SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.

SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization. Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires. Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties. Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.

SS.6.W.4.8:	<p>Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.</p>
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.4.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p>

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p> <p>Use the accepted rules governing a specific format to create quality work.</p>

ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but is not limited to the characteristics of a cultural group, the development of cultural societies, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2105020

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Multicultural Studies >

Abbreviated Title: M/J WORLD CLTRS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Political Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World Cultures & Career Planning (#2105025) 2019 -

2022 (current)

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.

SS.6.W.1.1:	Use timelines to identify chronological order of historical events. Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties. Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.

SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
SS.6.W.4.8:	Describe the contributions of classical and post classical China. Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting Summarize numerical data sets in relation to their context, such as by: a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement.

MAFS.6.SP.2.5:	<p>c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered.</p> <p>d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered.</p> <p>Standard Relation to Course: Supporting</p> <p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.1.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.3.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but is not limited to the characteristics of a cultural group, the development of cultural societies, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Career and Education Planning - Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.

- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2105025

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 6 to 8 Education Courses > **Subject:** Social Studies > **SubSubject:** Multicultural Studies >

Abbreviated Title: M/J WORLD CLTRS C/P

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Status: Course Approved

Grade Level(s): 6,7,8

Course Level: 2

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
History (Grades 6-12)
Social Science (Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J World Cultures & Career Planning (#2105025) 2022 -

2023

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.

SS.6.W.1.1:	Use timelines to identify chronological order of historical events. Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties. Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.

SS.6.W.4.7:	<p>Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.</p>
SS.6.W.4.8:	<p>Describe the contributions of classical and post classical China.</p> <p>Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.</p>
SS.6.W.4.10:	<p>Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.</p>
SS.6.W.4.11:	<p>Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.</p>
SS.6.W.4.12:	<p>Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems.

MA.K12.MTR.5.1:

- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
 Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
 Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
 Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
 Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
 Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:
 K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
 6-8 Students continue with previous skills and use a style guide to create a proper citation.
 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:
 See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Make inferences to support comprehension.

Clarifications:
 Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
 In kindergarten, students learn to listen to one another respectfully.
 In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.
 In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:
 Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they

	must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but is not limited to the characteristics of a cultural group, the development of cultural societies, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Career and Education Planning - Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml>.

Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

And Beyond

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.

SS.6.W.1.1:	Use timelines to identify chronological order of historical events. Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties. Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.

SS.6.W.4.7:	<p>Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.</p>
SS.6.W.4.8:	<p>Describe the contributions of classical and post classical China.</p> <p>Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.</p>
SS.6.W.4.10:	<p>Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.</p>
SS.6.W.4.11:	<p>Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.</p>
SS.6.W.4.12:	<p>Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.</p>
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers.

- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

ELA.K.12.EE.4.1:	In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but is not limited to the characteristics of a cultural group, the development of cultural societies, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard

should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.

SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications:

	Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.6.SL.1.1:	<ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example,</i>

MAFS.6.SP.1.1:	<p><i>"How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i></p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.1.2:	<p>Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.1.3:	<p>Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p> <p>Standard Relation to Course: Supporting</p>
	<p>Make sense of problems and persevere in solving them.</p>
MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
	<p>Construct viable arguments and critique the reasoning of others.</p>
MAFS.K12.MP.3.1:	<p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
	<p>Use appropriate tools strategically.</p>
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
	<p>Attend to precision.</p>
MAFS.K12.MP.6.1:	<p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but not be limited to the characteristics of a cultural group, the development of cultural societies, the impact of geography on cultural development, the evaluation of the interdependence between humans and the environment, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines.

Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

GENERAL INFORMATION

Course Number: 2105030

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Multicultural Studies >

Abbreviated Title: M/J ADV WORLD CLTRS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J Advanced World Cultures (#2105030) 2022 - 2023

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.

SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications:

	Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but not be limited to the characteristics of a cultural group, the development of cultural societies, the impact of geography on cultural development, the evaluation of the interdependence between humans and the environment, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2105030

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Multicultural Studies >

Abbreviated Title: M/J ADV WORLD CLTRS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: State Board Approved

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J Advanced World Cultures (#2105030) 2023 - And Beyond

Course Standards

Name	Description
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.

SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece. Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty). Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization. Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires. Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications:

	Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
	Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.
SS.68.HE.1.1:	<ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
	Mathematicians who participate in effortful learning both individually and with others:
	<ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:
	<ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:
	<ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:
	<ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others.
	Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:
	<ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1: Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1: Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1: Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1: Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1: Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1: Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K.12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	<p>Investigate school and public health policies that influence health promotion and disease prevention.</p> <p>Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

M/J World Cultures - The social studies curriculum for this course consists of the following content area strands: World History, Geography, and Economics. The primary content for this course pertains to the study of the significant contributions of world cultural groups. Students will use social studies concepts, tools, and skills to draw conclusions regarding the varied characteristics of cultural groups. Content should include, but not be limited to the characteristics of a cultural group, the development of cultural societies, the impact of geography on cultural development, the evaluation of the interdependence between humans and the environment, and the complexity of global issues. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
	Describe current major cultural regions of North America.
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.

SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	Clarifications: Examples are tri-county mangrove decimation, beach erosion.
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	Clarifications: Examples are population density, changes in census data, and district reapportionment over time.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.7.SL.1.1:	<ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i> Standard Relation to Course: Supporting
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape. Standard Relation to Course: Supporting
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.

Standard Relation to Course: Supporting	
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J Civics (#2106010) 2022 - 2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
	Describe current major cultural regions of North America.
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.

SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	<p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	<p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

ELA.K12.EE.5.1:

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
History (Grades 6-12)
Social Science (Grades 6-12)
Elementary Education (Elementary Grades 1-6)
Elementary Education (Grades K-6)

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p>

SS.7.CG.1.9:	<ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	<p>Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights.</p> <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	<p>Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen.</p> <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	<p>Examine the election and voting process at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	<p>Identify the constitutional qualifications required to hold state and national office.</p> <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.

SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). • Students will compare and contrast executive authority at the local, state and national levels. • Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society. • Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> • Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). • Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). • Students will compare the amendment process of the U.S. and Florida Constitutions. • Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> • Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> • Students will evaluate various economic systems (e.g., capitalism, communism, socialism). • Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> • Students will recognize the difference between domestic and foreign policy. • Students will identify issues that relate to U.S. domestic and foreign policy. • Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest. <p>Describe the United States' and citizen participation in international organizations.</p>

SS.7.CG.4.2:	<ul style="list-style-type: none"> Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
SS.7.E.1.6:	<p>Compare the national budget process to the personal budget process.</p> <p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	<p>Describe the banking system in the United States and its impact on the money supply.</p> <p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
SS.7.E.2.5:	<p>Explain how economic institutions impact the national economy.</p> <p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
SS.7.G.1.2:	<p>Locate on a world map the territories and protectorates of the United States of America.</p> <p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
SS.7.G.2.1:	<p>Locate major cultural landmarks that are emblematic of the United States.</p> <p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
SS.7.G.2.2:	<p>Locate major physical landmarks that are emblematic of the United States.</p> <p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
SS.7.G.2.4:	<p>Describe current major cultural regions of North America.</p> <p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.
SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
SS.7.G.5.1:	<p>Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.</p> <p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
SS.7.G.6.1:	<p>Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.</p> <p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks.

MA.K12.MTR.1.1:

- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J Civics (#2106015) 2015 - 2022 (current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.7.SL.1.1:	<p>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the

	<p>discussion back on topic as needed.</p> <p>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</p>
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	<p>Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i></p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.1.2:	<p>Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.1.3:	<p>Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p> <p>Standard Relation to Course: Supporting</p>
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	<p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
	Attend to precision.
MAFS.K12.MP.6.1:	<p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

General Course Information and Notes

GENERAL NOTES

The primary content for this half -year course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106015

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Political Sciences >

Abbreviated Title: M/J CIVICS

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)
History (Grades 6-12)

M/J Civics (#2106015) 2022 - 2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.1:	<p>Differentiate concepts related to United States domestic and foreign policy.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.3:	<p>Describe examples of how the United States has dealt with international conflicts.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task.

MA.K12.MTR.4.1:

- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the

	girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for this half -year course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: <http://www.fasa.net/4DCGI/cms/review.html?>

GENERAL INFORMATION

Course Number: 2106015

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p>

SS.7.CG.1.9:	<ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	<p>Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights.</p> <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	<p>Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen.</p> <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	<p>Examine the election and voting process at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	<p>Identify the constitutional qualifications required to hold state and national office.</p> <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.

SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). • Students will compare and contrast executive authority at the local, state and national levels. • Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society. • Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> • Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). • Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). • Students will compare the amendment process of the U.S. and Florida Constitutions. • Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> • Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> • Students will evaluate various economic systems (e.g., capitalism, communism, socialism). • Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> • Students will recognize the difference between domestic and foreign policy. • Students will identify issues that relate to U.S. domestic and foreign policy. • Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest. <p>Describe the United States' and citizen participation in international organizations.</p>

SS.7.CG.4.2:

- Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization).
- Students will discuss the advantages and disadvantages of U.S. membership in international organizations.

SS.7.CG.4.3:

Describe examples of the United States' actions and reactions in international conflicts.

- Students will identify specific examples of and the reasons for United States' involvement in international conflicts.
- Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States.
- Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).

MA.K12.MTR.1.1:

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Articulate a position on a health-related issue and support it with accurate health information.
HE.7.P.8.2:	Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for this half -year course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106015

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics & Career Planning (#2106016) 2019 - 2022 (current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
	Describe current major cultural regions of North America.
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.

SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	Clarifications: Examples are tri-county mangrove decimation, beach erosion.
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	Clarifications: Examples are population density, changes in census data, and district reapportionment over time.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i> Standard Relation to Course: Supporting
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape. Standard Relation to Course: Supporting
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.

Standard Relation to Course: Supporting	
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p> </div>

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Mathematics Benchmark Guidance- Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.

- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106016

Course Path: Section: Grades PreK to 12 Education
 Courses > **Grade Group:** Grades 6 to 8 Education
 Courses > **Subject:** Social Studies > **SubSubject:**
 Political Sciences >
Abbreviated Title: M/J CIVICS & CAR PL
Course Length: Year (Y)
Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J Civics & Career Planning (#2106016) 2022 - 2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
	Describe current major cultural regions of North America.
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.

SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	<p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	<p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

ELA.K12.EE.5.1:

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Articulate a position on a health-related issue and support it with accurate health information.
HE.7.P.8.2:	Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106016

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS & CAR PL

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics & Career Planning (#2106016) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p>

SS.7.CG.1.9:	<ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	<p>Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights.</p> <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	<p>Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen.</p> <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	<p>Examine the election and voting process at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	<p>Identify the constitutional qualifications required to hold state and national office.</p> <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.

SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). • Students will compare and contrast executive authority at the local, state and national levels. • Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society. • Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> • Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). • Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). • Students will compare the amendment process of the U.S. and Florida Constitutions. • Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> • Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> • Students will evaluate various economic systems (e.g., capitalism, communism, socialism). • Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> • Students will recognize the difference between domestic and foreign policy. • Students will identify issues that relate to U.S. domestic and foreign policy. • Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest. <p>Describe the United States' and citizen participation in international organizations.</p>

SS.7.CG.4.2:	<ul style="list-style-type: none"> Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
SS.7.E.1.6:	<p>Compare the national budget process to the personal budget process.</p> <p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	<p>Describe the banking system in the United States and its impact on the money supply.</p> <p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
SS.7.E.2.5:	<p>Explain how economic institutions impact the national economy.</p> <p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	<p>Locate the fifty states and their capital cities in addition to the nation's capital on a map.</p> <p>Locate on a world map the territories and protectorates of the United States of America.</p>
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	<p>Interpret maps to identify geopolitical divisions and boundaries of places in North America.</p> <p>Locate major cultural landmarks that are emblematic of the United States.</p>
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
SS.7.G.2.2:	<p>Locate major physical landmarks that are emblematic of the United States.</p> <p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	<p>Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.</p> <p>Describe current major cultural regions of North America.</p>
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.
SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
SS.7.G.5.1:	<p>Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.</p> <p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
SS.7.G.6.1:	<p>Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.</p> <p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks.

MA.K12.MTR.1.1:

- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106016

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS & CAR PL

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)
History (Grades 6-12)

M/J Civics, Advanced (#2106020) 2019 - 2022 (current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
	Describe current major cultural regions of North America.
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.

SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	Clarifications: Examples are tri-county mangrove decimation, beach erosion.
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	Clarifications: Examples are population density, changes in census data, and district reapportionment over time.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.7.SL.1.1:	<ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i> Standard Relation to Course: Supporting
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape. Standard Relation to Course: Supporting
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.

Standard Relation to Course: Supporting	
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p> </div>

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society

- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106020

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS ADV

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J Civics, Advanced (#2106020) 2022 - 2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p>
SS.7.C.3.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Identify the relationship and division of powers between the federal government and state governments.</p>
SS.7.C.3.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Explain the Constitutional amendment process.</p>
SS.7.C.3.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Evaluate Constitutional rights and their impact on individuals and society.</p>
SS.7.C.3.6:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p>
SS.7.C.3.7:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p>
SS.7.C.3.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Illustrate the law making process at the local, state, and federal levels.</p>
SS.7.C.3.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p>
SS.7.C.3.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p>
SS.7.C.3.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p>
SS.7.C.3.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Compare the constitutions of the United States and Florida.</p>
SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
	Describe current major cultural regions of North America.
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.

SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	<p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	<p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts: <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Articulate a position on a health-related issue and support it with accurate health information.
HE.7.P.8.2:	Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106020

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS ADV

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
History (Grades 6-12)
Social Science (Grades 6-12)
Elementary Education (Elementary Grades 1-6)
Elementary Education (Grades K-6)

M/J Civics, Advanced (#2106020) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p>

SS.7.CG.1.9:	<ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	<p>Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights.</p> <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	<p>Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen.</p> <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	<p>Examine the election and voting process at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	<p>Identify the constitutional qualifications required to hold state and national office.</p> <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.

SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). • Students will compare and contrast executive authority at the local, state and national levels. • Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society. • Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> • Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). • Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). • Students will compare the amendment process of the U.S. and Florida Constitutions. • Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> • Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> • Students will evaluate various economic systems (e.g., capitalism, communism, socialism). • Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> • Students will recognize the difference between domestic and foreign policy. • Students will identify issues that relate to U.S. domestic and foreign policy. • Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest. <p>Describe the United States' and citizen participation in international organizations.</p>

SS.7.CG.4.2:	<ul style="list-style-type: none"> Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
SS.7.E.1.6:	<p>Compare the national budget process to the personal budget process.</p> <p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	<p>Describe the banking system in the United States and its impact on the money supply.</p> <p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
SS.7.E.2.5:	<p>Explain how economic institutions impact the national economy.</p> <p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	<p>Locate the fifty states and their capital cities in addition to the nation's capital on a map.</p> <p>Locate on a world map the territories and protectorates of the United States of America.</p>
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	<p>Interpret maps to identify geopolitical divisions and boundaries of places in North America.</p> <p>Locate major cultural landmarks that are emblematic of the United States.</p>
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
SS.7.G.2.2:	<p>Locate major physical landmarks that are emblematic of the United States.</p> <p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	<p>Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.</p> <p>Describe current major cultural regions of North America.</p>
SS.7.G.2.4:	<p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.
SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
SS.7.G.5.1:	<p>Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.</p> <p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
SS.7.G.6.1:	<p>Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.</p> <p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks.

MA.K12.MTR.1.1:

- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106020

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS ADV

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
History (Grades 6-12)
Social Science (Grades 6-12)
Elementary Education (Elementary Grades 1-6)
Elementary Education (Grades K-6)

M/J Civics, Advanced (#2106025) 2015 - 2022 (current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.7.SL.1.1:	<ol style="list-style-type: none"> Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. Acknowledge new information expressed by others and, when warranted, modify their own views.

LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i> Standard Relation to Course: Supporting
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape. Standard Relation to Course: Supporting
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for this half-year course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106025

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS ADV

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)
Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)
History (Grades 6-12)

M/J Civics, Advanced (#2106025) 2022 - 2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.1:	<p>Differentiate concepts related to United States domestic and foreign policy.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.3:	<p>Describe examples of how the United States has dealt with international conflicts.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
MA.K.12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K.12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K.12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task.

MA.K12.MTR.4.1:

- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the

	girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for this half-year course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard

should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106025

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**
Political Sciences >

Abbreviated Title: M/J CIVICS ADV

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics, Advanced (#2106025) 2023 - And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists to serve them.
	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p>

SS.7.CG.1.9:	<ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	<p>Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights.</p> <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	<p>Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen.</p> <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	<p>Examine the election and voting process at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	<p>Identify the constitutional qualifications required to hold state and national office.</p> <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.

SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). • Students will compare and contrast executive authority at the local, state and national levels. • Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society. • Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> • Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). • Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). • Students will compare the amendment process of the U.S. and Florida Constitutions. • Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will describe and classify specific services provided by local, state and national governments. • Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> • Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> • Students will evaluate various economic systems (e.g., capitalism, communism, socialism). • Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> • Students will recognize the difference between domestic and foreign policy. • Students will identify issues that relate to U.S. domestic and foreign policy. • Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest. <p>Describe the United States' and citizen participation in international organizations.</p>

SS.7.CG.4.2:

- Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization).
- Students will discuss the advantages and disadvantages of U.S. membership in international organizations.

SS.7.CG.4.3:

Describe examples of the United States' actions and reactions in international conflicts.

- Students will identify specific examples of and the reasons for United States' involvement in international conflicts.
- Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States.
- Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).

MA.K12.MTR.1.1:

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Articulate a position on a health-related issue and support it with accurate health information.
HE.7.P.8.2:	Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for this half-year course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106025

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
Political Sciences >

Abbreviated Title: M/J CIVICS ADV

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics, Advanced & Career Planning (#2106026) 2019 -

2022 (current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p>

SS.7.C.2.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
	Clarifications:

SS.7.C.3.1:	This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.2:	Compare parliamentary, federal, confederal, and unitary systems of government. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.3:	Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.4:	Identify the relationship and division of powers between the federal government and state governments. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.5:	Explain the Constitutional amendment process. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.6:	Evaluate Constitutional rights and their impact on individuals and society. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.7:	Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.8:	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.9:	Illustrate the law making process at the local, state, and federal levels. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.10:	Identify sources and types (civil, criminal, constitutional, military) of law. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.11:	Diagram the levels, functions, and powers of courts at the state and federal levels. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.12:	Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the constitutions of the United States and Florida.

SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.

	Describe current major cultural regions of North America.
SS.7.G.2.4:	Clarifications: Examples are the South, Rust-belt, Silicon Valley.
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.
SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
	Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.
SS.7.G.5.1:	Clarifications: Examples are tri-county mangrove decimation, beach erosion.
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	Clarifications: Examples are population density, changes in census data, and district reapportionment over time.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.
LAFS.7.SL.1.1:	<ol style="list-style-type: none"> Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i>
	Standard Relation to Course: Supporting

MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape. Standard Relation to Course: Supporting
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Mathematics Benchmark Guidance- Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic

and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106026

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS ADV&CAR P

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics, Advanced & Career Planning (#2106026) 2022 -

2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p>

SS.7.C.2.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
	Clarifications:

SS.7.C.3.1:	This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.2:	Compare parliamentary, federal, confederal, and unitary systems of government. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.3:	Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.4:	Identify the relationship and division of powers between the federal government and state governments. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.5:	Explain the Constitutional amendment process. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.6:	Evaluate Constitutional rights and their impact on individuals and society. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.7:	Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.8:	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.9:	Illustrate the law making process at the local, state, and federal levels. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.10:	Identify sources and types (civil, criminal, constitutional, military) of law. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.11:	Diagram the levels, functions, and powers of courts at the state and federal levels. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.12:	Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore. Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the constitutions of the United States and Florida.

SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate concepts related to United States domestic and foreign policy.
SS.7.C.4.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Recognize government and citizen participation in international organizations.
SS.7.C.4.2:	<p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Describe examples of how the United States has dealt with international conflicts.
SS.7.C.4.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
	Compare the national budget process to the personal budget process.
SS.7.E.1.6:	<p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
	Describe the banking system in the United States and its impact on the money supply.
SS.7.E.2.2:	<p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
	Explain how economic institutions impact the national economy.
SS.7.E.2.5:	<p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
	Locate on a world map the territories and protectorates of the United States of America.
SS.7.G.1.2:	<p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
	Locate major cultural landmarks that are emblematic of the United States.
SS.7.G.2.1:	<p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
	Locate major physical landmarks that are emblematic of the United States.
SS.7.G.2.2:	<p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.

SS.7.G.2.4:	<p>Describe current major cultural regions of North America.</p> <p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.
SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
SS.7.G.5.1:	<p>Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.</p> <p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
SS.7.G.6.1:	<p>Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.</p> <p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p>

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	<p>Use the accepted rules governing a specific format to create quality work.</p>

ELA.K.12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Articulate a position on a health-related issue and support it with accurate health information.
HE.7.P.8.2:	Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.stml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106026

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIVICS ADV&CAR P

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics, Advanced & Career Planning (#2106026) 2023 -

And Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> • Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). • Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). • Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. • Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> • Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). • Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> • Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> • Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. • Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. • Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> • Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). • Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> • Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). • Students will explain the concept of natural rights as expressed in the Declaration of Independence. • Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. • Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. • Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. • Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). • Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). • Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists

	to serve them.
SS.7.CG.1.9:	Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law. <ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights. <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States. <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen. <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society. <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution. <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights. <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	Describe the trial process and the role of juries in the administration of justice at the state and federal levels. <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	Examine the election and voting process at the local, state and national levels. <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	Identify the constitutional qualifications required to hold state and national office. <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	Examine the impact of media, individuals, and interest groups on monitoring and influencing government. <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	Analyze media and political communications and identify examples of bias, symbolism and propaganda. <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action. <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government. <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government.

	<ul style="list-style-type: none"> Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.
SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> Students will apply their understanding of federal, confederal and unitary systems of government. Students will compare the organizational structures of systems of government. Students will recognize examples of these systems of government. Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize the structure of the legislative, executive and judicial branches. Students will compare the roles and responsibilities of the three branches of the national government. Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> Students will describe the system of federalism as established by the U.S. Constitution. Students will analyze how federalism limits government power. Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. Students will identify the correct sequence of each amendment process. Students will identify the importance of a formal amendment process. Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> Students will recognize how these amendments expanded civil rights to African Americans, women and young people. Students will evaluate the impact these amendments have had on American society. Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). Students will compare and contrast executive authority at the local, state and national levels. Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). Students will distinguish between the structure, functions and powers of courts at the state and federal levels. Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> Students will explain how historical codes of law influenced the United States. Students will recognize natural, constitutional, statutory, case and common law as sources of law. Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). Students will use primary sources to assess the significance of each U.S. Supreme Court case. Students will evaluate the impact of each case on society. Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). Students will compare the amendment process of the U.S. and Florida Constitutions. Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> Students will describe and classify specific services provided by local, state and national governments. Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> Students will evaluate various economic systems (e.g., capitalism, communism, socialism). Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> Students will recognize the difference between domestic and foreign policy. Students will identify issues that relate to U.S. domestic and foreign policy.

	<ul style="list-style-type: none"> Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest.
SS.7.CG.4.2:	<p>Describe the United States' and citizen participation in international organizations.</p> <ul style="list-style-type: none"> Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).
SS.7.E.1.1:	Explain how the principles of a market and mixed economy helped to develop the United States into a democratic nation.
SS.7.E.1.2:	Discuss the importance of borrowing and lending in the United States, the government's role in controlling financial institutions, and list the advantages and disadvantages of using credit.
SS.7.E.1.3:	Review the concepts of supply and demand, choice, scarcity, and opportunity cost as they relate to the development of the mixed market economy in the United States.
SS.7.E.1.4:	Discuss the function of financial institutions in the development of a market economy.
SS.7.E.1.5:	Assess how profits, incentives, and competition motivate individuals, households, and businesses in a free market economy.
SS.7.E.1.6:	<p>Compare the national budget process to the personal budget process.</p> <p>Clarifications: Prepare an individual budget which includes housing, food, leisure, communication, and miscellaneous categories and compare that to federal government budget allocations.</p>
SS.7.E.2.1:	Explain how federal, state, and local taxes support the economy as a function of the United States government.
SS.7.E.2.2:	<p>Describe the banking system in the United States and its impact on the money supply.</p> <p>Clarifications: Examples are the Federal Reserve System and privately owned banks.</p>
SS.7.E.2.3:	Identify and describe United States laws and regulations adopted to promote economic competition.
SS.7.E.2.4:	Identify entrepreneurs from various gender, social, and ethnic backgrounds who started a business seeking to make a profit.
SS.7.E.2.5:	<p>Explain how economic institutions impact the national economy.</p> <p>Clarifications: Examples are the stock market, banks, credit unions.</p>
SS.7.E.3.1:	Explain how international trade requires a system for exchanging currency between and among nations.
SS.7.E.3.2:	Assess how the changing value of currency affects trade of goods and services between nations.
SS.7.E.3.3:	Compare and contrast a single resource economy with a diversified economy.
SS.7.E.3.4:	Compare and contrast the standard of living in various countries today to that of the United States using gross domestic product (GDP) per capita as an indicator.
SS.7.G.1.1:	Locate the fifty states and their capital cities in addition to the nation's capital on a map.
SS.7.G.1.2:	<p>Locate on a world map the territories and protectorates of the United States of America.</p> <p>Clarifications: Examples are American Samoa, Guam, Puerto Rico, U.S. Virgin Islands.</p>
SS.7.G.1.3:	Interpret maps to identify geopolitical divisions and boundaries of places in North America.
SS.7.G.2.1:	<p>Locate major cultural landmarks that are emblematic of the United States.</p> <p>Clarifications: Examples are Statue of Liberty, White House, Mount Rushmore, Capitol, Empire State Building, Gateway Arch, Independence Hall, Alamo, Hoover Dam.</p>
SS.7.G.2.2:	<p>Locate major physical landmarks that are emblematic of the United States.</p> <p>Clarifications: Examples are Grand Canyon, Mt. Denali, Everglades, Great Salt Lake, Mississippi River, Great Plains.</p>
SS.7.G.2.3:	Explain how major physical characteristics, natural resources, climate, and absolute and relative location have influenced settlement, economies, and inter-governmental relations in North America.
SS.7.G.2.4:	<p>Describe current major cultural regions of North America.</p> <p>Clarifications: Examples are the South, Rust-belt, Silicon Valley.</p>
SS.7.G.3.1:	Use maps to describe the location, abundance, and variety of natural resources in North America.
SS.7.G.4.1:	Use geographic terms and tools to explain cultural diffusion throughout North America.
SS.7.G.4.2:	Use maps and other geographic tools to examine the importance of demographics within political divisions of the United States.
SS.7.G.5.1:	<p>Use a choropleth or other map to geographically represent current information about issues of conservation or ecology in the local community.</p> <p>Clarifications: Examples are tri-county mangrove decimation, beach erosion.</p>
SS.7.G.6.1:	<p>Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.</p> <p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task.

MA.K12.MTR.1.1:	<ul style="list-style-type: none"> Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> Estimate to discover possible solutions. Use benchmark quantities to determine if a solution makes sense.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

History (Grades 6-12)

M/J Civics and Digital Technologies (#2106029) 2015 - 2022

(current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p>

SS.7.C.2.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
	<p>Clarifications:</p>

SS.7.C.3.1:	This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.7.C.3.2:	<p>Compare parliamentary, federal, confederal, and unitary systems of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare the constitutions of the United States and Florida.

SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.1:	<p>Differentiate concepts related to United States domestic and foreign policy.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.3:	<p>Describe examples of how the United States has dealt with international conflicts.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.68.WHST.4.10:	<p>Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.</p> <p>Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on

LAFS.7.SL.1.1:	<p>the topic, text, or issue to probe and reflect on ideas under discussion.</p> <p>b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed.</p> <p>c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed.</p> <p>d. Acknowledge new information expressed by others and, when warranted, modify their own views.</p>
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	<p>Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i></p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.1.2:	<p>Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.6.SP.1.3:	<p>Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.</p> <p>Standard Relation to Course: Supporting</p>
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	<p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
	Attend to precision.
MAFS.K12.MP.6.1:	<p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	<p>Articulate a position on a health-related issue and support it with accurate health information.</p> <p>Clarifications: Bullying prevention, Internet safety, and nutritional choices.</p>

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Digital Technologies - The digital curriculum required by Section 1003.4203 (3), Florida Statutes, has been integrated into this course. Listed below are the competencies that must be met to satisfy the requirements of (Section 1003.4203 (3), Florida Statutes):

Multimedia Technologies

01.0 Demonstrate proficiency in using presentation software and equipment.

01.01 Produce a presentation that includes music, animation, and digital photography and present it using a projection system.

01.02 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.

01.03 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation where individuals on the team function in specific production roles.

02.0 Demonstrate proficiency in using digital photography and digital imaging.

02.01 Demonstrate knowledge of ethics related to digital imaging, and legal and consent issues.

02.02 Apply effective design principles in digital photography compositions.

02.03 Illustrate the essence of an event, quote, or slogan through digital photography/imaging.

02.04 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.

02.05 Demonstrate skill in scanning and cropping photographs.

03.0 Demonstrate proficiency in basic video production equipment.

03.01 Operate video camera (e.g., Flip video camera) in studio and location (field) production environments.

03.02 Demonstrate understanding of digital video storage media and file types.

03.03 Identify and select microphones for production needs.

03.04 Determine appropriate lighting needs for production settings.

03.05 Create a short video for publishing on the web.

04.0 Demonstrate skill in using video production software.

04.01 Demonstrate knowledge of the digital video software interface.

04.02 Demonstrate ability to edit, cut, erase, and insert video.

04.03 Edit video as needed to achieve desired message and length.

04.04 Demonstrate skill in using video effects and plug-ins.

04.05 Describe a first complete run-through of the video production process

04.06 Characterize the qualities of effective communication in a completed video

04.07 Prepare a video project for final compositing and export.

04.08 Upload finished video files to a website.

05.0 Demonstrate proficiency gathering and preparing textual, graphical, and image-based web content.

05.01 Characterize effective writing styles and conventions for the web.

05.02 Use word processing software to create effective written content for the web.

05.03 Use graphics software to create and prepare various types of graphical content for use on a webpage.

05.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clip art, CD-ROMs).

05.05 Create and edit images using image or graphic design software.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106029

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

Political Sciences >

Abbreviated Title: M/J CIV & DIG TECH

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J Civics and Digital Technologies (#2106029) 2022 - 2023

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.3:	<p>Describe how English policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 22-23. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.5:	<p>Identify how the weaknesses of the Articles of Confederation led to the writing of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.6:	<p>Interpret the intentions of the Preamble of the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 27. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.8:	<p>Explain the viewpoints of the Federalists and the Anti-Federalists regarding the ratification of the Constitution and inclusion of a bill of rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 30. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.1:	<p>Define the term "citizen," and identify legal means of becoming a United States citizen.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.
SS.7.C.2.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Experience the responsibilities of citizens at the local, state, or federal levels.
SS.7.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
	Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.
SS.7.C.2.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish how the Constitution safeguards and limits individual rights.
SS.7.C.2.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	Simulate the trial process and the role of juries in the administration of justice.
SS.7.C.2.7:	Conduct a mock election to demonstrate the voting process and its impact on a school, community, or local level.
	Identify America's current political parties, and illustrate their ideas about government.
SS.7.C.2.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 40. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate candidates for political office by analyzing their qualifications, experience, issue-based platforms, debates, and political ads.
SS.7.C.2.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 41-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the impact of media, individuals, and interest groups on monitoring and influencing government.
SS.7.C.2.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Conduct a service project to further the public good.
SS.7.C.2.14:	<p>Clarifications: The project can be at the school, community, state, national, or international level.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.

SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.3:	<p>Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.4:	<p>Identify the relationship and division of powers between the federal government and state governments.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.5:	<p>Explain the Constitutional amendment process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.6:	<p>Evaluate Constitutional rights and their impact on individuals and society.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.7:	<p>Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.8:	<p>Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.9:	<p>Illustrate the law making process at the local, state, and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.10:	<p>Identify sources and types (civil, criminal, constitutional, military) of law.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.11:	<p>Diagram the levels, functions, and powers of courts at the state and federal levels.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.12:	<p>Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.3.13:	<p>Compare the constitutions of the United States and Florida.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.7.C.3.14:	<p>Differentiate between local, state, and federal governments' obligations and services.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.1:	<p>Differentiate concepts related to United States domestic and foreign policy.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 70-71. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.2:	<p>Recognize government and citizen participation in international organizations.</p> <p>Clarifications: Examples are United Nations, NATO, Peace Corps, World Health Organization, World Trade Organization, International Court of Justice.</p> <p>This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 72-73. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.4.3:	<p>Describe examples of how the United States has dealt with international conflicts.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 74-75. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
MA.K.12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K.12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K.12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task.

MA.K12.MTR.4.1:

- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the

	girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Digital Technologies - The digital curriculum required by Section 1003.4203 (3), Florida Statutes, has been integrated into this course. Listed below are the competencies that must be met to satisfy the requirements of (Section 1003.4203 (3), Florida Statutes):

Multimedia Technologies

01.0 Demonstrate proficiency in using presentation software and equipment.

01.01 Produce a presentation that includes music, animation, and digital photography and present it using a projection system.

01.02 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.

01.03 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation where individuals on the team function in specific production roles.

02.0 Demonstrate proficiency in using digital photography and digital imaging.

02.01 Demonstrate knowledge of ethics related to digital imaging, and legal and consent issues.

02.02 Apply effective design principles in digital photography compositions.

02.03 Illustrate the essence of an event, quote, or slogan through digital photography/imaging.

02.04 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.

02.05 Demonstrate skill in scanning and cropping photographs.

03.0 Demonstrate proficiency in basic video production equipment.

03.01 Operate video camera (e.g., Flip video camera) in studio and location (field) production environments.

03.02 Demonstrate understanding of digital video storage media and file types.

03.03 Identify and select microphones for production needs.

03.04 Determine appropriate lighting needs for production settings.

03.05 Create a short video for publishing on the web.

04.0 Demonstrate skill in using video production software.

04.01 Demonstrate knowledge of the digital video software interface.

04.02 Demonstrate ability to edit, cut, erase, and insert video.

04.03 Edit video as needed to achieve desired message and length.

04.04 Demonstrate skill in using video effects and plug-ins.

04.05 Describe a first complete run-through of the video production process

04.06 Characterize the qualities of effective communication in a completed video

04.07 Prepare a video project for final compositing and export.

04.08 Upload finished video files to a website.

05.0 Demonstrate proficiency gathering and preparing textual, graphical, and image-based web content.

05.01 Characterize effective writing styles and conventions for the web.

- 05.02 Use word processing software to create effective written content for the web.
- 05.03 Use graphics software to create and prepare various types of graphical content for use on a webpage.
- 05.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clip art, CD-ROMs).
- 05.05 Create and edit images using image or graphic design software.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106029

Course Path: Section: Grades PreK to 12 Education
 Courses > **Grade Group:** Grades 6 to 8 Education
 Courses > **Subject:** Social Studies > **SubSubject:**
 Political Sciences >
Abbreviated Title: M/J CIV & DIG TECH
Course Length: Year (Y)
Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J Civics and Digital Technologies (#2106029) 2023 - And

Beyond

Course Standards

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.1:	<p>Analyze the influences of ancient Greece, ancient Rome and the Judeo-Christian tradition on America's constitutional republic.</p> <ul style="list-style-type: none"> Students will explain the influence of ancient Greece on America's constitutional republic (e.g., civic participation, legislative bodies, polis, voting rights, written constitution). Students will explain the influence of ancient Rome on America's constitutional republic (e.g., civic participation, republicanism, representative government, rule of law, separation of powers). Students will compare and contrast the democratic principles of ancient Greece and ancient Rome with those of the United States. Students will explain how the Judeo-Christian ethical ideas of justice, individual worth, personal responsibility and the rule of law influenced America's constitutional republic.
SS.7.CG.1.2:	<p>Trace the principles underlying America's founding ideas on law and government.</p> <ul style="list-style-type: none"> Students will recognize principles contained in the founding documents (e.g., due process of law, equality of mankind, limited government, natural rights, the rule of law). Students will explain why religious liberty is a protected right.
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.5:	<p>Describe how British policies and responses to colonial concerns led to the writing of the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will trace the causal relationships between British policies, British responses to colonial grievances and the writing of the Declaration of Independence (e.g., Stamp Act, Quartering Act, Declaratory Act, Townshend Acts, Tea Act, Intolerable Acts). Students will recognize the underlying themes of British colonial policies concerning taxation, representation and individual rights that formed the basis of the American colonists' desire for independence.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.7:	<p>Explain how the weaknesses of the Articles of Confederation led to the writing of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will identify the weaknesses of the government under the Articles of Confederation (i.e., Congress had no power to tax, to regulate trade or to enforce its laws; the national government lacked a national court system [judicial branch] and central leadership [executive branch]; no national armed forces; and changes to the Articles required unanimous consent of the 13 states).
SS.7.CG.1.8:	<p>Explain the purpose of the Preamble to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain how the Preamble serves as an introduction to the U.S. Constitution (e.g., establishes the goals and purposes of government). Students will identify the goals and purposes of the national government as set forth in the Preamble to the U.S. Constitution (i.e., form a more perfect union, establish justice, ensure domestic tranquility, provide for the common defense, promote the general welfare, and secure the blessings of liberty to ourselves and our posterity). Students will recognize that the intention of the phrase "We the People" means that government depends on the people for its power and exists

	to serve them.
SS.7.CG.1.9:	Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law. <ul style="list-style-type: none"> • Students will explain the concept of limited government in the U.S. Constitution. • Students will describe and distinguish between separation of powers and checks and balances. • Students will analyze how government power is limited by separation of powers and/or checks and balances. • Students will recognize examples of separation of powers and checks and balances. • Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.10:	Compare the viewpoints of the Federalists and the Anti-Federalists regarding ratification of the U.S. Constitution and including a bill of rights. <ul style="list-style-type: none"> • Students will identify the viewpoints of the Federalists and the Anti-Federalists about the ratification of the U.S. Constitution. • Students will recognize the Anti-Federalists' reasons for the inclusion of a bill of rights in the U.S. Constitution.
SS.7.CG.1.11:	Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States. <ul style="list-style-type: none"> • Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. • Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. • Students will analyze the meaning and importance of due process in the United States legal system. • Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.1:	Define the term "citizen," and explain the constitutional means of becoming a U.S. citizen. <ul style="list-style-type: none"> • Students will define citizenship as stated in the 14th Amendment. • Students will explain the process of becoming a naturalized citizen. • Students will define permanent residency and explain its role in obtaining citizenship. • Students will examine the impact of the naturalization process on society, government and the political process.
SS.7.CG.2.2:	Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society. <ul style="list-style-type: none"> • Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. • Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. • Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. • Students will use scenarios to assess specific obligations of citizens. • Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution. <ul style="list-style-type: none"> • Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. • Students will recognize the five freedoms protected by the First Amendment. • Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. • Students will use scenarios to identify rights protected by the Bill of Rights. • Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights. <ul style="list-style-type: none"> • Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). • Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus). • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	Describe the trial process and the role of juries in the administration of justice at the state and federal levels. <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.6:	Examine the election and voting process at the local, state and national levels. <ul style="list-style-type: none"> • Students will explain how elections and voting impact citizens at the local, state and national levels. • Students will explain the origins of the Republican and Democratic political parties and evaluate their roles in shaping public policy. • Students will explain how free and fair elections promote trust in democratic institutions and preserve the republic.
SS.7.CG.2.7:	Identify the constitutional qualifications required to hold state and national office. <ul style="list-style-type: none"> • Students will recognize the qualifications to seek election to local and state political offices.
SS.7.CG.2.8:	Examine the impact of media, individuals, and interest groups on monitoring and influencing government. <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	Analyze media and political communications and identify examples of bias, symbolism and propaganda. <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action. <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government. <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government.

	<ul style="list-style-type: none"> Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.
SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> Students will apply their understanding of federal, confederal and unitary systems of government. Students will compare the organizational structures of systems of government. Students will recognize examples of these systems of government. Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize the structure of the legislative, executive and judicial branches. Students will compare the roles and responsibilities of the three branches of the national government. Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> Students will describe the system of federalism as established by the U.S. Constitution. Students will analyze how federalism limits government power. Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. Students will identify the correct sequence of each amendment process. Students will identify the importance of a formal amendment process. Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> Students will recognize how these amendments expanded civil rights to African Americans, women and young people. Students will evaluate the impact these amendments have had on American society. Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.8:	<p>Explain the structure, functions and processes of the executive branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the executive branch (e.g., executive order, veto, appointments). Students will compare and contrast executive authority at the local, state and national levels. Students will explain the function of administrative agencies (e.g., advise, make regulations, enforce law and regulations).
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). Students will distinguish between the structure, functions and powers of courts at the state and federal levels. Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> Students will explain how historical codes of law influenced the United States. Students will recognize natural, constitutional, statutory, case and common law as sources of law. Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). Students will use primary sources to assess the significance of each U.S. Supreme Court case. Students will evaluate the impact of each case on society. Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.
SS.7.CG.3.12:	<p>Compare the U.S. and Florida constitutions.</p> <ul style="list-style-type: none"> Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people). Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments). Students will compare the amendment process of the U.S. and Florida Constitutions. Students will recognize the U.S. Constitution as the supreme law of the land.
SS.7.CG.3.13:	<p>Explain government obligations to its citizens and the services provided at the local, state and national levels.</p> <ul style="list-style-type: none"> Students will describe and classify specific services provided by local, state and national governments. Students will compare the powers and obligations of local, state and national governments.
SS.7.CG.3.14:	<p>Explain the purpose and function of the Electoral College in electing the President of the United States.</p> <ul style="list-style-type: none"> Students will explain the origin of the Electoral College and the changes made to it by the 12th Amendment.
SS.7.CG.3.15:	<p>Analyze the advantages of capitalism and the free market in the United States over government-controlled economic systems (e.g., socialism and communism) in regard to economic freedom and raising the standard of living for citizens.</p> <ul style="list-style-type: none"> Students will evaluate various economic systems (e.g., capitalism, communism, socialism). Students will compare the economic prosperity and opportunity of current nations.
SS.7.CG.4.1:	<p>Explain the relationship between U.S. foreign and domestic policy.</p> <ul style="list-style-type: none"> Students will recognize the difference between domestic and foreign policy. Students will identify issues that relate to U.S. domestic and foreign policy.

SS.7.CG.4.2:	<ul style="list-style-type: none"> Students will define "national interest" and identify the means available to the national government to pursue the United States' national interest. <p>Describe the United States' and citizen participation in international organizations.</p> <ul style="list-style-type: none"> Students will identify major international organizations in which government plays a role (e.g., North Atlantic Treaty Organization, United Nations, International Court of Justice, World Trade Organization). Students will discuss the advantages and disadvantages of U.S. membership in international organizations.
SS.7.CG.4.3:	<p>Describe examples of the United States' actions and reactions in international conflicts.</p> <ul style="list-style-type: none"> Students will identify specific examples of and the reasons for United States' involvement in international conflicts. Students will analyze primary source documents pertaining to international incidents to determine the course of action taken by the United States. Students will identify the different methods used by the United States to deal with international conflict (e.g., diplomacy, espionage, humanitarian efforts, peacekeeping operations, sanctions, war).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems. </div>
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations. </div>
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. </div>
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers. </div>
	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems.

MA.K12.MTR.5.1:

- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they

ELA.K12.EE.5.1:

	must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

VERSION DESCRIPTION

Civic education is essential in the development of informed citizenry who are equipped to participate in civic life and preserve a government of the people, by the people, and for the people. The Civics and Government (CG) standards in this class were revised in 2021 as a result of the House Bill (2019) civics standards review and reflect the following priorities for K-12 Civics and Government teaching and learning in Florida schools.

- Students study primary source documents to understand the philosophical underpinnings of the American Republic and the root cause of American exceptionalism.
- Students compare the success of the United States and the success or failure of other nations' governing philosophies to evaluate their past, present and likely future effects.
- Students have a sense of civic pride and participate regularly in all levels of government.
- Students reflect upon United States civic history, so they understand their rights and responsibilities as citizens, including the process of advocating properly with government officials.

GENERAL NOTES

The primary content for the course pertains to the principles, functions, and organization of government; the origins of the American political system; the roles, rights, responsibilities of United States citizens; and methods of active participation in our political system. The course is embedded with strong geographic and economic components to support civic education instruction.

Digital Technologies - The digital curriculum required by Section 1003.4203 (3), Florida Statutes, has been integrated into this course. Listed below are the competencies that must be met to satisfy the requirements of (Section 1003.4203 (3), Florida Statutes):

Multimedia Technologies

01.0 Demonstrate proficiency in using presentation software and equipment.

01.01 Produce a presentation that includes music, animation, and digital photography and present it using a projection system.

01.02 Using presentation software, create a multimedia presentation that incorporates shot and edited video, animation, music, narration and adheres to good design principles, use of transitions, and effective message conveyance.

01.03 Collaborate with team members to plan, edit, evaluate, and present a multimedia presentation where individuals on the team function in specific production roles.

02.0 Demonstrate proficiency in using digital photography and digital imaging.

02.01 Demonstrate knowledge of ethics related to digital imaging, and legal and consent issues.

02.02 Apply effective design principles in digital photography compositions.

02.03 Illustrate the essence of an event, quote, or slogan through digital photography/imaging.

02.04 Demonstrate skill in using digital imaging software for image manipulation, color correction, and special effects to creatively convey a message or literary interpretation.

02.05 Demonstrate skill in scanning and cropping photographs.

03.0 Demonstrate proficiency in basic video production equipment.

03.01 Operate video camera (e.g., Flip video camera) in studio and location (field) production environments.

03.02 Demonstrate understanding of digital video storage media and file types.

03.03 Identify and select microphones for production needs.

03.04 Determine appropriate lighting needs for production settings.

03.05 Create a short video for publishing on the web.

04.0 Demonstrate skill in using video production software.

04.01 Demonstrate knowledge of the digital video software interface.

04.02 Demonstrate ability to edit, cut, erase, and insert video.

04.03 Edit video as needed to achieve desired message and length.

04.04 Demonstrate skill in using video effects and plug-ins.

04.05 Describe a first complete run-through of the video production process

04.06 Characterize the qualities of effective communication in a completed video

04.07 Prepare a video project for final compositing and export.

04.08 Upload finished video files to a website.

05.0 Demonstrate proficiency gathering and preparing textual, graphical, and image-based web content.

- 05.01 Characterize effective writing styles and conventions for the web.
- 05.02 Use word processing software to create effective written content for the web.
- 05.03 Use graphics software to create and prepare various types of graphical content for use on a webpage.
- 05.04 Access and digitize graphics through various resources (e.g., scanner, digital cameras, on-line graphics, clip art, CD-ROMs).
- 05.05 Create and edit images using image or graphic design software.

