- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.1.3:	<p>Evaluate how environment and personal health are interrelated.</p> <p>Clarifications: Food options within a community; prenatal-care services; availability of recreational facilities; air quality; weather-safety awareness; and weather, air, and water conditions.</p>

GENERAL NOTES

This course consists of the following content area strands: World History, United States History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African-Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African-American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Instructional Practices - Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100335

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: AFRICAN-AMER HISTORY

Course Length: Semester (S)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 5-9)

Social Science (Grades 6-12)

African-American History Honors (#2100336) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.
SS.912.A.1.2:	<p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.
SS.912.A.1.5:	<p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf</p>
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
	Review causes and consequences of the Civil War.
SS.912.A.2.1:	<p>Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Assess the influence of significant people or groups on Reconstruction.
SS.912.A.2.2:	<p>Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution.
SS.912.A.2.4:	<p>Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups.
SS.912.A.2.5:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.
SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Identify significant inventors of the Industrial Revolution including African Americans and women.
SS.912.A.3.5:	<p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is</p>

	<p>evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on</p>

	the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.C.3.10:	<p>Evaluate the significance and outcomes of landmark Supreme Court cases.</p> <p>Clarifications: Examples are Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland,</p>

	District of Columbia v. Heller.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.P.10.1:	Define culture and diversity.
SS.912.P.10.3:	Discuss the relationship between culture and conceptions of self and identity.
SS.912.P.10.4:	Discuss psychological research examining race and ethnicity.
SS.912.P.10.6:	Discuss how privilege and social power structures relate to stereotypes, prejudice, and discrimination.
SS.912.P.10.12:	Examine how perspectives affect stereotypes and treatment of minority and majority groups in society.
SS.912.S.1.4:	Examine changing points of view of social issues, such as poverty, crime and discrimination.
SS.912.S.2.1:	Define the key components of a culture, such as knowledge, language and communication, customs, values, norms, and physical objects.
SS.912.S.2.6:	Identify the factors that promote cultural diversity within the United States.
SS.912.S.2.9:	Prepare original written and oral reports and presentations on specific events, people or historical eras.
SS.912.S.4.10:	Distinguish the degree of assimilation that ethnic, cultural, and social groups achieve with the United States culture. Clarifications: Examples may include, but are not limited to, forced vs. voluntary assimilations, association with different groups, interaction within a cultural community, adaptation within families due to education.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.1.6:	Evaluate the role of history in shaping identity and character. Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.

LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. <ul style="list-style-type: none"> a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.

MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

The grade 9-12 African-American History Honors course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained

through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance: Social studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts and graphs.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning: Reading assignments from longer text passages as well as shorter ones when text is extremely complex.

1. Making close reading and rereading of texts central to lessons.
2. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
3. Requiring students to support answers with evidence from the text.
4. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section: Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Social Science (Grades 6-12)

African-American History Honors (#2100336) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.5:	Identify significant inventors of the Industrial Revolution including African Americans and women. Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on

	the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.C.3.10:	<p>Evaluate the significance and outcomes of landmark Supreme Court cases.</p> <p>Clarifications: Examples are Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland, District of Columbia v. Heller.</p>

SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.P.10.1:	Define culture and diversity.
SS.912.P.10.3:	Discuss the relationship between culture and conceptions of self and identity.
SS.912.P.10.4:	Discuss psychological research examining race and ethnicity.
SS.912.P.10.6:	Discuss how privilege and social power structures relate to stereotypes, prejudice, and discrimination.
SS.912.P.10.12:	Examine how perspectives affect stereotypes and treatment of minority and majority groups in society.
SS.912.S.1.4:	Examine changing points of view of social issues, such as poverty, crime and discrimination.
SS.912.S.2.1:	Define the key components of a culture, such as knowledge, language and communication, customs, values, norms, and physical objects.
SS.912.S.2.6:	Identify the factors that promote cultural diversity within the United States.
SS.912.S.2.9:	Prepare original written and oral reports and presentations on specific events, people or historical eras.
SS.912.S.4.10:	Distinguish the degree of assimilation that ethnic, cultural, and social groups achieve with the United States culture. Clarifications: Examples may include, but are not limited to, forced vs. voluntary assimilations, association with different groups, interaction within a cultural community, adaptation within families due to education.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas. Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks.

MA.K12.MTR.1.1:

- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

GENERAL NOTES

The grade 9-12 African-American History Honors course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning: Reading assignments from longer text passages as well as shorter ones when text is extremely complex.

1. Making close reading and rereading of texts central to lessons.
2. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
3. Requiring students to support answers with evidence from the text.
4. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section: Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

African-American History Honors (#2100336) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.5:	Identify significant inventors of the Industrial Revolution including African Americans and women. Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is

	<p>evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on</p>

	the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.2.6:	<p>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</p> <ul style="list-style-type: none"> • Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). • Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights. <p>Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., <i>Marbury v. Madison</i>; <i>McCulloch v. Maryland</i>; <i>Dred Scott v. Sandford</i>; <i>Plessy v.</i>

SS.912.CG.3.11:	<p><i>Ferguson v. Board of Education; Gideon v. Wainwright; Miranda v. Arizona; Korematsu v. United States; Mapp v. Ohio; In re Gault; United States v. Nixon; Regents of the University of California v. Bakke; Hazelwood v. Kuhlmeier; District of Columbia v. Heller</i>).</p> <ul style="list-style-type: none"> Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments. Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.P.10.1:	Define culture and diversity.
SS.912.P.10.3:	Discuss the relationship between culture and conceptions of self and identity.
SS.912.P.10.4:	Discuss psychological research examining race and ethnicity.
SS.912.P.10.6:	Discuss how privilege and social power structures relate to stereotypes, prejudice, and discrimination.
SS.912.P.10.12:	Examine how perspectives affect stereotypes and treatment of minority and majority groups in society.
SS.912.S.1.4:	Examine changing points of view of social issues, such as poverty, crime and discrimination.
SS.912.S.2.1:	Define the key components of a culture, such as knowledge, language and communication, customs, values, norms, and physical objects.
SS.912.S.2.6:	Identify the factors that promote cultural diversity within the United States.
SS.912.S.2.9:	Prepare original written and oral reports and presentations on specific events, people or historical eras.
SS.912.S.4.10:	<p>Distinguish the degree of assimilation that ethnic, cultural, and social groups achieve with the United States culture.</p> <p>Clarifications: Examples may include, but are not limited to, forced vs. voluntary assimilations, association with different groups, interaction within a cultural community, adaptation within families due to education.</p>
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	<p>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</p> <p>Evaluate the role of history in shaping identity and character.</p>
SS.912.W.1.6:	<p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.

SS.912.W.4.15:	<p>Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. Support students to develop generalizations based on the similarities found among problems. Provide opportunities for students to create plans and procedures to solve problems. Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

The grade 9-12 African-American History Honors course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning: Reading assignments from longer text passages as well as shorter ones when text is extremely complex.

1. Making close reading and rereading of texts central to lessons.
2. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
3. Requiring students to support answers with evidence from the text.
4. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section: Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.5:	Identify significant inventors of the Industrial Revolution including African Americans and women. Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on

	the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.C.3.10:	<p>Evaluate the significance and outcomes of landmark Supreme Court cases.</p> <p>Clarifications: Examples are Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland, District of Columbia v. Heller.</p>

SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed.

	<p>c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions.</p> <p>d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.</p>
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <p>a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns.</p> <p>c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts.</p> <p>d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).</p>
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>

	Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

African-American History - The grade 9-12 African-American History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.

2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100340

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** American and Western Hemispheric Histories >

Number of Credits: One (1) credit

Abbreviated Title: AFRICAN-AMER HIST

Course Type: Elective Course

Course Length: Year (Y)

Course Status: Course Approved

Course Level: 2

Grade Level(s): 9,10,11,12

Educator Certifications

History (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)

African-American History (#2100340) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.5:	Identify significant inventors of the Industrial Revolution including African Americans and women. Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on

	the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.C.3.10:	<p>Evaluate the significance and outcomes of landmark Supreme Court cases.</p> <p>Clarifications: Examples are Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland, District of Columbia v. Heller.</p>

SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or

MA.K12.MTR.7.1:	<p>efficiency.</p> <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

African-American History - The grade 9-12 African-American History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

African-American History (#2100340) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.5:	Identify significant inventors of the Industrial Revolution including African Americans and women. Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on

	the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.6.9:	<p>Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune.</p> <p>Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.6:	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.2.6:	<p>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</p> <ul style="list-style-type: none"> • Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). • Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.
SS.912.CG.3.11:	<p>Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will recognize landmark Supreme Court cases (e.g., <i>Marbury v. Madison</i>; <i>McCulloch v. Maryland</i>; <i>Dred Scott v. Sandford</i>; <i>Plessy v. Ferguson</i>; <i>Brown v. Board of Education</i>; <i>Gideon v. Wainwright</i>; <i>Miranda v. Arizona</i>; <i>Korematsu v. United States</i>; <i>Mapp v. Ohio</i>; <i>In re Gault</i>; <i>United States v. Nixon</i>; <i>Regents of the University of California v. Bakke</i>; <i>Hazelwood v. Kuhlmeier</i>; <i>District of Columbia v. Heller</i>).

	<ul style="list-style-type: none"> • Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments. • Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> • Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.1.6:	<p>Evaluate the role of history in shaping identity and character.</p> <p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p>

MA.K12.MTR.2.1:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:	<ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

African-American History - The grade 9-12 African-American History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of African Americans by examining the political, economic, social, religious, military and cultural events that affected the cultural group. Content will include, but is not limited to, West African heritage, the Middle Passage and Triangular Trade, the African Diaspora, significant turning points and trends in the development of African American culture and institutions, enslavement and emancipation, the Abolition, Black Nationalist, and Civil Rights movements, major historical figures and events in African-American history, and contemporary African-American affairs.

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Great Men and Women of Color Who Shaped World History (#2100345) 2017 - 2022 (current)

Course Standards

Name	Description
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. <ul style="list-style-type: none"> a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.SL.2.6:	Adapt speech to a variety of contexts and tasks, demonstrating command of formal English when indicated or appropriate.
LAFS.910.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.

LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.3:	Examine the changing status of women in the United States from post-World War II to present. Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i> , National Organization for Women, <i>Roe v. Wade</i> , Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.6:	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale]. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights. Clarifications:

SS.912.A.7.7:	<p>Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.4.3:	<p>Assess human rights policies of the United States and other countries.</p>
SS.912.W.1.1:	<p>Use timelines to establish cause and effect relationships of historical events.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.5:	<p>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</p>
SS.912.W.6.4:	<p>Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.</p> <p>Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.</p>
SS.912.W.8.7:	<p>Compare post-war independence movements in African, Asian, and Caribbean countries.</p>
SS.912.W.8.9:	<p>Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>

General Course Information and Notes

VERSION DESCRIPTION

This course examines world history through the contributions of individuals. Students will learn about specific men and women of color who have shaped the world and changed the course of history. Students will understand that the development of our society was made possible through the efforts and contributions of people of various ethnicities. Students will study biographical accounts of individuals and learn how these historical figures have shaped the history, culture and politics of our society.

Students will be introduced to men and women of color who have made valuable contributions to world history. Many scholars have recognized these historical figures and how their legacies can inspire students.

Though the focal point of this course is studying biographical accounts of historical figures, the larger goal is that students appreciate the contributions of men and women of color in a larger context of world history. Students will synthesize the information they learn and develop an understanding of how the past affects the present. Assignments should be designed to emphasize more than historical figures and dates, but examine how these figures and dates created a shift in our historical progression. Assignments should help foster critical thinking, analytical and inference skills.

