S. History should include opportunities for students to interpret and create representations of historical events using mathematical tables, charts, and graphs.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled

course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

M/J United States History & Career Planning (#2100015) 2022 - 2023

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.

SS.8.A.3.4:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.

SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	<p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.

	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
	Evaluate domestic and international interdependence.
SS.8.E.3.1:	Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
	Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context.

MA.K12.MTR.3.1:

- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

ELA.K.12.EE.1.1:	<p>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</p> <p>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	<p>Critique school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.

7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.

8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100015

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
American and Western Hemispheric Histories >
Abbreviated Title: M/J US HIST&CAR PLAN
Course Length: Year (Y)
Course Attributes:
• Class Size Core Required
Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Elementary Grades 1-6)
Elementary Education (Grades K-6)

M/J United States History & Career Planning (#2100015) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.8.A.1.1:	<p>Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
SS.8.A.1.3:	Analyze current events relevant to American History topics through a variety of electronic and print media resources. <p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
SS.8.A.1.5:	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents. <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. <p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
SS.8.A.2.1:	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America. <p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. <p>Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.</p>
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. <p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. <p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. <p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. <p>Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.</p>
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.3.1:	Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774. <p>Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.</p>
	Explain American colonial reaction to British policy from 1763 - 1774.

SS.8.A.3.2:	<p>Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.</p>
SS.8.A.3.3:	<p>Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts.</p> <p>Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.</p>
SS.8.A.3.4:	<p>Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war.</p> <p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
SS.8.A.3.5:	<p>Describe the influence of individuals on social and political developments during the Revolutionary era.</p> <p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
SS.8.A.3.6:	<p>Examine the causes, course, and consequences of the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	<p>Examine the structure, content, and consequences of the Declaration of Independence.</p>
SS.8.A.3.8:	<p>Examine individuals and groups that affected political and social motivations during the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	<p>Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.</p>
SS.8.A.3.10:	<p>Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).</p>
SS.8.A.3.11:	<p>Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.</p>
SS.8.A.3.12:	<p>Examine the influences of George Washington's presidency in the formation of the new nation.</p> <p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
SS.8.A.3.13:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
SS.8.A.3.14:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.1:	<p>Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>
SS.8.A.4.6:	<p>Identify technological improvements (inventions/inventors) that contributed to industrial growth.</p> <p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
SS.8.A.4.7:	<p>Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.</p>

	Describe the influence of individuals on social and political developments of this era in American History.
SS.8.A.4.8:	<p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.
SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.CG.1.1:	<p>Compare the views of Patriots, Loyalists and other colonists on limits of government authority, inalienable rights and resistance to tyranny.</p> <ul style="list-style-type: none"> • Students will describe colonial forms of government prior to the American Revolution. • Students will evaluate the Loyalists' and Patriots' arguments for remaining loyal to the British Crown or seeking independence from Britain.
SS.8.CG.1.2:	<p>Compare and contrast the 1838 Florida Constitution and 1868 Florida Constitution.</p> <ul style="list-style-type: none"> • Students will explain how the 1868 Florida Constitution conformed with the Reconstruction Era amendments to the U.S. Constitution (e.g., citizenship, equal protection, suffrage).
	Explain the importance of the rule of law in the United States' constitutional republic.
	<ul style="list-style-type: none"> • Students will discuss the impact of the rule of law on U.S. citizens and government.

SS.8.CG.1.3:	<ul style="list-style-type: none"> • Students will recognize how the rule of law influences a society. • Students will identify how the rule of law protects citizens from arbitrary and abusive government. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, fair procedures, decisions based on the law, consistent application and enforcement of the law, transparency of institutions).
SS.8.CG.2.1:	<p>Identify the constitutional provisions for establishing citizenship.</p> <ul style="list-style-type: none"> • Students will explain how the 14th Amendment establishes citizenship.
SS.8.CG.2.2:	<p>Compare the responsibilities of citizens at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will recognize responsibilities of citizens (e.g., obeying the law, paying taxes, serving on a jury when summoned, registering with the Selective Service).
SS.8.CG.2.3:	<p>Analyze the role of civic virtue in the lives of citizens and leaders from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will understand how the idea of civic virtue changes in response to the attitudes of citizens and leaders over time.
SS.8.CG.2.4:	<p>Explain how forms of civic and political participation changed from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will describe significant acts of civic and political participation from the Colonial period through Reconstruction.
SS.8.CG.2.5:	<p>Analyze how the Bill of Rights guarantees civil rights and liberties to citizens.</p> <ul style="list-style-type: none"> • Students will explain the meaning and purpose of each amendment in the Bill of Rights. • Students will describe how the Bill of Rights affects citizens and government.
SS.8.CG.2.6:	<p>Evaluate how amendments to the U.S. Constitution expanded opportunities for civic participation through Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify constitutional amendments that address voting rights. • Students will describe how specific constitutional amendments expanded access to the political process for various groups over time.
SS.8.CG.3.1:	<p>Trace the foundational ideals and principles related to the U.S. government expressed in primary sources from the colonial period to Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify foundational ideals and principles related to the U.S. government expressed in primary sources (e.g., the Mayflower Compact (1620); Common Sense (1776); the Declaration of Independence (1776); the U.S. Constitution (1789); the Declaration of Rights and Sentiments (1848); the Gettysburg Address (1863); Lincoln's Second Inaugural Address (1865)).
SS.8.E.1.1:	<p>Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.</p> <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	<p>Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.</p>
SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	<p>Assess the role of Africans and other minority groups in the economic development of the United States.</p>
SS.8.E.3.1:	<p>Evaluate domestic and international interdependence.</p> <p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	<p>Use maps to explain physical and cultural attributes of major regions throughout American history.</p>
SS.8.G.1.2:	<p>Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.</p>
SS.8.G.2.1:	<p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p> <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	<p>Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.</p>
SS.8.G.3.1:	<p>Locate and describe in geographic terms the major ecosystems of the United States.</p>
SS.8.G.3.2:	<p>Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.</p>
SS.8.G.4.1:	<p>Interpret population growth and other demographic data for any given place in the United States throughout its history.</p>
SS.8.G.4.2:	<p>Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.</p>
SS.8.G.4.3:	<p>Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.</p>
SS.8.G.4.4:	<p>Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.</p>
SS.8.G.4.5:	<p>Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.</p>
SS.8.G.4.6:	<p>Use political maps to describe changes in boundaries and governance throughout American history.</p>
SS.8.G.5.1:	<p>Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.</p>
SS.8.G.5.2:	<p>Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.</p> <p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	<p>Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.</p>
SS.8.G.6.2:	<p>Illustrate places and events in U.S. history through the use of narratives and graphic representations.</p> <p>Clarifications: Examples are maps, graphs, tables.</p>

MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Critique school and public health policies that influence health promotion and disease prevention.

HE.8.C.2.4:

Clarifications:

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
SS.8.A.1.3:	Analyze current events relevant to American History topics through a variety of electronic and print media resources. Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
SS.8.A.1.5:	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
SS.8.A.2.1:	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America. Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.3.1:	Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774. Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications:

	Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.
SS.8.A.3.4:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.

SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	<p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.

	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
	Evaluate domestic and international interdependence.
SS.8.E.3.1:	Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
	Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their

MAFS.K12.MP.6.1:	own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.
HE.8.C.2.4:	Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Instruction of U.S. History should include opportunities for students to interpret and create representations of historical events using mathematical tables, charts, and graphs.

Special Notes: Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

M/J United States History Advanced (#2100020) 2022 - 2023

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.
	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects

SS.8.A.3.4:	<p>on the outcome of the war.</p> <p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
SS.8.A.3.5:	<p>Describe the influence of individuals on social and political developments during the Revolutionary era.</p> <p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
SS.8.A.3.6:	<p>Examine the causes, course, and consequences of the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	<p>Examine the structure, content, and consequences of the Declaration of Independence.</p>
SS.8.A.3.8:	<p>Examine individuals and groups that affected political and social motivations during the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	<p>Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.</p>
SS.8.A.3.10:	<p>Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).</p>
SS.8.A.3.11:	<p>Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.</p>
SS.8.A.3.12:	<p>Examine the influences of George Washington's presidency in the formation of the new nation.</p> <p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
SS.8.A.3.13:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
SS.8.A.3.14:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.1:	<p>Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>
SS.8.A.4.6:	<p>Identify technological improvements (inventions/inventors) that contributed to industrial growth.</p> <p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
SS.8.A.4.7:	<p>Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.</p>
SS.8.A.4.8:	<p>Describe the influence of individuals on social and political developments of this era in American History.</p> <p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
SS.8.A.4.9:	<p>Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.</p> <p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles</p>

	Grandison Finney, the Beecher family.
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications:

	Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
	Evaluate domestic and international interdependence.
SS.8.E.3.1:	Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
	Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence.

MA.K12.MTR.3.1:

- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:	<p>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	<p>Critique school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes: Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

QUALIFICATIONS

added elem ed cert options, per commissioner approval on 1/23/18

GENERAL INFORMATION

Course Number: 2100020

Course Path: Section: Grades PreK to 12 Education
 Courses > **Grade Group:** Grades 6 to 8 Education
 Courses > **Subject:** Social Studies > **SubSubject:**
 American and Western Hemispheric Histories >

Abbreviated Title: M/J US HIST ADV

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J United States History Advanced (#2100020) 2023 - And

Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.8.A.1.1:	<p>Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
SS.8.A.1.3:	Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	<p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
SS.8.A.1.5:	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	<p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History.
SS.8.A.1.6:	<p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
SS.8.A.2.1:	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	<p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies.
SS.8.A.2.2:	<p>Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.</p>
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.
SS.8.A.2.3:	<p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies.
SS.8.A.2.4:	<p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations.
SS.8.A.2.5:	<p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War.
SS.8.A.2.6:	<p>Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.</p>
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.3.1:	Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	<p>Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.</p>
	Explain American colonial reaction to British policy from 1763 - 1774.

SS.8.A.3.2:	<p>Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.</p>
SS.8.A.3.3:	<p>Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts.</p> <p>Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.</p>
SS.8.A.3.4:	<p>Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war.</p> <p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
SS.8.A.3.5:	<p>Describe the influence of individuals on social and political developments during the Revolutionary era.</p> <p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
SS.8.A.3.6:	<p>Examine the causes, course, and consequences of the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	<p>Examine the structure, content, and consequences of the Declaration of Independence.</p>
SS.8.A.3.8:	<p>Examine individuals and groups that affected political and social motivations during the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	<p>Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.</p>
SS.8.A.3.10:	<p>Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).</p>
SS.8.A.3.11:	<p>Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.</p>
SS.8.A.3.12:	<p>Examine the influences of George Washington's presidency in the formation of the new nation.</p> <p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
SS.8.A.3.13:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
SS.8.A.3.14:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.1:	<p>Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>
SS.8.A.4.6:	<p>Identify technological improvements (inventions/inventors) that contributed to industrial growth.</p> <p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
SS.8.A.4.7:	<p>Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.</p>

	Describe the influence of individuals on social and political developments of this era in American History.
SS.8.A.4.8:	<p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.
SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.CG.1.1:	<p>Compare the views of Patriots, Loyalists and other colonists on limits of government authority, inalienable rights and resistance to tyranny.</p> <ul style="list-style-type: none"> • Students will describe colonial forms of government prior to the American Revolution. • Students will evaluate the Loyalists' and Patriots' arguments for remaining loyal to the British Crown or seeking independence from Britain.
SS.8.CG.1.2:	<p>Compare and contrast the 1838 Florida Constitution and 1868 Florida Constitution.</p> <ul style="list-style-type: none"> • Students will explain how the 1868 Florida Constitution conformed with the Reconstruction Era amendments to the U.S. Constitution (e.g., citizenship, equal protection, suffrage).
	Explain the importance of the rule of law in the United States' constitutional republic.
	<ul style="list-style-type: none"> • Students will discuss the impact of the rule of law on U.S. citizens and government.

SS.8.CG.1.3:	<ul style="list-style-type: none"> • Students will recognize how the rule of law influences a society. • Students will identify how the rule of law protects citizens from arbitrary and abusive government. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, fair procedures, decisions based on the law, consistent application and enforcement of the law, transparency of institutions).
SS.8.CG.2.1:	<p>Identify the constitutional provisions for establishing citizenship.</p> <ul style="list-style-type: none"> • Students will explain how the 14th Amendment establishes citizenship.
SS.8.CG.2.2:	<p>Compare the responsibilities of citizens at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will recognize responsibilities of citizens (e.g., obeying the law, paying taxes, serving on a jury when summoned, registering with the Selective Service).
SS.8.CG.2.3:	<p>Analyze the role of civic virtue in the lives of citizens and leaders from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will understand how the idea of civic virtue changes in response to the attitudes of citizens and leaders over time.
SS.8.CG.2.4:	<p>Explain how forms of civic and political participation changed from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will describe significant acts of civic and political participation from the Colonial period through Reconstruction.
SS.8.CG.2.5:	<p>Analyze how the Bill of Rights guarantees civil rights and liberties to citizens.</p> <ul style="list-style-type: none"> • Students will explain the meaning and purpose of each amendment in the Bill of Rights. • Students will describe how the Bill of Rights affects citizens and government.
SS.8.CG.2.6:	<p>Evaluate how amendments to the U.S. Constitution expanded opportunities for civic participation through Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify constitutional amendments that address voting rights. • Students will describe how specific constitutional amendments expanded access to the political process for various groups over time.
SS.8.CG.3.1:	<p>Trace the foundational ideals and principles related to the U.S. government expressed in primary sources from the colonial period to Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify foundational ideals and principles related to the U.S. government expressed in primary sources (e.g., the Mayflower Compact (1620); Common Sense (1776); the Declaration of Independence (1776); the U.S. Constitution (1789); the Declaration of Rights and Sentiments (1848); the Gettysburg Address (1863); Lincoln's Second Inaugural Address (1865)).
SS.8.E.1.1:	<p>Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.</p> <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	<p>Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.</p>
SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	<p>Assess the role of Africans and other minority groups in the economic development of the United States.</p>
SS.8.E.3.1:	<p>Evaluate domestic and international interdependence.</p> <p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	<p>Use maps to explain physical and cultural attributes of major regions throughout American history.</p>
SS.8.G.1.2:	<p>Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.</p>
SS.8.G.2.1:	<p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p> <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	<p>Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.</p>
SS.8.G.3.1:	<p>Locate and describe in geographic terms the major ecosystems of the United States.</p>
SS.8.G.3.2:	<p>Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.</p>
SS.8.G.4.1:	<p>Interpret population growth and other demographic data for any given place in the United States throughout its history.</p>
SS.8.G.4.2:	<p>Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.</p>
SS.8.G.4.3:	<p>Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.</p>
SS.8.G.4.4:	<p>Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.</p>
SS.8.G.4.5:	<p>Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.</p>
SS.8.G.4.6:	<p>Use political maps to describe changes in boundaries and governance throughout American history.</p>
SS.8.G.5.1:	<p>Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.</p>
SS.8.G.5.2:	<p>Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.</p> <p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	<p>Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.</p>
SS.8.G.6.2:	<p>Illustrate places and events in U.S. history through the use of narratives and graphic representations.</p> <p>Clarifications: Examples are maps, graphs, tables.</p>

MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SI.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

ELD.K12.ELL.SS.1:

Critique school and public health policies that influence health promotion and disease prevention.

HE.8.C.2.4:

Clarifications:

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes: Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

QUALIFICATIONS

added elem ed cert options, per commissioner approval on 1/23/18

GENERAL INFORMATION

Course Number: 2100020

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 6 to 8 Education
Courses > Subject: Social Studies > **SubSubject:**

American and Western Hemispheric Histories >

Abbreviated Title: M/J US HIST ADV

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J United States History Advanced & Career Planning (#2100025) 2019 - 2022 (current)

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.

SS.8.A.3.4:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.

SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
SS.8.A.5.3:	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency. Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
SS.8.A.5.7:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	<p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.

SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	<p>Assess the role of Africans and other minority groups in the economic development of the United States.</p> <p>Evaluate domestic and international interdependence.</p>
SS.8.E.3.1:	<p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
SS.8.G.2.1:	<p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p> <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
SS.8.G.5.2:	<p>Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.</p> <p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
SS.8.G.6.2:	<p>Illustrate places and events in U.S. history through the use of narratives and graphic representations.</p> <p>Clarifications: Examples are maps, graphs, tables.</p>
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their

MAFS.K12.MP.6.1:	own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.
HE.8.C.2.4:	Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Instruction of U.S. History should include opportunities for students to interpret and create representations of historical events using mathematical tables, charts, and graphs.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.

5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100025

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**
American and Western Hemispheric Histories >

Abbreviated Title: M/J US HIS ADV & C/P

Course Length: Year (Y)

Course Attributes:

- Honors
- Class Size Core Required

Course Level: 3

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J United States History Advanced & Career Planning (#2100025) 2022 - 2023

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies. Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War. Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America. Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.3.2:	Explain American colonial reaction to British policy from 1763 - 1774. Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.3.3:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts. Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.

SS.8.A.3.4:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war. Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.

SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	<p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.

SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	<p>Assess the role of Africans and other minority groups in the economic development of the United States.</p> <p>Evaluate domestic and international interdependence.</p>
SS.8.E.3.1:	<p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	<p>Use maps to explain physical and cultural attributes of major regions throughout American history.</p>
SS.8.G.1.2:	<p>Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.</p> <p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p>
SS.8.G.2.1:	<p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	<p>Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.</p>
SS.8.G.3.1:	<p>Locate and describe in geographic terms the major ecosystems of the United States.</p>
SS.8.G.3.2:	<p>Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.</p>
SS.8.G.4.1:	<p>Interpret population growth and other demographic data for any given place in the United States throughout its history.</p>
SS.8.G.4.2:	<p>Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.</p>
SS.8.G.4.3:	<p>Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.</p>
SS.8.G.4.4:	<p>Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.</p>
SS.8.G.4.5:	<p>Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.</p>
SS.8.G.4.6:	<p>Use political maps to describe changes in boundaries and governance throughout American history.</p>
SS.8.G.5.1:	<p>Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.</p> <p>Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.</p>
SS.8.G.5.2:	<p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	<p>Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.</p> <p>Illustrate places and events in U.S. history through the use of narratives and graphic representations.</p>
SS.8.G.6.2:	<p>Clarifications: Examples are maps, graphs, tables.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context.

MA.K12.MTR.3.1:

- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

ELA.K.12.EE.1.1:	<p>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</p> <p>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	<p>Critique school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.

- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100025

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Social Studies > **SubSubject:** American and Western Hemispheric Histories > **Abbreviated Title:** M/J US HIS ADV & C/P
Course Length: Year (Y)
Course Attributes:

- Honors
- Class Size Core Required

Course Level: 3

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)
Middle Grades Integrated Curriculum (Middle Grades 5-9)
Social Science (Grades 5-9)
Social Science (Grades 6-12)

M/J United States History Advanced & Career Planning (#2100025) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.8.A.1.1:	<p>Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
SS.8.A.1.3:	Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	<p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
SS.8.A.1.5:	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	<p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History.
SS.8.A.1.6:	<p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
SS.8.A.2.1:	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	<p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
SS.8.A.2.2:	Compare the characteristics of the New England, Middle, and Southern colonies.
SS.8.A.2.2:	<p>Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.</p>
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.
SS.8.A.2.3:	<p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies.
SS.8.A.2.4:	<p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations.
SS.8.A.2.5:	<p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
SS.8.A.2.6:	Examine the causes, course, and consequences of the French and Indian War.
SS.8.A.2.6:	<p>Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.</p>
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.3.1:	Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.3.1:	<p>Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.</p>
	Explain American colonial reaction to British policy from 1763 - 1774.