Special Notes:

Additional content that may be included in the Grade 8 NAEP Civics assessment includes:

- Distinctive characteristics of American society
- Unity/diversity in American society
- Civil society: nongovernmental associations, groups
- Nation-states
- Interaction among nation-states
- Major governmental, nongovernmental international organizations

The NAEP frameworks for Civics may be accessed at <http://www.nagb.org/publications/frameworks/civicsframework.pdf>

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2106029

Course Path: Section: Grades PreK to 12 Education
 Courses > **Grade Group:** Grades 6 to 8 Education
 Courses > **Subject:** Social Studies > **SubSubject:**
 Political Sciences >

Abbreviated Title: M/J CIV & DIG TECH

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Political Science (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Grades K-6)
Elementary Education (Elementary Grades 1-6)

M/J Law Studies (#2106030) 2015 - 2022 (current)

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.2:	<p>Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.4:	<p>Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.5:	<p>Distinguish how the Constitution safeguards and limits individual rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	<p>Simulate the trial process and the role of juries in the administration of justice.</p>
SS.7.C.2.10:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.
SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.
SS.7.C.3.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Identify the relationship and division of powers between the federal government and state governments.
SS.7.C.3.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Explain the Constitutional amendment process.
SS.7.C.3.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate Constitutional rights and their impact on individuals and society.
SS.7.C.3.6:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.
SS.7.C.3.7:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.
SS.7.C.3.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Illustrate the law making process at the local, state, and federal levels.
SS.7.C.3.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Identify sources and types (civil, criminal, constitutional, military) of law.
SS.7.C.3.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Diagram the levels, functions, and powers of courts at the state and federal levels.
SS.7.C.3.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.
SS.7.C.3.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare the constitutions of the United States and Florida.
SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	<p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
	Write arguments focused on <i>discipline-specific content</i> .
LAFS.68.WHST.1.1:	<ol style="list-style-type: none"> Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. Establish and maintain a formal style. Provide a concluding statement or section that follows from and supports the argument presented.
	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.
LAFS.68.WHST.1.2:	<ol style="list-style-type: none"> Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to inform about or explain the topic. Establish and maintain a formal style and objective tone. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.

LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
LAFS.7.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 7 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or researched material under study; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, track progress toward specific goals and deadlines, and define individual roles as needed. c. Pose questions that elicit elaboration and respond to others' questions and comments with relevant observations and ideas that bring the discussion back on topic as needed. d. Acknowledge new information expressed by others and, when warranted, modify their own views.
LAFS.7.SL.1.2:	Analyze the main ideas and supporting details presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how the ideas clarify a topic, text, or issue under study.
LAFS.7.SL.1.3:	Delineate a speaker's argument and specific claims, evaluating the soundness of the reasoning and the relevance and sufficiency of the evidence.
LAFS.7.SL.2.4:	Present claims and findings, emphasizing salient points in a focused, coherent manner with pertinent descriptions, facts, details, and examples; use appropriate eye contact, adequate volume, and clear pronunciation.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i> Standard Relation to Course: Supporting
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape. Standard Relation to Course: Supporting
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number. Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications:

General Course Information and Notes

GENERAL NOTES

M/J Law Studies – The social studies curriculum for this course consists of the following content area strands: Geography, Civics and Government. The primary content for this course pertains to the principles, functions, and organization of the American legal system. The content should include, but not be limited to, the purpose of law, the role of citizens, the impact of laws on the lives of citizens, civil and criminal laws, fundamental civil and criminal justice procedures, causes and effects of crime, consumer and family law, comparison of adult and juvenile justice systems, and career opportunities in the legal system. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance – Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Course Standards

Name	Description
SS.7.C.1.1:	<p>Recognize how Enlightenment ideas including Montesquieu's view of separation of power and John Locke's theories related to natural law and how Locke's social contract influenced the Founding Fathers.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 18-19. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.2:	<p>Trace the impact that the Magna Carta, English Bill of Rights, Mayflower Compact, and Thomas Paine's "Common Sense" had on colonists' views of government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 20-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.4:	<p>Analyze the ideas (natural rights, role of the government) and complaints set forth in the Declaration of Independence.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 24-25. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.7:	<p>Describe how the Constitution limits the powers of government through separation of powers and checks and balances.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 28-29. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.1.9:	<p>Define the rule of law and recognize its influence on the development of the American legal, political, and governmental systems.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.2:	<p>Evaluate the obligations citizens have to obey laws, pay taxes, defend the nation, and serve on juries.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 34-35. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.7.C.2.4:	<p>Evaluate rights contained in the Bill of Rights and other amendments to the Constitution.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 36-37. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.5:	<p>Distinguish how the Constitution safeguards and limits individual rights.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 38-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.7.C.2.6:	<p>Simulate the trial process and the role of juries in the administration of justice.</p>
SS.7.C.2.10:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 43. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Analyze media and political communications (bias, symbolism, propaganda).
SS.7.C.2.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 44-45. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Develop a plan to resolve a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue, and determining a course of action.
SS.7.C.2.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 46-47. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine multiple perspectives on public and current issues.
SS.7.C.2.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 48-49. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare different forms of government (direct democracy, representative democracy, socialism, communism, monarchy, oligarchy, autocracy).
SS.7.C.3.1:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare parliamentary, federal, confederal, and unitary systems of government.
SS.7.C.3.2:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Illustrate the structure and function (three branches of government established in Articles I, II, and III with corresponding powers) of government in the United States as established in the Constitution.
SS.7.C.3.3:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Identify the relationship and division of powers between the federal government and state governments.
SS.7.C.3.4:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 55. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Explain the Constitutional amendment process.
SS.7.C.3.5:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate Constitutional rights and their impact on individuals and society.
SS.7.C.3.6:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 57. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the impact of the 13th, 14th, 15th, 19th, 24th, and 26th amendments on participation of minority groups in the American political process.
SS.7.C.3.7:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 58-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the structure, functions, and processes of the legislative, executive, and judicial branches.
SS.7.C.3.8:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Illustrate the law making process at the local, state, and federal levels.
SS.7.C.3.9:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 60-61. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

	Identify sources and types (civil, criminal, constitutional, military) of law.
SS.7.C.3.10:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 62. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Diagram the levels, functions, and powers of courts at the state and federal levels.
SS.7.C.3.11:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 63-64. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the significance and outcomes of landmark Supreme Court cases including, but not limited to, Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, in re Gault, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, and Bush v. Gore.
SS.7.C.3.12:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications page 65. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare the constitutions of the United States and Florida.
SS.7.C.3.13:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 66-67. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Differentiate between local, state, and federal governments' obligations and services.
SS.7.C.3.14:	<p>Clarifications: This benchmark is annually evaluated on the Civics End-of-Course Assessment. For more information on how this benchmark is evaluated view the Civics End-of-Course Assessment Test Item Specifications pages 68-69. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.
SS.7.G.6.1:	<p>Clarifications: Examples are population density, changes in census data, and district reapportionment over time.</p>
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K.12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K.12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K.12.MTR.3.1:	<p>Clarifications:</p>

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.7.P.8.2:	Articulate a position on a health-related issue and support it with accurate health information. Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

M/J Law Studies – The social studies curriculum for this course consists of the following content area strands: Geography, Civics and Government. The primary content for this course pertains to the principles, functions, and organization of the American legal system. The content should include, but not be limited to, the purpose of law, the role of citizens, the impact of laws on the lives of citizens, civil and criminal laws, fundamental civil and criminal justice procedures, causes and effects of crime, consumer and family law, comparison of adult and juvenile justice systems, and career opportunities in the legal system. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Name	Description
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. Students will analyze how antisemitism led to and contributed to the Holocaust. Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
SS.7.CG.1.3:	<p>Trace the impact that the Magna Carta, Mayflower Compact, English Bill of Rights and Thomas Paine's Common Sense had on colonists' views of government.</p> <ul style="list-style-type: none"> Students will identify the important ideas contained in the Magna Carta (e.g., due process of law, limitation of government power, right to justice, right to fair trial), Mayflower Compact (e.g., consent of the governed, self-government), English Bill of Rights (e.g., right to life, liberty and property; no taxation without representation; right to a speedy and fair jury trial; no excessive punishments; habeas corpus) and Common Sense (representative self-government).
SS.7.CG.1.4:	<p>Analyze how Enlightenment ideas, including Montesquieu's view of separation of powers and John Locke's theories related to natural law and Locke's social contract, influenced the Founding.</p> <ul style="list-style-type: none"> Students will identify and describe the Enlightenment ideas of separation of powers, natural law and social contract. Students will examine how Enlightenment ideas influenced the Founders' beliefs about individual liberties and government. Students will evaluate the influence of Montesquieu's and Locke's ideas on the Founding Fathers.
SS.7.CG.1.6:	<p>Analyze the ideas and grievances set forth in the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify the unalienable rights specifically expressed in the Preamble of the Declaration of Independence (e.g., life, liberty and the pursuit of happiness). Students will explain the concept of natural rights as expressed in the Declaration of Independence. Students will recognize natural rights, social contract, limited government and the right of resistance to tyrannical government. Students will analyze the relationship between natural rights and the role of government: 1. People are endowed by their Creator with certain unalienable rights; 2. Governments are instituted among men to secure these rights; 3. Governments derive their just powers from the consent of governed; and 4. Whenever any form of government becomes destructive of these ends, it is the right of the people to alter or abolish it and to institute new government. Students will recognize the connection between specific grievances in the Declaration of Independence and natural rights violations. Students will recognize colonial grievances identified in the Declaration of Independence (e.g., imposing taxes without the consent of the people, suspending trial by jury, limiting judicial powers, quartering soldiers and dissolving legislatures).
SS.7.CG.1.9:	<p>Describe how the U.S. Constitution limits the powers of government through separation of powers, checks and balances, individual rights, rule of law and due process of law.</p> <ul style="list-style-type: none"> Students will explain the concept of limited government in the U.S. Constitution. Students will describe and distinguish between separation of powers and checks and balances. Students will analyze how government power is limited by separation of powers and/or checks and balances. Students will recognize examples of separation of powers and checks and balances. Students will recognize the influence of the U.S. Constitution on the development of other governments.
SS.7.CG.1.11:	<p>Define the rule of law and recognize its influence on the development of legal, political and governmental systems in the United States.</p> <ul style="list-style-type: none"> Students will compare and contrast the characteristics of a society that operates under the rule of law and one that does not. Students will assess the importance of the rule of law in protecting citizens from arbitrary and abusive uses of government power. Students will analyze the meaning and importance of due process in the United States legal system. Students will evaluate the impact of the rule of law on governmental officials and institutions (e.g., accountability to the law, consistent application and enforcement of the law, decisions based on the law, fair procedures, transparency of institutions).
SS.7.CG.2.2:	<p>Differentiate between obligations and responsibilities of U.S. citizenship, and evaluate their impact on society.</p> <ul style="list-style-type: none"> Students will distinguish between an obligation or duty and a responsibility as it relates to citizenship. Responsibilities may include, but are not limited to, voting, attending civic meetings, petitioning government and running for office. Students will recognize the concept of the common good as a reason for fulfilling the obligations and responsibilities of citizenship. Students will evaluate the obligations and responsibilities of citizens as they relate to active participation in society and government. Students will use scenarios to assess specific obligations of citizens. Students will identify the consequences or predict the outcome on society if citizens do not fulfill their obligations and responsibilities.
SS.7.CG.2.3:	<p>Identify and apply the rights contained in the Bill of Rights and other amendments to the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize that the Bill of Rights comprises the first ten amendments to the U.S. Constitution. Students will recognize the five freedoms protected by the First Amendment. Students will evaluate how the Bill of Rights and other amendments (e.g., 13th, 14th, 15th, 19th, 24th, 26th) influence individual actions and social interactions. Students will use scenarios to identify rights protected by the Bill of Rights. Students will use scenarios to recognize violations of the Bill of Rights or other constitutional amendments.
SS.7.CG.2.4:	<p>Explain how the U.S. Constitution and the Bill of Rights safeguard individual rights.</p> <ul style="list-style-type: none"> Students will recognize that rights are protected but some rights are limited (e.g., property rights, civil disobedience). Students will examine rationales for government-imposed limitations on individual rights (e.g., forced internment in wartime, limitations on speech, rationing during wartime, suspension of habeas corpus).

	<ul style="list-style-type: none"> • Students will use scenarios to examine the impact of limiting individual rights. • Students will examine the role of the judicial branch of government in protecting individual rights and freedoms.
SS.7.CG.2.5:	<p>Describe the trial process and the role of juries in the administration of justice at the state and federal levels.</p> <ul style="list-style-type: none"> • Students will examine the significance of juries in the American legal system. • Students will explain types of jury trials, how juries are selected and why jury trials are important.
SS.7.CG.2.8:	<p>Examine the impact of media, individuals, and interest groups on monitoring and influencing government.</p> <ul style="list-style-type: none"> • Students will identify methods used by the media to monitor and hold government accountable (e.g., acting as a watchdog, freedom of the press as contained in the 1st Amendment). • Students will identify methods used by individuals to monitor, hold accountable and influence the government (e.g., attending civic meetings, peacefully protesting, petitioning government, running for office, voting). • Students will identify methods used by interest groups to monitor and influence government.
SS.7.CG.2.9:	<p>Analyze media and political communications and identify examples of bias, symbolism and propaganda.</p> <ul style="list-style-type: none"> • Students will use scenarios to identify bias, symbolism and propaganda. • Students will evaluate how bias, symbolism and propaganda can impact public opinion.
SS.7.CG.2.10:	<p>Explain the process for citizens to address a state or local problem by researching public policy alternatives, identifying appropriate government agencies to address the issue and determining a course of action.</p> <ul style="list-style-type: none"> • Students will identify the appropriate level of government to resolve specific problems. • Students will identify appropriate government agencies to address local or state problems. • Students will analyze public policy alternatives to resolve local and state problems.
SS.7.CG.3.1:	<p>Analyze the advantages of the United States' constitutional republic over other forms of government in safeguarding liberty, freedom and a representative government.</p> <ul style="list-style-type: none"> • Students will apply their understanding of various forms of government (e.g., republic, democracy, monarchy, oligarchy, theocracy, autocracy). • Students will identify different forms of government based on their political philosophy or organizational structure. • Students will analyze scenarios describing various forms of government. • Students will explain how the application of checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and separation of powers distinguishes the United States' constitutional republic from authoritarian and totalitarian nations.
SS.7.CG.3.2:	<p>Explain the advantages of a federal system of government over other systems in balancing local sovereignty with national unity and protecting against authoritarianism.</p> <ul style="list-style-type: none"> • Students will apply their understanding of federal, confederal and unitary systems of government. • Students will compare the organizational structures of systems of government. • Students will recognize examples of these systems of government. • Students will analyze scenarios describing various systems of government.
SS.7.CG.3.3:	<p>Describe the structure and function of the three branches of government established in the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the structure of the legislative, executive and judicial branches. • Students will compare the roles and responsibilities of the three branches of the national government. • Students will identify the general powers described in Articles I, II and III of the U.S. Constitution.
SS.7.CG.3.4:	<p>Explain the relationship between state and national governments as written in Article IV of the U.S. Constitution and the 10th Amendment.</p> <ul style="list-style-type: none"> • Students will describe the system of federalism as established by the U.S. Constitution. • Students will analyze how federalism limits government power. • Students will compare concurrent powers, enumerated powers, reserved powers and delegated powers as they relate to state and national governments.
SS.7.CG.3.5:	<p>Explain the amendment process outlined in Article V of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize the methods used to propose and ratify amendments to the U.S. Constitution. • Students will identify the correct sequence of each amendment process. • Students will identify the importance of a formal amendment process. • Students will recognize the significance of the difficulty of amending the U.S. Constitution.
SS.7.CG.3.6:	<p>Analyze how the 13th, 14th, 15th, 19th, 24th and 26th Amendments broadened participation in the political process.</p> <ul style="list-style-type: none"> • Students will recognize how these amendments expanded civil rights to African Americans, women and young people. • Students will evaluate the impact these amendments have had on American society. • Students will examine how these amendments increased participation in the political process.
SS.7.CG.3.7:	<p>Explain the structure, functions and processes of the legislative branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the legislative branch (e.g., how a bill becomes a law, appointment confirmation, committee selection). • Students will compare local, state and national lawmakers (e.g., city/county commissioners/council members; state legislators [representatives and senators]; and U.S. Congressmen/Congresswomen [representatives and senators]). • Students will compare and contrast the lawmaking process at the local, state and national levels.
SS.7.CG.3.9:	<p>Explain the structure, functions and processes of the judicial branch of government.</p> <ul style="list-style-type: none"> • Students will examine the processes of the judicial branch (e.g., judicial review, court order, writ of certiorari, summary judgment). • Students will distinguish between the structure, functions and powers of courts at the state and federal levels. • Students will recognize that the powers and jurisdiction of the state and federal courts are derived from their respective constitutions. • Students will compare the trial and appellate processes.
SS.7.CG.3.10:	<p>Identify sources and types of law.</p> <ul style="list-style-type: none"> • Students will explain how historical codes of law influenced the United States. • Students will recognize natural, constitutional, statutory, case and common law as sources of law. • Students will compare civil, criminal, constitutional and/or military types of law.
SS.7.CG.3.11:	<p>Analyze the effects of landmark Supreme Court decisions on law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., Marbury v. Madison; Dred Scott v. Sandford; Plessy v. Ferguson; Brown v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; In re Gault; United States v. Nixon; Hazelwood v. Kuhlmeier). • Students will use primary sources to assess the significance of each U.S. Supreme Court case. • Students will evaluate the impact of each case on society.