GENERAL NOTES

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/si.pdf>.

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.3:	Examine the changing status of women in the United States from post-World War II to present. Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i> , National Organization for Women, <i>Roe v. Wade</i> , Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.6:	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale]. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.4.3:	<p>Assess human rights policies of the United States and other countries.</p>
SS.912.W.1.1:	<p>Use timelines to establish cause and effect relationships of historical events.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.5:	<p>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</p>
SS.912.W.6.4:	<p>Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.</p> <p>Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.</p>
SS.912.W.8.7:	<p>Compare post-war independence movements in African, Asian, and Caribbean countries.</p>
SS.912.W.8.9:	<p>Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations.

- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.

	<ul style="list-style-type: none"> • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

VERSION DESCRIPTION

This course examines world history through the contributions of individuals. Students will learn about specific men and women of color who have shaped the world and changed the course of history. Students will understand that the development of our society was made possible through the efforts and contributions of people of various ethnicities. Students will study biographical accounts of individuals and learn how these historical figures have shaped the history, culture and politics of our society.

Students will be introduced to men and women of color who have made valuable contributions to world history. Many scholars have recognized these historical figures and how their legacies can inspire students.

Though the focal point of this course is studying biographical accounts of historical figures, the larger goal is that students appreciate the contributions of men and women of color in a larger context of world history. Students will synthesize the information they learn and develop an understanding of how the past affects the present. Assignments should be designed to emphasize more than historical figures and dates, but examine how these figures and dates created a shift in our historical progression. Assignments should help foster critical thinking, analytical and inference skills.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/si.pdf>.

GENERAL INFORMATION

Course Number: 2100345

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: State Board Approved

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: MEN/WOMEN WORLD HIST

Course Length: Semester (S)

Course Level: 2

Educator Certifications

Social Science (Grades 6-12)

History (Grades 6-12)

Great Men and Women of Color Who Shaped World History (#2100345) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.3:	Examine the changing status of women in the United States from post-World War II to present. Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i> , National Organization for Women, <i>Roe v. Wade</i> , Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.6:	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale]. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.W.1.1:	<p>Use timelines to establish cause and effect relationships of historical events.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.5:	<p>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</p>
SS.912.W.6.4:	<p>Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.</p> <p>Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.</p>
SS.912.W.8.7:	<p>Compare post-war independence movements in African, Asian, and Caribbean countries.</p>
SS.912.W.8.9:	<p>Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications:</p>

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

	<p>Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

VERSION DESCRIPTION

This course examines world history through the contributions of individuals. Students will learn about specific men and women of color who have shaped the world and changed the course of history. Students will understand that the development of our society was made possible through the efforts and contributions of people of various ethnicities. Students will study biographical accounts of individuals and learn how these historical figures have shaped the history, culture and politics of our society.

Students will be introduced to men and women of color who have made valuable contributions to world history. Many scholars have recognized these historical figures and how their legacies can inspire students.

Though the focal point of this course is studying biographical accounts of historical figures, the larger goal is that students appreciate the contributions of men and women of color in a larger context of world history. Students will synthesize the information they learn and develop an understanding of how the past affects the present. Assignments should be designed to emphasize more than historical figures and dates, but examine how these figures and dates created a shift in our historical progression. Assignments should help foster critical thinking, analytical and inference skills.

GENERAL NOTES

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally

embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development (ELD) Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate for social and instructional purposes within the school setting. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/si.pdf>.

GENERAL INFORMATION

Course Number: 2100345

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: Draft - Course Pending Approval

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: MEN/WOMEN WORLD HIST

Course Length: Semester (S)

Course Level: 2

Educator Certifications

Social Science (Grades 6-12)

History (Grades 6-12)

Florida History (#2100350) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.7:	Review the Native American experience. Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.1:	Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

	Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.
SS.912.A.3.2:	Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.3:	Compare the first and second Industrial Revolutions in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.
SS.912.A.3.4:	Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy. Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.6:	Analyze changes that occurred as the United States shifted from agrarian to an industrial society. Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.13:	Examine key events and peoples in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.9:	Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune. Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood

SS.912.A.7.6:	<p>Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.C.2.10:	<p>Monitor current public issues in Florida.</p> <p>Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</p>
SS.912.C.2.11:	<p>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</p>
SS.912.C.3.10:	<p>Evaluate the significance and outcomes of landmark Supreme Court cases.</p> <p>Clarifications: Examples are Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland, District of Columbia v. Heller.</p>
SS.912.C.4.3:	<p>Assess human rights policies of the United States and other countries.</p>
SS.912.E.2.3:	<p>Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.</p>
SS.912.G.1.1:	<p>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</p>
SS.912.G.1.2:	<p>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</p>
SS.912.G.1.3:	<p>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</p>
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources.</p>

	Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.4:	Use geographic terms and tools to analyze case studies of how selected regions change over time.
SS.912.G.2.5:	Use geographic terms and tools to analyze case studies of debates over how human actions modify a selected region. Clarifications: Examples are mining, drilling, farming, housing.
SS.912.G.3.1:	Use geographic terms to locate and describe major ecosystems of Earth.
SS.912.G.3.2:	Use geographic terms and tools to explain how weather and climate influence the natural character of a place.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.3.4:	Use geographic terms and tools to explain how the Earth's internal changes and external changes influence the character of places. Clarifications: Examples of internal are volcanic activity, folding. Examples of external are erosion, water cycle.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers.
SS.912.G.4.6:	Use geographic terms and tools to predict the effect of a change in a specific characteristic of a place on the human population of that place.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.8:	Use geographic concepts to analyze spatial phenomena and to discuss economic, political, and social factors that define and interpret space.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.1.1:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
SS.912.W.4.1.2:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.1.3:	Examine the various economic and political systems of Portugal, Spain, the Netherlands, France, and England in the Americas.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting

MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Florida History - The grade 9-12 Florida History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the state of Florida by examining the political, economic, social, military and cultural events that affected the state. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Florida including, but not limited to, the evolution of Florida's diverse heritage through Spanish, French, British and American occupations, Florida's Native American population, United States annexation and territorial experience, statehood and an analysis of Florida's first constitution, Florida's system of slavery, Florida under the Confederacy and Reconstruction, Florida's role as a part of the new South, technological and urban transformations of the state, the evolution of Florida lifestyles and ideals over the centuries, the historic evolution of the Florida economy, Florida's diverse geographic regions and population groups, state government, modern day Florida's successes and challenges, and the projection of Florida's future development.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.

4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Florida History (#2100350) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.7:	Review the Native American experience. Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.1:	Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

	Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.
SS.912.A.3.2:	Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.3:	Compare the first and second Industrial Revolutions in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.
SS.912.A.3.4:	Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy. Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.6:	Analyze changes that occurred as the United States shifted from agrarian to an industrial society. Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.13:	Examine key events and peoples in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.9:	Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune. Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood

SS.912.A.7.6:	<p>Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.9:	<p>Identify the expansion of civil rights and liberties by examining the principles contained in primary documents.</p> <p>Clarifications: Examples are Preamble, Declaration of Independence, Constitution, Emancipation Proclamation, 13th, 14th, 15th, 19th, 24th, and 26th Amendments, Voting Rights Act of 1965.</p>
SS.912.C.2.10:	<p>Monitor current public issues in Florida.</p> <p>Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</p>
SS.912.C.2.11:	<p>Analyze public policy solutions or courses of action to resolve a local, state, or federal issue.</p>
SS.912.C.3.10:	<p>Evaluate the significance and outcomes of landmark Supreme Court cases.</p> <p>Clarifications: Examples are Marbury v. Madison, Plessy v. Ferguson, Brown v. Board of Education, Gideon v. Wainwright, Miranda v. Arizona, Tinker v. Des Moines, Hazelwood v. Kuhlmeier, United States v. Nixon, Roe v. Wade, Bush v. Gore, Texas v. Johnson, Mapp v. Ohio, McCulloch v. Maryland, District of Columbia v. Heller.</p>
SS.912.C.4.3:	<p>Assess human rights policies of the United States and other countries.</p>
SS.912.E.2.3:	<p>Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.</p>
SS.912.G.1.1:	<p>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</p>
SS.912.G.1.2:	<p>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</p>
SS.912.G.1.3:	<p>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</p>
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources.</p>

	Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.4:	Use geographic terms and tools to analyze case studies of how selected regions change over time.
	Use geographic terms and tools to analyze case studies of debates over how human actions modify a selected region.
SS.912.G.2.5:	Clarifications: Examples are mining, drilling, farming, housing.
SS.912.G.3.1:	Use geographic terms to locate and describe major ecosystems of Earth.
SS.912.G.3.2:	Use geographic terms and tools to explain how weather and climate influence the natural character of a place.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
	Use geographic terms and tools to explain how the Earth's internal changes and external changes influence the character of places.
SS.912.G.3.4:	Clarifications: Examples of internal are volcanic activity, folding. Examples of external are erosion, water cycle.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers.
SS.912.G.4.6:	Use geographic terms and tools to predict the effect of a change in a specific characteristic of a place on the human population of that place.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.8:	Use geographic concepts to analyze spatial phenomena and to discuss economic, political, and social factors that define and interpret space.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
	Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4:	Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.13:	Examine the various economic and political systems of Portugal, Spain, the Netherlands, France, and England in the Americas.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose.
MA.K12.MTR.2.1:	Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations.

- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.

	<ul style="list-style-type: none"> • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
	Cite evidence to explain and justify reasoning.
ELA.K12.EE.1.1:	<p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
	Read and comprehend grade-level complex texts proficiently.
ELA.K12.EE.2.1:	<p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
	Make inferences to support comprehension.
ELA.K12.EE.3.1:	<p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.
ELA.K12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	<p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	<p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	<p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Florida History - The grade 9-12 Florida History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the state of Florida by examining the political, economic, social, military and cultural events that affected the state. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Florida including, but not limited to, the evolution of Florida's diverse heritage through Spanish, French, British and American occupations, Florida's Native American population, United States annexation and territorial experience, statehood and an analysis of Florida's first constitution, Florida's system of slavery, Florida under the Confederacy and Reconstruction, Florida's role as a part of the new South, technological and urban transformations of the state, the evolution of Florida lifestyles and ideals over the centuries, the historic evolution of the Florida economy, Florida's diverse geographic regions and population groups, state government, modern day Florida's successes and challenges, and the projection of Florida's future development.

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.