SS.8.A.3.2:	<p>Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.</p>
SS.8.A.3.3:	<p>Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts.</p> <p>Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.</p>
SS.8.A.3.4:	<p>Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war.</p> <p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
SS.8.A.3.5:	<p>Describe the influence of individuals on social and political developments during the Revolutionary era.</p> <p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
SS.8.A.3.6:	<p>Examine the causes, course, and consequences of the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	<p>Examine the structure, content, and consequences of the Declaration of Independence.</p>
SS.8.A.3.8:	<p>Examine individuals and groups that affected political and social motivations during the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	<p>Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.</p>
SS.8.A.3.10:	<p>Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).</p>
SS.8.A.3.11:	<p>Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.</p>
SS.8.A.3.12:	<p>Examine the influences of George Washington's presidency in the formation of the new nation.</p> <p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
SS.8.A.3.13:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
SS.8.A.3.14:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.1:	<p>Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>
SS.8.A.4.6:	<p>Identify technological improvements (inventions/inventors) that contributed to industrial growth.</p> <p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
SS.8.A.4.7:	<p>Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.</p>

	Describe the influence of individuals on social and political developments of this era in American History.
SS.8.A.4.8:	<p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements.
SS.8.A.4.9:	<p>Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history.
	Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency.
SS.8.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War.
	Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
	Compare significant Civil War battles and events and their effects on civilian populations.
SS.8.A.5.6:	<p>Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.CG.1.1:	<p>Compare the views of Patriots, Loyalists and other colonists on limits of government authority, inalienable rights and resistance to tyranny.</p> <ul style="list-style-type: none"> • Students will describe colonial forms of government prior to the American Revolution. • Students will evaluate the Loyalists' and Patriots' arguments for remaining loyal to the British Crown or seeking independence from Britain.
SS.8.CG.1.2:	<p>Compare and contrast the 1838 Florida Constitution and 1868 Florida Constitution.</p> <ul style="list-style-type: none"> • Students will explain how the 1868 Florida Constitution conformed with the Reconstruction Era amendments to the U.S. Constitution (e.g., citizenship, equal protection, suffrage).
	Explain the importance of the rule of law in the United States' constitutional republic.
	<ul style="list-style-type: none"> • Students will discuss the impact of the rule of law on U.S. citizens and government.

SS.8.CG.1.3:	<ul style="list-style-type: none"> • Students will recognize how the rule of law influences a society. • Students will identify how the rule of law protects citizens from arbitrary and abusive government. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, fair procedures, decisions based on the law, consistent application and enforcement of the law, transparency of institutions).
SS.8.CG.2.1:	<p>Identify the constitutional provisions for establishing citizenship.</p> <ul style="list-style-type: none"> • Students will explain how the 14th Amendment establishes citizenship.
SS.8.CG.2.2:	<p>Compare the responsibilities of citizens at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will recognize responsibilities of citizens (e.g., obeying the law, paying taxes, serving on a jury when summoned, registering with the Selective Service).
SS.8.CG.2.3:	<p>Analyze the role of civic virtue in the lives of citizens and leaders from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will understand how the idea of civic virtue changes in response to the attitudes of citizens and leaders over time.
SS.8.CG.2.4:	<p>Explain how forms of civic and political participation changed from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will describe significant acts of civic and political participation from the Colonial period through Reconstruction.
SS.8.CG.2.5:	<p>Analyze how the Bill of Rights guarantees civil rights and liberties to citizens.</p> <ul style="list-style-type: none"> • Students will explain the meaning and purpose of each amendment in the Bill of Rights. • Students will describe how the Bill of Rights affects citizens and government.
SS.8.CG.2.6:	<p>Evaluate how amendments to the U.S. Constitution expanded opportunities for civic participation through Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify constitutional amendments that address voting rights. • Students will describe how specific constitutional amendments expanded access to the political process for various groups over time.
SS.8.CG.3.1:	<p>Trace the foundational ideals and principles related to the U.S. government expressed in primary sources from the colonial period to Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify foundational ideals and principles related to the U.S. government expressed in primary sources (e.g., the Mayflower Compact (1620); Common Sense (1776); the Declaration of Independence (1776); the U.S. Constitution (1789); the Declaration of Rights and Sentiments (1848); the Gettysburg Address (1863); Lincoln's Second Inaugural Address (1865)).
SS.8.E.1.1:	<p>Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.</p> <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	<p>Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.</p>
SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	<p>Assess the role of Africans and other minority groups in the economic development of the United States.</p>
SS.8.E.3.1:	<p>Evaluate domestic and international interdependence.</p> <p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	<p>Use maps to explain physical and cultural attributes of major regions throughout American history.</p>
SS.8.G.1.2:	<p>Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.</p>
SS.8.G.2.1:	<p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p> <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	<p>Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.</p>
SS.8.G.3.1:	<p>Locate and describe in geographic terms the major ecosystems of the United States.</p>
SS.8.G.3.2:	<p>Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.</p>
SS.8.G.4.1:	<p>Interpret population growth and other demographic data for any given place in the United States throughout its history.</p>
SS.8.G.4.2:	<p>Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.</p>
SS.8.G.4.3:	<p>Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.</p>
SS.8.G.4.4:	<p>Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.</p>
SS.8.G.4.5:	<p>Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.</p>
SS.8.G.4.6:	<p>Use political maps to describe changes in boundaries and governance throughout American history.</p>
SS.8.G.5.1:	<p>Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.</p>
SS.8.G.5.2:	<p>Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.</p> <p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	<p>Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.</p>
SS.8.G.6.2:	<p>Illustrate places and events in U.S. history through the use of narratives and graphic representations.</p> <p>Clarifications: Examples are maps, graphs, tables.</p>

MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Critique school and public health policies that influence health promotion and disease prevention.

HE.8.C.2.4:

Clarifications:

General Course Information and Notes

GENERAL NOTES

Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard

should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

M/J Florida History (#2100030) 2015 - 2022 (current)

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class). Examine key events in Florida history as each impacts this era of American history.
SS.8.A.3.16:	Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations. Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.
SS.8.A.4.5:	Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
	Describe the influence of individuals on social and political developments of this era in American History.

SS.8.A.4.8:	<p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	<p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
	Explain the economic impact of government policies.
SS.8.E.2.2:	<p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	<p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	<p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.

SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States. Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history. Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic. Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.1:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.8.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. d. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting Summarize numerical data sets in relation to their context, such as by: a. Reporting the number of observations.

MAFS.6.SP.2.5:	<p>b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.</p> <p>c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.</p> <p>d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.</p>
<p>Standard Relation to Course: Supporting</p>	
<p>Make sense of problems and persevere in solving them.</p>	
MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
<p>Construct viable arguments and critique the reasoning of others.</p>	
MAFS.K12.MP.3.1:	<p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
<p>Use appropriate tools strategically.</p>	
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
<p>Attend to precision.</p>	
MAFS.K12.MP.6.1:	<p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.8.C.2.4:	<p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J Florida - The social studies curriculum for this course consists of the following content area strands: American History, Economics, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the state of Florida by examining the political, economic, social, military and cultural events that affected the state. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Florida including, but not limited to, the evolution of Florida's diverse heritage through Spanish, French, British and American occupations, Florida's Native American population, United States annexation and territorial experience, statehood, Florida's role in sectionalism, Florida's system of slavery, Civil War and Reconstruction, Florida's diverse geographic regions and population groups, state government, modern day Florida's successes and challenges, and the projection of Florida's future development. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

GENERAL INFORMATION

Course Number: 2100030

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

American and Western Hemispheric Histories >

Abbreviated Title: M/J FLORIDA HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J Florida History (#2100030) 2022 - 2023

Course Standards

Name	Description
SS.8.A.1.1:	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf .
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect. Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials. Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.1.6:	Compare interpretations of key events and issues throughout American History. Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts. Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.3:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources. Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.2.4:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies. Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.2.5:	Discuss the impact of colonial settlement on Native American populations. Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class). Examine key events in Florida history as each impacts this era of American history.
SS.8.A.3.16:	Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations. Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.
SS.8.A.4.5:	Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
	Describe the influence of individuals on social and political developments of this era in American History.

SS.8.A.4.8:	Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.
SS.8.E.1.1:	Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
	Explain the economic impact of government policies.
SS.8.E.2.2:	Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.
SS.8.G.2.1:	Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.
SS.8.G.2.2:	Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.

SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States. Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history. Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul style="list-style-type: none"> Focus on relevant details within a problem.

MA.K12.MTR.5.1:

- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.
HE.8.C.2.4:	Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

M/J Florida - The social studies curriculum for this course consists of the following content area strands: American History, Economics, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the state of Florida by examining the political, economic, social, military and cultural events that affected the state. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Florida including, but not limited to, the evolution of Florida's diverse heritage through Spanish, French, British and American occupations, Florida's Native American population, United States annexation and territorial experience, statehood, Florida's role in sectionalism, Florida's system of slavery, Civil War and Reconstruction, Florida's diverse geographic regions and population groups, state government, modern day Florida's successes and challenges, and the projection of Florida's future development. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100030

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

American and Western Hemispheric Histories >

Abbreviated Title: M/J FLORIDA HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J Florida History (#2100030) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.8.A.1.1:	<p>Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	<p>Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.</p>
SS.8.A.1.3:	<p>Analyze current events relevant to American History topics through a variety of electronic and print media resources.</p> <p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	<p>Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.</p>
SS.8.A.1.5:	<p>Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.</p> <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.8.A.1.6:	<p>Compare interpretations of key events and issues throughout American History.</p> <p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	<p>View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.</p>
SS.8.A.2.1:	<p>Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.</p> <p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
SS.8.A.2.3:	<p>Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.</p> <p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
SS.8.A.2.4:	<p>Identify the impact of key colonial figures on the economic, political, and social development of the colonies.</p> <p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
SS.8.A.2.5:	<p>Discuss the impact of colonial settlement on Native American populations.</p> <p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
SS.8.A.2.7:	<p>Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>

	Identify technological improvements (inventions/inventors) that contributed to industrial growth.
SS.8.A.4.6:	<p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
	Describe the influence of individuals on social and political developments of this era in American History.
SS.8.A.4.8:	<p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
	Analyze the impact of technological advancements on the agricultural economy and slave labor.
SS.8.A.4.10:	<p>Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.4.17:	<p>Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period.
SS.8.A.4.18:	<p>Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate).
	Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
	Examine key events and peoples in Florida history as each impacts this era of American history.
SS.8.A.5.7:	<p>Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.CG.2.1:	<p>Identify the constitutional provisions for establishing citizenship.</p> <ul style="list-style-type: none"> Students will explain how the 14th Amendment establishes citizenship.
SS.8.CG.2.3:	<p>Analyze the role of civic virtue in the lives of citizens and leaders from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> Students will understand how the idea of civic virtue changes in response to the attitudes of citizens and leaders over time.
SS.8.CG.2.4:	<p>Explain how forms of civic and political participation changed from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> Students will describe significant acts of civic and political participation from the Colonial period through Reconstruction.
SS.8.CG.2.6:	<p>Evaluate how amendments to the U.S. Constitution expanded opportunities for civic participation through Reconstruction.</p> <ul style="list-style-type: none"> Students will identify constitutional amendments that address voting rights. Students will describe how specific constitutional amendments expanded access to the political process for various groups over time.
SS.8.CG.3.1:	<p>Trace the foundational ideals and principles related to the U.S. government expressed in primary sources from the colonial period to Reconstruction.</p> <ul style="list-style-type: none"> Students will identify foundational ideals and principles related to the U.S. government expressed in primary sources (e.g., the Mayflower Compact (1620); Common Sense (1776); the Declaration of Independence (1776); the U.S. Constitution (1789); the Declaration of Rights and Sentiments (1848); the Gettysburg Address (1863); Lincoln's Second Inaugural Address (1865)).
SS.8.E.1.1:	<p>Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.</p> <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
SS.8.G.2.1:	<p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p> <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic,

SS.8.G.2.2:	physical, or political ramifications. Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States. Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.
SS.8.G.5.2:	Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history. Illustrate places and events in U.S. history through the use of narratives and graphic representations.
SS.8.G.6.2:	Clarifications: Examples are maps, graphs, tables.
MA.K.12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K.12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K.12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others.

MA.K12.MTR.4.1:

- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

ELA.K12.EE.3.1:	Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Critique school and public health policies that influence health promotion and disease prevention.
HE.8.C.2.4:	Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

M/J Florida - The social studies curriculum for this course consists of the following content area strands: American History, Economics, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the state of Florida by examining the political, economic, social, military and cultural events that affected the state. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Florida including, but not limited to, the evolution of Florida's diverse heritage through Spanish, French, British and American occupations, Florida's Native American population, United States annexation and territorial experience, statehood, Florida's role in sectionalism, Florida's system of slavery, Civil War and Reconstruction, Florida's diverse geographic regions and population groups, state government, modern day Florida's successes and challenges, and the projection of Florida's future development. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100030

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

American and Western Hemispheric Histories >

Abbreviated Title: M/J FLORIDA HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J International Baccalaureate MYP United States History (#2100040) 2014 - 2023 (current)

General Course Information and Notes

GENERAL NOTES

The curriculum description for this IB course is provided at <http://www.ibo.org/en/programmes/>.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course</p>

	(EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.2:	<p>Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.4:	<p>Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.5:	<p>Distinguish how the Constitution safeguards and limits individual rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
SS.7.C.2.8:	<p>Identify America's current political parties, and illustrate their ideas about government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.9:	<p>Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.10:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.11:	<p>Analyze media and political communications (bias, symbolism, propaganda).</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.12:	<p>Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.13:	<p>Examine multiple perspectives on public and current issues.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.14:	<p>Conduct a service project to further the public good.</p> <p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
SS.7.C.3.1:	<p>Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Compare parliamentary, federal, confederal, and unitary systems of government.
SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.
SS.7.C.3.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Identify the relationship and division of powers between the federal government and state governments.
SS.7.C.3.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Explain the Constitutional amendment process.
SS.7.C.3.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate Constitutional rights and their impact on individuals and society.
SS.7.C.3.6:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.
SS.7.C.3.7:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.
SS.7.C.3.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Illustrate the law making process at the local, state, and federal levels.
SS.7.C.3.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Identify sources and types (civil, criminal, constitutional, military) of law.
SS.7.C.3.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Diagram the levels, functions, and powers of courts at the state and federal levels.
SS.7.C.3.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.
SS.7.C.3.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare the constitutions of the United States and Florida.
SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.
SS.8.A.1.1:	<p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
	Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	<p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	<p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
	Compare interpretations of key events and issues throughout American History.
SS.8.A.1.6:	<p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	<p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
	Compare the characteristics of the New England, Middle, and Southern colonies.
SS.8.A.2.2:	<p>Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.</p>
	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.
SS.8.A.2.3:	<p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
	Identify the impact of key colonial figures on the economic, political, and social development of the colonies.
SS.8.A.2.4:	<p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
	Discuss the impact of colonial settlement on Native American populations.
SS.8.A.2.5:	<p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
	Examine the causes, course, and consequences of the French and Indian War.
SS.8.A.2.6:	<p>Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.</p>
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.

SS.8.A.3.1:	<p>Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.</p> <p>Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.</p>
SS.8.A.3.2:	<p>Explain American colonial reaction to British policy from 1763 - 1774.</p> <p>Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.</p>
SS.8.A.3.3:	<p>Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts.</p> <p>Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.</p>
SS.8.A.3.4:	<p>Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war.</p> <p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
SS.8.A.3.5:	<p>Describe the influence of individuals on social and political developments during the Revolutionary era.</p> <p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
SS.8.A.3.6:	<p>Examine the causes, course, and consequences of the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	<p>Examine the structure, content, and consequences of the Declaration of Independence.</p>
SS.8.A.3.8:	<p>Examine individuals and groups that affected political and social motivations during the American Revolution.</p> <p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	<p>Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.</p>
SS.8.A.3.10:	<p>Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).</p>
SS.8.A.3.11:	<p>Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.</p>
SS.8.A.3.12:	<p>Examine the influences of George Washington's presidency in the formation of the new nation.</p> <p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
SS.8.A.3.13:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
SS.8.A.3.14:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.</p> <p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	<p>Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).</p>
SS.8.A.3.16:	<p>Examine key events in Florida history as each impacts this era of American history.</p> <p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
SS.8.A.4.1:	<p>Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).</p>
SS.8.A.4.2:	<p>Describe the debate surrounding the spread of slavery into western territories and Florida.</p> <p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
SS.8.A.4.3:	<p>Examine the experiences and perspectives of significant individuals and groups during this era of American History.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	<p>Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.</p>
SS.8.A.4.5:	<p>Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.</p> <p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>

SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry. Describe the influence of individuals on social and political developments of this era in American History.
SS.8.A.4.8:	Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
SS.8.A.4.9:	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements. Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.
SS.8.A.4.10:	Analyze the impact of technological advancements on the agricultural economy and slave labor. Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.
SS.8.A.4.17:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
SS.8.A.4.18:	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period. Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
SS.8.A.5.3:	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency. Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.
SS.8.A.5.6:	Compare significant Civil War battles and events and their effects on civilian populations. Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.
SS.8.A.5.7:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.

SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.
SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
SS.8.E.1.1:	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects. Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
SS.8.E.2.2:	Explain the economic impact of government policies. Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
SS.8.E.3.1:	Evaluate domestic and international interdependence. Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
SS.8.G.2.1:	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history. Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
SS.8.G.2.2:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications. Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
SS.8.G.5.2:	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history. Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
SS.8.G.6.2:	Illustrate places and events in U.S. history through the use of narratives and graphic representations. Clarifications: Examples are maps, graphs, tables.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style.

e. Provide a concluding statement or section that follows from and supports the argument presented.

Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.

- a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension.
- b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples.
- c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts.
- d. Use precise language and domain-specific vocabulary to inform about or explain the topic.
- e. Establish and maintain a formal style and objective tone.
- f. Provide a concluding statement or section that follows from and supports the information or explanation presented.

LAFS.68.WHST.1.2:

LAFS.68.WHST.2.4:

Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.68.WHST.2.5:

With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.

LAFS.68.WHST.2.6:

Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

LAFS.68.WHST.3.7:

Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

LAFS.68.WHST.3.8:

Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.

LAFS.68.WHST.3.9:

Draw evidence from informational texts to support analysis, reflection, and research.

LAFS.68.WHST.4.10:

Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.

LAFS.8.SL.1.2:

Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.

LAFS.8.SL.1.3:

Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and relevance and sufficiency of the evidence and identifying when irrelevant evidence is introduced.

LAFS.8.SL.2.4:

Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.

MAFS.6.SP.2.4:

Display numerical data in plots on a number line, including dot plots, histograms, and box plots.

Standard Relation to Course: Supporting

Summarize numerical data sets in relation to their context, such as by:

- a. Reporting the number of observations.
- b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.
- c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.
- d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.

MAFS.6.SP.2.5:

Standard Relation to Course: Supporting

Make sense of problems and persevere in solving them.

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

MAFS.K12.MP.1.1:

Standard Relation to Course: Supporting

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

MAFS.K12.MP.3.1:

Standard Relation to Course: Supporting

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are

MAFS.K12.MP.5.1:

	able to use technological tools to explore and deepen their understanding of concepts. Standard Relation to Course: Supporting Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
	Standard Relation to Course: Supporting
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	Critique school and public health policies that influence health promotion and disease prevention. Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.

General Course Information and Notes

GENERAL NOTES

M/J U.S. History - The eighth grade social studies curriculum consists of the following content area strands: American History, Geography, Economics and Civics. Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

M/J Civics - The primary content for this portion of the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Mathematics Benchmark Guidance - Instruction of U.S. History should include opportunities for students to interpret and create representations of historical events using mathematical tables, charts, and graphs.