- Students will recognize constitutional principles and individual rights in relevant U.S. Supreme Court decisions.

SS.7.CG.3.12:

Compare the U.S. and Florida constitutions.

- Students will identify the purposes of a constitution (e.g., provides a framework for government, limits government authority, protects individual rights of the people).
- Students will recognize the basic outline of the U.S. and Florida Constitutions (e.g., both have preambles, articles and amendments).
- Students will compare the amendment process of the U.S. and Florida Constitutions.
- Students will recognize the U.S. Constitution as the supreme law of the land.

SS.7.CG.3.13:

Explain government obligations to its citizens and the services provided at the local, state and national levels.

- Students will describe and classify specific services provided by local, state and national governments.
- Students will compare the powers and obligations of local, state and national governments.

SS.7.G.6.1:

Use Geographic Information Systems (GIS) or other technology to view maps of current information about the United States.

Clarifications:

Examples are population density, changes in census data, and district reapportionment over time.

MA.K12.MTR.1.1:

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	<p>Use the accepted rules governing a specific format to create quality work.</p>

ELA.K.12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Articulate a position on a health-related issue and support it with accurate health information.
HE.7.P.8.2:	Clarifications: Bullying prevention, Internet safety, and nutritional choices.

General Course Information and Notes

GENERAL NOTES

M/J Law Studies – The social studies curriculum for this course consists of the following content area strands: Geography, Civics and Government. The primary content for this course pertains to the principles, functions, and organization of the American legal system. The content should include, but not be limited to, the purpose of law, the role of citizens, the impact of laws on the lives of citizens, civil and criminal laws, fundamental civil and criminal justice procedures, causes and effects of crime, consumer and family law, comparison of adult and juvenile justice systems, and career opportunities in the legal system. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2106030

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**
Political Sciences >

Abbreviated Title: M/J LAW STUDIES

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Political Science (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Law (Secondary Grades 7-12)

M/J World History (#2109010) 2015 - 2022 (current)

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications:

	Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.4.4:	Map and analyze the impact of the spread of various belief systems in the ancient world. Clarifications: Examples are Buddhism, Christianity, Judaism.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
SS.6.W.2.3:	Identify the characteristics of civilization. Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.9:	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area. Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.

SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.8:	Determine the impact of significant figures associated with ancient Rome. Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
SS.6.W.3.12:	Explain the causes for the growth and longevity of the Roman Empire. Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.15:	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana. Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
SS.6.W.4.7:	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi. Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
SS.6.W.4.8:	Describe the contributions of classical and post classical China. Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.9:	Identify key figures from classical and post classical China. Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.

SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students

MAFS.K12.MP.1.1:	might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.3.1:	
	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.5.1:	
	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
MAFS.K12.MP.6.1:	
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	<p>Clarifications:</p> <p>Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.</p>

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and

concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2109010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

World and Eastern Hemispheric Histories >

Abbreviated Title: M/J WORLD HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Course Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World History (#2109010) 2022 - 2023

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications:

	Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.4.4:	Map and analyze the impact of the spread of various belief systems in the ancient world. Clarifications: Examples are Buddhism, Christianity, Judaism.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
SS.6.W.2.3:	Identify the characteristics of civilization. Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.9:	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area. Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.

SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.8:	Determine the impact of significant figures associated with ancient Rome. Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
SS.6.W.3.12:	Explain the causes for the growth and longevity of the Roman Empire. Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.15:	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana. Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
SS.6.W.4.7:	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi. Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
SS.6.W.4.8:	Describe the contributions of classical and post classical China. Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.9:	Identify key figures from classical and post classical China. Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.

SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.
MA.K12.MTR.4.1:	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations.
MA.K12.MTR.5.1:	<p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems.

- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Clarifications:

Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2109010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

World and Eastern Hemispheric Histories >

Abbreviated Title: M/J WORLD HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World History (#2109010) 2023 - And Beyond

Course Standards

Name	Description
SS.6.CG.1.1:	Analyze how democratic concepts developed in ancient Greece served as a foundation for the United States' constitutional republic. <ul style="list-style-type: none"> • Students will identify and explain the democratic principles of government in ancient Greece. • Students will compare and contrast the political systems of ancient Greece and modern-day United States. • Students will recognize the influence of ancient Greece on the American political process.
SS.6.CG.1.2:	Analyze the influence of ancient Rome on the United States' constitutional republic. <ul style="list-style-type: none"> • Students will compare and contrast the political systems in ancient Rome and modern-day United States. • Students will recognize the influence of ancient Rome on the American political process.
SS.6.CG.1.3:	Examine rule of law in the ancient world and its influence on the United States' constitutional republic. <ul style="list-style-type: none"> • Students will recognize origins of what to include, but not be limited to, the contributions of ancient Greek and ancient Roman civilizations. • Students will recognize that the rule of law is a foundational principle of the U.S. government.
SS.6.CG.1.4:	Examine examples of civic leadership and virtue in ancient Greece and ancient Rome. <ul style="list-style-type: none"> • Students will explain the influence of significant leaders (e.g., Marcus Tullius Cicero, Marcus Aurelius, Pericles, Solon, Cleisthenes) on civic participation and governance in the ancient world.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.</p> </div>
SS.6.G.1.4:	Utilize tools geographers use to study the world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.</p> </div>
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are major rivers, seas, oceans.</p> </div>
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.</p> </div>
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are city-states, provinces, kingdoms, empires.</p> </div>
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].</p> </div>
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Egypt, Rome, Greece, China, Kush.</p> </div>
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are China limits and Greece invites.</p> </div>
	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another.

SS.6.G.2.6:	Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world. Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures. Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world. Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages. Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods. Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.9:	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area. Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.

SS.6.W.2.10:	Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.

SS.6.W.4.9:	<p>Identify key figures from classical and post classical China.</p> <p>Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.</p>
SS.6.W.4.10:	<p>Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.</p>
SS.6.W.4.11:	<p>Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.</p>
SS.6.W.4.12:	<p>Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.</p>
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers. <p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p>

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>

	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2109010

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**

World and Eastern Hemispheric Histories >

Abbreviated Title: M/J WORLD HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

M/J World History and Career Planning (#2109015) 2019 -

2022 (current)

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.

SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
	Analyze the impact of human populations on the ancient world's ecosystems.
SS.6.G.3.2:	Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
	Summarize important achievements of Egyptian civilization.
SS.6.W.2.5:	Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
	Determine the contributions of key figures from ancient Egypt.
SS.6.W.2.6:	Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
	Summarize the important achievements of Mesopotamian civilization.
SS.6.W.2.7:	Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
	Determine the impact of key figures from ancient Mesopotamian civilizations.
SS.6.W.2.8:	Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.
SS.6.W.2.9:	Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.
SS.6.W.2.10:	Clarifications: Examples are Olmec, Zapotec, Chavin.

SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
	Identify key figures from classical and post classical China.
SS.6.W.4.9:	Clarifications:

Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.

SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i>
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.
	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the

MAFS.K12.MP.1.1:	original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.

- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELLs need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Additional Instructional Resources: A.V.E. for Success Collaboration (http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

2023

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.

SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
	Analyze the impact of human populations on the ancient world's ecosystems.
SS.6.G.3.2:	Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
	Summarize important achievements of Egyptian civilization.
SS.6.W.2.5:	Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
	Determine the contributions of key figures from ancient Egypt.
SS.6.W.2.6:	Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
	Summarize the important achievements of Mesopotamian civilization.
SS.6.W.2.7:	Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
	Determine the impact of key figures from ancient Mesopotamian civilizations.
SS.6.W.2.8:	Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.
SS.6.W.2.9:	Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.
SS.6.W.2.10:	Clarifications: Examples are Olmec, Zapotec, Chavin.

SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
	Identify key figures from classical and post classical China.
SS.6.W.4.9:	Clarifications:

Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.

SS.6.W.4.10: Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.

SS.6.W.4.11: Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.

SS.6.W.4.12: Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1: Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1: Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1: Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1: Read and comprehend grade-level complex texts proficiently.

Clarifications:
See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.3.1: Make inferences to support comprehension.

Clarifications:
Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.4.1: Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:
In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.5.1: Use the accepted rules governing a specific format to create quality work.

Clarifications:
Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.6.1: Use appropriate voice and tone when speaking or writing.

Clarifications:
In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends

	differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELLs need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Additional Instructional Resources: A.V.E. for Success Collaboration (http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

GENERAL INFORMATION

Course Number: 2109015

Course Path: Section: Grades PreK to 12 Education
 Courses > **Grade Group:** Grades 6 to 8 Education
 Courses > **Subject:** Social Studies > **SubSubject:**
 World and Eastern Hemispheric Histories >
Abbreviated Title: M/J WORLD HIST & CP
Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Type: Core Academic Course

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J World History and Career Planning (#2109015) 2023 -

And Beyond

Course Standards

Name	Description
SS.6.CG.1.1:	Analyze how democratic concepts developed in ancient Greece served as a foundation for the United States' constitutional republic. <ul style="list-style-type: none"> Students will identify and explain the democratic principles of government in ancient Greece. Students will compare and contrast the political systems of ancient Greece and modern-day United States. Students will recognize the influence of ancient Greece on the American political process.
SS.6.CG.1.2:	Analyze the influence of ancient Rome on the United States' constitutional republic. <ul style="list-style-type: none"> Students will compare and contrast the political systems in ancient Rome and modern-day United States. Students will recognize the influence of ancient Rome on the American political process.
SS.6.CG.1.3:	Examine rule of law in the ancient world and its influence on the United States' constitutional republic. <ul style="list-style-type: none"> Students will recognize origins of what to include, but not be limited to, the contributions of ancient Greek and ancient Roman civilizations. Students will recognize that the rule of law is a foundational principle of the U.S. government.
SS.6.CG.1.4:	Examine examples of civic leadership and virtue in ancient Greece and ancient Rome. <ul style="list-style-type: none"> Students will explain the influence of significant leaders (e.g., Marcus Tullius Cicero, Marcus Aurelius, Pericles, Solon, Cleisthenes) on civic participation and governance in the ancient world.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.</p> </div>
SS.6.G.1.4:	Utilize tools geographers use to study the world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.</p> </div>
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are major rivers, seas, oceans.</p> </div>
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.</p> </div>
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are city-states, provinces, kingdoms, empires.</p> </div>
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].</p> </div>
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Egypt, Rome, Greece, China, Kush.</p> </div>
	Interpret how geographic boundaries invite or limit interaction with other regions and cultures.

SS.6.G.2.5:	Clarifications: Examples are China limits and Greece invites.
	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another.
SS.6.G.2.6:	Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
	Analyze the impact of human populations on the ancient world's ecosystems.
SS.6.G.3.2:	Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
	Summarize important achievements of Egyptian civilization.
SS.6.W.2.5:	Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
	Determine the contributions of key figures from ancient Egypt.
SS.6.W.2.6:	Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
	Summarize the important achievements of Mesopotamian civilization.
SS.6.W.2.7:	Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
	Determine the impact of key figures from ancient Mesopotamian civilizations.
SS.6.W.2.8:	Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.

SS.6.W.2.9:	Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.
SS.6.W.2.10:	Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.

SS.6.W.4.8:	<p>Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.</p>
	Identify key figures from classical and post classical China.
SS.6.W.4.9:	<p>Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.</p>
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence.
	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.

- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELLs need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Additional Instructional Resources: A.V.E. for Success Collaboration (http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

GENERAL INFORMATION

Course Number: 2109015

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
World and Eastern Hemispheric Histories >

Abbreviated Title: M/J WORLD HIST & CP

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Type: Core Academic Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J World History, Advanced (#2109020) 2015 - 2022 (current)

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications:

	Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
SS.6.G.4.2:	Use maps to trace significant migrations, and analyze their results. Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.4.4:	Map and analyze the impact of the spread of various belief systems in the ancient world. Clarifications: Examples are Buddhism, Christianity, Judaism.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
SS.6.W.2.3:	Identify the characteristics of civilization. Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.9:	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area. Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.

SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.8:	Determine the impact of significant figures associated with ancient Rome. Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
SS.6.W.3.12:	Explain the causes for the growth and longevity of the Roman Empire. Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.15:	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana. Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
SS.6.W.4.7:	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi. Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
SS.6.W.4.8:	Describe the contributions of classical and post classical China. Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.9:	Identify key figures from classical and post classical China. Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.

SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. <ul style="list-style-type: none"> a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.2.4:	Display numerical data in plots on a number line, including dot plots, histograms, and box plots. Standard Relation to Course: Supporting
MAFS.6.SP.2.5:	Summarize numerical data sets in relation to their context, such as by: <ul style="list-style-type: none"> a. Reporting the number of observations. b. Describing the nature of the attribute under investigation, including how it was measured and its units of measurement. c. Giving quantitative measures of center (median and/or mean) and variability (interquartile range and/or mean absolute deviation), as well as describing any overall pattern and any striking deviations from the overall pattern with reference to the context in which the data were gathered. d. Relating the choice of measures of center and variability to the shape of the data distribution and the context in which the data were gathered. Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students

MAFS.K12.MP.1.1:	might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.3.1:	
	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.5.1:	
	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
MAFS.K12.MP.6.1:	
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
SS.6.G.3.1:	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world. Clarifications:

	Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures. Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
SS.6.G.4.4:	Map and analyze the impact of the spread of various belief systems in the ancient world. Clarifications: Examples are Buddhism, Christianity, Judaism.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
SS.6.G.5.3:	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations. Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
SS.6.W.1.3:	Interpret primary and secondary sources. Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.9:	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area. Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
SS.6.W.2.10:	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations. Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.

SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
SS.6.W.3.5:	Summarize the important achievements and contributions of ancient Greek civilization. Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
SS.6.W.3.6:	Determine the impact of key figures from ancient Greece. Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
SS.6.W.3.7:	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period. Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
SS.6.W.3.8:	Determine the impact of significant figures associated with ancient Rome. Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
SS.6.W.3.12:	Explain the causes for the growth and longevity of the Roman Empire. Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
SS.6.W.3.13:	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire. Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
SS.6.W.3.14:	Describe the key achievements and contributions of Roman civilization. Clarifications: Examples are art and architecture, engineering, law, literature, technology.
SS.6.W.3.15:	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana. Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
SS.6.W.3.17:	Explain the spread and influence of the Latin language on Western Civilization. Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
SS.6.W.4.2:	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India. Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
SS.6.W.4.4:	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia. Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
SS.6.W.4.5:	Summarize the important achievements and contributions of ancient Indian civilization. Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
SS.6.W.4.7:	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi. Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
SS.6.W.4.8:	Describe the contributions of classical and post classical China. Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
SS.6.W.4.9:	Identify key figures from classical and post classical China. Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.

SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems.

- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

Clarifications:

Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Name	Description
SS.6.CG.1.1:	Analyze how democratic concepts developed in ancient Greece served as a foundation for the United States' constitutional republic. <ul style="list-style-type: none"> • Students will identify and explain the democratic principles of government in ancient Greece. • Students will compare and contrast the political systems of ancient Greece and modern-day United States. • Students will recognize the influence of ancient Greece on the American political process.
SS.6.CG.1.2:	Analyze the influence of ancient Rome on the United States' constitutional republic. <ul style="list-style-type: none"> • Students will compare and contrast the political systems in ancient Rome and modern-day United States. • Students will recognize the influence of ancient Rome on the American political process.
SS.6.CG.1.3:	Examine rule of law in the ancient world and its influence on the United States' constitutional republic. <ul style="list-style-type: none"> • Students will recognize origins of what to include, but not be limited to, the contributions of ancient Greek and ancient Roman civilizations. • Students will recognize that the rule of law is a foundational principle of the U.S. government.
SS.6.CG.1.4:	Examine examples of civic leadership and virtue in ancient Greece and ancient Rome. <ul style="list-style-type: none"> • Students will explain the influence of significant leaders (e.g., Marcus Tullius Cicero, Marcus Aurelius, Pericles, Solon, Cleisthenes) on civic participation and governance in the ancient world.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another.

SS.6.G.2.6:	Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world. Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
SS.6.G.3.2:	Analyze the impact of human populations on the ancient world's ecosystems. Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures. Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world. Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
SS.6.G.5.1:	Identify the methods used to compensate for the scarcity of resources in the ancient world. Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages. Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods. Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
SS.6.W.1.4:	Describe the methods of historical inquiry and how history relates to the other social sciences. Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization. Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
SS.6.W.2.4:	Compare the economic, political, social, and religious institutions of ancient river civilizations. Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
SS.6.W.2.5:	Summarize important achievements of Egyptian civilization. Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
SS.6.W.2.6:	Determine the contributions of key figures from ancient Egypt. Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
SS.6.W.2.7:	Summarize the important achievements of Mesopotamian civilization. Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
SS.6.W.2.8:	Determine the impact of key figures from ancient Mesopotamian civilizations. Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
SS.6.W.2.9:	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area. Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.

SS.6.W.2.10:	Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.

SS.6.W.4.9:	<p>Identify key figures from classical and post classical China.</p> <p>Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.</p>
SS.6.W.4.10:	<p>Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.</p>
SS.6.W.4.11:	<p>Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.</p>
SS.6.W.4.12:	<p>Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.</p>
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers. <p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p>

MA.K12.MTR.5.1:	<ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>

	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies. Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2109020

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 6 to 8 Education
Courses > **Subject:** Social Studies > **SubSubject:**
World and Eastern Hemispheric Histories >
Abbreviated Title: M/J WORLD HIST ADV
Course Length: Year (Y)
Course Attributes:

- Honors
- Class Size Core Required

Course Level: 3

Course Status: Draft - Course Pending Approval

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Grades K-6)

Elementary Education (Elementary Grades 1-6)

M/J World History, Advanced and Career Planning (#2109025) 2019 - 2022 (current)

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps. Identify natural wonders of the ancient world.
SS.6.G.1.3:	Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.

SS.6.G.3.1:	<p>Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.</p> <p>Clarifications: Examples are terracing, seasonal crop rotations, resource development.</p>
SS.6.G.3.2:	<p>Analyze the impact of human populations on the ancient world's ecosystems.</p> <p>Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.</p>
SS.6.G.4.1:	<p>Explain how family and ethnic relationships influenced ancient cultures.</p> <p>Use maps to trace significant migrations, and analyze their results.</p>
SS.6.G.4.2:	<p>Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.</p>
SS.6.G.4.3:	<p>Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.</p> <p>Map and analyze the impact of the spread of various belief systems in the ancient world.</p>
SS.6.G.4.4:	<p>Clarifications: Examples are Buddhism, Christianity, Judaism.</p>
SS.6.G.5.1:	<p>Identify the methods used to compensate for the scarcity of resources in the ancient world.</p> <p>Clarifications: Examples are water in the Middle East, fertile soil, fuel.</p>
SS.6.G.5.2:	<p>Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.</p> <p>Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.</p>
SS.6.G.5.3:	<p>Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.</p>
SS.6.G.6.1:	<p>Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.</p>
SS.6.G.6.2:	<p>Compare maps of the world in ancient times with current political maps.</p>
SS.6.W.1.1:	<p>Use timelines to identify chronological order of historical events.</p>
SS.6.W.1.2:	<p>Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.</p> <p>Interpret primary and secondary sources.</p>
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
SS.6.W.1.4:	<p>Describe the methods of historical inquiry and how history relates to the other social sciences.</p> <p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.5:	<p>Describe the roles of historians and recognize varying historical interpretations (historiography).</p>
SS.6.W.1.6:	<p>Describe how history transmits culture and heritage and provides models of human character.</p>
SS.6.W.2.1:	<p>Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.</p>
SS.6.W.2.2:	<p>Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.</p> <p>Identify the characteristics of civilization.</p>
SS.6.W.2.3:	<p>Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.</p>
SS.6.W.2.4:	<p>Compare the economic, political, social, and religious institutions of ancient river civilizations.</p> <p>Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.</p>
SS.6.W.2.5:	<p>Summarize important achievements of Egyptian civilization.</p> <p>Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.</p>
SS.6.W.2.6:	<p>Determine the contributions of key figures from ancient Egypt.</p> <p>Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.</p>
SS.6.W.2.7:	<p>Summarize the important achievements of Mesopotamian civilization.</p> <p>Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.</p>
SS.6.W.2.8:	<p>Determine the impact of key figures from ancient Mesopotamian civilizations.</p> <p>Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.</p>
SS.6.W.2.9:	<p>Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.</p> <p>Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.</p>
SS.6.W.2.10:	<p>Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.</p> <p>Clarifications: Examples are Olmec, Zapotec, Chavin.</p>

SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
	Identify key figures from classical and post classical China.
SS.6.W.4.9:	Clarifications:

Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.

SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
LAFS.6.SL.1.1:	Engage effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grade 6 topics, texts, and issues, building on others' ideas and expressing their own clearly. a. Come to discussions prepared, having read or studied required material; explicitly draw on that preparation by referring to evidence on the topic, text, or issue to probe and reflect on ideas under discussion. b. Follow rules for collegial discussions, set specific goals and deadlines, and define individual roles as needed. c. Pose and respond to specific questions with elaboration and detail by making comments that contribute to the topic, text, or issue under discussion. d. Review the key ideas expressed and demonstrate understanding of multiple perspectives through reflection and paraphrasing.
LAFS.6.SL.1.2:	Interpret information presented in diverse media and formats (e.g., visually, quantitatively, orally) and explain how it contributes to a topic, text, or issue under study.
LAFS.6.SL.1.3:	Delineate a speaker's argument and specific claims, distinguishing claims that are supported by reasons and evidence from claims that are not.
LAFS.6.SL.2.4:	Present claims and findings, sequencing ideas logically and using pertinent descriptions, facts, and details to accentuate main ideas or themes; use appropriate eye contact, adequate volume, and clear pronunciation.
LAFS.68.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources.
LAFS.68.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of the source distinct from prior knowledge or opinions.
LAFS.68.RH.1.3:	Identify key steps in a text's description of a process related to history/social studies (e.g., how a bill becomes law, how interest rates are raised or lowered).
LAFS.68.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary specific to domains related to history/social studies.
LAFS.68.RH.2.5:	Describe how a text presents information (e.g., sequentially, comparatively, causally).
LAFS.68.RH.2.6:	Identify aspects of a text that reveal an author's point of view or purpose (e.g., loaded language, inclusion or avoidance of particular facts).
LAFS.68.RH.3.7:	Integrate visual information (e.g., in charts, graphs, photographs, videos, or maps) with other information in print and digital texts.
LAFS.68.RH.3.8:	Distinguish among fact, opinion, and reasoned judgment in a text.
LAFS.68.RH.3.9:	Analyze the relationship between a primary and secondary source on the same topic.
LAFS.68.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce claim(s) about a topic or issue, acknowledge and distinguish the claim(s) from alternate or opposing claims, and organize the reasons and evidence logically. b. Support claim(s) with logical reasoning and relevant, accurate data and evidence that demonstrate an understanding of the topic or text, using credible sources. c. Use words, phrases, and clauses to create cohesion and clarify the relationships among claim(s), counterclaims, reasons, and evidence. d. Establish and maintain a formal style. e. Provide a concluding statement or section that follows from and supports the argument presented.
LAFS.68.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic clearly, previewing what is to follow; organize ideas, concepts, and information into broader categories as appropriate to achieving purpose; include formatting (e.g., headings), graphics (e.g., charts, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with relevant, well-chosen facts, definitions, concrete details, quotations, or other information and examples. c. Use appropriate and varied transitions to create cohesion and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to inform about or explain the topic. e. Establish and maintain a formal style and objective tone. f. Provide a concluding statement or section that follows from and supports the information or explanation presented.
LAFS.68.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.68.WHST.2.5:	With some guidance and support from peers and adults, develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on how well purpose and audience have been addressed.
LAFS.68.WHST.2.6:	Use technology, including the Internet, to produce and publish writing and present the relationships between information and ideas clearly and efficiently.
LAFS.68.WHST.3.7:	Conduct short research projects to answer a question (including a self-generated question), drawing on several sources and generating additional related, focused questions that allow for multiple avenues of exploration.
LAFS.68.WHST.3.8:	Gather relevant information from multiple print and digital sources, using search terms effectively; assess the credibility and accuracy of each source; and quote or paraphrase the data and conclusions of others while avoiding plagiarism and following a standard format for citation.
LAFS.68.WHST.3.9:	Draw evidence from informational texts to support analysis reflection, and research.
LAFS.68.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.6.SP.1.1:	Recognize a statistical question as one that anticipates variability in the data related to the question and accounts for it in the answers. <i>For example, "How old am I?" is not a statistical question, but "How old are the students in my school?" is a statistical question because one anticipates variability in students' ages.</i>
MAFS.6.SP.1.2:	Understand that a set of data collected to answer a statistical question has a distribution which can be described by its center, spread, and overall shape.
MAFS.6.SP.1.3:	Recognize that a measure of center for a numerical data set summarizes all of its values with a single number, while a measure of variation describes how its values vary with a single number.
	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the

MAFS.K12.MP.1.1:	original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Career and Education Planning - Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards - Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.

- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Middle Grades Integrated Curriculum (Middle Grades 5-9)
History (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)
Elementary Education (Elementary Grades 1-6)
Elementary Education (Grades K-6)

M/J World History, Advanced and Career Planning (#2109025) 2022 - 2023

Course Standards

Name	Description
SS.6.C.1.1:	Identify democratic concepts developed in ancient Greece that served as a foundation for American constitutional democracy. Clarifications: Examples are polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law.
SS.6.C.1.2:	Identify how the government of the Roman Republic contributed to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.C.2.1:	Identify principles (civic participation, role of government) from ancient Greek and Roman civilizations which are reflected in the American political process today, and discuss their effect on the American political process.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps. Identify natural wonders of the ancient world.
SS.6.G.1.3:	Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.
SS.6.G.1.4:	Utilize tools geographers use to study the world. Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world. Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations.
SS.6.G.1.6:	Clarifications: Examples are major rivers, seas, oceans.
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. Clarifications: Examples are city-states, provinces, kingdoms, empires.
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. Clarifications: Examples are Egypt, Rome, Greece, China, Kush.
SS.6.G.2.5:	Interpret how geographic boundaries invite or limit interaction with other regions and cultures. Clarifications: Examples are China limits and Greece invites.
SS.6.G.2.6:	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another. Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.

SS.6.G.3.1:	<p>Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.</p> <p>Clarifications: Examples are terracing, seasonal crop rotations, resource development.</p>
SS.6.G.3.2:	<p>Analyze the impact of human populations on the ancient world's ecosystems.</p> <p>Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.</p>
SS.6.G.4.1:	<p>Explain how family and ethnic relationships influenced ancient cultures.</p> <p>Use maps to trace significant migrations, and analyze their results.</p>
SS.6.G.4.2:	<p>Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.</p>
SS.6.G.4.3:	<p>Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.</p> <p>Map and analyze the impact of the spread of various belief systems in the ancient world.</p>
SS.6.G.4.4:	<p>Clarifications: Examples are Buddhism, Christianity, Judaism.</p>
SS.6.G.5.1:	<p>Identify the methods used to compensate for the scarcity of resources in the ancient world.</p> <p>Clarifications: Examples are water in the Middle East, fertile soil, fuel.</p>
SS.6.G.5.2:	<p>Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.</p> <p>Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.</p>
SS.6.G.5.3:	<p>Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.</p>
SS.6.G.6.1:	<p>Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.</p>
SS.6.G.6.2:	<p>Compare maps of the world in ancient times with current political maps.</p>
SS.6.W.1.1:	<p>Use timelines to identify chronological order of historical events.</p>
SS.6.W.1.2:	<p>Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.</p> <p>Interpret primary and secondary sources.</p>
SS.6.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory sources, written sources.</p>
SS.6.W.1.4:	<p>Describe the methods of historical inquiry and how history relates to the other social sciences.</p> <p>Clarifications: Examples are archaeology, geography, political science, economics.</p>
SS.6.W.1.5:	<p>Describe the roles of historians and recognize varying historical interpretations (historiography).</p>
SS.6.W.1.6:	<p>Describe how history transmits culture and heritage and provides models of human character.</p>
SS.6.W.2.1:	<p>Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.</p>
SS.6.W.2.2:	<p>Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.</p> <p>Identify the characteristics of civilization.</p>
SS.6.W.2.3:	<p>Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.</p>
SS.6.W.2.4:	<p>Compare the economic, political, social, and religious institutions of ancient river civilizations.</p> <p>Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.</p>
SS.6.W.2.5:	<p>Summarize important achievements of Egyptian civilization.</p> <p>Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.</p>
SS.6.W.2.6:	<p>Determine the contributions of key figures from ancient Egypt.</p> <p>Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.</p>
SS.6.W.2.7:	<p>Summarize the important achievements of Mesopotamian civilization.</p> <p>Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.</p>
SS.6.W.2.8:	<p>Determine the impact of key figures from ancient Mesopotamian civilizations.</p> <p>Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.</p>
SS.6.W.2.9:	<p>Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.</p> <p>Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.</p>
SS.6.W.2.10:	<p>Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.</p> <p>Clarifications: Examples are Olmec, Zapotec, Chavin.</p>

SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.
SS.6.W.4.8:	Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.
	Identify key figures from classical and post classical China.
SS.6.W.4.9:	Clarifications:

Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.

SS.6.W.4.10: Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.

SS.6.W.4.11: Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.

SS.6.W.4.12: Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.

Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

MA.K12.MTR.1.1:

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

	<p>Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends</p>

	differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Investigate school and public health policies that influence health promotion and disease prevention.
HE.6.C.2.4:	Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship; state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.html>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Additional Instructional Resources: A.V.E. for Success Collaboration (http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

GENERAL INFORMATION

Course Number: 2109025

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 6 to 8 Education

Courses > **Subject:** Social Studies > **SubSubject:**
World and Eastern Hemispheric Histories >

Abbreviated Title: M/J WRLD HIST ADV CP

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 3

Course Type: Core Academic Course

Course Status: State Board Approved

Grade Level(s): 6,7,8

Educator Certifications

Middle Grades Integrated Curriculum (Middle Grades 5-9)

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

Elementary Education (Elementary Grades 1-6)

Elementary Education (Grades K-6)

M/J World History, Advanced and Career Planning (#2109025) 2023 - And Beyond

Course Standards

Name	Description
SS.6.CG.1.1:	Analyze how democratic concepts developed in ancient Greece served as a foundation for the United States' constitutional republic. <ul style="list-style-type: none"> Students will identify and explain the democratic principles of government in ancient Greece. Students will compare and contrast the political systems of ancient Greece and modern-day United States. Students will recognize the influence of ancient Greece on the American political process.
SS.6.CG.1.2:	Analyze the influence of ancient Rome on the United States' constitutional republic. <ul style="list-style-type: none"> Students will compare and contrast the political systems in ancient Rome and modern-day United States. Students will recognize the influence of ancient Rome on the American political process.
SS.6.CG.1.3:	Examine rule of law in the ancient world and its influence on the United States' constitutional republic. <ul style="list-style-type: none"> Students will recognize origins of what to include, but not be limited to, the contributions of ancient Greek and ancient Roman civilizations. Students will recognize that the rule of law is a foundational principle of the U.S. government.
SS.6.CG.1.4:	Examine examples of civic leadership and virtue in ancient Greece and ancient Rome. <ul style="list-style-type: none"> Students will explain the influence of significant leaders (e.g., Marcus Tullius Cicero, Marcus Aurelius, Pericles, Solon, Cleisthenes) on civic participation and governance in the ancient world.
SS.6.E.1.1:	Identify the factors (new resources, increased productivity, education, technology, slave economy, territorial expansion) that increase economic growth.
SS.6.E.1.2:	Describe and identify traditional and command economies as they appear in different civilizations.
SS.6.E.1.3:	Describe the following economic concepts as they relate to early civilization: scarcity, opportunity cost, supply and demand, barter, trade, productive resources (land, labor, capital, entrepreneurship).
SS.6.E.2.1:	Evaluate how civilizations through clans, leaders, and family groups make economic decisions for that civilization providing a framework for future city-state or nation development.
SS.6.E.3.1:	Identify examples of mediums of exchange (currencies) used for trade (barter) for each civilization, and explain why international trade requires a system for a medium of exchange between trading both inside and among various regions.
SS.6.E.3.2:	Categorize products that were traded among civilizations, and give examples of barriers to trade of those products.
SS.6.E.3.3:	Describe traditional economies (Egypt, Greece, Rome, Kush) and elements of those economies that led to the rise of a merchant class and trading partners.
SS.6.E.3.4:	Describe the relationship among civilizations that engage in trade, including the benefits and drawbacks of voluntary trade.
SS.6.G.1.1:	Use latitude and longitude coordinates to understand the relationship between people and places on the Earth.
SS.6.G.1.2:	Analyze the purposes of map projections (political, physical, special purpose) and explain the applications of various types of maps.
SS.6.G.1.3:	Identify natural wonders of the ancient world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Seven Natural Wonders of Africa, Himalayas, Gobi Desert.</p> </div>
SS.6.G.1.4:	Utilize tools geographers use to study the world. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are maps, globes, graphs, charts and geo-spatial tools such as GPS (global positioning system), GIS (Geographic Information Systems), satellite imagery, aerial photography, online mapping resources.</p> </div>
SS.6.G.1.5:	Use scale, cardinal, and intermediate directions, and estimation of distances between places on current and ancient maps of the world.
SS.6.G.1.6:	Use a map to identify major bodies of water of the world, and explain ways they have impacted the development of civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are major rivers, seas, oceans.</p> </div>
SS.6.G.1.7:	Use maps to identify characteristics and boundaries of ancient civilizations that have shaped the world today. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Phoenicia, Carthage, Crete, Egypt, Greece, Rome, Kush.</p> </div>
SS.6.G.2.1:	Explain how major physical characteristics, natural resources, climate, and absolute and relative locations have influenced settlement, interactions, and the economies of ancient civilizations of the world.
SS.6.G.2.2:	Differentiate between continents, regions, countries, and cities in order to understand the complexities of regions created by civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are city-states, provinces, kingdoms, empires.</p> </div>
SS.6.G.2.3:	Analyze the relationship of physical geography to the development of ancient river valley civilizations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Tigris and Euphrates [Mesopotamia], Nile [Egypt], Indus and Ganges [Ancient India], and Huang He [Ancient China].</p> </div>
SS.6.G.2.4:	Explain how the geographical location of ancient civilizations contributed to the culture and politics of those societies. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are Egypt, Rome, Greece, China, Kush.</p> </div>
	Interpret how geographic boundaries invite or limit interaction with other regions and cultures.

SS.6.G.2.5:	Clarifications: Examples are China limits and Greece invites.
	Explain the concept of cultural diffusion, and identify the influences of different ancient cultures on one another.
SS.6.G.2.6:	Clarifications: Examples are Phoenicia on Greece and Greece on Rome.
SS.6.G.2.7:	Interpret choropleths or dot-density maps to explain the distribution of population in the ancient world.
	Explain how the physical landscape has affected the development of agriculture and industry in the ancient world.
SS.6.G.3.1:	Clarifications: Examples are terracing, seasonal crop rotations, resource development.
	Analyze the impact of human populations on the ancient world's ecosystems.
SS.6.G.3.2:	Clarifications: Examples are desertification, deforestation, abuse of resources, erosion.
SS.6.G.4.1:	Explain how family and ethnic relationships influenced ancient cultures.
	Use maps to trace significant migrations, and analyze their results.
SS.6.G.4.2:	Clarifications: Examples are prehistoric Asians to the Americas, Aryans in Asia, Germanic tribes throughout Europe.
SS.6.G.4.3:	Locate sites in Africa and Asia where archaeologists have found evidence of early human societies, and trace their migration patterns to other parts of the world.
	Map and analyze the impact of the spread of various belief systems in the ancient world.
SS.6.G.4.4:	Clarifications: Examples are Buddhism, Christianity, Judaism.
	Identify the methods used to compensate for the scarcity of resources in the ancient world.
SS.6.G.5.1:	Clarifications: Examples are water in the Middle East, fertile soil, fuel.
SS.6.G.5.2:	Use geographic terms and tools to explain why ancient civilizations developed networks of highways, waterways, and other transportation linkages.
	Use geographic tools and terms to analyze how famine, drought, and natural disasters plagued many ancient civilizations.
SS.6.G.5.3:	Clarifications: Examples are flooding of the Nile, drought in Africa, volcanoes in the Mediterranean region, famine in Asia.
SS.6.G.6.1:	Describe the Six Essential Elements of Geography (The World in Spatial Terms, Places and Regions, Physical Systems, Human Systems, Environment, The Uses of Geography) as the organizing framework for understanding the world and its people.
SS.6.G.6.2:	Compare maps of the world in ancient times with current political maps.
SS.6.W.1.1:	Use timelines to identify chronological order of historical events.
SS.6.W.1.2:	Identify terms (decade, century, epoch, era, millennium, BC/BCE, AD/CE) and designations of time periods.
	Interpret primary and secondary sources.
SS.6.W.1.3:	Clarifications: Examples are artifacts, images, auditory sources, written sources.
	Describe the methods of historical inquiry and how history relates to the other social sciences.
SS.6.W.1.4:	Clarifications: Examples are archaeology, geography, political science, economics.
SS.6.W.1.5:	Describe the roles of historians and recognize varying historical interpretations (historiography).
SS.6.W.1.6:	Describe how history transmits culture and heritage and provides models of human character.
SS.6.W.2.1:	Compare the lifestyles of hunter-gatherers with those of settlers of early agricultural communities.
SS.6.W.2.2:	Describe how the developments of agriculture and metallurgy related to settlement, population growth, and the emergence of civilization.
	Identify the characteristics of civilization.
SS.6.W.2.3:	Clarifications: Examples are urbanization, specialized labor, advanced technology, government and religious institutions, social classes.
	Compare the economic, political, social, and religious institutions of ancient river civilizations.
SS.6.W.2.4:	Clarifications: Examples are Nile, Tigris-Euphrates, Indus, Huang He.
	Summarize important achievements of Egyptian civilization.
SS.6.W.2.5:	Clarifications: Examples are agriculture, calendar, pyramids, art and architecture, hieroglyphic writing and record-keeping, literature such as The Book of the Dead, mummification.
	Determine the contributions of key figures from ancient Egypt.
SS.6.W.2.6:	Clarifications: Examples are Narmer, Imhotep, Hatshepsut, Ramses the Great, Akhenaten, Tutankhamun.
	Summarize the important achievements of Mesopotamian civilization.
SS.6.W.2.7:	Clarifications: Examples are cuneiform writing, epic literature such as Gilgamesh, art and architecture, technology such as the wheel, sail, and plow.
	Determine the impact of key figures from ancient Mesopotamian civilizations.
SS.6.W.2.8:	Clarifications: Examples are Abraham, Hammurabi, Nebuchadnezzar, Cyrus, Zoroaster.
	Identify key figures and basic beliefs of the Israelites and determine how these beliefs compared with those of others in the geographic area.

SS.6.W.2.9:	Clarifications: Examples are Abraham, Moses, monotheism, law, emphasis on individual worth and responsibility.
	Compare the emergence of advanced civilizations in Meso and South America with the four early river valley civilizations.
SS.6.W.2.10:	Clarifications: Examples are Olmec, Zapotec, Chavin.
SS.6.W.3.1:	Analyze the cultural impact the ancient Phoenicians had on the Mediterranean world with regard to colonization (Carthage), exploration, maritime commerce (purple dye, tin), and written communication (alphabet).
SS.6.W.3.2:	Explain the democratic concepts (polis, civic participation and voting rights, legislative bodies, written constitutions, rule of law) developed in ancient Greece.
SS.6.W.3.3:	Compare life in Athens and Sparta (government and the status of citizens, women and children, foreigners, helots).
SS.6.W.3.4:	Explain the causes and effects of the Persian and Peloponnesian Wars.
	Summarize the important achievements and contributions of ancient Greek civilization.
SS.6.W.3.5:	Clarifications: Examples are art and architecture, athletic competitions, the birth of democracy and civic responsibility, drama, history, literature, mathematics, medicine, philosophy, science, warfare.
	Determine the impact of key figures from ancient Greece.
SS.6.W.3.6:	Clarifications: Examples are Aristophanes, Aristotle, Hippocrates, Herodotus, Homer, Pericles, Plato, Pythagoras, Socrates, Solon, Sophocles, Thales, Themistocles, Thucydides.
	Summarize the key achievements, contributions, and figures associated with The Hellenistic Period.
SS.6.W.3.7:	Clarifications: Examples are Alexander the Great, Library of Alexandria, Archimedes, Euclid, Plutarch, The Septuagint, Stoicism, Ptolemy I.
	Determine the impact of significant figures associated with ancient Rome.
SS.6.W.3.8:	Clarifications: Examples are Augustus, Cicero, Cincinnatus, Cleopatra, Constantine the Great, Diocletian, Tiberius and Gaius Gracchus, Hadrian, Hannibal, Horace, Julius Caesar, Ovid, Romulus and Remus, Marcus Aurelius, Scipio Africanus, Virgil, Theodosius, Attila the Hun.
SS.6.W.3.9:	Explain the impact of the Punic Wars on the development of the Roman Empire.
SS.6.W.3.10:	Describe the government of the Roman Republic and its contribution to the development of democratic principles (separation of powers, rule of law, representative government, civic duty).
SS.6.W.3.11:	Explain the transition from Roman Republic to empire and Imperial Rome, and compare Roman life and culture under each one.
	Explain the causes for the growth and longevity of the Roman Empire.
SS.6.W.3.12:	Clarifications: Examples are centralized and efficient government, religious toleration, expansion of citizenship, the legion, the extension of road networks.
	Identify key figures and the basic beliefs of early Christianity and how these beliefs impacted the Roman Empire.
SS.6.W.3.13:	Clarifications: Examples are Christian monotheism, Jesus as the son of God, Peter, Paul.
	Describe the key achievements and contributions of Roman civilization.
SS.6.W.3.14:	Clarifications: Examples are art and architecture, engineering, law, literature, technology.
	Explain the reasons for the gradual decline of the Western Roman Empire after the Pax Romana.
SS.6.W.3.15:	Clarifications: Examples are internal power struggles, constant Germanic pressure on the frontiers, economic policies, over dependence on slavery and mercenary soldiers.
SS.6.W.3.16:	Compare life in the Roman Republic for patricians, plebeians, women, children, and slaves.
	Explain the spread and influence of the Latin language on Western Civilization.
SS.6.W.3.17:	Clarifications: Examples are education, law, medicine, religion, science.
SS.6.W.3.18:	Describe the rise and fall of the ancient east African kingdoms of Kush and Axum and Christianity's development in Ethiopia.
SS.6.W.4.1:	Discuss the significance of Aryan and other tribal migrations on Indian civilization.
	Explain the major beliefs and practices associated with Hinduism and the social structure of the caste system in ancient India.
SS.6.W.4.2:	Clarifications: Examples are Brahman, reincarnation, dharma, karma, ahimsa, moksha.
SS.6.W.4.3:	Recognize the political and cultural achievements of the Mauryan and Gupta empires.
	Explain the teachings of Buddha, the importance of Asoka, and how Buddhism spread in India, Ceylon, and other parts of Asia.
SS.6.W.4.4:	Clarifications: Examples are The Four Noble Truths, Three Qualities, Eightfold Path.
	Summarize the important achievements and contributions of ancient Indian civilization.
SS.6.W.4.5:	Clarifications: Examples are Sanskrit, Bhagavad Gita, medicine, metallurgy, and mathematics including Hindu-Arabic numerals and the concept of zero.
SS.6.W.4.6:	Describe the concept of the Mandate of Heaven and its connection to the Zhou and later dynasties.
	Explain the basic teachings of Laozi, Confucius, and Han Fei Zi.
SS.6.W.4.7:	Clarifications: Examples are filial piety, the role of kinship in maintaining order, hierarchy in Chinese society.
	Describe the contributions of classical and post classical China.

SS.6.W.4.8:	<p>Clarifications: Examples are Great Wall, Silk Road, bronze casting, silk-making, movable type, gunpowder, paper-making, magnetic compass, horse collar, stirrup, civil service system, The Analects.</p>
	Identify key figures from classical and post classical China.
SS.6.W.4.9:	<p>Clarifications: Examples are Shi Huangdi, Wu-ti, Empress Wu, Chengho.</p>
SS.6.W.4.10:	Explain the significance of the silk roads and maritime routes across the Indian Ocean to the movement of goods and ideas among Asia, East Africa, and the Mediterranean Basin.
SS.6.W.4.11:	Explain the rise and expansion of the Mongol empire and its effects on peoples of Asia and Europe including the achievements of Ghengis and Kublai Khan.
SS.6.W.4.12:	Identify the causes and effects of Chinese isolation and the decision to limit foreign trade in the 15th century.
SS.68.HE.1.1:	<p>Examine the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> • Students will describe the basic beliefs of Judaism and trace the origins and history of Jews in Europe. • Students will analyze how antisemitism led to and contributed to the Holocaust. • Students will identify examples of antisemitism (e.g., making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews; demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis).
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach.
	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations.
	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence.
	<p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.

- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.6.C.2.4:	Investigate school and public health policies that influence health promotion and disease prevention. Clarifications: Fitness reports for students, school zone speeding laws, school district wellness policies, and helmet laws.

General Course Information and Notes

GENERAL NOTES

The primary content for this course pertains to the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Students will be exposed to the multiple dynamics of world history including economics, geography, politics, and religion/philosophy. Students will study methods of historical inquiry and primary and secondary historical documents.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Career and Education Planning – Per section 1003.4156, Florida Statutes, the Career and Education Planning course must result in a completed, personalized academic and career plan for the student, that may be revised as the student progresses through middle and high school; must emphasize the importance of entrepreneurship and employability skills; and must include information from the Department of Economic Opportunity's economic security report as described in Section 445.07, Florida Statutes. The required, personalized academic and career plan must inform students of high school graduation requirements, including diploma designations (Section 1003.4285, Florida Statutes); requirements for a Florida Bright Futures Scholarship: state university and Florida College System institution admission requirements; and, available opportunities to earn college credit in high school utilizing acceleration mechanisms. For additional information on the Middle School Career and Education Planning courses, visit <http://www.fldoe.org/academics/college-career-planning/educators-toolkit/index.shtml>.