3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Florida History (#2100350) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.6:	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.7:	Review the Native American experience. Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.1:	Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

	Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.
SS.912.A.3.2:	Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.3:	Compare the first and second Industrial Revolutions in the United States. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.
SS.912.A.3.4:	Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy. Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.6:	Analyze changes that occurred as the United States shifted from agrarian to an industrial society. Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.3.13:	Examine key events and peoples in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.9:	Describe the rationale for the formation of the United Nations, including the contribution of Mary McLeod Bethune. Clarifications: Examples may include, but are not limited to, the Declaration of Human Rights. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood

SS.912.A.7.6:	<p>Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.2.6:	<p>Explain how the principles contained in foundational documents contributed to the expansion of civil rights and liberties over time.</p> <ul style="list-style-type: none"> Students will explain how different groups of people (e.g., African Americans, immigrants, Native Americans, women) had their civil rights expanded through legislative action (e.g., Voting Rights Act, Civil Rights Act), executive action (e.g., Truman's desegregation of the army, Lincoln's Emancipation Proclamation) and the courts (e.g., Brown v. Board of Education; In re Gault). Students will explain the role founding documents, such as the Declaration of Independence and the Constitution, had on setting precedent for the future granting of rights.
SS.912.CG.2.12:	<p>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</p> <ul style="list-style-type: none"> Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions. Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues. Students will analyze public policy solutions related to local, state and national issues.
SS.912.CG.3.11:	<p>Evaluate how landmark Supreme Court decisions affect law, liberty and the interpretation of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will recognize landmark Supreme Court cases (e.g., <i>Marbury v. Madison</i>; <i>McCulloch v. Maryland</i>; <i>Dred Scott v. Sandford</i>; <i>Plessy v. Ferguson</i>; <i>Brown v. Board of Education</i>; <i>Gideon v. Wainwright</i>; <i>Miranda v. Arizona</i>; <i>Korematsu v. United States</i>; <i>Mapp v. Ohio</i>; <i>In re Gault</i>; <i>United States v. Nixon</i>; <i>Regents of the University of California v. Bakke</i>; <i>Hazelwood v. Kuhlmeier</i>; <i>District of Columbia v. Heller</i>). Students will explain the foundational constitutional issues underlying landmark Supreme Court decisions related to the Bill of Rights and other amendments. Students will explain the outcomes of landmark Supreme Court cases related to the Bill of Rights and other amendments.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.E.2.3:	<p>Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.</p>
SS.912.G.1.1:	<p>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</p>
SS.912.G.1.2:	<p>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</p>
SS.912.G.1.3:	<p>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</p>
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications:</p>

	Examples are thematic, contour, and dot-density.
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	<p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.4:	Use geographic terms and tools to analyze case studies of how selected regions change over time.
SS.912.G.2.5:	Use geographic terms and tools to analyze case studies of debates over how human actions modify a selected region.
	<p>Clarifications: Examples are mining, drilling, farming, housing.</p>
SS.912.G.3.1:	Use geographic terms to locate and describe major ecosystems of Earth.
SS.912.G.3.2:	Use geographic terms and tools to explain how weather and climate influence the natural character of a place.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
	Use geographic terms and tools to explain how the Earth's internal changes and external changes influence the character of places.
SS.912.G.3.4:	<p>Clarifications: Examples of internal are volcanic activity, folding. Examples of external are erosion, water cycle.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.5:	Use geographic terms and tools to analyze case studies of the development, growth, and changing nature of cities and urban centers.
SS.912.G.4.6:	Use geographic terms and tools to predict the effect of a change in a specific characteristic of a place on the human population of that place.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.8:	Use geographic concepts to analyze spatial phenomena and to discuss economic, political, and social factors that define and interpret space.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
	Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4:	<p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	<p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	<p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	<p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.13:	Examine the various economic and political systems of Portugal, Spain, the Netherlands, France, and England in the Americas.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	<p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems. </p>
	Demonstrate understanding by representing problems in multiple ways.
	Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations.

MA.K12.MTR.2.1:

- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.

MA.K12.MTR.7.1:	<ul style="list-style-type: none"> Perform investigations to gather data or determine if a method is appropriate. Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Provide opportunities for students to create models, both concrete and abstract, and perform investigations. Challenge students to question the accuracy of their models and methods. Support students as they validate conclusions by comparing them to the given situation. Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Florida History - The grade 9-12 Florida History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the state of Florida by examining the political, economic, social, military and cultural events that affected the state. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Florida including, but not limited to, the evolution of Florida's diverse heritage through Spanish, French, British and American occupations, Florida's Native American population, United States annexation and territorial experience, statehood and an analysis of Florida's first constitution, Florida's system of slavery, Florida under the Confederacy and Reconstruction, Florida's role as a part of the new South, technological and urban transformations of the state, the evolution of Florida lifestyles and ideals over the centuries, the historic evolution of the Florida economy, Florida's diverse geographic regions and population groups, state government, modern day Florida's successes and challenges, and the projection of Florida's future development.

Instructional Practices:

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

History and Contributions of Haiti in a Global Context (#2100355) 2020 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.4.8:	Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.3:	Analyze the impact of the Holocaust during World War II on Jews as well as other groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.4:	Examine efforts to expand or contract rights for various populations during World War II. Clarifications: Examples may include, but are not limited to, women, African Americans, German Americans, Japanese Americans and their internment, Native Americans, Hispanic Americans, Italian Americans. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.6:	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].

	This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.12:	Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century. Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.E.3.1:	Demonstrate the impact of inflation on world economies. Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.H.3.3:	Identify contributions made by various world cultures through trade and communication, and form a hypothesis on future contributions and changes.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.4:	Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.
SS.912.W.5.6:	Summarize the important causes, events, and effects of the French Revolution including the rise and rule of Napoleon.
SS.912.W.5.7:	Describe the causes and effects of 19th Latin American and Caribbean independence movements led by people including Bolivar, de San Martin, and L' Overture.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.

SS.912.W.7.8:	Explain the causes, events, and effects of the Holocaust (1933-1945) including its roots in the long tradition of antisemitism, 19th century ideas about race and nation, and Nazi dehumanization of the Jews and other victims.
SS.912.W.8.4:	Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
LAFS.1112.RL.3.7:	Analyze multiple interpretations of a story, drama, or poem (e.g., recorded or live production of a play or recorded novel or poetry), evaluating how each version interprets the source text. (Include at least one play by Shakespeare and one play by an American dramatist.)
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.W.3.9:	Draw evidence from literary or informational texts to support analysis, reflection, and research. a. Apply grades 11–12 Reading standards to literature (e.g., “Demonstrate knowledge of eighteenth-, nineteenth- and early-twentieth-century foundational works of American literature, including how two or more texts from the same period treat similar themes or topics”). b. Apply grades 11–12 Reading standards to literary nonfiction (e.g., “Delineate and evaluate the reasoning in seminal U.S. texts, including the application of constitutional principles and use of legal reasoning [e.g., in U.S. Supreme Court Case majority opinions and dissents] and the premises, purposes, and arguments in works of public advocacy [e.g., The Federalist, presidential addresses]”).
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: History of the Republic of Haiti, Human Geography, and Humanities. The primary content emphasis for this course pertains to the study of Haiti history from the arrival of Christopher Columbus in 1492 to the present day. Students will be exposed to the historical, geographic, political, economics, and sociological events which influenced the development of the Republic of Haiti and the resulting impact on world history. At the conclusion of this course, students will be able to understand and discuss how Haiti changed the course of history on a global scale.

GENERAL INFORMATION

Course Number: 2100355	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: World and Eastern Hemispheric Histories >
Number of Credits: Half credit (.5)	Abbreviated Title: HIST/CONTRIB HAITI
Course Type: Elective Course	Course Length: Semester (S)
Course Status: Course Approved	Course Level: 2
Grade Level(s): 9,10,11,12

Social Science (Grades 6-12)

History and Contributions of Haiti in a Global Context (#2100355) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.4.8:	Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.3:	Analyze the impact of the Holocaust during World War II on Jews as well as other groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.4:	Examine efforts to expand or contract rights for various populations during World War II. Clarifications: Examples may include, but are not limited to, women, African Americans, German Americans, Japanese Americans and their internment, Native Americans, Hispanic Americans, Italian Americans. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.6:	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].

	This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.12:	Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century. Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.E.3.1:	Demonstrate the impact of inflation on world economies. Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.H.3.3:	Identify contributions made by various world cultures through trade and communication, and form a hypothesis on future contributions and changes.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.4:	Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.
SS.912.W.5.6:	Summarize the important causes, events, and effects of the French Revolution including the rise and rule of Napoleon.
SS.912.W.5.7:	Describe the causes and effects of 19th Latin American and Caribbean independence movements led by people including Bolivar, de San Martin, and L' Overture.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.

SS.912.W.7.8:	Explain the causes, events, and effects of the Holocaust (1933-1945) including its roots in the long tradition of antisemitism, 19th century ideas about race and nation, and Nazi dehumanization of the Jews and other victims.
SS.912.W.8.4:	Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts. Look for similarities among problems. Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p>

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.
In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

Use appropriate voice and tone when speaking or writing.

Clarifications:

In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

ELA.K12.EE.6.1:

ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: History of the Republic of Haiti, Human Geography, and Humanities. The primary content emphasis for this course pertains to the study of Haiti history from the arrival of Christopher Columbus in 1492 to the present day. Students will be exposed to the historical, geographic, political, economics, and sociological events which influenced the development of the Republic of Haiti and the resulting impact on world history. At the conclusion of this course, students will be able to understand and discuss how Haiti changed the course of history on a global scale.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

History and Contributions of Haiti in a Global Context (#2100355) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.4.8:	Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.3:	Analyze the impact of the Holocaust during World War II on Jews as well as other groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.4:	Examine efforts to expand or contract rights for various populations during World War II. Clarifications: Examples may include, but are not limited to, women, African Americans, German Americans, Japanese Americans and their internment, Native Americans, Hispanic Americans, Italian Americans. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.5:	Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights. Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.6:	Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement. Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr., Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].

For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.4.2:	<p>Explain how the United States uses foreign policy to influence other nations.</p> <ul style="list-style-type: none"> • Students will explain how the policies of other nations influence U.S. policy and society. • Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency). • Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International). • Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia). • Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria). • Students will explain the U.S. response to international conflicts.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> • Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.CG.4.4:	<p>Identify indicators of democratization in foreign countries.</p> <ul style="list-style-type: none"> • Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.H.1.5:	<p>Examine artistic response to social issues and new ideas in various cultures.</p> <p>Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.H.3.3:	Identify contributions made by various world cultures through trade and communication, and form a hypothesis on future contributions and changes.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).

SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.4:	Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.
SS.912.W.5.6:	Summarize the important causes, events, and effects of the French Revolution including the rise and rule of Napoleon.
SS.912.W.5.7:	Describe the causes and effects of 19th Latin American and Caribbean independence movements led by people including Bolivar, de San Martin, and L' Ouverture.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.7.8:	Explain the causes, events, and effects of the Holocaust (1933-1945) including its roots in the long tradition of antisemitism, 19th century ideas about race and nation, and Nazi dehumanization of the Jews and other victims.
SS.912.W.8.4:	Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.

- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.
6-8 Students continue with previous skills and use a style guide to create a proper citation.
9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.
In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: History of the Republic of Haiti, Human Geography, and Humanities. The primary content emphasis for this course pertains to the study of Haiti history from the arrival of Christopher Columbus in 1492 to the present day. Students will be exposed to the historical, geographic, political, economics, and sociological events which influenced the development of the Republic of Haiti and the resulting impact on world history. At the conclusion of this course, students will be able to understand and discuss how Haiti changed the course of history on a global scale.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100355	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: World and Eastern Hemispheric Histories >
Number of Credits: Half credit (.5)	Abbreviated Title: HIST/CONTRIB HAITI
Course Type: Elective Course	Course Length: Semester (S)
Course Status: Draft - Course Pending Approval	Course Level: 2
Grade Level(s): 9,10,11,12	

Educator Certifications

Social Science (Grades 6-12)

Latin American History (#2100360) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.7:	Review the Native American experience. Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.3:	Examine causes, course, and consequences of the Spanish American War. Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i> , the <i>Philippines</i> , <i>Commodore Dewey</i> , <i>the Rough Riders</i> , <i>acquisition of territories</i> , <i>the Treaty of Paris</i> . This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.4:	Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction. Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.14:	Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns). Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.