Special Notes: This course is meant as a means of combining the required M/J United States History content with remediation of the required M/J Civics content.

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.
SS.8.A.1.1:	<p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
	Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.3:	<p>Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.</p>
SS.8.A.1.4:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.5:	<p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
	Compare interpretations of key events and issues throughout American History.
SS.8.A.1.6:	<p>Clarifications: Examples may include, but are not limited to, historiography.</p>
SS.8.A.1.7:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.1:	<p>Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.</p>
	Compare the characteristics of the New England, Middle, and Southern colonies.
SS.8.A.2.2:	<p>Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.</p>
	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.
SS.8.A.2.3:	<p>Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.</p>
	Identify the impact of key colonial figures on the economic, political, and social development of the colonies.
SS.8.A.2.4:	<p>Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.</p>
	Discuss the impact of colonial settlement on Native American populations.
SS.8.A.2.5:	<p>Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.</p>
	Examine the causes, course, and consequences of the French and Indian War.
SS.8.A.2.6:	<p>Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.</p>
SS.8.A.2.7:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
	Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.

SS.8.A.3.1:	<p>Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.</p>
	Explain American colonial reaction to British policy from 1763 - 1774.
SS.8.A.3.2:	<p>Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.</p>
	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts.
SS.8.A.3.3:	<p>Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.</p>
	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war.
SS.8.A.3.4:	<p>Clarifications: Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.</p>
	Describe the influence of individuals on social and political developments during the Revolutionary era.
SS.8.A.3.5:	<p>Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.</p>
	Examine the causes, course, and consequences of the American Revolution.
SS.8.A.3.6:	<p>Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.</p>
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
	Examine individuals and groups that affected political and social motivations during the American Revolution.
SS.8.A.3.8:	<p>Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.</p>
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
	Examine the influences of George Washington's presidency in the formation of the new nation.
SS.8.A.3.12:	<p>Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency.
SS.8.A.3.13:	<p>Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.</p>
	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency.
SS.8.A.3.14:	<p>Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.</p>
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
	Examine key events in Florida history as each impacts this era of American history.
SS.8.A.3.16:	<p>Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.</p>
	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
	Describe the debate surrounding the spread of slavery into western territories and Florida.
SS.8.A.4.2:	<p>Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.</p>
	Examine the experiences and perspectives of significant individuals and groups during this era of American History.
SS.8.A.4.3:	<p>Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.</p>
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy.
SS.8.A.4.5:	<p>Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.</p>
	Identify technological improvements (inventions/inventors) that contributed to industrial growth.

SS.8.A.4.6:	<p>Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.</p>
SS.8.A.4.7:	<p>Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry. Describe the influence of individuals on social and political developments of this era in American History.</p>
SS.8.A.4.8:	<p>Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.</p>
SS.8.A.4.9:	<p>Analyze the causes, course and consequences of the Second Great Awakening on social reform movements. Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.</p>
SS.8.A.4.10:	<p>Analyze the impact of technological advancements on the agricultural economy and slave labor. Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.</p>
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	<p>Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.</p>
SS.8.A.4.17:	<p>Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.</p>
SS.8.A.4.18:	<p>Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period. Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.</p>
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	<p>Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.</p>
SS.8.A.5.3:	<p>Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency. Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.</p>
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	<p>Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.</p>
SS.8.A.5.6:	<p>Compare significant Civil War battles and events and their effects on civilian populations. Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.</p>
SS.8.A.5.7:	<p>Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.</p>
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.C.1.1:	Identify the constitutional provisions for establishing citizenship.
SS.8.C.1.2:	Compare views of self-government and the rights and responsibilities of citizens held by Patriots, Loyalists, and other colonists.
SS.8.C.1.3:	Recognize the role of civic virtue in the lives of citizens and leaders from the colonial period through Reconstruction.
SS.8.C.1.4:	Identify the evolving forms of civic and political participation from the colonial period through Reconstruction.

SS.8.C.1.5:	Apply the rights and principles contained in the Constitution and Bill of Rights to the lives of citizens today.
SS.8.C.1.6:	Evaluate how amendments to the Constitution have expanded voting rights from our nation's early history to present day.
SS.8.C.2.1:	Evaluate and compare the essential ideals and principles of American constitutional government expressed in primary sources from the colonial period to Reconstruction.
SS.8.E.1.1:	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects. Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.E.2.1:	Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.
SS.8.E.2.2:	Explain the economic impact of government policies. Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.
SS.8.E.2.3:	Assess the role of Africans and other minority groups in the economic development of the United States.
SS.8.E.3.1:	Evaluate domestic and international interdependence. Clarifications: Examples are triangular trade routes and regional exchange of resources.
SS.8.G.1.1:	Use maps to explain physical and cultural attributes of major regions throughout American history.
SS.8.G.1.2:	Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.
SS.8.G.2.1:	Identify the physical elements and the human elements that define and differentiate regions as relevant to American history. Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.
SS.8.G.2.2:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications. Clarifications: Examples are cataclysmic natural disasters, shipwrecks.
SS.8.G.2.3:	Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.
SS.8.G.3.1:	Locate and describe in geographic terms the major ecosystems of the United States.
SS.8.G.3.2:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.
SS.8.G.4.1:	Interpret population growth and other demographic data for any given place in the United States throughout its history.
SS.8.G.4.2:	Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.
SS.8.G.4.3:	Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.
SS.8.G.4.4:	Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.
SS.8.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.
SS.8.G.4.6:	Use political maps to describe changes in boundaries and governance throughout American history.
SS.8.G.5.1:	Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.
SS.8.G.5.2:	Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history. Clarifications: Examples are deforestation, urbanization, agriculture.
SS.8.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.
SS.8.G.6.2:	Illustrate places and events in U.S. history through the use of narratives and graphic representations. Clarifications: Examples are maps, graphs, tables.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems. Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations.

MA.K12.MTR.2.1:

- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or

MA.K12.MTR.7.1:	<p>efficiency.</p> <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	<p>Critique school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J U.S. History - The eighth grade social studies curriculum consists of the following content area strands: American History, Geography, Economics and Civics. Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

M/J Civics - The primary content for this portion of the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Special Notes: This course is meant as a means of combining the required M/J United States History content with remediation of the required M/J Civics content.

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100045

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
American and Western Hemispheric Histories >
Abbreviated Title: M/J US HIST & CIVICS
Course Length: Year (Y)
Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
	Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law

	and due process of law.
SS.7.CG.1.9:	<ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	<p>Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights.</p> <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	<p>Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen.</p> <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	<p>Examine the election and voting process at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	<p>Identify the constitutional qualifications required to hold state and national office.</p> <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States'

	constitutional republic from authoritarian and totalitarian nations.
SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). • Students will compare and contrast executive authority at the local, state and national levels. • Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society. • Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> • Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). • Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). • Students will compare the amendment process of the U.S. and Florida Constitutions. • Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> • Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> • Students will evaluate various economic systems (e.g., capitalism, communism, socialism). • Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> • Students will recognize the difference between domestic and foreign policy. • Students will identify issues that relate to U.S. domestic and foreign policy. • Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest.
	Describe the United States' and citizen participation in international organizations.

SS.7.CG.4.2:	<ul style="list-style-type: none"> Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).
SS.8.A.1.1:	<p>Provide supporting details for an answer from text, interview for oral history, check validity of information from research/text, and identify strong vs. weak arguments.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf.</p>
SS.8.A.1.2:	Analyze charts, graphs, maps, photographs and timelines; analyze political cartoons; determine cause and effect.
SS.8.A.1.3:	Analyze current events relevant to American History topics through a variety of electronic and print media resources.
SS.8.A.1.4:	Clarifications: Examples may include, but are not limited to, articles, editorials, journals, periodicals, reports, websites, videos, and podcasts.
SS.8.A.1.5:	Differentiate fact from opinion, utilize appropriate historical research and fiction/nonfiction support materials.
SS.8.A.1.6:	Identify, within both primary and secondary sources, the author, audience, format, and purpose of significant historical documents.
SS.8.A.1.7:	Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.8.A.2.1:	Compare interpretations of key events and issues throughout American History.
SS.8.A.2.2:	Clarifications: Examples may include, but are not limited to, historiography.
SS.8.A.2.3:	View historic events through the eyes of those who were there as shown in their art, writings, music, and artifacts.
SS.8.A.2.4:	Compare the relationships among the British, French, Spanish, and Dutch in their struggle for colonization of North America.
SS.8.A.2.5:	Clarifications: This benchmark implies a study of the ways that economic, political, cultural, and religious competition between these Atlantic powers shaped early colonial America.
SS.8.A.2.6:	Compare the characteristics of the New England, Middle, and Southern colonies.
SS.8.A.2.7:	Clarifications: Examples may include, but are not limited to, colonial governments, geographic influences, occupations, religion, education, settlement patterns, and social patterns.
SS.8.A.3.1:	Differentiate economic systems of New England, Middle and Southern colonies including indentured servants and slaves as labor sources.
SS.8.A.3.2:	Clarifications: Examples may include, but are not limited to, subsistence farming, cash crop farming, and maritime industries.
SS.8.A.3.3:	Identify the impact of key colonial figures on the economic, political, and social development of the colonies.
SS.8.A.3.4:	Clarifications: Examples may include, but are not limited to, John Smith, William Penn, Roger Williams, Anne Hutchinson, John Winthrop, Jonathan Edwards, William Bradford, Nathaniel Bacon, John Peter Zenger, and Lord Calvert.
SS.8.A.4.1:	Discuss the impact of colonial settlement on Native American populations.
SS.8.A.4.2:	Clarifications: Examples may include, but are not limited to, war, disease, loss of land, westward displacement of tribes causing increased conflict between tribes, and dependence on trade for Western goods, including guns.
SS.8.A.4.3:	Examine the causes, course, and consequences of the French and Indian War.
SS.8.A.4.4:	Clarifications: Examples may include, but are not limited to, ongoing conflict between France and England, territorial disputes, trade competition, Ft. Duquesne, Ft. Quebec, Treaty of Paris, heavy British debt.
SS.8.A.4.5:	Describe the contributions of key groups (Africans, Native Americans, women, and children) to the society and culture of colonial America.
SS.8.A.4.6:	Explain the consequences of the French and Indian War in British policies for the American colonies from 1763 - 1774.
SS.8.A.4.7:	Clarifications: Examples may include, but are not limited to, Proclamation of 1763, Sugar Act, Quartering Act, Stamp Act, Declaratory Act, Townshend Acts, Tea Act, Quebec Act, and Coercive Acts.
SS.8.A.4.8:	Explain American colonial reaction to British policy from 1763 - 1774.
SS.8.A.4.9:	Clarifications: Examples may include, but are not limited to, written protests, boycotts, unrest leading to the Boston Massacre, Boston Tea Party, First Continental Congress, Stamp Act Congress, Committees of Correspondence.
SS.8.A.4.10:	Recognize the contributions of the Founding Fathers (John Adams, Sam Adams, Benjamin Franklin, John Hancock, Alexander Hamilton, Thomas Jefferson, James Madison, George Mason, George Washington) during American Revolutionary efforts.
SS.8.A.4.11:	Clarifications: Examples may also include, but are not limited to, Thomas Paine, John Jay, Peter Salem.
SS.8.A.4.12:	Examine the contributions of influential groups to both the American and British war efforts during the American Revolutionary War and their effects on the outcome of the war.
SS.8.A.4.13:	Clarifications:

	Examples may include, but are not limited to, foreign alliances, freedmen, Native Americans, slaves, women, soldiers, Hessians.
SS.8.A.3.5:	Describe the influence of individuals on social and political developments during the Revolutionary era. Clarifications: Examples may include, but are not limited to, James Otis, Mercy Otis Warren, Abigail Adams, Benjamin Banneker, Lemuel Haynes, Phyllis Wheatley.
SS.8.A.3.6:	Examine the causes, course, and consequences of the American Revolution. Clarifications: Examples may include, but are not limited to, Battles of Lexington and Concord, Common Sense, Second Continental Congress, Battle of Bunker Hill, Battle of Cowpens, Battle of Trenton, Olive Branch Petition, Declaration of Independence, winter at Valley Forge, Battles of Saratoga and Yorktown, Treaty of Paris.
SS.8.A.3.7:	Examine the structure, content, and consequences of the Declaration of Independence.
SS.8.A.3.8:	Examine individuals and groups that affected political and social motivations during the American Revolution. Clarifications: Examples may include, but are not limited to, Ethan Allen and the Green Mountain Boys, the Committees of Correspondence, Sons of Liberty, Daughters of Liberty, the Black Regiment (in churches), Patrick Henry, Patriots, Loyalists, individual colonial militias, and undecideds.
SS.8.A.3.9:	Evaluate the structure, strengths, and weaknesses of the Articles of Confederation and its aspects that led to the Constitutional Convention.
SS.8.A.3.10:	Examine the course and consequences of the Constitutional Convention (New Jersey Plan, Virginia Plan, Great Compromise, Three-Fifths Compromise, compromises regarding taxation and slave trade, Electoral College, state vs. federal power, empowering a president).
SS.8.A.3.11:	Analyze support and opposition (Federalists, Federalist Papers, AntiFederalists, Bill of Rights) to ratification of the U.S. Constitution.
SS.8.A.3.12:	Examine the influences of George Washington's presidency in the formation of the new nation. Clarifications: Examples may include, but are not limited to, personal motivations, military experience, political influence, establishing Washington, D.C. as the nation's capital, rise of the party system, setting of precedents (e.g., the Cabinet), Farewell Address.
SS.8.A.3.13:	Explain major domestic and international economic, military, political, and socio-cultural events of John Adams's presidency. Clarifications: Examples may include, but are not limited to, XYZ Affairs, Alien and Sedition Acts, Land Act of 1800, the quasi-war, the Midnight Judges.
SS.8.A.3.14:	Explain major domestic and international economic, military, political, and socio-cultural events of Thomas Jefferson's presidency. Clarifications: Examples may include, but are not limited to, Election of 1800, birth of political parties, Marbury v. Madison, judicial review, Jefferson's First Inaugural Address, Judiciary Act of 1801, Louisiana Purchase, Barbary War, Lewis and Clark Expedition, Hamilton and Burr conflict/duel, Embargo of 1807.
SS.8.A.3.15:	Examine this time period (1763-1815) from the perspective of historically under-represented groups (children, indentured servants, Native Americans, slaves, women, working class).
SS.8.A.3.16:	Examine key events in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Treaty of Paris, British rule, Second Spanish Period.
SS.8.A.4.1:	Examine the causes, course, and consequences of United States westward expansion and its growing diplomatic assertiveness (War of 1812, Convention of 1818, Adams-Onis Treaty, Missouri Compromise, Monroe Doctrine, Trail of Tears, Texas annexation, Manifest Destiny, Oregon Territory, Mexican American War/Mexican Cession, California Gold Rush, Compromise of 1850, Kansas Nebraska Act, Gadsden Purchase).
SS.8.A.4.2:	Describe the debate surrounding the spread of slavery into western territories and Florida. Clarifications: Examples may include, but are not limited to, abolitionist movement, Ft. Mose, Missouri Compromise, Bleeding Kansas, Kansas-Nebraska Act, Compromise of 1850.
SS.8.A.4.3:	Examine the experiences and perspectives of significant individuals and groups during this era of American History. Clarifications: Examples may include, but are not limited to, Lewis and Clark, Sacajawea, York, Pike, Native Americans, Buffalo Soldiers, Mexicanos, Chinese immigrants, Irish immigrants, children, slaves, women, Alexis de Tocqueville, political parties.
SS.8.A.4.4:	Discuss the impact of westward expansion on cultural practices and migration patterns of Native American and African slave populations.
SS.8.A.4.5:	Explain the causes, course, and consequences of the 19th century transportation revolution on the growth of the nation's economy. Clarifications: Examples may include, but are not limited to, roads, canals, bridges, steamboats, railroads.
SS.8.A.4.6:	Identify technological improvements (inventions/inventors) that contributed to industrial growth. Clarifications: Examples may include, but are not limited to, Fitch/steamboat, Slater/textile mill machinery, Whitney/cotton gin, interchangeable parts, McCoy/industrial lubrication, Fulton/commercial steamboat, Lowell/ mechanized cotton mill, Isaac Singer/sewing machine.
SS.8.A.4.7:	Explain the causes, course, and consequences (industrial growth, subsequent effect on children and women) of New England's textile industry.
SS.8.A.4.8:	Describe the influence of individuals on social and political developments of this era in American History. Clarifications: Examples may include, but are not limited to, Daniel Boone, Tecumseh, Black Hawk, John Marshall, James Madison, Dolly Madison, Andrew Jackson, John C. Calhoun, Henry Clay, Daniel Webster, James Polk, Susan B. Anthony, Elizabeth Cady Stanton, William Lloyd Garrison, Frederick Douglass, Horace Mann, Dorothea Dix, Lucretia Mott, Sojourner Truth, Harriet Tubman.
SS.8.A.4.9:	Analyze the causes, course and consequences of the Second Great Awakening on social reform movements. Clarifications: Examples may include, but are not limited to, abolition, women's rights, temperance, education, prison and mental health reform, Charles Grandison Finney, the Beecher family.
	Analyze the impact of technological advancements on the agricultural economy and slave labor.