Career and Education Planning Course Standards – Students will:

- 1.0 Describe the influences that societal, economic, and technological changes have on employment trends and future training.
- 2.0 Develop skills to locate, evaluate, and interpret career information.
- 3.0 Identify and demonstrate processes for making short and long term goals.
- 4.0 Demonstrate employability skills such as working in a group, problem-solving and organizational skills, and the importance of entrepreneurship.
- 5.0 Understand the relationship between educational achievement and career choices/postsecondary options.
- 6.0 Identify a career cluster and related pathways through an interest assessment that match career and education goals.
- 7.0 Develop a career and education plan that includes short and long-term goals, high school program of study, and postsecondary/career goals.
- 8.0 Demonstrate knowledge of technology and its application in career fields/clusters.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support,

students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.

Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.10:	<p>Examine causes, course, and consequences of the early years of the Cold War (Truman Doctrine, Marshall Plan, NATO, Warsaw Pact).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 43-44. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.11:	<p>Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.12:	<p>Examine causes, course, and consequences of the Korean War.</p> <p>Clarifications: Examples may include, but are not limited to, Communist China, 38th parallel, cease fire, firing of Gen. Douglas MacArthur.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.6.13:	<p>Analyze significant foreign policy events during the Truman, Eisenhower, Kennedy, Johnson, and Nixon administrations.</p> <p>Clarifications: Examples may include, but are not limited to, the Domino Theory, Sputnik, space race, Korean Conflict, Vietnam Conflict, U-2 and Gary Powers, Bay of Pigs invasion, Cuban Missile Crisis, Berlin Wall, Ping Pong Diplomacy, opening of China.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.14:	<p>Analyze causes, course, and consequences of the Vietnam War.</p> <p>Clarifications: Examples may include, but are not limited to, Geneva Accords, Gulf of Tonkin Resolution, the draft, escalating protest at home, Vietnamization, the War Powers Act.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.15:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, Mosquito Fleet, "Double V Campaign", construction of military bases and WWII training centers, 1959 Cuban coup and its impact on Florida, development of the space program and NASA.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.1:	<p>Identify causes for Post-World War II prosperity and its effects on American society.</p> <p>Clarifications: Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.2:	<p>Compare the relative prosperity between different ethnic groups and social classes in the post-World War II period.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.3:	<p>Examine the changing status of women in the United States from post-World War II to present.</p> <p>Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i>, National Organization for Women, <i>Roe v. Wade</i>, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.4:	<p>Evaluate the success of 1960s era presidents' foreign and domestic policies.</p> <p>Clarifications: Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is</p>

	<p>evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.10:	<p>Analyze the significance of Vietnam and Watergate on the government and people of the United States.</p> <p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances. Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.13:	<p>Analyze the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.</p> <p>Clarifications: Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p>

SS.912.A.7.16:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine key events and key people in Florida history as they relate to United States history.
SS.912.A.7.17:	<p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	<p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.
SS.912.H.1.1:	<p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
	Relate works in the arts to various cultures.
SS.912.H.1.3:	<p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
	Examine artistic response to social issues and new ideas in various cultures.
SS.912.H.1.5:	<p>Clarifications: Examples are Victor Hugo's <i>Les Miserables</i>, Langston Hughes' poetry, Pete Seeger's <i>Bring 'Em Home</i>.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
	Write arguments focused on <i>discipline-specific content</i> .

LAFS.1112.WHST.1.1:	<p>a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and</p>

graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

MAFS.K12.MP.3.1:

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

MAFS.K12.MP.5.1:

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

MAFS.K12.MP.6.1:

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.4:

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Clarifications:

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

VERSION DESCRIPTION

United States History (U.S. History) 9-12 Course - The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts and graphs.

Special Notes: Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assests/documents/publications/frameworks/hsitoryframework.pdf>.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

For additional information on the development and implementation of the ELD standards, please contact the Bureau of Student Achievement through Language Acquisition at sala@fldoe.org.

GENERAL INFORMATION

Course Number: 2100310

Number of Credits: One (1) credit

Course Type: Core Academic Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12,30,31

Graduation Requirement: United States History

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: US HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

United States History (#2100310) 2022 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the</p>

	FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications:</p>

SS.912.A.4.4:	<p>Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.3:	<p>Examine the impact of United States foreign economic policy during the 1920s.</p> <p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.5:	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the Nobel Prize.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.11:	<p>Examine causes, course, and consequences of the Great Depression and the New Deal.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.12:	<p>Examine key events and people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.1:	<p>Examine causes, course, and consequences of World War II on the United States and the world.</p> <p>Clarifications: Examples may include, but are not limited to, rise of dictators, attack on Pearl Harbor, Nazi party, American neutrality, D-Day, Battle of the Bulge, War in the Pacific, internment camps, Holocaust, Yalta.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.6.2:	<p>Describe the United States response in the early years of World War II (Neutrality Acts, Cash and Carry, Lend Lease Act).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.3:	<p>Analyze the impact of the Holocaust during World War II on Jews as well as other groups.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.4:	<p>Examine efforts to expand or contract rights for various populations during World War II.</p> <p>Clarifications: Examples may include, but are not limited to, women, African Americans, German Americans, Japanese Americans and their internment, Native Americans, Hispanic Americans, Italian Americans.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.5:	<p>Explain the impact of World War II on domestic government policy.</p> <p>Clarifications: Examples may include, but are not limited to, rationing, national security, civil rights, increased job opportunities for African Americans, women, Jews, and other refugees.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.6:	<p>Analyze the use of atomic weapons during World War II and the aftermath of the bombings.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.7:	<p>Describe the attempts to promote international justice through the Nuremberg Trials.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.8:	<p>Analyze the effects of the Red Scare on domestic United States policy.</p> <p>Clarifications: Examples may include, but are not limited to, loyalty review program, House Un-American Activities Committee, McCarthyism (Sen. Joe McCarthy), McCarran Act.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.10:	<p>Examine causes, course, and consequences of the early years of the Cold War (Truman Doctrine, Marshall Plan, NATO, Warsaw Pact).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 43-44. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.11:	<p>Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.12:	<p>Examine causes, course, and consequences of the Korean War.</p> <p>Clarifications: Examples may include, but are not limited to, Communist China, 38th parallel, cease fire, firing of Gen. Douglas MacArthur.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.6.13:	<p>Analyze significant foreign policy events during the Truman, Eisenhower, Kennedy, Johnson, and Nixon administrations.</p> <p>Clarifications: Examples may include, but are not limited to, the Domino Theory, Sputnik, space race, Korean Conflict, Vietnam Conflict, U-2 and Gary Powers, Bay of Pigs invasion, Cuban Missile Crisis, Berlin Wall, Ping Pong Diplomacy, opening of China.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.14:	<p>Analyze causes, course, and consequences of the Vietnam War.</p> <p>Clarifications: Examples may include, but are not limited to, Geneva Accords, Gulf of Tonkin Resolution, the draft, escalating protest at home, Vietnamization, the War Powers Act.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.15:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, Mosquito Fleet, "Double V Campaign", construction of military bases and WWII training centers, 1959 Cuban coup and its impact on Florida, development of the space program and NASA.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.1:	<p>Identify causes for Post-World War II prosperity and its effects on American society.</p> <p>Clarifications: Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.2:	<p>Compare the relative prosperity between different ethnic groups and social classes in the post-World War II period.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.3:	<p>Examine the changing status of women in the United States from post-World War II to present.</p> <p>Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i>, National Organization for Women, <i>Roe v. Wade</i>, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.4:	<p>Evaluate the success of 1960s era presidents' foreign and domestic policies.</p> <p>Clarifications: Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is</p>

	<p>evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.10:	<p>Analyze the significance of Vietnam and Watergate on the government and people of the United States.</p> <p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances. Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.13:	<p>Analyze the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.</p> <p>Clarifications: Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p>

SS.912.A.7.16:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine key events and key people in Florida history as they relate to United States history.
SS.912.A.7.17:	<p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	<p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.
SS.912.H.1.1:	<p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
	Relate works in the arts to various cultures.
SS.912.H.1.3:	<p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
	Examine artistic response to social issues and new ideas in various cultures.
SS.912.H.1.5:	<p>Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems. </p>
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations. </p>
	Complete tasks with mathematical fluency.
	Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.
MA.K12.MTR.3.1:	

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:
Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:
Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:
Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:
K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide

	<p>referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

VERSION DESCRIPTION

United States History (U.S. History) 9-12 Course - The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

Special Notes: Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assests/documents/publications/frameworks/hsitoryframework.pdf>.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard

should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100310

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** American and Western Hemispheric Histories >

Number of Credits: One (1) credit

Abbreviated Title: US HIST

Course Length: Year (Y)

Course Attributes:

- Class Size Core Required

Course Level: 2

Course Type: Core Academic Course

Course Status: State Board Approved

Grade Level(s): 9,10,11,12,30,31

Graduation Requirement: United States History

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

United States History for Credit Recovery (#2100315) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social

SS.912.A.3.8:	<p>Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Examine the impact of United States foreign economic policy during the 1920s.</p>

SS.912.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.5:	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the Nobel Prize.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is</p>

	evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.H.1.1:	<p>Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.</p> <p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
SS.912.H.1.3:	<p>Relate works in the arts to various cultures.</p> <p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
SS.912.H.1.5:	<p>Examine artistic response to social issues and new ideas in various cultures.</p> <p>Clarifications: Examples are Victor Hugo's <i>Les Miserables</i>, Langston Hughes' poetry, Pete Seeger's <i>Bring 'Em Home</i>.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.

LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p> <p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution</p>

MAFS.K12.MP.1.1:	<p>pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

United States History (U.S. History) 9-12 Course - The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment

- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

United States History for Credit Recovery (#2100315) 2022 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social

SS.912.A.3.8:	<p>Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.H.1.1:	<p>Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.</p> <p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
SS.912.H.1.3:	<p>Relate works in the arts to various cultures.</p> <p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
SS.912.H.1.5:	<p>Examine artistic response to social issues and new ideas in various cultures.</p> <p>Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations.

MA.K12.MTR.3.1:

- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In

ELA.K12.EE.1.1:	3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

United States History (U.S. History) 9-12 Course - The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer,

complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100315

Number of Credits: One (1) credit

Course Type: Credit Recovery

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: US HIST CR

Course Length: Credit Recovery (R)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

United States History Honors (#2100320) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the</p>

	FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications:</p>

SS.912.A.4.4:	<p>Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p>

SS.912.A.7.16:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine key events and key people in Florida history as they relate to United States history.
SS.912.A.7.17:	<p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	<p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.
SS.912.H.1.1:	<p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
	Relate works in the arts to various cultures.
SS.912.H.1.3:	<p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
	Examine artistic response to social issues and new ideas in various cultures.
SS.912.H.1.5:	<p>Clarifications: Examples are Victor Hugo's <i>Les Miserables</i>, Langston Hughes' poetry, Pete Seeger's <i>Bring 'Em Home</i>.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
	Write arguments focused on <i>discipline-specific content</i> .

LAFS.1112.WHST.1.1:	<p>a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and</p>

graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Construct viable arguments and critique the reasoning of others.

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

MAFS.K12.MP.3.1:

Use appropriate tools strategically.

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

MAFS.K12.MP.5.1:

Attend to precision.

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

MAFS.K12.MP.6.1:

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.4:

Evaluate how public health policies and government regulations can influence health promotion and disease prevention.

Clarifications:

Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

United States History (U.S. History) 9-12 Course - The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer.

complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

United States History Honors (#2100320) 2022 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the</p>

	FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.10:	<p>Analyze the significance of Vietnam and Watergate on the government and people of the United States.</p> <p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances. Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.13:	<p>Analyze the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.</p> <p>Clarifications: Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p>

SS.912.A.7.16:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.H.1.1:	<p>Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.</p> <p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
SS.912.H.1.3:	<p>Relate works in the arts to various cultures.</p> <p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
SS.912.H.1.5:	<p>Examine artistic response to social issues and new ideas in various cultures.</p> <p>Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.3.1:	<p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations.

	<p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide</p>

	<p>referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

United States History (U.S. History) 9-12 Course - The grade 9-12 United States History course consists of the following content area strands: United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of United States history from Reconstruction to the present day. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the development of the United States and the resulting impact on world history. So that students can clearly see the relationship between cause and effect in historical events, students should have the opportunity to review those fundamental ideas and events which occurred before the end of Reconstruction.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Additional content that may be contained in the NAEP Grade 12 United States History assessment includes material from all time periods on the following topics:

- Change and Continuity in American Democracy: Ideas, Institutions, Events, Key Figures, and Controversies
- The Gathering and Interactions of Peoples, Cultures, and Ideas
- Economic and Technological Changes and Their Relationship to Society, Ideas, and the Environment
- The Changing Role of America in the World

The NAEP frameworks for United States History may be accessed at <http://www.nagb.org/content/nagb/assets/documents/publications/frameworks/historyframework.pdf>

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.

4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.912.A.1.2:	<p>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</p> <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	<p>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf</p>
SS.912.A.2.1:	<p>Review causes and consequences of the Civil War.</p> <p>Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.2:	<p>Assess the influence of significant people or groups on Reconstruction.</p> <p>Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.4:	<p>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</p> <p>Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.5:	<p>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.6:	<p>Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.

SS.912.A.5.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.
SS.912.A.5.7:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.
SS.912.A.5.8:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.
SS.912.A.5.9:	<p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.
SS.912.A.5.10:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.
SS.912.A.7.5:	<p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.
SS.912.A.7.6:	<p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.
SS.912.A.7.7:	<p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.
SS.912.C.2.9:	<p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.

LAFS.910.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience’s knowledge level and concerns. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience’s knowledge of the topic. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology’s capacity to link to other information and to display information flexibly and dynamically.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★
	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students</p>

MAFS.K12.MP.1.1:	might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.1.3:	<p>Evaluate how environment and personal health are interrelated.</p> <p>Clarifications: Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.</p>

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: World History, United States History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African-Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African-American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Mathematics Benchmark Guidance - Social studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts and graphs.

Instructional Practices - Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100335

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** American and Western Hemispheric Histories >

Abbreviated Title: AFRICAN-AMER HISTORY

Course Length: Semester (S)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

African-American History (#2100335) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.2:	<p>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</p> <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.912.A.1.3:	<p>Utilize timelines to identify the time sequence of historical data.</p>
SS.912.A.1.4:	<p>Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.</p>
SS.912.A.1.5:	<p>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf</p>
SS.912.A.2.1:	<p>Review causes and consequences of the Civil War.</p> <p>Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.2:	<p>Assess the influence of significant people or groups on Reconstruction.</p> <p>Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.4:	<p>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</p> <p>Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.5:	<p>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.6:	<p>Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p>

SS.912.A.5.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.G.4.2:	<p>Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.</p>
SS.912.G.4.3:	<p>Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.</p>
SS.912.W.4.14:	<p>Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p>

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

	<p>Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.1.3:	<p>Evaluate how environment and personal health are interrelated.</p> <p>Clarifications: Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.</p>

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: World History, United States History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African-Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African-American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Instructional Practices - Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100335

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric

Histories >

Abbreviated Title: AFRICAN-AMER HISTORY

Course Length: Semester (S)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

African-American History (#2100335) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.2:	<p>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</p> <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	<p>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf</p>
SS.912.A.2.1:	<p>Review causes and consequences of the Civil War.</p> <p>Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.2:	<p>Assess the influence of significant people or groups on Reconstruction.</p> <p>Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.4:	<p>Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.</p> <p>Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.5:	<p>Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.6:	<p>Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.

SS.912.A.5.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.2.6:	<p>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</p> <ul style="list-style-type: none"> • Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). • Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.
SS.912.G.4.2:	<p>Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.</p>
SS.912.G.4.3:	<p>Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.</p>
SS.912.W.4.14:	<p>Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.</p>
	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks.

MA.K12.MTR.1.1:

- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