SS.912.C.4.4:	Compare indicators of democratization in multiple countries. Demonstrate the impact of inflation on world economies.
SS.912.E.3.1:	Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time. Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4:	Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations. Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	Clarifications: Examples are Maya, Aztec, Inca.
SS.912.W.3.17:	Describe the roles of people in the Maya, Inca, and Aztec societies. Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.
SS.912.W.3.18:	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America. Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.13:	Examine the various economic and political systems of Portugal, Spain, the Netherlands, France, and England in the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.

SS.912.W.5.7:	Describe the causes and effects of 19th Latin American and Caribbean independence movements led by people including Bolivar, de San Martin, and L' Overture.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.4:	Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.8:	Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies. Clarifications: Examples are Mahatma Ghandi, Fidel Castro, Gamal Abdel Nasser, Francois 'Papa Doc' Duvalier, Jawaharlal Nehru.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
SS.912.W.9.4:	Describe the causes and effects of twentieth century nationalist conflicts. Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
SS.912.W.9.6:	Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications

	or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools

MAFS.K12.MP.5.1:	might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Latin American History - The grade 9-12 Latin American History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the Latin American people by examining the history and culture of the region with emphasis on the Caribbean Basin, Central America and South America. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Latin America including, but not limited to, indigenous Native American population prior to the arrival of the Europeans, Spanish heritage, influence and impact of the Catholic Church on Latin American cultures, evolution of political systems and philosophies in Latin American societies, interaction of science and Latin American cultures, Latin American nationalism, origin and course of economic systems and philosophies in Latin American societies, influence of major historical figures and events in Latin American history, and contemporary Latin American affairs.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence)

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100360

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** American and Western Hemispheric Histories >

Number of Credits: One (1) credit

Abbreviated Title: LATIN AMER HIST

Course Type: Elective Course

Course Length: Year (Y)

Course Status: Course Approved

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Latin American History (#2100360) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.7:	Review the Native American experience. Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.3:	Examine causes, course, and consequences of the Spanish American War. Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i> , the <i>Philippines</i> , <i>Commodore Dewey</i> , <i>the Rough Riders</i> , <i>acquisition of territories</i> , <i>the Treaty of Paris</i> . This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.4:	Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction. Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.14:	Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns). Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.

SS.912.C.4.4:	Compare indicators of democratization in multiple countries. Demonstrate the impact of inflation on world economies.
SS.912.E.3.1:	Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time. Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4:	Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations. Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	Clarifications: Examples are Maya, Aztec, Inca.
SS.912.W.3.17:	Describe the roles of people in the Maya, Inca, and Aztec societies. Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.
SS.912.W.3.18:	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America. Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.13:	Examine the various economic and political systems of Portugal, Spain, the Netherlands, France, and England in the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.

SS.912.W.5.7:	Describe the causes and effects of 19th Latin American and Caribbean independence movements led by people including Bolivar, de San Martin, and L' Overture.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.4:	Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.8:	Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies. Clarifications: Examples are Mahatma Ghandi, Fidel Castro, Gamal Abdel Nasser, Francois 'Papa Doc' Duvalier, Jawaharlal Nehru.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
SS.912.W.9.4:	Describe the causes and effects of twentieth century nationalist conflicts. Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
SS.912.W.9.6:	Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others: <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.

- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

ELA.K.12.EE.4.1:	In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Latin American History - The grade 9-12 Latin American History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the Latin American people by examining the history and culture of the region with emphasis on the Caribbean Basin, Central America and South America. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Latin America including, but not limited to, indigenous Native American population prior to the arrival of the Europeans, Spanish heritage, influence and impact of the Catholic Church on Latin American cultures, evolution of political systems and philosophies in Latin American societies, interaction of science and Latin American cultures, Latin American nationalism, origin and course of economic systems and philosophies in Latin American societies, influence of major historical figures and events in Latin American history, and contemporary Latin American affairs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence)

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Latin American History (#2100360) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.7:	Review the Native American experience. Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.3:	Examine causes, course, and consequences of the Spanish American War. Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i> , the <i>Philippines</i> , <i>Commodore Dewey</i> , <i>the Rough Riders</i> , <i>acquisition of territories</i> , <i>the Treaty of Paris</i> . This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.4:	Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction. Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.14:	Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns). Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.

SS.912.CG.4.3:	<ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
	Identify indicators of democratization in foreign countries.
SS.912.CG.4.4:	<ul style="list-style-type: none"> Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.
	Demonstrate the impact of inflation on world economies.
SS.912.E.3.1:	<p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.
SS.912.G.1.4:	<p>Clarifications: Examples are thematic, contour, and dot-density.</p>
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	<p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.
SS.912.G.2.3:	<p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
	Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4:	<p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	<p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	<p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	<p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	<p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations.
	Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	<p>Clarifications: Examples are Maya, Aztec, Inca.</p>
	Describe the roles of people in the Maya, Inca, and Aztec societies.
SS.912.W.3.17:	<p>Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.</p>
	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America.
SS.912.W.3.18:	<p>Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.</p>
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.13:	Examine the various economic and political systems of Portugal, Spain, the Netherlands, France, and England in the Americas.

SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.7:	Describe the causes and effects of 19th Latin American and Caribbean independence movements led by people including Bolivar, de San Martin, and L' Overture.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.4:	Summarize the causes and effects of the arms race and proxy wars in Africa, Asia, Latin America, and the Middle East.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.8:	Describe the rise and goals of nationalist leaders in the post-war era and the impact of their rule on their societies. Clarifications: Examples are Mahatma Ghandi, Fidel Castro, Gamal Abdel Nasser, Francois 'Papa Doc' Duvalier, Jawaharlal Nehru.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
SS.912.W.9.4:	Describe the causes and effects of twentieth century nationalist conflicts. Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
SS.912.W.9.6:	Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K.12.EE.4.1:	<p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
	Use the accepted rules governing a specific format to create quality work.
ELA.K.12.EE.5.1:	<p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
	Use appropriate voice and tone when speaking or writing.
ELA.K.12.EE.6.1:	<p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	<p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Latin American History - The grade 9-12 Latin American History course consists of the following content area strands: World History, American History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the chronological development of the Latin American people by examining the history and culture of the region with emphasis on the Caribbean Basin, Central America and South America. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of Latin America including, but not limited to, indigenous Native American population prior to the arrival of the Europeans, Spanish heritage, influence and impact of the Catholic Church on Latin American cultures, evolution of political systems and philosophies in Latin American societies, interaction of science and Latin American cultures, Latin American nationalism, origin and course of economic systems and philosophies in Latin American societies, influence of major historical figures and events in Latin American history, and contemporary Latin American affairs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence)

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.3.10:	Review different economic and philosophic ideologies. Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.3:	Examine causes, course, and consequences of the Spanish American War. Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i> , the <i>Philippines</i> , <i>Commodore Dewey</i> , the <i>Rough Riders</i> , acquisition of territories, the <i>Treaty of Paris</i> . This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.4:	Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction. Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.12:	Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century. Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.16:	Examine changes in immigration policy and attitudes toward immigration since 1950. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.2.4:	Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.
SS.912.C.2.13:	Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal. Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.
SS.912.C.4.1:	Explain how the world's nations are governed differently.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?: (2) How to produce?: and (3) For whom to produce?

SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth. Identify and explain broad economic goals.
SS.912.E.2.1:	Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.7:	Identify the impact of inflation on society. Demonstrate the impact of inflation on world economies.
SS.912.E.3.1:	Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage. Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.
SS.912.E.3.3:	Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.
SS.912.E.3.4:	Assess the economic impact of negative and positive externalities on the international environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.3.5:	Compare the current United States economy with other developed and developing nations. Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.FL.1.2:	Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer. Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.
SS.912.FL.1.5:	Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment. Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.4:	Use geographic terms and tools to analyze case studies of issues in globalization. Clarifications: Examples are cultural imperialism, outsourcing.
SS.912.H.1.1:	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created. Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.
SS.912.H.1.2:	Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens. Clarifications: Examples are imperial Roman sculpture; Palace of Versailles; Picasso's Guernica; layout of Washington, DC.
SS.912.H.1.3:	Relate works in the arts to various cultures. Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.
	Explain philosophical beliefs as they relate to works in the arts.

SS.912.H.1.4:	Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
	Examine artistic response to social issues and new ideas in various cultures.
SS.912.H.1.5:	Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.1.6:	Analyze how current events are explained by artistic and cultural trends of the past.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
	Distinguish methods used to study development.
SS.912.P.6.3:	Clarifications: Examples may include, but are not limited to, cross-sectional research, longitudinal research, data collection, observation, case studies, questionnaires, and experimentation.
	Describe the structure and function of language.
SS.912.P.8.1:	Clarifications: Topics may include, but are not limited to, phoneme, morpheme, and grammar.
SS.912.P.16.11:	Analyze how individualistic and collectivistic cultural perspectives relate to personality.
SS.912.S.1.4:	Examine changing points of view of social issues, such as poverty, crime and discrimination.
SS.912.S.1.6:	Distinguish fact from opinion in data sources to analyze various points of view about a social issue.
SS.912.S.1.8:	Identify, evaluate and use appropriate reference materials and technology to interpret information about cultural life in the United States and other world cultures, both in the past and today.
SS.912.S.2.1:	Define the key components of a culture, such as knowledge, language and communication, customs, values, norms, and physical objects.
SS.912.S.2.2:	Explain the differences between a culture and a society.
SS.912.S.2.3:	Recognize the influences of genetic inheritance and culture on human behavior.
SS.912.S.2.4:	Give examples of subcultures and describe what makes them unique.
SS.912.S.2.5:	Compare social norms among various subcultures.
SS.912.S.2.7:	Explain how various practices of the culture create differences within group behavior.
SS.912.S.2.8:	Compare and contrast different types of societies, such as hunting and gathering, agrarian, industrial, and post-industrial.
SS.912.S.2.9:	Prepare original written and oral reports and presentations on specific events, people or historical eras.
	Describe how social status affects social order.
SS.912.S.3.1:	Clarifications: Examples may include, but are not limited to, upper class, middle class, lower class, professional, blue collar, and unemployed.
	Explain how roles and role expectations can lead to role conflict.
SS.912.S.3.2:	Clarifications: Examples may include, but are not limited to, gender roles, age, racial and ethnic groups within different societies.
SS.912.S.3.3:	Examine and analyze various points of view relating to historical and current events.
SS.912.S.4.1:	Describe how individuals are affected by the different social groups to which they belong.
SS.912.S.4.2:	Identify major characteristics of social groups familiar to the students.
SS.912.S.4.6:	Identify the various types of norms (folkways, mores, laws, and taboos) and explain why these rules of behavior are considered important to society.
SS.912.S.4.12:	Determine the cultural patterns of behavior within such social groups as rural/urban or rich/poor.
	Discuss the concept of political power and factors that influence political power.
SS.912.S.5.2:	Clarifications: Examples may include, but are not limited to, social class, racial and ethnic group memberships, cultural group, gender, and age.
SS.912.S.5.5:	Define ethnocentrism and explain how it can be beneficial or destructive to a culture.
SS.912.S.5.6:	Identify the factors that influence change in social norms over time.
SS.912.S.5.9:	Conduct research and analysis on an issue associated with social structure or social institutions.
SS.912.S.6.1:	Describe how and why societies change over time.
	Examine various social influences that can lead to immediate and long-term changes.
SS.912.S.6.2:	Clarifications: Examples may include, but are not limited to, natural and man-made disasters, spatial movement of people, technology, urbanization, industrialization, immigration, war, challenge to authority, laws, diffusion of cultural traits, discrimination, discoveries and inventions, and scientific exploration.
SS.912.S.6.8:	Investigate the consequences in society as result of changes.
	Describe how social problems have changed over time.
SS.912.S.7.2:	Clarifications: Examples may include, but are not limited to, juvenile delinquency, crime, poverty, and discrimination.
	Explain how patterns of behavior are found with certain social problems.
SS.912.S.7.3:	Clarifications: Examples may include, but are not limited to, juvenile offenses, such as gang membership, crime, sexual behavior, and teen pregnancy, are found in the histories of adult criminals.
	Define propaganda and discuss the methods of propaganda and discuss the methods of propaganda used to influence social behavior.
SS.912.S.8.7:	Clarifications: Examples may include, but are not limited to, news media and advertisements.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.

SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain. Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.4:	Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America. Describe the causes and effects of post-World War II economic and demographic changes.
SS.912.W.9.2:	Clarifications: Examples are medical and technological advances, free market economics, increased consumption of natural resources and goods, rise in expectations for standards of living.
SS.912.W.9.3:	Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them. Clarifications: Examples are prejudice, racism, stereotyping, economic competition.
LAFS.1112.L.2.3:	Apply knowledge of language to understand how language functions in different contexts, to make effective choices for meaning or style, and to comprehend more fully when reading or listening. a. Vary syntax for effect, consulting references (e.g., Tufte's <i>Artful Sentences</i>) for guidance as needed; apply an understanding of syntax to the study of complex texts when reading.
LAFS.1112.L.3.4:	Determine or clarify the meaning of unknown and multiple-meaning words and phrases based on <i>grades 11–12 reading and content</i> , choosing flexibly from a range of strategies. a. Use context (e.g., the overall meaning of a sentence, paragraph, or text; a word's position or function in a sentence) as a clue to the meaning of a word or phrase. b. Identify and correctly use patterns of word changes that indicate different meanings or parts of speech (e.g., conceive, conception, conceivable). c. Consult general and specialized reference materials (e.g., dictionaries, glossaries, thesauruses), both print and digital, to find the pronunciation of a word or determine or clarify its precise meaning, its part of speech, its etymology, or its standard usage. d. Verify the preliminary determination of the meaning of a word or phrase (e.g., by checking the inferred meaning in context or in a dictionary).
LAFS.1112.L.3.6:	Acquire and use accurately general academic and domain-specific words and phrases, sufficient for reading, writing, speaking, and listening at the college and career readiness level; demonstrate independence in gathering vocabulary knowledge when considering a word or phrase important to comprehension or expression.
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RI.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text, including determining where the text leaves matters uncertain.
LAFS.1112.RI.1.2:	Determine two or more central ideas of a text and analyze their development over the course of the text, including how they interact and build on one another to provide a complex analysis; provide an objective summary of the text.
LAFS.1112.RI.1.3:	Analyze a complex set of ideas or sequence of events and explain how specific individuals, ideas, or events interact and develop over the course of the text.

LAFS.1112.RL.1.1:	Cite strong and thorough textual evidence to support analysis of what the text says explicitly as well as inferences drawn from the text, including determining where the text leaves matters uncertain.
LAFS.1112.RL.1.2:	Determine two or more themes or central ideas of a text and analyze their development over the course of the text, including how they interact and build on one another to produce a complex account; provide an objective summary of the text.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.W.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.W.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers. e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: American History, Geography, Economics, World History, Humanities, Civics and Government, Psychology, Sociology, and Financial Literacy. The primary content emphasis for this course pertains to the student of the development of the Latin American identity, along with examinations of the Latin American cultures through in-depth study of literature, sociology, anthropology, economics, and geography. The course will study the commonalities and differences among the peoples and cultures of Latin American and the complex nature of individual, group, national, and international interactions. Students will examine the characteristics that define culture and gain an understanding of the culture of Latin America. Content includes, but is not limited to, interdependence and challenges, culture, international systems and policies, pluralism, transnationalism, cultural diffusion, Latin American economics, human-environment interactions, patterns of language development, poverty, and the effect of change on cultural institutions. Using texts of high complexity, students will develop knowledge of Latin American literature through integrated educational experiences of reading, writing, speaking and analyzing. Emphasis will include representative Latin American literature, with its varied cultural influences, highlighting the major genres, themes, issues, and influences associated with the selections. Other concepts in this class may include indigenous Native American culture prior to the arrival of the Europeans, Spanish heritage, influence and impact of the Catholic Church, evolution of political systems and philosophies in Latin America, Latin American nationalism, and contemporary Latin American affairs.

Course Standards

Name	Description
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.3.10:	Review different economic and philosophic ideologies. Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.3:	Examine causes, course, and consequences of the Spanish American War. Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i> , the <i>Philippines</i> , <i>Commodore Dewey</i> , the <i>Rough Riders</i> , acquisition of territories, the <i>Treaty of Paris</i> . This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.4:	Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction. Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.12:	Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century. Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.16:	Examine changes in immigration policy and attitudes toward immigration since 1950. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.2.4:	Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.
SS.912.C.2.13:	Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal. Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.
SS.912.C.4.1:	Explain how the world's nations are governed differently.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?: (2) How to produce?: and (3) For whom to produce?

SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth. Identify and explain broad economic goals.
SS.912.E.2.1:	Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.7:	Identify the impact of inflation on society. Demonstrate the impact of inflation on world economies.
SS.912.E.3.1:	Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage. Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.
SS.912.E.3.3:	Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.
SS.912.E.3.4:	Assess the economic impact of negative and positive externalities on the international environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.3.5:	Compare the current United States economy with other developed and developing nations. Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.FL.1.2:	Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer. Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.
SS.912.FL.1.5:	Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment. Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.4:	Use geographic terms and tools to analyze case studies of issues in globalization. Clarifications: Examples are cultural imperialism, outsourcing.
SS.912.H.1.1:	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created. Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.
SS.912.H.1.2:	Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens. Clarifications: Examples are imperial Roman sculpture; Palace of Versailles; Picasso's Guernica; layout of Washington, DC.
SS.912.H.1.3:	Relate works in the arts to various cultures. Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.
	Explain philosophical beliefs as they relate to works in the arts.

SS.912.H.1.4:	Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
	Examine artistic response to social issues and new ideas in various cultures.
SS.912.H.1.5:	Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.1.6:	Analyze how current events are explained by artistic and cultural trends of the past.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
	Distinguish methods used to study development.
SS.912.P.6.3:	Clarifications: Examples may include, but are not limited to, cross-sectional research, longitudinal research, data collection, observation, case studies, questionnaires, and experimentation.
	Describe the structure and function of language.
SS.912.P.8.1:	Clarifications: Topics may include, but are not limited to, phoneme, morpheme, and grammar.
SS.912.P.16.11:	Analyze how individualistic and collectivistic cultural perspectives relate to personality.
SS.912.S.1.4:	Examine changing points of view of social issues, such as poverty, crime and discrimination.
SS.912.S.1.6:	Distinguish fact from opinion in data sources to analyze various points of view about a social issue.
SS.912.S.1.8:	Identify, evaluate and use appropriate reference materials and technology to interpret information about cultural life in the United States and other world cultures, both in the past and today.
SS.912.S.2.1:	Define the key components of a culture, such as knowledge, language and communication, customs, values, norms, and physical objects.
SS.912.S.2.2:	Explain the differences between a culture and a society.
SS.912.S.2.3:	Recognize the influences of genetic inheritance and culture on human behavior.
SS.912.S.2.4:	Give examples of subcultures and describe what makes them unique.
SS.912.S.2.5:	Compare social norms among various subcultures.
SS.912.S.2.7:	Explain how various practices of the culture create differences within group behavior.
SS.912.S.2.8:	Compare and contrast different types of societies, such as hunting and gathering, agrarian, industrial, and post-industrial.
SS.912.S.2.9:	Prepare original written and oral reports and presentations on specific events, people or historical eras.
	Describe how social status affects social order.
SS.912.S.3.1:	Clarifications: Examples may include, but are not limited to, upper class, middle class, lower class, professional, blue collar, and unemployed.
	Explain how roles and role expectations can lead to role conflict.
SS.912.S.3.2:	Clarifications: Examples may include, but are not limited to, gender roles, age, racial and ethnic groups within different societies.
SS.912.S.3.3:	Examine and analyze various points of view relating to historical and current events.
SS.912.S.4.1:	Describe how individuals are affected by the different social groups to which they belong.
SS.912.S.4.2:	Identify major characteristics of social groups familiar to the students.
SS.912.S.4.6:	Identify the various types of norms (folkways, mores, laws, and taboos) and explain why these rules of behavior are considered important to society.
SS.912.S.4.12:	Determine the cultural patterns of behavior within such social groups as rural/urban or rich/poor.
	Discuss the concept of political power and factors that influence political power.
SS.912.S.5.2:	Clarifications: Examples may include, but are not limited to, social class, racial and ethnic group memberships, cultural group, gender, and age.
SS.912.S.5.5:	Define ethnocentrism and explain how it can be beneficial or destructive to a culture.
SS.912.S.5.6:	Identify the factors that influence change in social norms over time.
SS.912.S.5.9:	Conduct research and analysis on an issue associated with social structure or social institutions.
SS.912.S.6.1:	Describe how and why societies change over time.
	Examine various social influences that can lead to immediate and long-term changes.
SS.912.S.6.2:	Clarifications: Examples may include, but are not limited to, natural and man-made disasters, spatial movement of people, technology, urbanization, industrialization, immigration, war, challenge to authority, laws, diffusion of cultural traits, discrimination, discoveries and inventions, and scientific exploration.
SS.912.S.6.8:	Investigate the consequences in society as result of changes.
	Describe how social problems have changed over time.
SS.912.S.7.2:	Clarifications: Examples may include, but are not limited to, juvenile delinquency, crime, poverty, and discrimination.
	Explain how patterns of behavior are found with certain social problems.
SS.912.S.7.3:	Clarifications: Examples may include, but are not limited to, juvenile offenses, such as gang membership, crime, sexual behavior, and teen pregnancy, are found in the histories of adult criminals.
	Define propaganda and discuss the methods of propaganda and discuss the methods of propaganda used to influence social behavior.
SS.912.S.8.7:	Clarifications: Examples may include, but are not limited to, news media and advertisements.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.

SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain. Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.4:	Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world. Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America. Describe the causes and effects of post-World War II economic and demographic changes.
SS.912.W.9.2:	Clarifications: Examples are medical and technological advances, free market economics, increased consumption of natural resources and goods, rise in expectations for standards of living.
SS.912.W.9.3:	Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them. Clarifications: Examples are prejudice, racism, stereotyping, economic competition.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. Clarifications: Teachers who encourage students to complete tasks with mathematical fluency: <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.

- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

	9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: American History, Geography, Economics, World History, Humanities, Civics and Government, Psychology, Sociology, and Financial Literacy. The primary content emphasis for this course pertains to the student of the development of the Latin American identity, along with examinations of the Latin American cultures through in-depth study of literature, sociology, anthropology, economics, and geography. The course will study the commonalities and differences among the peoples and cultures of Latin American and the complex nature of individual, group, national, and international interactions. Students will examine the characteristics that define culture and gain an understanding of the culture of Latin America. Content includes, but is not limited to, interdependence and challenges, culture, international systems and policies, pluralism, transnationalism, cultural diffusion, Latin American economics, human-environment interactions, patterns of language development, poverty, and the effect of change on cultural institutions. Using texts of high complexity, students will develop knowledge of Latin American literature through integrated educational experiences of reading, writing, speaking and analyzing. Emphasis will include representative Latin American literature, with its varied cultural influences, highlighting the major genres, themes, issues, and influences associated with the selections. Other concepts in this class may include indigenous Native American culture prior to the arrival of the Europeans, Spanish heritage, influence and impact of the Catholic Church, evolution of political systems and philosophies in Latin America, Latin American nationalism, and contemporary Latin American affairs.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100362

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: American and Western Hemispheric
Histories >

Abbreviated Title: LATIN AMER STUDIES H

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Level: 3

Course Type: Elective Course

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Educator Certifications

Social Science (Grades 6-12)

Latin American Studies Honors (#2100362) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.2:	<p>Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period.</p> <p>Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.</p>
SS.912.A.1.5:	<p>Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources.</p> <p>Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf</p>
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, the <i>Philippines</i>, <i>Commodore Dewey</i>, the <i>Rough Riders</i>, acquisition of territories, the <i>Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.2.4:	<p>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.</p> <ul style="list-style-type: none"> • Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act). • Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good. • Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).
SS.912.CG.2.11:	<p>Evaluate political communication for bias, factual accuracy, omission and emotional appeal.</p> <ul style="list-style-type: none"> • Students will compare the reporting on the same political event or issue from multiple perspectives. • Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies). • Students will discuss the historical impact of political communication on American political process and public opinion.

	<ul style="list-style-type: none"> Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.
SS.912.CG.4.1:	<p>Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.</p> <ul style="list-style-type: none"> Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy). Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism). Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.
SS.912.CG.4.2:	<p>Explain how the United States uses foreign policy to influence other nations.</p> <ul style="list-style-type: none"> Students will explain how the policies of other nations influence U.S. policy and society. Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency). Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International). Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia). Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria). Students will explain the U.S. response to international conflicts.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.CG.4.4:	<p>Identify indicators of democratization in foreign countries.</p> <ul style="list-style-type: none"> Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.
SS.912.E.1.3:	<p>Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?; (2) How to produce?; and (3) For whom to produce?</p>
SS.912.E.1.4:	<p>Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place.</p>
SS.912.E.1.10:	<p>Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.</p>
SS.912.E.2.1:	<p>Identify and explain broad economic goals.</p> <p>Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.</p>
SS.912.E.2.7:	<p>Identify the impact of inflation on society.</p>
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	<p>Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.</p>
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.FL.1.2:	<p>Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer.</p> <p>Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.</p>
SS.912.FL.1.5:	<p>Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment.</p> <p>Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	<p>Describe the factors and processes that contribute to the differences between developing and developed regions of the world.</p> <p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or</p>

SS.912.G.2.3:	political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas. Use geographic terms and tools to analyze case studies of issues in globalization.
SS.912.G.4.4:	Clarifications: Examples are cultural imperialism, outsourcing.
SS.912.H.1.1:	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created. Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.
SS.912.H.1.2:	Describe how historical events, social context, and culture impact forms, techniques, and purposes of works in the arts, including the relationship between a government and its citizens. Clarifications: Examples are imperial Roman sculpture; Palace of Versailles; Picasso's Guernica; layout of Washington, DC.
SS.912.H.1.3:	Relate works in the arts to various cultures. Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.1.6:	Analyze how current events are explained by artistic and cultural trends of the past.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.P.6.3:	Distinguish methods used to study development. Clarifications: Examples may include, but are not limited to, cross-sectional research, longitudinal research, data collection, observation, case studies, questionnaires, and experimentation.
SS.912.P.8.1:	Describe the structure and function of language. Clarifications: Topics may include, but are not limited to, phoneme, morpheme, and grammar.
SS.912.P.16.11:	Analyze how individualistic and collectivistic cultural perspectives relate to personality.
SS.912.S.1.4:	Examine changing points of view of social issues, such as poverty, crime and discrimination.
SS.912.S.1.6:	Distinguish fact from opinion in data sources to analyze various points of view about a social issue.
SS.912.S.1.8:	Identify, evaluate and use appropriate reference materials and technology to interpret information about cultural life in the United States and other world cultures, both in the past and today.
SS.912.S.2.1:	Define the key components of a culture, such as knowledge, language and communication, customs, values, norms, and physical objects.
SS.912.S.2.2:	Explain the differences between a culture and a society.
SS.912.S.2.3:	Recognize the influences of genetic inheritance and culture on human behavior.
SS.912.S.2.4:	Give examples of subcultures and describe what makes them unique.
SS.912.S.2.5:	Compare social norms among various subcultures.
SS.912.S.2.7:	Explain how various practices of the culture create differences within group behavior.
SS.912.S.2.8:	Compare and contrast different types of societies, such as hunting and gathering, agrarian, industrial, and post-industrial.
SS.912.S.2.9:	Prepare original written and oral reports and presentations on specific events, people or historical eras.
SS.912.S.3.1:	Describe how social status affects social order. Clarifications: Examples may include, but are not limited to, upper class, middle class, lower class, professional, blue collar, and unemployed.
SS.912.S.3.2:	Explain how roles and role expectations can lead to role conflict. Clarifications: Examples may include, but are not limited to, gender roles, age, racial and ethnic groups within different societies.
SS.912.S.3.3:	Examine and analyze various points of view relating to historical and current events.
SS.912.S.4.1:	Describe how individuals are affected by the different social groups to which they belong.
SS.912.S.4.2:	Identify major characteristics of social groups familiar to the students.
SS.912.S.4.6:	Identify the various types of norms (folkways, mores, laws, and taboos) and explain why these rules of behavior are considered important to society.
SS.912.S.4.12:	Determine the cultural patterns of behavior within such social groups as rural/urban or rich/poor.
SS.912.S.5.2:	Discuss the concept of political power and factors that influence political power. Clarifications:

	Examples may include, but are not limited to, social class, racial and ethnic group memberships, cultural group, gender, and age.
SS.912.S.5.5:	Define ethnocentrism and explain how it can be beneficial or destructive to a culture.
SS.912.S.5.6:	Identify the factors that influence change in social norms over time.
SS.912.S.5.9:	Conduct research and analysis on an issue associated with social structure or social institutions.
SS.912.S.6.1:	Describe how and why societies change over time.
	Examine various social influences that can lead to immediate and long-term changes.
SS.912.S.6.2:	Clarifications: Examples may include, but are not limited to, natural and man-made disasters, spatial movement of people, technology, urbanization, industrialization, immigration, war, challenge to authority, laws, diffusion of cultural traits, discrimination, discoveries and inventions, and scientific exploration.
SS.912.S.6.8:	Investigate the consequences in society as result of changes.
	Describe how social problems have changed over time.
SS.912.S.7.2:	Clarifications: Examples may include, but are not limited to, juvenile delinquency, crime, poverty, and discrimination.
	Explain how patterns of behavior are found with certain social problems.
SS.912.S.7.3:	Clarifications: Examples may include, but are not limited to, juvenile offenses, such as gang membership, crime, sexual behavior, and teen pregnancy, are found in the histories of adult criminals.
	Define propaganda and discuss the methods of propaganda and discuss the methods of propaganda used to influence social behavior.
SS.912.S.8.7:	Clarifications: Examples may include, but are not limited to, news media and advertisements.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain.
	Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
SS.912.W.5.4:	Evaluate the impact of Enlightenment ideals on the development of economic, political, and religious structures in the Western world.
	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
	Describe the causes and effects of post-World War II economic and demographic changes.
SS.912.W.9.2:	Clarifications: Examples are medical and technological advances, free market economics, increased consumption of natural resources and goods, rise in expectations for standards of living.
	Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.
SS.912.W.9.3:	Clarifications: Examples are prejudice, racism, stereotyping, economic competition.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve.

- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"

	<ul style="list-style-type: none"> Reinforce that students check their work as they progress within and after a task. Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Connect mathematical concepts to everyday experiences. Use models and methods to understand, represent and solve problems. Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> Provide opportunities for students to create models, both concrete and abstract, and perform investigations. Challenge students to question the accuracy of their models and methods. Support students as they validate conclusions by comparing them to the given situation. Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This course consists of the following content area strands: American History, Geography, Economics, World History, Humanities, Civics and Government, Psychology, Sociology, and Financial Literacy. The primary content emphasis for this course pertains to the student of the development of the Latin American identity, along with examinations of the Latin American cultures through in-depth study of literature, sociology, anthropology, economics, and geography. The course will study the commonalities and differences among the peoples and cultures of Latin American and the complex nature of individual, group, national, and international interactions. Students will examine the characteristics that define culture and gain an understanding of the culture of Latin America. Content includes, but is not limited to, interdependence and challenges, culture, international systems and policies, pluralism, transnationalism, cultural diffusion, Latin American economics, human-environment interactions, patterns of language development, poverty, and the effect of change on cultural institutions. Using texts of high complexity, students will develop knowledge of

Latin American literature through integrated educational experiences of reading, writing, speaking and analyzing. Emphasis will include representative Latin American literature, with its varied cultural influences, highlighting the major genres, themes, issues, and influences associated with the selections. Other concepts in this class may include indigenous Native American culture prior to the arrival of the Europeans, Spanish heritage, influence and impact of the Catholic Church, evolution of political systems and philosophies in Latin America, Latin American nationalism, and contemporary Latin American affairs.

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100362

Number of Credits: One (1) credit

Course Type: Elective Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: LATIN AMER STUDIES H

Course Length: Year (Y)

Course Attributes:

- Honors

Course Level: 3

Educator Certifications

Social Science (Grades 6-12)

African History Honors (#2100365) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.G.1.1:	<p>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</p>
SS.912.G.1.2:	<p>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</p>
SS.912.G.1.3:	<p>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</p>
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	<p>Describe the factors and processes that contribute to the differences between developing and developed regions of the world.</p>
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	<p>Interpret population growth and other demographic data for any given place.</p>
SS.912.G.4.2:	<p>Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.</p>
SS.912.G.4.3:	<p>Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.</p>
SS.912.G.4.7:	<p>Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.</p>
SS.912.G.4.9:	<p>Use political maps to describe the change in boundaries and governments within continents over time.</p>
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	<p>Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.</p>
SS.912.H.3.2:	<p>Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.</p>
SS.912.W.1.1:	<p>Use timelines to establish cause and effect relationships of historical events.</p>

	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
	Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.3:	Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.
SS.912.W.3.4:	Describe the expansion of Islam into India and the relationship between Muslims and Hindus.
	Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5:	Clarifications: Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.
	Describe key economic, political, and social developments in Islamic history.
SS.912.W.3.6:	Clarifications: Examples are growth of the caliphate, division of Sunni and Shi'a, role of trade, dhimmitude, Islamic slave trade.
	Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.
SS.912.W.3.7:	Clarifications: Examples are Crusades, Reconquista.
	Trace the growth of major sub-Saharan African kingdoms and empires.
SS.912.W.3.9:	Clarifications: Examples are Ghana, Mali, Songhai.
	Identify key significant economic, political, and social characteristics of Ghana.
SS.912.W.3.10:	Clarifications: Examples are salt and gold trade, taxation system, gold monopoly, matrilineal inheritance, griots, ancestral worship, rise of Islam, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Mali.
SS.912.W.3.11:	Clarifications: Examples are Sundiata, Epic of Sundiata, Mansa Musa, Ibn Battuta, gold mining and salt trade, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Songhai.
SS.912.W.3.12:	Clarifications: Examples are Sunni Ali, Askia Mohammad the Great, gold, salt trade, cowries as a medium of exchange, Sankore University, slavery, professional army, provincial political structure.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
	Examine the internal and external factors that led to the fall of the empires of Ghana, Mali, and Songhai.
SS.912.W.3.14:	Clarifications: Examples are disruption of trade, internal political struggles, Islamic invasions.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
	Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.
SS.912.W.8.10:	Clarifications: Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.
	Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.
SS.912.W.9.1:	Clarifications: Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