SS.8.A.4.10:	Clarifications: Examples may include, but are not limited to, cotton gin, steel plow, rapid growth of slave trade.
SS.8.A.4.11:	Examine the aspects of slave culture including plantation life, resistance efforts, and the role of the slaves' spiritual system.
SS.8.A.4.12:	Examine the effects of the 1804 Haitian Revolution on the United States acquisition of the Louisiana Territory.
SS.8.A.4.13:	Explain the consequences of landmark Supreme Court decisions (McCulloch v. Maryland [1819], Gibbons v. Odgen [1824], Cherokee Nation v. Georgia [1831], and Worcester v. Georgia [1832]) significant to this era of American history.
SS.8.A.4.14:	Examine the causes, course, and consequences of the women's suffrage movement (1848 Seneca Falls Convention, Declaration of Sentiments).
SS.8.A.4.15:	Examine the causes, course, and consequences of literature movements (Transcendentalism) significant to this era of American history. Identify key ideas and influences of Jacksonian democracy.
SS.8.A.4.16:	Clarifications: Examples may include, but are not limited to, political participation, political parties, constitutional government, spoils system, National Bank veto, Maysville Road veto, tariff battles, Indian Removal Act, nullification crisis.
SS.8.A.4.17:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, Andrew Jackson's military expeditions to end Indian uprisings, developing relationships between the Seminole and runaway slaves, Adams-Onis Treaty, Florida becoming a United States territory, combining former East and West Floridas, establishing first state capital, Florida's constitution, Florida's admittance to the Union as 27th state.
SS.8.A.4.18:	Examine the experiences and perspectives of different ethnic, national, and religious groups in Florida, explaining their contributions to Florida's and America's society and culture during the Territorial Period. Clarifications: Examples may include, but are not limited to, Osceola, white settlers, U.S. troops, Black Seminoles, southern plantation and slave owners, Seminole Wars, Treaty of Moultrie Creek, Seminole relocation, Chief Billy Bowlegs, Florida Crackers.
SS.8.A.5.1:	Explain the causes, course, and consequence of the Civil War (sectionalism, slavery, states' rights, balance of power in the Senate). Analyze the role of slavery in the development of sectional conflict.
SS.8.A.5.2:	Clarifications: Examples may include, but are not limited to, Abolition Movement, Nat Turner's Rebellion, Black Codes, Missouri Compromise, Compromise of 1850, Uncle Tom's Cabin, Kansas-Nebraska Act, Dred Scott v. Sandford, Lincoln-Douglas Debates, raid on Harper's Ferry, Underground Railroad, Presidential Election of 1860, Southern secession.
SS.8.A.5.3:	Explain major domestic and international economic, military, political, and socio-cultural events of Abraham Lincoln's presidency. Clarifications: Examples may include, but are not limited to, sectionalism, states' rights, slavery, Civil War, attempts at foreign alliances, Emancipation Proclamation, Gettysburg Address, suspension of habeas corpus, First and Second Inaugural Addresses.
SS.8.A.5.4:	Identify the division (Confederate and Union States, Border states, western territories) of the United States at the outbreak of the Civil War. Compare Union and Confederate strengths and weaknesses.
SS.8.A.5.5:	Clarifications: Examples may include, but are not limited to, technology, resources, alliances, geography, military leaders-Lincoln, Davis, Grant, Lee, Jackson, Sherman.
SS.8.A.5.6:	Compare significant Civil War battles and events and their effects on civilian populations. Clarifications: Examples may include, but are not limited to, Fort Sumter, Bull Run, Monitor v. Merrimack, Antietam, Vicksburg, Gettysburg, Emancipation Proclamation, Sherman's March, Lee's surrender at Appomattox.
SS.8.A.5.7:	Examine key events and peoples in Florida history as each impacts this era of American history. Clarifications: Examples may include, but are not limited to, slavery, influential planters, Florida's secession and Confederate membership, women, children, pioneer environment, Union occupation, Battle of Olustee and role of 54th Massachusetts regiment, Battle at Natural Bridge.
SS.8.A.5.8:	Explain and evaluate the policies, practices, and consequences of Reconstruction (presidential and congressional reconstruction, Johnson's impeachment, Civil Rights Act of 1866, the 13th, 14th, and 15th Amendments, opposition of Southern whites to Reconstruction, accomplishments and failures of Radical Reconstruction, presidential election of 1876, end of Reconstruction, rise of Jim Crow laws, rise of Ku Klux Klan).
SS.8.CG.1.1:	Compare the views of Patriots, Loyalists and other colonists on limits of government authority, inalienable rights and resistance to tyranny. <ul style="list-style-type: none"> • Students will describe colonial forms of government prior to the American Revolution. • Students will evaluate the Loyalists' and Patriots' arguments for remaining loyal to the British Crown or seeking independence from Britain.
SS.8.CG.1.2:	Compare and contrast the 1838 Florida Constitution and 1868 Florida Constitution. <ul style="list-style-type: none"> • Students will explain how the 1868 Florida Constitution conformed with the Reconstruction Era amendments to the U.S. Constitution (e.g., citizenship, equal protection, suffrage).
SS.8.CG.1.3:	Explain the importance of the rule of law in the United States' constitutional republic. <ul style="list-style-type: none"> • Students will discuss the impact of the rule of law on U.S. citizens and government. • Students will recognize how the rule of law influences a society. • Students will identify how the rule of law protects citizens from arbitrary and abusive government. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, fair procedures, decisions based on the law, consistent application and enforcement of the law, transparency of institutions).
SS.8.CG.2.1:	Identify the constitutional provisions for establishing citizenship. <ul style="list-style-type: none"> • Students will explain how the 14th Amendment establishes citizenship.
SS.8.CG.2.2:	Compare the responsibilities of citizens at the local, state and national levels. <ul style="list-style-type: none"> • Students will recognize responsibilities of citizens (e.g., obeying the law, paying taxes, serving on a jury when summoned, registering with the Selective Service).
SS.8.CG.2.3:	Analyze the role of civic virtue in the lives of citizens and leaders from the Colonial period through Reconstruction. <ul style="list-style-type: none"> • Students will understand how the idea of civic virtue changes in response to the attitudes of citizens and leaders over time.

SS.8.CG.2.4:	<p>Explain how forms of civic and political participation changed from the Colonial period through Reconstruction.</p> <ul style="list-style-type: none"> • Students will describe significant acts of civic and political participation from the Colonial period through Reconstruction.
SS.8.CG.2.5:	<p>Analyze how the Bill of Rights guarantees civil rights and liberties to citizens.</p> <ul style="list-style-type: none"> • Students will explain the meaning and purpose of each amendment in the Bill of Rights. • Students will describe how the Bill of Rights affects citizens and government.
SS.8.CG.2.6:	<p>Evaluate how amendments to the U.S. Constitution expanded opportunities for civic participation through Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify constitutional amendments that address voting rights. • Students will describe how specific constitutional amendments expanded access to the political process for various groups over time.
SS.8.CG.3.1:	<p>Trace the foundational ideals and principles related to the U.S. government expressed in primary sources from the colonial period to Reconstruction.</p> <ul style="list-style-type: none"> • Students will identify foundational ideals and principles related to the U.S. government expressed in primary sources (e.g., the Mayflower Compact (1620); Common Sense (1776); the Declaration of Independence (1776); the U.S. Constitution (1789); the Declaration of Rights and Sentiments (1848); the Gettysburg Address (1863); Lincoln's Second Inaugural Address (1865)).
SS.8.E.1.1:	<p>Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.</p> <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.E.2.1:	<p>Analyze contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States economy.</p>
SS.8.E.2.2:	<p>Explain the economic impact of government policies.</p> <p>Clarifications: Examples are mercantilism, colonial establishment, Articles of Confederation, Constitution, compromises over slavery.</p>
SS.8.E.2.3:	<p>Assess the role of Africans and other minority groups in the economic development of the United States.</p>
SS.8.E.3.1:	<p>Evaluate domestic and international interdependence.</p> <p>Clarifications: Examples are triangular trade routes and regional exchange of resources.</p>
SS.8.G.1.1:	<p>Use maps to explain physical and cultural attributes of major regions throughout American history.</p>
SS.8.G.1.2:	<p>Use appropriate geographic tools and terms to identify and describe significant places and regions in American history.</p>
SS.8.G.2.1:	<p>Identify the physical elements and the human elements that define and differentiate regions as relevant to American history.</p> <p>Clarifications: Examples of physical elements are climate, terrain, resources. Examples of human elements are religion, government, economy, language, demography.</p>
SS.8.G.2.2:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the United States that have had critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are cataclysmic natural disasters, shipwrecks.</p>
SS.8.G.2.3:	<p>Use geographic terms and tools to analyze case studies of how selected regions of the United States have changed over time.</p>
SS.8.G.3.1:	<p>Locate and describe in geographic terms the major ecosystems of the United States.</p>
SS.8.G.3.2:	<p>Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in the United States and Florida over time.</p>
SS.8.G.4.1:	<p>Interpret population growth and other demographic data for any given place in the United States throughout its history.</p>
SS.8.G.4.2:	<p>Use geographic terms and tools to analyze the effects throughout American history of migration to and within the United States, both on the place of origin and destination.</p>
SS.8.G.4.3:	<p>Use geographic terms and tools to explain cultural diffusion throughout the United States as it expanded its territory.</p>
SS.8.G.4.4:	<p>Interpret databases, case studies, and maps to describe the role that regions play in influencing trade, migration patterns, and cultural/political interaction in the United States throughout time.</p>
SS.8.G.4.5:	<p>Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers in the United States over time.</p>
SS.8.G.4.6:	<p>Use political maps to describe changes in boundaries and governance throughout American history.</p>
SS.8.G.5.1:	<p>Describe human dependence on the physical environment and natural resources to satisfy basic needs in local environments in the United States.</p>
SS.8.G.5.2:	<p>Describe the impact of human modifications on the physical environment and ecosystems of the United States throughout history.</p> <p>Clarifications: Examples are deforestation, urbanization, agriculture.</p>
SS.8.G.6.1:	<p>Use appropriate maps and other graphic representations to analyze geographic problems and changes over time throughout American history.</p>
SS.8.G.6.2:	<p>Illustrate places and events in U.S. history through the use of narratives and graphic representations.</p> <p>Clarifications: Examples are maps, graphs, tables.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	<ul style="list-style-type: none"> • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.8.C.2.4:	<p>Critique school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Speed-limit laws, immunization requirements, universal precautions, zero tolerance, report bullying, and cell phone/texting laws.</p>

General Course Information and Notes

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the

following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

M/J U.S. History - The eighth grade social studies curriculum consists of the following content area strands: American History, Geography, Economics and Civics. Primary content emphasis for this course pertains to the study of American history from the Exploration and Colonization period to the Reconstruction Period following the Civil War. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to explore those fundamental ideas and events which occurred after Reconstruction.

M/J Civics - The primary content for this portion of the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Special Notes: This course is meant as a means of combining the required M/J United States History content with remediation of the required M/J Civics content.

Additional content that may be contained in the NAEP Grade 8 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL NOTES

SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts.

MA.K12.MTR.5.1:

- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to

ELA.K12.EE.5.1:

	do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

M/J World Geography (#2103010) 2015 - 2022 (current)

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land

use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K.12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	<p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	<p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	<p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively.

MA.K12.MTR.4.1:	<ul style="list-style-type: none"> Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Have students estimate or predict solutions prior to solving. Prompt students to continually ask, "Does this solution make sense? How do you know?" Reinforce that students check their work as they progress within and after a task. Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Provide opportunities for students to create models, both concrete and abstract, and perform investigations. Challenge students to question the accuracy of their models and methods. Support students as they validate conclusions by comparing them to the given situation. Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>

ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and

concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2103010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**
Geography >

Abbreviated Title: M/J WORLD GEOG

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

M/J World Geography (#2103015) 2015 - 2022 (current)

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.

LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
Make sense of problems and persevere in solving them.	
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
Construct viable arguments and critique the reasoning of others.	
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
Use appropriate tools strategically.	
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
Attend to precision.	
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land

use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

M/J World Geography (#2103015) 2022 - 2023

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps. Identify natural wonders of the ancient world.
SS.6.G.1.3:	Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K.12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	<p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	<p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	<p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively.

MA.K12.MTR.4.1:	<ul style="list-style-type: none"> Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Have students estimate or predict solutions prior to solving. Prompt students to continually ask, "Does this solution make sense? How do you know?" Reinforce that students check their work as they progress within and after a task. Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Provide opportunities for students to create models, both concrete and abstract, and perform investigations. Challenge students to question the accuracy of their models and methods. Support students as they validate conclusions by comparing them to the given situation. Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>

ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and

concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

M/J World Geography & Career Planning (#2103016) 2019 - 2022 (current)

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.6.SL.1.1:	<ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.

LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Career and Education Planning - Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml>.

Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2103016

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Geography >
Abbreviated Title: M/J WORLD GEOG & C/P
Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Type: Core Academic Course

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Geography (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World Geography & Career Planning (#2103016) 2022 - 2023

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	<p>Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.</p>
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	<p>Clarifications: Examples are water in the Middle East, fertile soil, fuel.</p>
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	<p>Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.</p>
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	<p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
	<ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others.

MA.K12.MTR.4.1:

- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

ELA.K.12.EE.3.1:	Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Career and Education Planning - Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml>.

Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world. Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	<p>Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.</p>
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	<p>Clarifications: Examples are water in the Middle East, fertile soil, fuel.</p>
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	<p>Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.</p>
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	<p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2103016

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Geography >

Abbreviated Title: M/J WORLD GEOG & C/P

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Course Level: 2

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Geography (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World Geography and Digital Technologies (#2103017) 2015 - 2022 (current)

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.6.SL.1.1:	<ol style="list-style-type: none"> Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.

LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Digital Technologies - The digital curriculum required by Section 1003.4203 (3), Florida Statutes, has been integrated into this course. Listed below are the competencies that must be met to satisfy the requirements of (Section 1003.4203 (3), Florida Statutes):

Communications Technologies

01.0 Demonstrate proficiency locating information on the Internet.

01.01 Identify and describe web terminology.

01.02 Define Universal Resource Locators (URLs) and associated protocols (e.g., http, ftp, telnet, mailto).

01.03 Compare and contrast the types of Internet domains (e.g., .com, .org, .edu, .gov, .net, .mil).

01.04 Adhere to cyberethics, copyright laws, and regulatory control.

01.05 Describe the human element of Internet security, specifically social engineering techniques for obtaining private or identification information.

01.06 Demonstrate proficiency using search engines, including Boolean search strategies.

01.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).

01.08 Compare and contrast the roles of web servers and web browsers.

02.0 Demonstrate proficiency gathering and preparing textual, graphical, and image-based web content.

02.01 Characterize effective writing styles and conventions for the web.

02.02 Use word processing software to create effective written content for the web.

02.03 Use graphics software to create message-driven graphical content for use on a webpage.

02.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).

02.05 Create and edit images using image or graphic design software.

03.0 Perform e-mail activities.

03.01 Describe e-mail capabilities and functions.

03.02 Identify components of an e-mail message.

03.03 Identify the components of an e-mail address.

03.04 Attach a file to an e-mail message.

03.05 Forward an e-mail message to one or more addressees.

03.06 Use an address book.

03.07 Reply to an e-mail message.

03.08 Use the Internet to perform e-mail activities.

03.09 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.

04.0 Use Web 2.0 or Internet-based collaborative technology (e.g., Wikis, Wimba, Moodle, Facebook) to facilitate a web development project.

04.01 Create and use a wiki or similar collaborative environment for communicating and sharing among web development project team members.

04.02 Create and use a social media page (e.g., Facebook, Wimba, Moodle) to share and publish web components (e.g., content, images, graphics, videos) for gauging visitor reaction and obtaining feedback.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support,

students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

M/J World Geography and Digital Technologies (#2103017) 2022 - 2023

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	<p>Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.</p>
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	<p>Clarifications: Examples are water in the Middle East, fertile soil, fuel.</p>
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	<p>Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.</p>
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	<p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
	<ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others.

MA.K12.MTR.4.1:

- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

ELA.K.12.EE.3.1:	Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.
ELA.K.12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.</p> <p>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	<p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	<p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	<p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Digital Technologies - The digital curriculum required by Section 1003.4203 (3), Florida Statutes, has been integrated into this course. Listed below are the competencies that must be met to satisfy the requirements of (Section 1003.4203 (3), Florida Statutes):

Communications Technologies

01.0 Demonstrate proficiency locating information on the Internet.

01.01 Identify and describe web terminology.

01.02 Define Universal Resource Locators (URLs) and associated protocols (e.g., http, ftp, telnet, mailto).

01.03 Compare and contrast the types of Internet domains (e.g., .com, .org, .edu, .gov, .net, .mil).

01.04 Adhere to cyberethics, copyright laws, and regulatory control.

01.05 Describe the human element of Internet security, specifically social engineering techniques for obtaining private or identification information.

01.06 Demonstrate proficiency using search engines, including Boolean search strategies.

01.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).

01.08 Compare and contrast the roles of web servers and web browsers.

02.0 Demonstrate proficiency gathering and preparing textual, graphical, and image-based web content.

02.01 Characterize effective writing styles and conventions for the web.

02.02 Use word processing software to create effective written content for the web.

02.03 Use graphics software to create message-driven graphical content for use on a webpage.

02.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).

02.05 Create and edit images using image or graphic design software.

03.0 Perform e-mail activities.

03.01 Describe e-mail capabilities and functions.

03.02 Identify components of an e-mail message.

03.03 Identify the components of an e-mail address.

03.04 Attach a file to an e-mail message.

03.05 Forward an e-mail message to one or more addressees.

03.06 Use an address book.

03.07 Reply to an e-mail message.

03.08 Use the Internet to perform e-mail activities.

03.09 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.

04.0 Use Web 2.0 or Internet-based collaborative technology (e.g., Wikis, Wimba, Moodle, Facebook) to facilitate a web development project.

04.01 Create and use a wiki or similar collaborative environment for communicating and sharing among web development project team members.

04.02 Create and use a social media page (e.g., Facebook, Wimba, Moodle) to share and publish web components (e.g., content, images, graphics, videos) for gauging visitor reaction and obtaining feedback.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Digital Technologies - The digital curriculum required by Section 1003.4203 (3), Florida Statutes, has been integrated into this course. Listed below are the competencies that must be met to satisfy the requirements of (Section 1003.4203 (3), Florida Statutes):

Communications Technologies

- 01.0 Demonstrate proficiency locating information on the Internet.
- 01.01 Identify and describe web terminology.
- 01.02 Define Universal Resource Locators (URLs) and associated protocols (e.g., http, ftp, telnet, mailto).
- 01.03 Compare and contrast the types of Internet domains (e.g., .com, .org, .edu, .gov, .net, .mil).
- 01.04 Adhere to cyberethics, copyright laws, and regulatory control.
- 01.05 Describe the human element of Internet security, specifically social engineering techniques for obtaining private or identification information.
- 01.06 Demonstrate proficiency using search engines, including Boolean search strategies.
- 01.07 Demonstrate proficiency using various web tools (e.g., downloading of files, transfer of files, telnet, PDF, etc.).
- 01.08 Compare and contrast the roles of web servers and web browsers.
- 02.0 Demonstrate proficiency gathering and preparing textual, graphical, and image-based web content.
- 02.01 Characterize effective writing styles and conventions for the web.
- 02.02 Use word processing software to create effective written content for the web.
- 02.03 Use graphics software to create message-driven graphical content for use on a webpage.
- 02.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clipart, CD-ROMs).
- 02.05 Create and edit images using image or graphic design software.
- 03.0 Perform e-mail activities.
- 03.01 Describe e-mail capabilities and functions.
- 03.02 Identify components of an e-mail message.
- 03.03 Identify the components of an e-mail address.
- 03.04 Attach a file to an e-mail message.
- 03.05 Forward an e-mail message to one or more addressees.
- 03.06 Use an address book.

- 03.07 Reply to an e-mail message.
- 03.08 Use the Internet to perform e-mail activities.
- 03.09 Identify the appropriate use of e-mail and demonstrate related e-mail etiquette.

- 04.0 Use Web 2.0 or Internet-based collaborative technology (e.g., Wikis, Wimba, Moodle, Facebook) to facilitate a web development project.
- 04.01 Create and use a wiki or similar collaborative environment for communicating and sharing among web development project team members.
- 04.02 Create and use a social media page (e.g., Facebook, Wimba, Moodle) to share and publish web components (e.g., content, images, graphics, videos) for gauging visitor reaction and obtaining feedback.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2103017

Course Path: Section: Grades PreK to 12 Education
 Courses > **Grade Group:** Grades 6 to 8 Education
 Courses > **Subject:** Social Studies > **SubSubject:**
 Geography >
Abbreviated Title: M/J WORLDGEO & DIGTECH
Course Length: Year (Y)
Course Attributes:

General Course Information and Notes

VERSION DESCRIPTION

The curriculum description for this IB course is provided at <http://www.ibo.org/en/programmes/>.

GENERAL NOTES

In addition to the requirements set forth by the International Baccalaureate Organization, students enrolled in this course will also complete course requirements for Career and Education Planning.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

- 1.0 Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
- 2.0 Making close reading and rereading of texts central to lessons.
- 3.0 Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
- 4.0 Requiring students to support answers with evidence from the text.
- 5.0 Providing extensive text-based research and writing opportunities (claims and evidence).

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications:

	Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.6.SL.1.1:	<ol style="list-style-type: none"> Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.

LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary

content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps. Identify natural wonders of the ancient world.
SS.6.G.1.3:	Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K.12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	<p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	<p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	<p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support,

students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.

SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.68.HE.1.1:	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945. <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively.