SS.912.W.9.3:	<p>Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.</p> <p>Clarifications: Examples are prejudice, racism, stereotyping, economic competition.</p>
SS.912.W.9.4:	<p>Describe the causes and effects of twentieth century nationalist conflicts.</p> <p>Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.</p>
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9-10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9-10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and

	following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.1.1:	Understand statistics as a process for making inferences about population parameters based on a random sample from that population. ★
MAFS.912.S-IC.1.2:	Decide if a specified model is consistent with results from a given data-generating process, e.g., using simulation. <i>For example, a model says a spinning coin falls heads up with probability 0.5. Would a result of 5 tails in a row cause you to question the model</i> ★
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★
	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★
MAFS.912.S-ID.1.1:	<p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★
MAFS.912.S-ID.1.2:	<p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★
MAFS.912.S-ID.1.3:	<p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★
MAFS.912.S-ID.2.5:	Summarize categorical data for two categories in two-way frequency tables. Interpret relative frequencies in the context of the data (including joint, marginal, and conditional relative frequencies). Recognize possible associations and trends in the data. ★
	Represent data on two quantitative variables on a scatter plot, and describe how the variables are related. ★
	<ol style="list-style-type: none"> Fit a function to the data; use functions fitted to data to solve problems in the context of the data. <i>Use given functions or choose a function suggested by the context. Emphasize linear, and exponential models.</i> Informally assess the fit of a function by plotting and analyzing residuals. Fit a linear function for a scatter plot that suggests a linear association.
MAFS.912.S-ID.2.6:	<p>Clarifications: Students take a more sophisticated look at using a linear function to model the relationship between two numerical variables. In addition to fitting a line to data, students assess how well the model fits by analyzing residuals.</p>
MAFS.912.S-ID.3.7:	Interpret the slope (rate of change) and the intercept (constant term) of a linear model in the context of the data. ★
MAFS.912.S-ID.3.8:	Compute (using technology) and interpret the correlation coefficient of a linear fit. ★
MAFS.912.S-ID.3.9:	Distinguish between correlation and causation. ★
	Make sense of problems and persevere in solving them.
	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.1.1:	
	Construct viable arguments and critique the reasoning of others.
	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.3.1:	
	Use appropriate tools strategically.
	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software.

MAFS.K12.MP.5.1:	Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting. Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

The grade 9-12 African History Honors course consists of the following content area strands: World History, American History, Geography, Economics and Humanities. The primary content emphasis for this course pertains to the study of the chronological development of Africa by examining the political, economic, social, religious, military and cultural events that affected the continent. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of the continent including, but not limited to, the physical geography of Africa, prehistory on the African continent, early African civilizations and empires, traditional African religious tradition and cultures, colonialism in Africa, the evolution of political systems and philosophies in African societies and nations, African independence movements and nationalism, major historical figures and events in African history, and contemporary African affairs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance: Social studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts and graphs.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section: Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100365

Number of Credits: Half credit (.5)

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: AFRICAN HISTORY HON

Course Length: Semester (S)

Course Attributes:

- Honors

Course Type: Elective Course
Course Status: Course Approved
Grade Level(s): 9,10,11,12

Course Level: 3

Educator Certifications

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

African History Honors (#2100365) 2022 - And Beyond

Course Standards

Name	Description
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.G.1.1:	<p>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</p>
SS.912.G.1.2:	<p>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</p>
SS.912.G.1.3:	<p>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</p>
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	<p>Describe the factors and processes that contribute to the differences between developing and developed regions of the world.</p>
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	<p>Interpret population growth and other demographic data for any given place.</p>
SS.912.G.4.2:	<p>Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.</p>
SS.912.G.4.3:	<p>Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.</p>
SS.912.G.4.7:	<p>Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.</p>
SS.912.G.4.9:	<p>Use political maps to describe the change in boundaries and governments within continents over time.</p>
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	<p>Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.</p>
SS.912.H.3.2:	<p>Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.</p>
SS.912.W.1.1:	<p>Use timelines to establish cause and effect relationships of historical events.</p>

	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
	Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.3:	Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.
SS.912.W.3.4:	Describe the expansion of Islam into India and the relationship between Muslims and Hindus.
	Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5:	Clarifications: Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.
	Describe key economic, political, and social developments in Islamic history.
SS.912.W.3.6:	Clarifications: Examples are growth of the caliphate, division of Sunni and Shi'a, role of trade, dhimmitude, Islamic slave trade.
	Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century.
SS.912.W.3.7:	Clarifications: Examples are Crusades, Reconquista.
	Trace the growth of major sub-Saharan African kingdoms and empires.
SS.912.W.3.9:	Clarifications: Examples are Ghana, Mali, Songhai.
	Identify key significant economic, political, and social characteristics of Ghana.
SS.912.W.3.10:	Clarifications: Examples are salt and gold trade, taxation system, gold monopoly, matrilineal inheritance, griots, ancestral worship, rise of Islam, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Mali.
SS.912.W.3.11:	Clarifications: Examples are Sundiata, Epic of Sundiata, Mansa Musa, Ibn Battuta, gold mining and salt trade, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Songhai.
SS.912.W.3.12:	Clarifications: Examples are Sunni Ali, Askia Mohammad the Great, gold, salt trade, cowries as a medium of exchange, Sankore University, slavery, professional army, provincial political structure.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
	Examine the internal and external factors that led to the fall of the empires of Ghana, Mali, and Songhai.
SS.912.W.3.14:	Clarifications: Examples are disruption of trade, internal political struggles, Islamic invasions.
SS.912.W.4.12:	Evaluate the scope and impact of the Columbian Exchange on Europe, Africa, Asia, and the Americas.
SS.912.W.4.14:	Recognize the practice of slavery and other forms of forced labor experienced during the 13th through 17th centuries in East Africa, West Africa, Europe, Southwest Asia, and the Americas.
SS.912.W.4.15:	Explain the origins, developments, and impact of the trans-Atlantic slave trade between West Africa and the Americas.
	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
	Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.
SS.912.W.8.10:	Clarifications: Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.
	Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.
SS.912.W.9.1:	Clarifications: Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

SS.912.W.9.3:	<p>Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.</p> <p>Clarifications: Examples are prejudice, racism, stereotyping, economic competition.</p>
SS.912.W.9.4:	<p>Describe the causes and effects of twentieth century nationalist conflicts.</p> <p>Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.</p>
MA.K12.MTR.1.1:	<p>Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.</p> <p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts.</p> <p>Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts. Relate previously learned concepts to new concepts.

MA.K12.MTR.5.1:

- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

ELA.K12.EE.1.1:

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.2.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.

ELA.K12.EE.5.1:

	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

The grade 9-12 African History Honors course consists of the following content area strands: World History, American History, Geography, Economics and Humanities. The primary content emphasis for this course pertains to the study of the chronological development of Africa by examining the political, economic, social, religious, military and cultural events that affected the continent. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of the continent including, but not limited to, the physical geography of Africa, prehistory on the African continent, early African civilizations and empires, traditional African religious tradition and cultures, colonialism in Africa, the evolution of political systems and philosophies in African societies and nations, African independence movements and nationalism, major historical figures and events in African history, and contemporary African affairs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section: Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100365	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: American and Western Hemispheric Histories >
Number of Credits: Half credit (.5)	Abbreviated Title: AFRICAN HISTORY HON
Course Type: Elective Course	Course Length: Semester (S)
Course Status: State Board Approved	Course Attributes:
Grade Level(s): 9,10,11,12	<ul style="list-style-type: none"> • Honors
	Course Level: 3

Educator Certifications

Social Science (Grades 5-9)
History (Grades 6-12)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.

SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.1:	Locate the extent of Byzantine territory at the height of the empire.
SS.912.W.2.2:	Describe the impact of Constantine the Great's establishment of "New Rome" (Constantinople) and his recognition of Christianity as a legal religion.
SS.912.W.2.3:	Analyze the extent to which the Byzantine Empire was a continuation of the old Roman Empire and in what ways it was a departure. Identify key figures associated with the Byzantine Empire.
SS.912.W.2.4:	Clarifications: Examples are Justinian the Great, Theodora, Belisarius, John of Damascus, Anna Comnena, Cyril and Methodius. Explain the contributions of the Byzantine Empire.
SS.912.W.2.5:	Clarifications: Examples are Justinian's Code, the preservation of ancient Greek and Roman learning and culture, artistic and architectural achievements, the empire's impact on the development of Western Europe, Islamic civilization, and Slavic peoples.
SS.912.W.2.6:	Describe the causes and effects of the Iconoclast controversy of the 8th and 9th centuries and the 11th century Christian schism between the churches of Constantinople and Rome.
SS.912.W.2.7:	Analyze causes (Justinian's Plague, ongoing attacks from the "barbarians," the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.
SS.912.W.2.8:	Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman empire under the sultanate including Mehmet the Conqueror and Suleyman the Magnificent.
SS.912.W.2.9:	Analyze the impact of the collapse of the Western Roman Empire on Europe.
SS.912.W.2.10:	Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.
SS.912.W.2.11:	Describe the rise and achievements of significant rulers in medieval Europe. Clarifications: Examples are Charles Martel, Charlemagne, Otto the Great, William the Conqueror.
SS.912.W.2.12:	Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.14:	Describe the causes and effects of the Great Famine of 1315-1316, The Black Death, The Great Schism of 1378, and the Hundred Years War on Western Europe. Determine the factors that contributed to the growth of a modern economy.
SS.912.W.2.15:	Clarifications: Examples are growth of banking, technological and agricultural improvements, commerce, towns, guilds, rise of a merchant class.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain. Identify key figures, artistic, and intellectual achievements of the medieval period in Western Europe.
SS.912.W.2.17:	Clarifications: Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.
SS.912.W.2.18:	Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures. Clarifications: Examples are Magna Carta, parliament, habeas corpus.
SS.912.W.2.19:	Describe the impact of Japan's physiography on its economic and political development. Summarize the major cultural, economic, political, and religious developments in medieval Japan.
SS.912.W.2.20:	Clarifications: Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.
SS.912.W.2.21:	Compare Japanese feudalism with Western European feudalism during the Middle Ages.
SS.912.W.2.22:	Describe Japan's cultural and economic relationship to China and Korea. Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.3:	Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.
SS.912.W.3.4:	Describe the expansion of Islam into India and the relationship between Muslims and Hindus. Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5:	Clarifications: Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.
SS.912.W.3.6:	Describe key economic, political, and social developments in Islamic history. Clarifications: Examples are growth of the caliphate, division of Sunni and Shi'a, role of trade, dhimmitude, Islamic slave trade.
SS.912.W.3.7:	Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century. Clarifications: Examples are Crusades, Reconquista.