MA.K12.MTR.4.1:	<ul style="list-style-type: none"> Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense. Check calculations when solving problems. Verify possible solutions by explaining the methods used. Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Have students estimate or predict solutions prior to solving. Prompt students to continually ask, "Does this solution make sense? How do you know?" Reinforce that students check their work as they progress within and after a task. Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Provide opportunities for students to create models, both concrete and abstract, and perform investigations. Challenge students to question the accuracy of their models and methods. Support students as they validate conclusions by comparing them to the given situation. Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>

ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about physical and human patterns. Content should include, but not be limited to understanding world political regions in terms of location, physical characteristics, population and culture, historical change, economic activity, and land use. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2103020

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:** Geography >

Abbreviated Title: M/J WORLD GEOG ADV

Course Length: Year (Y)

Course Attributes:

- Honors
- Class Size Core Required

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Geography (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J Geography: Asia, Oceania, Africa (#2103030) 2015 - 2022

(current)

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.6.SL.1.1:	<ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.

LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	<p>Display numerical data in plots on a number line, including dot plots, histograms, and box plots.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.2.5:	<p>Summarize numerical data sets in relation to their context, such as by:</p> <ol style="list-style-type: none"> Reporting the number of observations. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>

	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about historical physical and human patterns in the regions of Asia, Oceania, and Africa. Content should include, but not be limited to the understanding of the impact of historical cultural and ethnic perspectives, societal roles and customs, law and politics, religion, and physical geography on the development of these regions. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

This course is one of the courses of a three year sequence in the Connections, Challenges, and Choices program. *M/J Geography: Asia, Oceania and Africa (2123030)* and *M/J Florida: Challenges and Choices (2103050)* complete the sequence.

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard

should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications:

	Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.

MA.K12.MTR.2.1:	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences.

MA.K12.MTR.7.1:	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about historical physical and human patterns in the regions of Asia, Oceania, and Africa. Content should include, but not be limited to the understanding of the impact of historical cultural and ethnic perspectives, societal roles and customs, law and politics, religion, and physical geography on the development of these regions. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Special Notes:

This course is one of the courses of a three year sequence in the Connections, Challenges, and Choices program. M/J Geography: Asia, Oceania and Africa (2123030) and M/J Florida: Challenges and Choices (2103050) complete the sequence.

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.

	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners.

- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

MA.K12.MTR.2.1:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

	<ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J Geography - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary

content for this course pertains to the usage of geographic concepts, tools, and skills to draw conclusions about historical physical and human patterns in the regions of Asia, Oceania, and Africa. Content should include, but not be limited to the understanding of the impact of historical cultural and ethnic perspectives, societal roles and customs, law and politics, religion, and physical geography on the development of these regions. Students will be exposed to the multiple dynamics of geography including economics and world history. Students will study methods of historical inquiry and primary and secondary historical documents.

Special Notes:

This course is one of the courses of a three year sequence in the Connections, Challenges, and Choices program. M/J Geography: Asia, Oceania and Africa (2123030) and M/J Florida: Challenges and Choices (2103050) complete the sequence.

Additional content that may be contained in the NAEP Grade 8 Geography assessment includes:

- regional patterns of function
- geographic factors contributing to conflict and cooperation in a variety of settings

The NAEP frameworks for Geography may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/gframework2010.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2103030

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Geography >

Abbreviated Title: M/J GEOG: AS, OC, AF

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.

SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.6.SL.1.1:	<ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.
	Standard Relation to Course: Supporting
	Summarize numerical data sets in relation to their context, such as by:
MAFS.6.SP.2.5:	<ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.

d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.

Standard Relation to Course: Supporting

Make sense of problems and persevere in solving them.

MAFS.K12.MP.1.1:

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

MAFS.K12.MP.3.1:

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Use appropriate tools strategically.

MAFS.K12.MP.5.1:

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

MAFS.K12.MP.6.1:

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.6.C.2.4:

Investigate school and public health policies that influence health promotion and disease prevention.

Clarifications:

Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The social studies curriculum for this course consists of the following content area strands: World History, Geography, Economics, Civics and Government. The primary content for this course pertains to the concepts and methodologies used in the social studies disciplines, and their applications in contemporary and historical contexts. Content should include, but not be limited to, the basic concepts and methodology of the social studies disciplines, interdisciplinary concepts of change, conflict, interdependence, choice, and impact of the environment, development of reasoning and information-processing skills, applications of the social studies to contemporary issues and concerns, applications of the social studies to the study of Florida. Students will be exposed to the multiple disciplines of social studies including history, geography, political science, economics, sociology, psychology, and anthropology. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.

SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	<p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems. </p>
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations. </p>
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. </p>
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers. </p>
	Use patterns and structure to help understand and connect mathematical concepts.
	Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts.

MA.K12.MTR.5.1:

- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to

	do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The social studies curriculum for this course consists of the following content area strands: World History, Geography, Economics, Civics and Government. The primary content for this course pertains to the concepts and methodologies used in the social studies disciplines, and their applications in contemporary and historical contexts. Content should include, but not be limited to, the basic concepts and methodology of the social studies disciplines, interdisciplinary concepts of change, conflict, interdependence, choice, and impact of the environment, development of reasoning and information-processing skills, applications of the social studies to contemporary issues and concerns, applications of the social studies to the study of Florida. Students will be exposed to the multiple disciplines of social studies including history, geography, political science, economics, sociology, psychology, and anthropology. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.</p> </div>
SS.6.G.1.4:	Utilize tools geographers use to study the world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.</p> </div>
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are major rivers, seas, oceans.</p> </div>
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are city-states, provinces, kingdoms, empires.</p> </div>
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are China limits and Greece invites.</p> </div>
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Phoenicia on Greece and Greece on Rome.</p> </div>
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.</p> </div>
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.</p> </div>
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are water in the Middle East, fertile soil, fuel.</p> </div>
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.

SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
	Interpret primary and secondary sources.
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	<p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The social studies curriculum for this course consists of the following content area strands: World History, Geography, Economics, Civics and Government. The primary content for this course pertains to the concepts and methodologies used in the social studies disciplines, and their applications in contemporary and historical contexts. Content should include, but not be limited to, the basic concepts and methodology of the social studies disciplines, interdisciplinary concepts of change, conflict, interdependence, choice, and impact of the environment, development of reasoning and information-processing skills, applications of the social studies to contemporary issues and concerns, applications of the social studies to the study of Florida. Students will be exposed to the multiple disciplines of social studies including history, geography, political science, economics, sociology, psychology, and anthropology. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ol style="list-style-type: none"> Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting Summarize numerical data sets in relation to their context, such as by: <ol style="list-style-type: none"> Reporting the number of observations.

MAFS.6.SP.2.5:	<p>b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.</p> <p>c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.</p> <p>d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.</p> <p>Standard Relation to Course: Supporting</p> <p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.1.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.3.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.5.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.13:	<p>Examine multiple perspectives on public and current issues.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.14:	<p>Conduct a service project to further the public good.</p> <p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course</p>

	(EOC) Assessments webpage and the FLDOE Social Studies webpage.
HE.6.B.4.3:	Demonstrate effective conflict-management and/or resolution strategies. Clarifications: Talk to an adult, anger management, and conflict mediation.
HE.6.B.5.4:	Distinguish between the need for individual or collaborative decision-making. Clarifications: Consider the severity of the situation, consider personal skills, and consider when someone is a danger to self or others.
HE.6.C.1.8:	Examine the likelihood of injury or illness if engaging in unhealthy/risky behaviors. Clarifications: Obesity related to poor nutrition and inactivity, cancer and chronic lung disease related to tobacco use, injuries caused from failure to use seat restraint, and sexually transmitted diseases caused by sexual activity.
PE.6.M.1.12:	Use proper safety practices. Clarifications: Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.R.5.1:	List ways that peer pressure can be positive and negative.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 20 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 20-hour requirement. Activities can range widely and occur within or beyond the school and regular school hours. For more information about service-learning, see the Florida Department of Education Web site at www.fl DOE.org/Family/learnserv.asp.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Provide documentation of activities and the minimum 20 hours of participation in an approved service-learning project.

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support,

students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem.

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p> <p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications:</p>

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
SS.7.C.2.3:	Experience the responsibilities of citizens at the local, state, or federal levels. Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.
SS.7.C.2.13:	Examine multiple perspectives on public and current issues. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.14:	Conduct a service project to further the public good. Clarifications: The project can be at the school, community, state, national, or international level.
SS.7.C.3.14:	Differentiate between local, state, and federal governments' obligations and services. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.4.2:	Recognize government and citizen participation in international organizations. Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice. This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
HE.6.B.4.3:	Demonstrate effective conflict-management and/or resolution strategies. Clarifications: Talk to an adult, anger management, and conflict mediation.
HE.6.B.5.4:	Distinguish between the need for individual or collaborative decision-making. Clarifications: Consider the severity of the situation, consider personal skills, and consider when someone is a danger to self or others.
HE.6.C.1.8:	Examine the likelihood of injury or illness if engaging in unhealthy/risky behaviors. Clarifications: Obesity related to poor nutrition and inactivity, cancer and chronic lung disease related to tobacco use, injuries caused from failure to use seat restraint, and sexually transmitted diseases caused by sexual activity.
PE.6.M.1.12:	Use proper safety practices. Clarifications: Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.R.5.1:	List ways that peer pressure can be positive and negative.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 20 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others

about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 20-hour requirement. Activities can range widely and occur within or beyond the school and regular school hours. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/Family/learnserve.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Provide documentation of activities and the minimum 20 hours of participation in an approved service-learning project.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

Course Standards

Name	Description
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem.

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p> <p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications:</p>

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
HE.6.B.4.3:	Demonstrate effective conflict-management and/or resolution strategies. Clarifications: Talk to an adult, anger management, and conflict mediation.
HE.6.B.5.4:	Distinguish between the need for individual or collaborative decision-making. Clarifications: Consider the severity of the situation, consider personal skills, and consider when someone is a danger to self or others.
HE.6.C.1.8:	Examine the likelihood of injury or illness if engaging in unhealthy/risky behaviors. Clarifications: Obesity related to poor nutrition and inactivity, cancer and chronic lung disease related to tobacco use, injuries caused from failure to use seat restraint, and sexually transmitted diseases caused by sexual activity.
PE.6.M.1.12:	Use proper safety practices. Clarifications: Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.R.5.1:	List ways that peer pressure can be positive and negative.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
SS.68.HE.1.1:	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945. <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.3.13:	Explain government obligations to its citizens and the services provided at the local, state and national levels. <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.4.2:	Describe the United States' and citizen participation in international organizations. <ul style="list-style-type: none"> • Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). • Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 20 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 20-hour requirement. Activities can range widely and occur within or beyond the school and regular school hours. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/Family/learnserve.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Course Standards

Name	Description
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.7.SL.1.1:	<p>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.2.4:	<p>Display numerical data in plots on a number line, including dot plots, histograms, and box plots.</p> <p>Standard Relation to Course: Supporting</p> <p>Summarize numerical data sets in relation to their context, such as by:</p> <ol style="list-style-type: none"> Reporting the number of observations.

MAFS.6.SP.2.5:	<p>b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.</p> <p>c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.</p> <p>d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.</p> <p>Standard Relation to Course: Supporting</p> <p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.1.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.3.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.5.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.13:	<p>Examine multiple perspectives on public and current issues.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.14:	<p>Conduct a service project to further the public good.</p> <p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course</p>

	(EOC) Assessments webpage and the FLDOE Social Studies webpage.
HE.7.B.4.2:	Demonstrate refusal, negotiation, and collaboration skills to enhance health and reduce health risks. Clarifications: Working together, compromise, direct statement, peer mediation, personal boundaries, and reflective listening.
HE.7.B.4.3:	Articulate the possible causes of conflict among youth in schools and communities. Clarifications: Ethnic prejudice and diversity, substance use, group dynamics, relationship issues/dating violence, gossip/rumors, and sexual identity.
HE.7.B.5.4:	Determine when individual or collaborative decision-making is appropriate. Clarifications: Over-the-counter drug use, harassment, gang involvement; and can the outcome result in harm or loss of life?
HE.7.C.1.8:	Explain the likelihood of injury or illness if engaging in unhealthy/risky behaviors. Clarifications: Abuse of over-the-counter medications, sexually transmitted diseases and sexually transmitted infections from sexual relationships, injury, or death from unsupervised handling of firearms, and physical/emotional injury, or impact from abusive dating partner.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction and applications to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 25 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 25-hour requirement. Activities can range widely and occur within or beyond the school and regular school hours. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/Family/learnserve.asp.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Provide documentation of activities and the minimum 25 hours of participation in one or more approved service-learning project.

For this second-level middle school course, the expectation is that students will not only conduct more service-learning hours than students in the first level but will also demonstrate responsibility and leadership in project investigation, design, and implementation.

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

GENERAL INFORMATION

Course Number: 2104020

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Interdisciplinary and Applied Social Studies >

Abbreviated Title: M/J ENG CIT SERVLRN2

Course Length: Semester (S)

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

M/J Engaged Citizenship through Service Learning 2 (#2104020) 2022 - 2023

Course Standards

Name	Description
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem.

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p> <p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications:</p>

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
SS.7.C.2.3:	Experience the responsibilities of citizens at the local, state, or federal levels. Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.
SS.7.C.2.13:	Examine multiple perspectives on public and current issues. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.14:	Conduct a service project to further the public good. Clarifications: The project can be at the school, community, state, national, or international level.
SS.7.C.3.14:	Differentiate between local, state, and federal governments' obligations and services. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.4.2:	Recognize government and citizen participation in international organizations. Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice. This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
HE.7.B.4.2:	Demonstrate refusal, negotiation, and collaboration skills to enhance health and reduce health risks. Clarifications: Working together, compromise, direct statement, peer mediation, personal boundaries, and reflective listening.
HE.7.B.4.3:	Articulate the possible causes of conflict among youth in schools and communities. Clarifications: Ethnic prejudice and diversity, substance use, group dynamics, relationship issues/dating violence, gossip/rumors, and sexual identity.
HE.7.B.5.4:	Determine when individual or collaborative decision-making is appropriate. Clarifications: Over-the-counter drug use, harassment, gang involvement; and can the outcome result in harm or loss of life?
HE.7.C.1.8:	Explain the likelihood of injury or illness if engaging in unhealthy/risky behaviors. Clarifications: Abuse of over-the-counter medications, sexually transmitted diseases and sexually transmitted infections from sexual relationships, injury, or death from unsupervised handling of firearms, and physical/emotional injury, or impact from abusive dating partner.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction and applications to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 25 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.

4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 25-hour requirement. Activities can range widely and occur within or beyond the school and regular school hours. For more information about service-learning, see the Florida Department of Education Web site at www.fl DOE.org/Family/learnservice.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.
2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Provide documentation of activities and the minimum 25 hours of participation in one or more approved service-learning project.

For this second-level middle school course, the expectation is that students will not only conduct more service-learning hours than students in the first level but will also demonstrate responsibility and leadership in project investigation, design, and implementation.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

QUALIFICATIONS

As well as any certification requirements listed on the course description, the following qualifications may also be acceptable for the course:

Any field when certification reflects a bachelor or higher degree.

M/J Engaged Citizenship through Service Learning 2 (#2104020) 2023 - And Beyond

Course Standards

Name	Description
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem.

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p> <p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications:</p>

ELA.K12.EE.5.1:	Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
HE.7.B.4.2:	Demonstrate refusal, negotiation, and collaboration skills to enhance health and reduce health risks. Clarifications: Working together, compromise, direct statement, peer mediation, personal boundaries, and reflective listening.
HE.7.B.4.3:	Articulate the possible causes of conflict among youth in schools and communities. Clarifications: Ethnic prejudice and diversity, substance use, group dynamics, relationship issues/dating violence, gossip/rumors, and sexual identity.
HE.7.B.5.4:	Determine when individual or collaborative decision-making is appropriate. Clarifications: Over-the-counter drug use, harassment, gang involvement; and can the outcome result in harm or loss of life?
HE.7.C.1.8:	Explain the likelihood of injury or illness if engaging in unhealthy/risky behaviors. Clarifications: Abuse of over-the-counter medications, sexually transmitted diseases and sexually transmitted infections from sexual relationships, injury, or death from unsupervised handling of firearms, and physical/emotional injury, or impact from abusive dating partner.
PE.7.M.1.7:	Utilize proper equipment and implement appropriate safety procedures for participation in a variety of sports or activities.
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.
PE.7.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
SS.68.HE.1.1:	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945. <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.3.13:	Explain government obligations to its citizens and the services provided at the local, state and national levels. <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.4.2:	Describe the United States' and citizen participation in international organizations. <ul style="list-style-type: none"> • Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). • Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course provides an introduction and applications to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school and/or community needs. Students will actively participate in meaningful service-learning experiences of at least 25 hours' duration.

The content should include, but not be limited to, the following:

1. Students, working individually or in small or large groups, will investigate, quantify, and choose among issues and needs that can be addressed.
2. Students will design and then implement one or more service-learning projects to address identified needs through direct, indirect, advocacy, or research-focused action. Projects will involve meaningful partnerships.
3. Students will conduct reflection activities to measure and record information about the service-learning activities and their impacts.
4. Students will demonstrate KSAs (knowledge, skills, or abilities) gained from projects through project-developed products and public presentations that educate others about the needs/issues addressed, activities conducted, impacts measured, and/or how others can also meet needs through service.

All of the above activities may be counted toward the service-learning 25-hour requirement. Activities can range widely and occur within or beyond the school and regular school hours. For more information about service-learning, see the Florida Department of Education Web site at www.fldoe.org/Family/learnserve.asp.

Language Arts benchmarks are addressed as students read, write, create documents, and make public presentations about needs and activities to address them. Social Studies benchmarks include analyzing community issues, coming up with solutions, and conducting service projects. Math benchmarks are met as students chart and graph data as part of issue investigation, project design, demonstration, and/or reflection. Health and Physical Education are addressed as projects include discussion and learning related to safety, liability, interpersonal skills, conflict avoidance, appraising outcomes and impacts on others, maintaining appropriate behavior, etc., in the students' interaction with others.

After successfully completing this course, the student will:

1. Demonstrate an understanding of service-learning, the types of service-learning, and its importance in a participatory democracy.

2. Demonstrate the ability to identify school/community needs and propose solutions that can be implemented through service-learning.
3. Demonstrate the ability to identify and analyze different points of view to gain an understanding of diverse backgrounds and perspectives and their value.
4. Demonstrate the ability to investigate significant needs, plan and implement service-learning projects to address them, evaluate project effectiveness, and present the information to an authentic audience.
5. Demonstrate use of effective self-assessment and reflection strategies (e.g., verbal, written, artistic, and non-verbal activities to demonstrate learning, understanding, and changes in students' knowledge, skills and/or abilities).
6. Demonstrate effective use of facilitative communication skills (e.g., writing, speaking, listening, questioning, paraphrasing, non-verbal communication, non-judgmental response).
7. Provide documentation of activities and the minimum 25 hours of participation in one or more approved service-learning project.

For this second-level middle school course, the expectation is that students will not only conduct more service-learning hours than students in the first level but will also demonstrate responsibility and leadership in project investigation, design, and implementation.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

Course Standards

Name	Description
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.12:	<p>Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.13:	<p>Examine multiple perspectives on public and current issues.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.14:	<p>Conduct a service project to further the public good.</p> <p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.B.5.2:	<p>Select healthy alternatives over unhealthy alternatives when making a decision.</p> <p>Clarifications: Proper prescription-drug use, using safety equipment, Internet safety, and managing stress.</p>
HE.7.B.5.4:	<p>Determine when individual or collaborative decision-making is appropriate.</p> <p>Clarifications: Over-the-counter drug use, harassment, gang involvement; and can the outcome result in harm or loss of life?</p>
MAFS.7.SP.1.1:	<p>Understand that statistics can be used to gain information about a population by examining a sample of the population: generalizations about a population from a sample are valid only if the sample is representative of that population. Understand that random sampling tends to produce representative samples and support valid inferences.</p> <p>Make sense of problems and persevere in solving them.</p>
MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving</p>

complex problems and identify correspondences between different approaches.

PE.7.R.5.1: Identify situations in which peer pressure could negatively impact one's own behavior choices.

General Course Information and Notes

VERSION DESCRIPTION

This course provides an introduction to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school or community needs. Students will actively participate in meaningful service-learning experiences of at least 20 hours in duration.

GENERAL NOTES

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts.

MA.K12.MTR.5.1:

- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Experience the responsibilities of citizens at the local, state, or federal levels.

SS.7.C.2.3:

Clarifications:

Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.

Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.

SS.7.C.2.12:

Clarifications:

This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Examine multiple perspectives on public and current issues.

SS.7.C.2.13:

Clarifications:

This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Conduct a service project to further the public good.

SS.7.C.2.14:

Clarifications:

The project can be at the school, community, state, national, or international level.

Differentiate between local, state, and federal governments' obligations and services.

SS.7.C.3.14:

Clarifications:

This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

Recognize government and citizen participation in international organizations.

SS.7.C.4.2:

Clarifications:

Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.

This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit. Cite evidence to explain and justify reasoning.
ELA.K12.EE.1.1:	Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.B.5.2:	Select healthy alternatives over unhealthy alternatives when making a decision. Clarifications: Proper prescription-drug use, using safety equipment, Internet safety, and managing stress.
HE.7.B.5.4:	Determine when individual or collaborative decision-making is appropriate. Clarifications: Over-the-counter drug use, harassment, gang involvement; and can the outcome result in harm or loss of life?
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.

General Course Information and Notes

VERSION DESCRIPTION

This course provides an introduction to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school or community needs. Students will actively participate in meaningful service-learning experiences of at least 20 hours in duration.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit

https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Course Standards

Name	Description
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts.

MA.K12.MTR.5.1:

- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to

ELA.K12.EE.5.1:

	do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
SS.68.HE.1.1:	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945. <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.2.10:	Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action. <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.13:	Explain government obligations to its citizens and the services provided at the local, state and national levels. <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.4.2:	Describe the United States' and citizen participation in international organizations. <ul style="list-style-type: none"> • Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). • Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.B.5.2:	Select healthy alternatives over unhealthy alternatives when making a decision. Clarifications: Proper prescription-drug use, using safety equipment, Internet safety, and managing stress.
HE.7.B.5.4:	Determine when individual or collaborative decision-making is appropriate. Clarifications: Over-the-counter drug use, harassment, gang involvement; and can the outcome result in harm or loss of life?
PE.7.R.5.1:	Identify situations in which peer pressure could negatively impact one's own behavior choices.

General Course Information and Notes

VERSION DESCRIPTION

This course provides an introduction to service-learning and civic responsibility. Academic, personal, and career skills needed for effective service-learning project implementation will be taught and applied through structured service projects that meet real school or community needs. Students will actively participate in meaningful service-learning experiences of at least 20 hours in duration.

Course Standards

Name	Description
SS.7.C.1.4:	Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.1.6:	Interpret the intentions of the Preamble of the Constitution. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.1.7:	Describe how the Constitution limits the powers of government through separation of powers and checks and balances. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.2:	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.2.3:	Experience the responsibilities of citizens at the local, state, or federal levels. Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.
SS.7.C.2.4:	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.8:	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.4.3:	Describe examples of how the United States has dealt with international conflicts. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RST.2.4:	Determine the meaning of symbols, key terms, and other domain-specific words and phrases as they are used in a specific scientific or technical context relevant to grades 6–8 texts and topics.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.

LAFS.7.SL.1.1:	<p>a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion.</p> <p>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</p> <p>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</p> <p>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</p>
PE.6.C.2.4:	<p>Describe the long-term benefits of regular physical activity.</p> <p>Clarifications: Some examples of types of long-term benefits are physical, cognitive and emotional.</p>
PE.6.M.1.1:	<p>Demonstrate movements designed to improve and maintain cardiorespiratory endurance, muscular strength and endurance, flexibility and proper body composition.</p>
PE.6.M.1.12:	<p>Use proper safety practices.</p> <p>Clarifications: Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.</p>
PE.6.R.5.2:	<p>Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop knowledge of the history, customs, traditions and function of the Junior Reserve Officer Training Corps (JROTC) as well as to stimulate an enthusiasm for scholarship as a foundation for higher citizenship and leadership goals. The course includes the development of basic leadership skills including leadership principles, values, and attributes. Students also develop knowledge of self-control, citizenship, wellness and fitness. A study of the United States Constitution, Bill of Rights, responsibilities of United States citizens and the federal justice system is also provided.

Special Notes:

Instructional Practices: Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Additional Benchmarks Related to Career and Technical Education:

(Principles of Public Service)

- 04.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 04.01 Employ leadership skills to accomplish organizational goals and objectives.
- 04.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks.
- 04.03 Conduct and participate in meetings to accomplish work tasks.
- 04.04 Employ mentoring skills to inspire and teach others.
- 04.05 Employ critical thinking skills independently and in teams to solve problems and make decisions.
- 04.06 Employ critical thinking and interpersonal skills to resolve conflicts.
- 04.07 Identify and document workplace performance goals and monitor progress toward these goals.
- 04.08 Conduct technical research to gather information necessary for decision-making.

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.2:	<p>Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.4:	<p>Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.3:	<p>Describe examples of how the United States has dealt with international conflicts.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	<ul style="list-style-type: none"> • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
PE.6.C.2.4:	<p>Describe the long-term benefits of regular physical activity.</p> <p>Clarifications: Some examples of types of long-term benefits are physical, cognitive and emotional.</p>
PE.6.M.1.1:	<p>Demonstrate movements designed to improve and maintain cardiorespiratory endurance, muscular strength and endurance, flexibility and proper body composition.</p>
PE.6.M.1.12:	<p>Use proper safety practices.</p> <p>Clarifications: Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.</p>
PE.6.R.5.2:	<p>Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>

GENERAL NOTES

The purpose of this course is to enable students to develop knowledge of the history, customs, traditions and function of the Junior Reserve Officer Training Corps (JROTC) as well as to stimulate an enthusiasm for scholarship as a foundation for higher citizenship and leadership goals. The course includes the development of basic leadership skills including leadership principles, values, and attributes. Students also develop knowledge of self-control, citizenship, wellness and fitness. A study of the United States Constitution, Bill of Rights, responsibilities of United States citizens and the federal justice system is also provided.

Special Notes:

Instructional Practices: Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Additional Benchmarks Related to Career and Technical Education:

(Principles of Public Service)

- 04.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 04.01 Employ leadership skills to accomplish organizational goals and objectives.
- 04.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks.
- 04.03 Conduct and participate in meetings to accomplish work tasks.
- 04.04 Employ mentoring skills to inspire and teach others.
- 04.05 Employ critical thinking skills independently and in teams to solve problems and make decisions.
- 04.06 Employ critical thinking and interpersonal skills to resolve conflicts.
- 04.07 Identify and document workplace performance goals and monitor progress toward these goals.
- 04.08 Conduct technical research to gather information necessary for decision-making.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/si.pdf>.

GENERAL INFORMATION

Course Number: 2104050

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Interdisciplinary and Applied Social Studies >
Abbreviated Title: M/J INTRO TO JROTC
Course Length: Semester (S)
Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Junior Reserve Officer Training Corps (JROTC) (Career & Technical)
Junior Reserve Officer Training Corps (JROTC) (District-issued Employment Certificate)

M/J Introduction to Junior Reserve Officer Training Corps (JROTC) (#2104050) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
SS.7.CG.1.9:	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p> <ul style="list-style-type: none"> Students will explain the concept of limited government in the U.S. Constitution. Students will describe and distinguish between separation of powers and checks and balances. Students will analyze how government power is limited by separation of powers and/or checks and balances. Students will recognize examples of separation of powers and checks and balances. Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. Students will use scenarios to assess specific obligations of citizens. Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. Students will recognize the five freedoms protected by the First Amendment. Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. Students will use scenarios to identify rights protected by the Bill of Rights. Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian

efforts, peacekeeping operations, sanctions, war).

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
PE.6.C.2.4:	<p>Describe the long-term benefits of regular physical activity.</p> <p>Clarifications: Some examples of types of long-term benefits are physical, cognitive and emotional.</p>

PE.6.M.1.1:	Demonstrate movements designed to improve and maintain cardiorespiratory endurance, muscular strength and endurance, flexibility and proper body composition.
	Use proper safety practices.
PE.6.M.1.12:	Clarifications: Some examples of safety practices are the use of sun screen, hydration, selection of clothing and correct biomechanics.
PE.6.R.5.2:	Demonstrate acceptance and respect for persons of diverse backgrounds and abilities in physical-activity settings.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.

General Course Information and Notes

GENERAL NOTES

The purpose of this course is to enable students to develop knowledge of the history, customs, traditions and function of the Junior Reserve Officer Training Corps (JROTC) as well as to stimulate an enthusiasm for scholarship as a foundation for higher citizenship and leadership goals. The course includes the development of basic leadership skills including leadership principles, values, and attributes. Students also develop knowledge of self-control, citizenship, wellness and fitness. A study of the United States Constitution, Bill of Rights, responsibilities of United States citizens and the federal justice system is also provided.

Special Notes:

Instructional Practices: Teaching from a well-written, grade-level textbook enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Additional Benchmarks Related to Career and Technical Education:

(Principles of Public Service)

- 04.0 Demonstrate leadership and teamwork skills needed to accomplish team goals and objectives.
- 04.01 Employ leadership skills to accomplish organizational goals and objectives.
- 04.02 Establish and maintain effective working relationships with others in order to accomplish objectives and tasks.
- 04.03 Conduct and participate in meetings to accomplish work tasks.
- 04.04 Employ mentoring skills to inspire and teach others.
- 04.05 Employ critical thinking skills independently and in teams to solve problems and make decisions.
- 04.06 Employ critical thinking and interpersonal skills to resolve conflicts.
- 04.07 Identify and document workplace performance goals and monitor progress toward these goals.
- 04.08 Conduct technical research to gather information necessary for decision-making.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/si.pdf>.

GENERAL INFORMATION

Course Number: 2104050

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Interdisciplinary and Applied Social Studies >

Abbreviated Title: M/J INTRO TO JROTC

Course Length: Semester (S)

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Junior Reserve Officer Training Corps (JROTC) (Career & Technical)

Junior Reserve Officer Training Corps (JROTC) (District-issued Employment Certificate)

M/J Introduction to Personal Financial Literacy (#2104060) 2019 - 2022 (current)

Course Standards

Name	Description
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.6:	Compare the national budget process to the personal budget process. Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	Describe the banking system in the United States and its impact on the money supply. Clarifications: Examples are the Federal Reserve System and privately owned banks.
SS.8.E.1.1:	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects. Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.FL.1.1:	Explain that careers are based on working at jobs in the same occupation or profession for many years. Describe the different types of education and training required by various careers. Clarifications: Interview individuals and create a timeline that shows the education, training, and job experiences that occurred as the individuals progressed through different stages of their careers.
SS.8.FL.1.2:	Identify the many decisions people must make over a lifetime about their education, jobs, and careers that affect their incomes and job opportunities. Clarifications: Conduct research on a specific career. Describe the education, job, or career decisions individuals in this field might make over their lifetime and explain how this could affect their incomes and job opportunities.
SS.8.FL.1.3:	Explain that getting more education and learning new job skills can increase a person's human capital and productivity. Clarifications: Explain how taking a babysitting class or getting lifeguard training can improve a young person's human capital or productivity.
SS.8.FL.1.4:	Examine the fact that people with less education and fewer job skills tend to earn lower incomes than people with more education and greater job skills. Clarifications: Gather data on the average wage or salary for different jobs and explain how they differ by the level of education, job skill, or years of experience.
SS.8.FL.1.5:	Examine the fact that investment in education and training generally has a positive rate of return in terms of the income that people earn over a lifetime, with some education or training having a higher rate of return than others. Clarifications: Using data on the lifetime earnings of workers with different levels of education, explain why adults with a college education typically earn more than adults with only a high school education.
SS.8.FL.1.6:	Identify the opportunity costs that education, training, and development of job skills have in the terms of time, effort, and money. Clarifications: Describe the opportunity costs of attending a training course on babysitting, lifeguarding, or first aid.
SS.8.FL.1.7:	Identify that interest, dividends, and capital appreciation (gains) are forms of income earned from financial investments. Clarifications: Find the interest rate a bank pays on a savings account.
SS.8.FL.1.8:	Discuss the fact that some people receive income support from government because they have low incomes or qualify in other ways for government assistance. Clarifications: Look up government programs, including but not limited to, Medicaid or SNAP (Supplemental Nutrition Assistance Program) and explain the financial situation the programs are addressing.
SS.8.FL.2.1:	Explain why when deciding what to buy, consumers may choose to gather information from a variety of sources. Describe how the quality and usefulness of information provided by sources can vary greatly from source to source. Explain that, while many sources provide valuable information, other sources provide information that is deliberately misleading. Clarifications: Gather information for an electronic good from sources such as manufacturers' websites, retail websites, and consumer review websites.

	Explain what information is most helpful in making their decision. Search the Internet and print materials and identify deceptive selling practices.
SS.8.FL.2.2:	Analyze a source's incentives in providing information about a good or service, and how a consumer can better assess the quality and usefulness of the information. Clarifications: Explain why advice from a source such as a salesperson may or may not be useful when deciding which product to buy.
SS.8.FL.2.3:	Describe the variety of payment methods people can use in order to buy goods and services. Clarifications: Explain how they would use the following payment methods to purchase a good or service: cash, check, debit card, credit card, mobile phone, online payment, prepaid card, layaway, and rent to own.
SS.8.FL.2.4:	Examine choosing a payment method, by weighing the costs and benefits of the different payment options. Clarifications: Choose the best payment method for the following purchases by weighing the costs and benefits of various payment options: ticket to a concert, food at a convenience store, airline ticket, cell phone bill, beverage at a middle school basketball game, and car payment.
SS.8.FL.2.5:	Discuss the fact that people may revise their budget based on unplanned expenses and changes in income. Clarifications: Offer ways to balance a family's budget given unplanned expenses such as health care costs, car repairs, or change in income.
SS.8.FL.3.1:	Explain that banks and other financial institutions loan funds received from depositors to borrowers and that part of the interest received from these loans is used to pay interest to depositors for the use of their money. Clarifications: Draw and label a diagram showing the role that financial institutions play in channeling funds from savers to borrowers. Conduct research into the interest rate paid on savings and charged for loans by financial institutions in their community and create a classroom bulletin board summarizing their findings.
SS.8.FL.3.2:	Explain that, for the saver, an interest rate is the price a financial institution pays for using a saver's money and is normally expressed as an annual percentage of the amount saved. Clarifications: Define an interest rate as the price paid for using someone else's money, expressed as a percentage of the amount saved.
SS.8.FL.3.3:	Discuss that interest rates paid on savings and charged on loans, like all prices, are determined in a market. Clarifications: Explain why banks that experience an increase in the number of people who want loans may decide to pay higher interest rates on deposits.
SS.8.FL.3.4:	Explain that, when interest rates increase, people earn more on their savings and their savings grow more quickly. Clarifications: Calculate the total amount of interest earned on two certificates of deposit—one with a higher rate of interest than the other—and explain how the certificate of deposit with the higher interest rate can help a saver reach his or her savings goal faster.
SS.8.FL.3.5:	Identify principal as the initial amount of money upon which interest is paid. Clarifications: Differentiate between principal and interest.
SS.8.FL.3.6:	Identify the value of a person's savings in the future as determined by the amount saved and the interest rate. Explain why the earlier people begin to save, the more savings they will be able to accumulate, all other things equal, as a result of the power of compound interest. Clarifications: Use the Rule of 72 to determine the number of years it will take for their savings to double in value. Using a formula for compound interest, calculate how much two different savers, one who starts to save at age 21 and one who starts to save at age 35, will have at retirement.
SS.8.FL.3.7:	Discuss the different reasons that people save money, including large purchases (such as higher education, autos, and homes), retirement, and unexpected events. Discuss how people's tastes and preferences influence their choice of how much to save and for what to save. Clarifications: Write a short story comparing the savings choices of a young college graduate to those of a married couple who recently celebrated their 40th birthdays and who have two children.
SS.8.FL.3.8:	Explain that, to assure savers that their deposits are safe from bank failures, federal agencies guarantee depositors' savings in most commercial banks, savings banks, and savings associations up to a set limit. Clarifications: Identify the Federal Deposit Insurance Corporation (FDIC) and the National Credit Union Administration (NCUA) as the government agencies responsible for insuring depositors' savings and state the limit of FDIC and NCUA coverage. Explain why the bank-run scene in the movie <i>It's a Wonderful Life</i> , for example, is less likely to occur in today's world of insured banks.
SS.8.FL.4.1:	Explain that people who apply for loans are told what the interest rate on the loan will be. An interest rate is the price of using someone else's money expressed as an annual percentage of the loan principal. Clarifications: Explain that repayment of a loan includes repayment of the principal plus the interest charged. Compute the interest rate when given a principal and an amount of interest. Compute the amount of interest when given the loan principal and the interest rate.
SS.8.FL.4.2:	Identify a credit card purchase as a loan from the financial institution that issued the card. Explain that credit card interest rates tend to be higher than rates for other loans. In addition, financial institutions may charge significant fees related to a credit card and its use. Clarifications: Examine a credit card statement and identify the interest rate and fees charged.
SS.8.FL.4.3:	Examine the fact that borrowers who use credit cards for purchases and who do not pay the full balance when it is due pay much higher costs for their purchases because interest is charged monthly. Explain how a credit card user can avoid interest charges by paying the entire balance within the grace period specified by the financial institution. Clarifications:

	For an expensive good purchased using credit, find the total interest paid and the amount still owed after one year when only the minimum payment is made each month. Give advice to a friend explaining what happens to the total cost of borrowing on a credit card when only the minimum payment is made each month.
SS.8.FL.4.4:	<p>Explain that lenders charge different interest rates based on the risk of nonpayment by borrowers. Describe why the higher the risk of nonpayment, the higher the interest rate charged by financial institutions, and the lower the risk of nonpayment, the lower the interest rate charged.</p> <p>Clarifications: As a banker, decide for each of three potential borrowers with different credit backgrounds whether to extend credit, and if so, what the interest rate should be. Write a decision letter to the borrower justifying the banker's decision.</p>
SS.8.FL.5.1:	<p>Describe the differences among the different types of financial assets, including a wide variety of financial instruments such as bank deposits, stocks, bonds, and mutual funds. Explain that real estate and commodities are also often viewed as financial assets.</p> <p>Clarifications: Find the prices of a variety of current possible investments.</p>
SS.8.FL.5.2:	Calculate the amount of interest income received from depositing a certain amount of money in a bank account paying 1 percent per year and from owning a bond paying 5 percent per year in order to analyze that interest is received from money deposited in bank accounts as well as by owning a corporate or government bond or making a loan.
SS.8.FL.5.3:	<p>Discuss that when people buy corporate stock, they are purchasing ownership shares in a business that if the business is profitable, they will expect to receive income in the form of dividends and/or from the increase in the stock's value, that the increase in the value of an asset (like a stock) is called a capital gain, and if the business is not profitable, investors could lose the money they have invested.</p> <p>Clarifications: Determine the amount of dividends paid from a selected stock and how much the price of the stock has appreciated or depreciated over the year.</p>
SS.8.FL.5.4:	<p>Explain that the price of a financial asset is determined by the interaction of buyers and sellers in a financial market.</p> <p>Clarifications: Explain why the price of a stock might change if more individuals decide to purchase the stock. Explain why the price of a stock might change if more companies issue new shares of stock to raise new investment funds.</p>
SS.8.FL.5.5:	<p>Explain that the rate of return earned from investments will vary according to the amount of risk and, in general, a trade-off exists between the security of an investment and its expected rate of return.</p> <p>Clarifications: Compare rates of return of a variety of different investments and speculate on the amount of risk each of the investments entails.</p>
SS.8.FL.6.1:	<p>Analyze the fact that personal financial risk exists when unexpected events can damage health, income, property, wealth, or future opportunities.</p> <p>Clarifications: Write a scenario describing how a storm blowing a tree onto a roof can impact a family's financial situation.</p>
SS.8.FL.6.2:	<p>Identify insurance as a product that allows people to pay a fee (called a premium) now to transfer the costs of a potential loss to a third party.</p> <p>Clarifications: Explain why homeowners buy flood insurance for \$300 a year when the likelihood of a flood in their area is extremely low.</p>
SS.8.FL.6.3:	<p>Describe how a person may self-insure by accepting a risk and saving money on a regular basis to cover a potential loss.</p> <p>Clarifications: List examples of potential events and costs against which people might self-insure.</p>
SS.8.FL.6.4:	<p>Discuss why insurance policies that guarantee higher levels of payment in the event of a loss (coverage) have higher prices.</p> <p>Clarifications: Explain how a deductible affects the payout on an auto insurance claim, and how the individual's choice of deductible affects the price of the policy at the time it is purchased.</p>
SS.8.FL.6.5:	<p>Discuss that insurance companies charge higher premiums to cover higher-risk individuals and events because the risk of monetary loss is greater for these individuals and events.</p> <p>Clarifications: Explain why drivers who receive repeated speeding tickets will see their insurance premiums increase.</p>
SS.8.FL.6.6:	<p>Explain that individuals can choose to accept some risk, to take steps to avoid or reduce risk, or to transfer risk to others through the purchase of insurance and that each option has different costs and benefits.</p> <p>Clarifications: Identify ways in which an automobile driver can avoid, reduce, or transfer the risk of being in an automobile accident. Explain why people may prefer to purchase insurance against fire in their apartment, but self-insure to handle the cost of tooth cavities.</p>
SS.8.FL.6.7:	<p>Evaluate social networking sites and other online activity from the perspective of making individuals vulnerable to harm caused by identity theft or misuse of their personal information.</p> <p>Clarifications: Identify ways that identity thieves can obtain someone's personal information. List actions an individual can take to protect personal information.</p>
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.

LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.RH.4.10:	By the end of grade 8, read and comprehend history/social studies texts in the grades 6–8 text complexity band independently and proficiently.
LAFS.68.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.8.SL.1.1:	<p>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 8 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions and decision-making, track progress toward specific goals and deadlines, and define individual roles as needed. Pose questions that connect the ideas of several speakers and respond to others' questions and comments with relevant evidence, observations, and ideas. Acknowledge new information expressed by others, and, when warranted, qualify or justify their own views in light of the evidence presented.
LAFS.8.SL.1.2:	Analyze the purpose of information presented in diverse media and formats (e.g., visually, quantitatively, orally) and evaluate the motives (e.g., social, commercial, political) behind its presentation.
LAFS.8.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with relevant evidence, sound valid reasoning, and well-chosen details; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.8.SL.2.5:	Integrate multimedia and visual displays into presentations to clarify information, strengthen claims and evidence, and add interest.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>

General Course Information and Notes

VERSION DESCRIPTION

This course consists for the following content areas and literacy strands: Financial Literacy, Economics, Mathematics, Language Arts for Literacy in History/Social Studies and Speaking and Listening. Content standards are geared toward deepening students' understanding of personal financial literacy through an economic perspective. A basic understanding of economics provides a critical framework to make informed decisions about budgeting, saving, and investing. In learning basic economics, students come to appreciate that choices have costs and benefits, and that it is often necessary to sort through complex information and weigh multiple costs and benefits before arriving at a decision. Emphasis will be placed on economic decision-making and real-life applications using real data.

The primary content for the course pertains to the study of learning the ideas, concepts, knowledge, and skills that will enable students to make sound personal finance decisions; to become wise, successful, and informed consumers, savers, borrowers, investors, risk managers, and future employees or employers; and to be participating and informed members of the global economy.

The content for the course is primarily developed around six standards from the NGSSS Financial Literacy Strand:

- Earning Income
- Buying Goods and Services
- Saving
- Using Credit
- Financial Investing
- Protecting and Insuring

Content included in these standards includes, but may not be limited to:

- analyzing cost/benefit of economic decisions
- identifying different types of education and training required by various careers
- understanding the effect of acquiring education and skills on future income
- measuring the opportunity cost that education and training have in terms of time, effort, and money
- exploring the variety of payment method options
- classifying expenses in a budget
- assessing the quality and usefulness of information from marketers
- understanding the role of financial institutions as intermediaries between savers and borrowers
- understanding the role of government agencies in protecting savings deposits
- examining the difference between principal and interest
- identifying the time value of money
- explaining how people's tastes and preferences influence their choice of how much and what to save for
- understanding why people use credit
- identifying a credit card purchase as a loan from the issuer of the card
- explaining why interest rates vary across borrowers
- examining how a credit card user can avoid interest charges
- understanding the variety of possible financial investments
- calculating the rates of return on an investment and understanding why it may vary among financial products
- identifying insurance as the transfer of risk through risk pooling
- understanding each option for managing risk (assume it, reduce it, insure it) entails a cost
- preventing identify theft and fraud

Special Notes

Instructional Practices: Teaching using real world materials, examples, and simulations enhances students' content area knowledge and also strengthens their ability to comprehend concepts related to personal financial literacy. Using the following instructional practices will also help student learning.

1. Incorporating current event articles on economic developments related to personal financial literacy.
2. Having students create economic models that reflect key concepts and economic decisions.
3. Use real world data and evidence to answer complex, high-level questions that are based on real world scenarios.
4. Require students to make and support personal financial decisions using evidence and trends.
5. Provided extended learning opportunities that simulate economic scenarios including, but not limited to:
 - opening a bank account
 - searching for and being offered a new job
 - planning and managing a household budget
 - analyzing the motivation and techniques of marketers
 - making a major purchase such as a home or automobile
 - applying for a credit card
 - planning for college expenses
 - filing a tax return
 - managing an investment portfolio

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Open Educational Resources (OEL)

There are a number of free financial literacy resources designed for middle school students that are available, providing both full service lesson plans and online digital modules. Please review the curriculum to determine if it is suitable for your educational needs before using.

Course Standards

Name	Description
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.6:	Compare the national budget process to the personal budget process. Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	Describe the banking system in the United States and its impact on the money supply. Clarifications: Examples are the Federal Reserve System and privately owned banks.
SS.8.E.1.1:	Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects. Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.
SS.8.FL.1.1:	Explain that careers are based on working at jobs in the same occupation or profession for many years. Describe the different types of education and training required by various careers. Clarifications: Interview individuals and create a timeline that shows the education, training, and job experiences that occurred as the individuals progressed through different stages of their careers.
SS.8.FL.1.2:	Identify the many decisions people must make over a lifetime about their education, jobs, and careers that affect their incomes and job opportunities. Clarifications: Conduct research on a specific career. Describe the education, job, or career decisions individuals in this field might make over their lifetime and explain how this could affect their incomes and job opportunities.
SS.8.FL.1.3:	Explain that getting more education and learning new job skills can increase a person's human capital and productivity. Clarifications: Explain how taking a babysitting class or getting lifeguard training can improve a young person's human capital or productivity.
SS.8.FL.1.4:	Examine the fact that people with less education and fewer job skills tend to earn lower incomes than people with more education and greater job skills. Clarifications: Gather data on the average wage or salary for different jobs and explain how they differ by the level of education, job skill, or years of experience.
SS.8.FL.1.5:	Examine the fact that investment in education and training generally has a positive rate of return in terms of the income that people earn over a lifetime, with some education or training having a higher rate of return than others. Clarifications: Using data on the lifetime earnings of workers with different levels of education, explain why adults with a college education typically earn more than adults with only a high school education.
SS.8.FL.1.6:	Identify the opportunity costs that education, training, and development of job skills have in the terms of time, effort, and money. Clarifications: Describe the opportunity costs of attending a training course on babysitting, lifeguarding, or first aid.
SS.8.FL.1.7:	Identify that interest, dividends, and capital appreciation (gains) are forms of income earned from financial investments. Clarifications: Find the interest rate a bank pays on a savings account.
SS.8.FL.1.8:	Discuss the fact that some people receive income support from government because they have low incomes or qualify in other ways for government assistance. Clarifications: Look up government programs, including but not limited to, Medicaid or SNAP (Supplemental Nutrition Assistance Program) and explain the financial situation the programs are addressing.
SS.8.FL.2.1:	Explain why when deciding what to buy, consumers may choose to gather information from a variety of sources. Describe how the quality and usefulness of information provided by sources can vary greatly from source to source. Explain that, while many sources provide valuable information, other sources provide information that is deliberately misleading. Clarifications: Gather information for an electronic good from sources such as manufacturers' websites, retail websites, and consumer review websites.

	Explain what information is most helpful in making their decision. Search the Internet and print materials and identify deceptive selling practices.
SS.8.FL.2.2:	Analyze a source's incentives in providing information about a good or service, and how a consumer can better assess the quality and usefulness of the information. Clarifications: Explain why advice from a source such as a salesperson may or may not be useful when deciding which product to buy.
SS.8.FL.2.3:	Describe the variety of payment methods people can use in order to buy goods and services. Clarifications: Explain how they would use the following payment methods to purchase a good or service: cash, check, debit card, credit card, mobile phone, online payment, prepaid card, layaway, and rent to own.
SS.8.FL.2.4:	Examine choosing a payment method, by weighing the costs and benefits of the different payment options. Clarifications: Choose the best payment method for the following purchases by weighing the costs and benefits of various payment options: ticket to a concert, food at a convenience store, airline ticket, cell phone bill, beverage at a middle school basketball game, and car payment.
SS.8.FL.2.5:	Discuss the fact that people may revise their budget based on unplanned expenses and changes in income. Clarifications: Offer ways to balance a family's budget given unplanned expenses such as health care costs, car repairs, or change in income.
SS.8.FL.3.1:	Explain that banks and other financial institutions loan funds received from depositors to borrowers and that part of the interest received from these loans is used to pay interest to depositors for the use of their money. Clarifications: Draw and label a diagram showing the role that financial institutions play in channeling funds from savers to borrowers. Conduct research into the interest rate paid on savings and charged for loans by financial institutions in their community and create a classroom bulletin board summarizing their findings.
SS.8.FL.3.2:	Explain that, for the saver, an interest rate is the price a financial institution pays for using a saver's money and is normally expressed as an annual percentage of the amount saved. Clarifications: Define an interest rate as the price paid for using someone else's money, expressed as a percentage of the amount saved.
SS.8.FL.3.3:	Discuss that interest rates paid on savings and charged on loans, like all prices, are determined in a market. Clarifications: Explain why banks that experience an increase in the number of people who want loans may decide to pay higher interest rates on deposits.
SS.8.FL.3.4:	Explain that, when interest rates increase, people earn more on their savings and their savings grow more quickly. Clarifications: Calculate the total amount of interest earned on two certificates of deposit—one with a higher rate of interest than the other—and explain how the certificate of deposit with the higher interest rate can help a saver reach his or her savings goal faster.
SS.8.FL.3.5:	Identify principal as the initial amount of money upon which interest is paid. Clarifications: Differentiate between principal and interest.
SS.8.FL.3.6:	Identify the value of a person's savings in the future as determined by the amount saved and the interest rate. Explain why the earlier people begin to save, the more savings they will be able to accumulate, all other things equal, as a result of the power of compound interest. Clarifications: Use the Rule of 72 to determine the number of years it will take for their savings to double in value. Using a formula for compound interest, calculate how much two different savers, one who starts to save at age 21 and one who starts to save at age 35, will have at retirement.
SS.8.FL.3.7:	Discuss the different reasons that people save money, including large purchases (such as higher education, autos, and homes), retirement, and unexpected events. Discuss how people's tastes and preferences influence their choice of how much to save and for what to save. Clarifications: Write a short story comparing the savings choices of a young college graduate to those of a married couple who recently celebrated their 40th birthdays and who have two children.
SS.8.FL.3.8:	Explain that, to assure savers that their deposits are safe from bank failures, federal agencies guarantee depositors' savings in most commercial banks, savings banks, and savings associations up to a set limit. Clarifications: Identify the Federal Deposit Insurance Corporation (FDIC) and the National Credit Union Administration (NCUA) as the government agencies responsible for insuring depositors' savings and state the limit of FDIC and NCUA coverage. Explain why the bank-run scene in the movie <i>It's a Wonderful Life</i> , for example, is less likely to occur in today's world of insured banks.
SS.8.FL.4.1:	Explain that people who apply for loans are told what the interest rate on the loan will be. An interest rate is the price of using someone else's money expressed as an annual percentage of the loan principal. Clarifications: Explain that repayment of a loan includes repayment of the principal plus the interest charged. Compute the interest rate when given a principal and an amount of interest. Compute the amount of interest when given the loan principal and the interest rate.
SS.8.FL.4.2:	Identify a credit card purchase as a loan from the financial institution that issued the card. Explain that credit card interest rates tend to be higher than rates for other loans. In addition, financial institutions may charge significant fees related to a credit card and its use. Clarifications: Examine a credit card statement and identify the interest rate and fees charged.
SS.8.FL.4.3:	Examine the fact that borrowers who use credit cards for purchases and who do not pay the full balance when it is due pay much higher costs for their purchases because interest is charged monthly. Explain how a credit card user can avoid interest charges by paying the entire balance within the grace period specified by the financial institution. Clarifications:

	For an expensive good purchased using credit, find the total interest paid and the amount still owed after one year when only the minimum payment is made each month. Give advice to a friend explaining what happens to the total cost of borrowing on a credit card when only the minimum payment is made each month.
SS.8.FL.4.4:	<p>Explain that lenders charge different interest rates based on the risk of nonpayment by borrowers. Describe why the higher the risk of nonpayment, the higher the interest rate charged by financial institutions, and the lower the risk of nonpayment, the lower the interest rate charged.</p> <p>Clarifications: As a banker, decide for each of three potential borrowers with different credit backgrounds whether to extend credit, and if so, what the interest rate should be. Write a decision letter to the borrower justifying the banker's decision.</p>
SS.8.FL.5.1:	<p>Describe the differences among the different types of financial assets, including a wide variety of financial instruments such as bank deposits, stocks, bonds, and mutual funds. Explain that real estate and commodities are also often viewed as financial assets.</p> <p>Clarifications: Find the prices of a variety of current possible investments.</p>
SS.8.FL.5.2:	<p>Calculate the amount of interest income received from depositing a certain amount of money in a bank account paying 1 percent per year and from owning a bond paying 5 percent per year in order to analyze that interest is received from money deposited in bank accounts as well as by owning a corporate or government bond or making a loan.</p>
SS.8.FL.5.3:	<p>Discuss that when people buy corporate stock, they are purchasing ownership shares in a business that if the business is profitable, they will expect to receive income in the form of dividends and/or from the increase in the stock's value, that the increase in the value of an asset (like a stock) is called a capital gain, and if the business is not profitable, investors could lose the money they have invested.</p> <p>Clarifications: Determine the amount of dividends paid from a selected stock and how much the price of the stock has appreciated or depreciated over the year.</p>
SS.8.FL.5.4:	<p>Explain that the price of a financial asset is determined by the interaction of buyers and sellers in a financial market.</p> <p>Clarifications: Explain why the price of a stock might change if more individuals decide to purchase the stock. Explain why the price of a stock might change if more companies issue new shares of stock to raise new investment funds.</p>
SS.8.FL.5.5:	<p>Explain that the rate of return earned from investments will vary according to the amount of risk and, in general, a trade-off exists between the security of an investment and its expected rate of return.</p> <p>Clarifications: Compare rates of return of a variety of different investments and speculate on the amount of risk each of the investments entails.</p>
SS.8.FL.6.1:	<p>Analyze the fact that personal financial risk exists when unexpected events can damage health, income, property, wealth, or future opportunities.</p> <p>Clarifications: Write a scenario describing how a storm blowing a tree onto a roof can impact a family's financial situation.</p>
SS.8.FL.6.2:	<p>Identify insurance as a product that allows people to pay a fee (called a premium) now to transfer the costs of a potential loss to a third party.</p> <p>Clarifications: Explain why homeowners buy flood insurance for \$300 a year when the likelihood of a flood in their area is extremely low.</p>
SS.8.FL.6.3:	<p>Describe how a person may self-insure by accepting a risk and saving money on a regular basis to cover a potential loss.</p> <p>Clarifications: List examples of potential events and costs against which people might self-insure.</p>
SS.8.FL.6.4:	<p>Discuss why insurance policies that guarantee higher levels of payment in the event of a loss (coverage) have higher prices.</p> <p>Clarifications: Explain how a deductible affects the payout on an auto insurance claim, and how the individual's choice of deductible affects the price of the policy at the time it is purchased.</p>
SS.8.FL.6.5:	<p>Discuss that insurance companies charge higher premiums to cover higher-risk individuals and events because the risk of monetary loss is greater for these individuals and events.</p> <p>Clarifications: Explain why drivers who receive repeated speeding tickets will see their insurance premiums increase.</p>
SS.8.FL.6.6:	<p>Explain that individuals can choose to accept some risk, to take steps to avoid or reduce risk, or to transfer risk to others through the purchase of insurance and that each option has different costs and benefits.</p> <p>Clarifications: Identify ways in which an automobile driver can avoid, reduce, or transfer the risk of being in an automobile accident. Explain why people may prefer to purchase insurance against fire in their apartment, but self-insure to handle the cost of tooth cavities.</p>
SS.8.FL.6.7:	<p>Evaluate social networking sites and other online activity from the perspective of making individuals vulnerable to harm caused by identity theft or misuse of their personal information.</p> <p>Clarifications: Identify ways that identity thieves can obtain someone's personal information. List actions an individual can take to protect personal information.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	<ul style="list-style-type: none"> • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

VERSION DESCRIPTION

This course consists for the following content areas and literacy strands: Financial Literacy, Economics, Mathematics, Language Arts for Literacy in History/Social Studies and Speaking and Listening. Content standards are geared toward deepening students' understanding of personal financial literacy through an economic perspective. A basic understanding of economics provides a critical framework to make informed decisions about budgeting, saving, and investing. In learning basic economics, students come to appreciate that choices have costs and benefits, and that it is often necessary to sort through complex information and weigh multiple costs and benefits before arriving at a decision. Emphasis will be placed on economic decision-making and real-life applications using real data.

The primary content for the course pertains to the study of learning the ideas, concepts, knowledge, and skills that will enable students to make sound personal finance

decisions; to become wise, successful, and informed consumers, savers, borrowers, investors, risk managers, and future employees or employers; and to be participating and informed members of the global economy.

The content for the course is primarily developed around six standards from the NGSSS Financial Literacy Strand:

- Earning Income
- Buying Goods and Services
- Saving
- Using Credit
- Financial Investing
- Protecting and Insuring

Content included in these standards includes, but may not be limited to:

- analyzing cost/benefit of economic decisions
- identifying different types of education and training required by various careers
- understanding the effect of acquiring education and skills on future income
- measuring the opportunity cost that education and training have in terms of time, effort, and money
- exploring the variety of payment method options
- classifying expenses in a budget
- assessing the quality and usefulness of information from marketers
- understanding the role of financial institutions as intermediaries between savers and borrowers
- understanding the role of government agencies in protecting savings deposits
- examining the difference between principal and interest
- identifying the time value of money
- explaining how people's tastes and preferences influence their choice of how much and what to save for
- understanding why people use credit
- identifying a credit card purchase as a loan from the issuer of the card
- explaining why interest rates vary across borrowers
- examining how a credit card user can avoid interest charges
- understanding the variety of possible financial investments
- calculating the rates of return on an investment and understanding why it may vary among financial products
- identifying insurance as the transfer of risk through risk pooling
- understanding each option for managing risk (assume it, reduce it, insure it) entails a cost
- preventing identify theft and fraud

Special Notes

Instructional Practices: Teaching using real world materials, examples, and simulations enhances students' content area knowledge and also strengthens their ability to comprehend concepts related to personal financial literacy. Using the following instructional practices will also help student learning.

1. Incorporating current event articles on economic developments related to personal financial literacy.
2. Having students create economic models that reflect key concepts and economic decisions.
3. Use real world data and evidence to answer complex, high-level questions that are based on real world scenarios.
4. Require students to make and support personal financial decisions using evidence and trends.
5. Provided extended learning opportunities that simulate economic scenarios including, but not limited to:
 - opening a bank account
 - searching for and being offered a new job
 - planning and managing a household budget
 - analyzing the motivation and techniques of marketers
 - making a major purchase such as a home or automobile
 - applying for a credit card
 - planning for college expenses
 - filing a tax return
 - managing an investment portfolio

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Open Educational Resources (OEL)

There are a number of free financial literacy resources designed for middle school students that are available, providing both full service lesson plans and online digital modules. Please review the curriculum to determine if it is suitable for your educational needs before using.

GENERAL INFORMATION

Course Number: 2104060

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 6 to 8 Education
Courses > Subject: Social Studies > **SubSubject:**
 Interdisciplinary and Applied Social Studies >

Abbreviated Title: M/J INTRO PERSFINLIT

Course Length: Semester (S)

Course Level: 2

Course Type: Elective Course

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Social Science (Grades 5-9)
Social Science (Grades 6-12)
Business Education (Grades 6-12)
Family and Consumer Science (Grades 6-12)

M/J Introduction to Personal Financial Literacy (#2104060) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.6:	<p>Compare the national budget process to the personal budget process.</p> <p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	<p>Describe the banking system in the United States and its impact on the money supply.</p> <p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.8.E.1.1:	<p>Examine motivating economic factors that influenced the development of the United States economy over time including scarcity, supply and demand, opportunity costs, incentives, profits, and entrepreneurial aspects.</p> <p>Clarifications: Examples are Triangular Trade, colonial development - New England, Middle, and Southern colonies - Revolutionary War, Manifest Destiny, compromises over slavery issues, the Civil War, Reconstruction.</p>
SS.8.FL.1.1:	<p>Explain that careers are based on working at jobs in the same occupation or profession for many years. Describe the different types of education and training required by various careers.</p> <p>Clarifications: Interview individuals and create a timeline that shows the education, training, and job experiences that occurred as the individuals progressed through different stages of their careers.</p>
SS.8.FL.1.2:	<p>Identify the many decisions people must make over a lifetime about their education, jobs, and careers that affect their incomes and job opportunities.</p> <p>Clarifications: Conduct research on a specific career. Describe the education, job, or career decisions individuals in this field might make over their lifetime and explain how this could affect their incomes and job opportunities.</p>
SS.8.FL.1.3:	<p>Explain that getting more education and learning new job skills can increase a person's human capital and productivity.</p> <p>Clarifications: Explain how taking a babysitting class or getting lifeguard training can improve a young person's human capital or productivity.</p>
SS.8.FL.1.4:	<p>Examine the fact that people with less education and fewer job skills tend to earn lower incomes than people with more education and greater job skills.</p> <p>Clarifications: Gather data on the average wage or salary for different jobs and explain how they differ by the level of education, job skill, or years of experience.</p>
SS.8.FL.1.5:	<p>Examine the fact that investment in education and training generally has a positive rate of return in terms of the income that people earn over a lifetime, with some education or training having a higher rate of return than others.</p> <p>Clarifications: Using data on the lifetime earnings of workers with different levels of education, explain why adults with a college education typically earn more than adults with only a high school education.</p>
SS.8.FL.1.6:	<p>Identify the opportunity costs that education, training, and development of job skills have in the terms of time, effort, and money.</p> <p>Clarifications: Describe the opportunity costs of attending a training course on babysitting, lifeguarding, or first aid.</p>
SS.8.FL.1.7:	<p>Identify that interest, dividends, and capital appreciation (gains) are forms of income earned from financial investments.</p> <p>Clarifications: Find the interest rate a bank pays on a savings account.</p>
SS.8.FL.1.8:	<p>Discuss the fact that some people receive income support from government because they have low incomes or qualify in other ways for government assistance.</p> <p>Clarifications: Look up government programs, including but not limited to, Medicaid or SNAP (Supplemental Nutrition Assistance Program) and explain the</p>

	financial situation the programs are addressing.
SS.8.FL.2.1:	<p>Explain why when deciding what to buy, consumers may choose to gather information from a variety of sources. Describe how the quality and usefulness of information provided by sources can vary greatly from source to source. Explain that, while many sources provide valuable information, other sources provide information that is deliberately misleading.</p> <p>Clarifications: Gather information for an electronic good from sources such as manufacturers' websites, retail websites, and consumer review websites. Explain what information is most helpful in making their decision. Search the Internet and print materials and identify deceptive selling practices.</p>
SS.8.FL.2.2:	<p>Analyze a source's incentives in providing information about a good or service, and how a consumer can better assess the quality and usefulness of the information.</p> <p>Clarifications: Explain why advice from a source such as a salesperson may or may not be useful when deciding which product to buy.</p>
SS.8.FL.2.3:	<p>Describe the variety of payment methods people can use in order to buy goods and services.</p> <p>Clarifications: Explain how they would use the following payment methods to purchase a good or service: cash, check, debit card, credit card, mobile phone, online payment, prepaid card, layaway, and rent to own.</p>
SS.8.FL.2.4:	<p>Examine choosing a payment method, by weighing the costs and benefits of the different payment options.</p> <p>Clarifications: Choose the best payment method for the following purchases by weighing the costs and benefits of various payment options: ticket to a concert, food at a convenience store, airline ticket, cell phone bill, beverage at a middle school basketball game, and car payment.</p>
SS.8.FL.2.5:	<p>Discuss the fact that people may revise their budget based on unplanned expenses and changes in income.</p> <p>Clarifications: Offer ways to balance a family's budget given unplanned expenses such as health care costs, car repairs, or change in income.</p>
SS.8.FL.3.1:	<p>Explain that banks and other financial institutions loan funds received from depositors to borrowers and that part of the interest received from these loans is used to pay interest to depositors for the use of their money.</p> <p>Clarifications: Draw and label a diagram showing the role that financial institutions play in channeling funds from savers to borrowers. Conduct research into the interest rate paid on savings and charged for loans by financial institutions in their community and create a classroom bulletin board summarizing their findings.</p>
SS.8.FL.3.2:	<p>Explain that, for the saver, an interest rate is the price a financial institution pays for using a saver's money and is normally expressed as an annual percentage of the amount saved.</p> <p>Clarifications: Define an interest rate as the price paid for using someone else's money, expressed as a percentage of the amount saved.</p>
SS.8.FL.3.3:	<p>Discuss that interest rates paid on savings and charged on loans, like all prices, are determined in a market.</p> <p>Clarifications: Explain why banks that experience an increase in the number of people who want loans may decide to pay higher interest rates on deposits.</p>
SS.8.FL.3.4:	<p>Explain that, when interest rates increase, people earn more on their savings and their savings grow more quickly.</p> <p>Clarifications: Calculate the total amount of interest earned on two certificates of deposit—one with a higher rate of interest than the other—and explain how the certificate of deposit with the higher interest rate can help a saver reach his or her savings goal faster.</p>
SS.8.FL.3.5:	<p>Identify principal as the initial amount of money upon which interest is paid.</p> <p>Clarifications: Differentiate between principal and interest.</p>
SS.8.FL.3.6:	<p>Identify the value of a person's savings in the future as determined by the amount saved and the interest rate. Explain why the earlier people begin to save, the more savings they will be able to accumulate, all other things equal, as a result of the power of compound interest.</p> <p>Clarifications: Use the Rule of 72 to determine the number of years it will take for their savings to double in value. Using a formula for compound interest, calculate how much two different savers, one who starts to save at age 21 and one who starts to save at age 35, will have at retirement.</p>
SS.8.FL.3.7:	<p>Discuss the different reasons that people save money, including large purchases (such as higher education, autos, and homes), retirement, and unexpected events. Discuss how people's tastes and preferences influence their choice of how much to save and for what to save.</p> <p>Clarifications: Write a short story comparing the savings choices of a young college graduate to those of a married couple who recently celebrated their 40th birthdays and who have two children.</p>
SS.8.FL.3.8:	<p>Explain that, to assure savers that their deposits are safe from bank failures, federal agencies guarantee depositors' savings in most commercial banks, savings banks, and savings associations up to a set limit.</p> <p>Clarifications: Identify the Federal Deposit Insurance Corporation (FDIC) and the National Credit Union Administration (NCUA) as the government agencies responsible for insuring depositors' savings and state the limit of FDIC and NCUA coverage. Explain why the bank-run scene in the movie <i>It's a Wonderful Life</i>, for example, is less likely to occur in today's world of insured banks.</p>
SS.8.FL.4.1:	<p>Explain that people who apply for loans are told what the interest rate on the loan will be. An interest rate is the price of using someone else's money expressed as an annual percentage of the loan principal.</p> <p>Clarifications: Explain that repayment of a loan includes repayment of the principal plus the interest charged. Compute the interest rate when given a principal and an amount of interest. Compute the amount of interest when given the loan principal and the interest rate.</p>
	Identify a credit card purchase as a loan from the financial institution that issued the card. Explain that credit card interest rates tend to be higher

SS.8.FL.4.2:	<p>than rates for other loans. In addition, financial institutions may charge significant fees related to a credit card and its use.</p> <p>Clarifications: Examine a credit card statement and identify the interest rate and fees charged.</p>
SS.8.FL.4.3:	<p>Examine the fact that borrowers who use credit cards for purchases and who do not pay the full balance when it is due pay much higher costs for their purchases because interest is charged monthly. Explain how a credit card user can avoid interest charges by paying the entire balance within the grace period specified by the financial institution.</p> <p>Clarifications: For an expensive good purchased using credit, find the total interest paid and the amount still owed after one year when only the minimum payment is made each month. Give advice to a friend explaining what happens to the total cost of borrowing on a credit card when only the minimum payment is made each month.</p>
SS.8.FL.4.4:	<p>Explain that lenders charge different interest rates based on the risk of nonpayment by borrowers. Describe why the higher the risk of nonpayment, the higher the interest rate charged by financial institutions, and the lower the risk of nonpayment, the lower the interest rate charged.</p> <p>Clarifications: As a banker, decide for each of three potential borrowers with different credit backgrounds whether to extend credit, and if so, what the interest rate should be. Write a decision letter to the borrower justifying the banker's decision.</p>
SS.8.FL.5.1:	<p>Describe the differences among the different types of financial assets, including a wide variety of financial instruments such as bank deposits, stocks, bonds, and mutual funds. Explain that real estate and commodities are also often viewed as financial assets.</p> <p>Clarifications: Find the prices of a variety of current possible investments.</p>
SS.8.FL.5.2:	<p>Calculate the amount of interest income received from depositing a certain amount of money in a bank account paying 1 percent per year and from owning a bond paying 5 percent per year in order to analyze that interest is received from money deposited in bank accounts as well as by owning a corporate or government bond or making a loan.</p>
SS.8.FL.5.3:	<p>Discuss that when people buy corporate stock, they are purchasing ownership shares in a business that if the business is profitable, they will expect to receive income in the form of dividends and/or from the increase in the stock's value, that the increase in the value of an asset (like a stock) is called a capital gain, and if the business is not profitable, investors could lose the money they have invested.</p> <p>Clarifications: Determine the amount of dividends paid from a selected stock and how much the price of the stock has appreciated or depreciated over the year.</p>
SS.8.FL.5.4:	<p>Explain that the price of a financial asset is determined by the interaction of buyers and sellers in a financial market.</p> <p>Clarifications: Explain why the price of a stock might change if more individuals decide to purchase the stock. Explain why the price of a stock might change if more companies issue new shares of stock to raise new investment funds.</p>
SS.8.FL.5.5:	<p>Explain that the rate of return earned from investments will vary according to the amount of risk and, in general, a trade-off exists between the security of an investment and its expected rate of return.</p> <p>Clarifications: Compare rates of return of a variety of different investments and speculate on the amount of risk each of the investments entails.</p>
SS.8.FL.6.1:	<p>Analyze the fact that personal financial risk exists when unexpected events can damage health, income, property, wealth, or future opportunities.</p> <p>Clarifications: Write a scenario describing how a storm blowing a tree onto a roof can impact a family's financial situation.</p>
SS.8.FL.6.2:	<p>Identify insurance as a product that allows people to pay a fee (called a premium) now to transfer the costs of a potential loss to a third party.</p> <p>Clarifications: Explain why homeowners buy flood insurance for \$300 a year when the likelihood of a flood in their area is extremely low.</p>
SS.8.FL.6.3:	<p>Describe how a person may self-insure by accepting a risk and saving money on a regular basis to cover a potential loss.</p> <p>Clarifications: List examples of potential events and costs against which people might self-insure.</p>
SS.8.FL.6.4:	<p>Discuss why insurance policies that guarantee higher levels of payment in the event of a loss (coverage) have higher prices.</p> <p>Clarifications: Explain how a deductible affects the payout on an auto insurance claim, and how the individual's choice of deductible affects the price of the policy at the time it is purchased.</p>
SS.8.FL.6.5:	<p>Discuss that insurance companies charge higher premiums to cover higher-risk individuals and events because the risk of monetary loss is greater for these individuals and events.</p> <p>Clarifications: Explain why drivers who receive repeated speeding tickets will see their insurance premiums increase.</p>
SS.8.FL.6.6:	<p>Explain that individuals can choose to accept some risk, to take steps to avoid or reduce risk, or to transfer risk to others through the purchase of insurance and that each option has different costs and benefits.</p> <p>Clarifications: Identify ways in which an automobile driver can avoid, reduce, or transfer the risk of being in an automobile accident. Explain why people may prefer to purchase insurance against fire in their apartment, but self-insure to handle the cost of tooth cavities.</p>
SS.8.FL.6.7:	<p>Evaluate social networking sites and other online activity from the perspective of making individuals vulnerable to harm caused by identity theft or misuse of their personal information.</p> <p>Clarifications: Identify ways that identity thieves can obtain someone's personal information. List actions an individual can take to protect personal information.</p>

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.

MA.K12.MTR.1.1:	<ul style="list-style-type: none"> • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems. </div>
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations. </div>
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. </div>
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers. </div>
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. </div>
	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>

General Course Information and Notes

This course consists for the following content areas and literacy strands: Financial Literacy, Economics, Mathematics, Language Arts for Literacy in History/Social Studies and Speaking and Listening. Content standards are geared toward deepening students' understanding of personal financial literacy through an economic perspective. A basic understanding of economics provides a critical framework to make informed decisions about budgeting, saving, and investing. In learning basic economics, students come to appreciate that choices have costs and benefits, and that it is often necessary to sort through complex information and weigh multiple costs and benefits before arriving at a decision. Emphasis will be placed on economic decision-making and real-life applications using real data.

The primary content for the course pertains to the study of learning the ideas, concepts, knowledge, and skills that will enable students to make sound personal finance decisions; to become wise, successful, and informed consumers, savers, borrowers, investors, risk managers, and future employees or employers; and to be participating and informed members of the global economy.

The content for the course is primarily developed around six standards from the NGSSS Financial Literacy Strand:

- Earning Income
- Buying Goods and Services
- Saving
- Using Credit
- Financial Investing
- Protecting and Insuring

Content included in these standards includes, but may not be limited to:

- analyzing cost/benefit of economic decisions
- identifying different types of education and training required by various careers
- understanding the effect of acquiring education and skills on future income
- measuring the opportunity cost that education and training have in terms of time, effort, and money
- exploring the variety of payment method options
- classifying expenses in a budget
- assessing the quality and usefulness of information from marketers
- understanding the role of financial institutions as intermediaries between savers and borrowers
- understanding the role of government agencies in protecting savings deposits
- examining the difference between principal and interest
- identifying the time value of money
- explaining how people's tastes and preferences influence their choice of how much and what to save for
- understanding why people use credit
- identifying a credit card purchase as a loan from the issuer of the card
- explaining why interest rates vary across borrowers
- examining how a credit card user can avoid interest charges
- understanding the variety of possible financial investments
- calculating the rates of return on an investment and understanding why it may vary among financial products
- identifying insurance as the transfer of risk through risk pooling
- understanding each option for managing risk (assume it, reduce it, insure it) entails a cost
- preventing identify theft and fraud

Special Notes

Instructional Practices: Teaching using real world materials, examples, and simulations enhances students' content area knowledge and also strengthens their ability to comprehend concepts related to personal financial literacy. Using the following instructional practices will also help student learning.

1. Incorporating current event articles on economic developments related to personal financial literacy.
2. Having students create economic models that reflect key concepts and economic decisions.
3. Use real world data and evidence to answer complex, high-level questions that are based on real world scenarios.
4. Require students to make and support personal financial decisions using evidence and trends.
5. Provided extended learning opportunities that simulate economic scenarios including, but not limited to:
 - opening a bank account
 - searching for and being offered a new job
 - planning and managing a household budget
 - analyzing the motivation and techniques of marketers
 - making a major purchase such as a home or automobile
 - applying for a credit card
 - planning for college expenses
 - filing a tax return
 - managing an investment portfolio

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Open Educational Resources (OEL)

There are a number of free financial literacy resources designed for middle school students that are available, providing both full service lesson plans and online digital modules. Please review the curriculum to determine if it is suitable for your educational needs before using.

GENERAL INFORMATION

Course Number: 2104060

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Social Studies > **SubSubject:** Interdisciplinary and Applied Social Studies >

Abbreviated Title: M/J INTRO PERSFINLIT

Course Length: Semester (S)

Course Level: 2

Course Type: Elective Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Business Education (Grades 6-12)

Family and Consumer Science (Grades 6-12)

M/J World Cultures (#2105020) 2015 - 2022 (current)

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.

SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization. Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires. Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties. Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.

SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots.
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.
	Standard Relation to Course: Supporting

MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but is not limited to the characteristics of a cultural group, the development of cultural societies, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled

course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2105020

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Multicultural Studies >

Abbreviated Title: M/J WORLD CLTRS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World Cultures (#2105020) 2022 - 2023

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.

SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
SS.6.W.4.7:	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi. Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.

SS.6.W.4.8:	<p>Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.</p>
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but is not limited to the characteristics of a cultural group, the development of cultural societies, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2105020

Course Path: **Section:** Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Multicultural Studies >

Abbreviated Title: M/J WORLD CLTRS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World Cultures (#2105020) 2023 - And Beyond

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