	Identify important figures associated with the Crusades.
SS.912.W.3.8:	Clarifications: Examples are Alexius Comnenus, Pope Urban, Bernard of Clairvaux, Godfrey of Bouillon, Saladin, Richard the Lionheart, Baybars, Louis IX.
	Trace the growth of major sub-Saharan African kingdoms and empires.
SS.912.W.3.9:	Clarifications: Examples are Ghana, Mali, Songhai.
	Identify key significant economic, political, and social characteristics of Ghana.
SS.912.W.3.10:	Clarifications: Examples are salt and gold trade, taxation system, gold monopoly, matrilineal inheritance, griots, ancestral worship, rise of Islam, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Mali.
SS.912.W.3.11:	Clarifications: Examples are Sundiata, Epic of Sundiata, Mansa Musa, Ibn Battuta, gold mining and salt trade, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Songhai.
SS.912.W.3.12:	Clarifications: Examples are Sunni Ali, Askia Mohammad the Great, gold, salt trade, cowries as a medium of exchange, Sankore University, slavery, professional army, provincial political structure.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
	Examine the internal and external factors that led to the fall of the empires of Ghana, Mali, and Songhai.
SS.912.W.3.14:	Clarifications: Examples are disruption of trade, internal political struggles, Islamic invasions.
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations.
	Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	Clarifications: Examples are Maya, Aztec, Inca.
	Describe the roles of people in the Maya, Inca, and Aztec societies.
SS.912.W.3.17:	Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.
	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America.
SS.912.W.3.18:	Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.1:	Identify the economic and political causes for the rise of the Italian city-states (Florence, Milan, Naples, Rome, Venice).
SS.912.W.4.2:	Recognize major influences on the architectural, artistic, and literary developments of Renaissance Italy (Classical, Byzantine, Islamic, Western European).
	Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.
SS.912.W.4.3:	Clarifications: Examples are Petrarch, Brunelleschi, Giotto, the Medici Family, Michelangelo, Leonardo da Vinci, Erasmus, Thomas More, Machiavelli, Shakespeare, Gutenberg, El Greco, Artemisia Gentileschi, Van Eyck.
	Identify characteristics of Renaissance humanism in works of art.
SS.912.W.4.4:	Clarifications: Examples are influence of classics, School of Athens.
SS.912.W.4.5:	Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.
SS.912.W.4.6:	Describe how scientific theories and methods of the Scientific Revolution challenged those of the early classical and medieval periods.
SS.912.W.4.7:	Identify criticisms of the Roman Catholic Church by individuals such as Wycliffe, Hus and Erasmus and their impact on later reformers.
	Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.
SS.912.W.4.8:	Clarifications: Examples are Catholic and Counter Reformation, political and religious fragmentation, military conflict, expansion of capitalism.
	Analyze the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation.
SS.912.W.4.9:	Clarifications: Examples are Council of Trent, Thomas More, Ignatius of Loyola and the Jesuits, Teresa of Avila, Charles V.
	Identify the major contributions of individuals associated with the Scientific Revolution.
SS.912.W.4.10:	Clarifications: Examples are Francis Bacon, Nicholas Copernicus, Rene Descartes, Galileo Galilei, Johannes Kepler, Isaac Newton, Blaise Pascal, Vesalius.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. <ul style="list-style-type: none"> a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting

MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Eastern and Western Heritage - The grade 9-12 Eastern and Western Heritage course consists of the following content area strands: World History, American History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the world's earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Content will include, but is not limited to, the birth of civilizations throughout the world, including the origins of societies from Mesopotamia,

Africa, China, India, and Mesoamerica from the perspective of cultural geography, growth, dissemination, and decline of four classic civilizations of India, China, Greece, and Rome, the role of isolation and interaction in the development of the Byzantine Empire, African and Mesoamerican civilizations, India, China, Japan, and Europe, and the emergence of social, political, economic, and religious institutions and ideas.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

GENERAL INFORMATION

Course Number: 2100370

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: World and Eastern Hemispheric Histories >

Abbreviated Title: EAST & WEST HERITAGE

Course Length: Year (Y)

Course Level: 2

Number of Credits: One (1) credit

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Eastern and Western Heritage (#2100370) 2022 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.

SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.1:	Locate the extent of Byzantine territory at the height of the empire.
SS.912.W.2.2:	Describe the impact of Constantine the Great's establishment of "New Rome" (Constantinople) and his recognition of Christianity as a legal religion.
SS.912.W.2.3:	Analyze the extent to which the Byzantine Empire was a continuation of the old Roman Empire and in what ways it was a departure. Identify key figures associated with the Byzantine Empire.
SS.912.W.2.4:	Clarifications: Examples are Justinian the Great, Theodora, Belisarius, John of Damascus, Anna Comnena, Cyril and Methodius. Explain the contributions of the Byzantine Empire.
SS.912.W.2.5:	Clarifications: Examples are Justinian's Code, the preservation of ancient Greek and Roman learning and culture, artistic and architectural achievements, the empire's impact on the development of Western Europe, Islamic civilization, and Slavic peoples.
SS.912.W.2.6:	Describe the causes and effects of the Iconoclast controversy of the 8th and 9th centuries and the 11th century Christian schism between the churches of Constantinople and Rome.
SS.912.W.2.7:	Analyze causes (Justinian's Plague, ongoing attacks from the "barbarians," the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.
SS.912.W.2.8:	Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman empire under the sultanate including Mehmet the Conqueror and Suleyman the Magnificent.
SS.912.W.2.9:	Analyze the impact of the collapse of the Western Roman Empire on Europe.
SS.912.W.2.10:	Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.
SS.912.W.2.11:	Describe the rise and achievements of significant rulers in medieval Europe. Clarifications: Examples are Charles Martel, Charlemagne, Otto the Great, William the Conqueror.
SS.912.W.2.12:	Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.14:	Describe the causes and effects of the Great Famine of 1315-1316, The Black Death, The Great Schism of 1378, and the Hundred Years War on Western Europe. Determine the factors that contributed to the growth of a modern economy.
SS.912.W.2.15:	Clarifications: Examples are growth of banking, technological and agricultural improvements, commerce, towns, guilds, rise of a merchant class.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain. Identify key figures, artistic, and intellectual achievements of the medieval period in Western Europe.
SS.912.W.2.17:	Clarifications: Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.
SS.912.W.2.18:	Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures. Clarifications: Examples are Magna Carta, parliament, habeas corpus.
SS.912.W.2.19:	Describe the impact of Japan's physiography on its economic and political development. Summarize the major cultural, economic, political, and religious developments in medieval Japan.
SS.912.W.2.20:	Clarifications: Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.
SS.912.W.2.21:	Compare Japanese feudalism with Western European feudalism during the Middle Ages.
SS.912.W.2.22:	Describe Japan's cultural and economic relationship to China and Korea. Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.3:	Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.
SS.912.W.3.4:	Describe the expansion of Islam into India and the relationship between Muslims and Hindus. Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5:	Clarifications: Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.
SS.912.W.3.6:	Describe key economic, political, and social developments in Islamic history. Clarifications: Examples are growth of the caliphate, division of Sunni and Shi'a, role of trade, dhimmitude, Islamic slave trade.
SS.912.W.3.7:	Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century. Clarifications: Examples are Crusades, Reconquista.

	Identify important figures associated with the Crusades.
SS.912.W.3.8:	Clarifications: Examples are Alexius Comnenus, Pope Urban, Bernard of Clairvaux, Godfrey of Bouillon, Saladin, Richard the Lionheart, Baybars, Louis IX.
	Trace the growth of major sub-Saharan African kingdoms and empires.
SS.912.W.3.9:	Clarifications: Examples are Ghana, Mali, Songhai.
	Identify key significant economic, political, and social characteristics of Ghana.
SS.912.W.3.10:	Clarifications: Examples are salt and gold trade, taxation system, gold monopoly, matrilineal inheritance, griots, ancestral worship, rise of Islam, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Mali.
SS.912.W.3.11:	Clarifications: Examples are Sundiata, Epic of Sundiata, Mansa Musa, Ibn Battuta, gold mining and salt trade, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Songhai.
SS.912.W.3.12:	Clarifications: Examples are Sunni Ali, Askia Mohammad the Great, gold, salt trade, cowries as a medium of exchange, Sankore University, slavery, professional army, provincial political structure.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
	Examine the internal and external factors that led to the fall of the empires of Ghana, Mali, and Songhai.
SS.912.W.3.14:	Clarifications: Examples are disruption of trade, internal political struggles, Islamic invasions.
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations.
	Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	Clarifications: Examples are Maya, Aztec, Inca.
	Describe the roles of people in the Maya, Inca, and Aztec societies.
SS.912.W.3.17:	Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.
	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America.
SS.912.W.3.18:	Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.1:	Identify the economic and political causes for the rise of the Italian city-states (Florence, Milan, Naples, Rome, Venice).
SS.912.W.4.2:	Recognize major influences on the architectural, artistic, and literary developments of Renaissance Italy (Classical, Byzantine, Islamic, Western European).
	Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.
SS.912.W.4.3:	Clarifications: Examples are Petrarch, Brunelleschi, Giotto, the Medici Family, Michelangelo, Leonardo da Vinci, Erasmus, Thomas More, Machiavelli, Shakespeare, Gutenberg, El Greco, Artemisia Gentileschi, Van Eyck.
	Identify characteristics of Renaissance humanism in works of art.
SS.912.W.4.4:	Clarifications: Examples are influence of classics, School of Athens.
SS.912.W.4.5:	Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.
SS.912.W.4.6:	Describe how scientific theories and methods of the Scientific Revolution challenged those of the early classical and medieval periods.
SS.912.W.4.7:	Identify criticisms of the Roman Catholic Church by individuals such as Wycliffe, Hus and Erasmus and their impact on later reformers.
	Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.
SS.912.W.4.8:	Clarifications: Examples are Catholic and Counter Reformation, political and religious fragmentation, military conflict, expansion of capitalism.
	Analyze the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation.
SS.912.W.4.9:	Clarifications: Examples are Council of Trent, Thomas More, Ignatius of Loyola and the Jesuits, Teresa of Avila, Charles V.
	Identify the major contributions of individuals associated with the Scientific Revolution.
SS.912.W.4.10:	Clarifications: Examples are Francis Bacon, Nicholas Copernicus, Rene Descartes, Galileo Galilei, Johannes Kepler, Isaac Newton, Blaise Pascal, Vesalius.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	<ul style="list-style-type: none"> • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Eastern and Western Heritage - The grade 9-12 Eastern and Western Heritage course consists of the following content area strands: World History, American History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the world's earliest civilizations to the ancient and classical civilizations

of Africa, Asia, and Europe. Content will include, but is not limited to, the birth of civilizations throughout the world, including the origins of societies from Mesopotamia, Africa, China, India, and Mesoamerica from the perspective of cultural geography, growth, dissemination, and decline of four classic civilizations of India, China, Greece, and Rome, the role of isolation and interaction in the development of the Byzantine Empire, African and Mesoamerican civilizations, India, China, Japan, and Europe, and the emergence of social, political, economic, and religious institutions and ideas.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100370	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: World and Eastern Hemispheric Histories >
Number of Credits: One (1) credit	Abbreviated Title: EAST & WEST HERITAGE
Course Type: Elective Course	Course Length: Year (Y)
Course Status: State Board Approved	Course Level: 2
Grade Level(s): 9,10,11,12	

Educator Certifications

History (Grades 6-12)
Social Science (Grades 6-12)

Visions and Their Pursuits: An American Tradition- U.S. History to 1920 (#2100380) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found</p>

	on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.3:	<p>Examine the impact of United States foreign economic policy during the 1920s.</p> <p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the</p>

SS.912.A.5.5:	Nobel Prize. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.6:	Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.8:	Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.9:	Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas. Clarifications: Examples may include, but are not limited to, 100 Percent Americanism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.11:	Examine causes, course, and consequences of the Great Depression and the New Deal. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.12:	Examine key events and people in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.1.1:	Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.
SS.912.C.1.2:	Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.
SS.912.C.1.3:	Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.
SS.912.C.1.4:	Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.
SS.912.C.1.5:	Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.
SS.912.C.3.2:	Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.
SS.912.C.3.3:	Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.
SS.912.C.3.4:	Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.
SS.912.C.3.5:	Identify the impact of independent regulatory agencies in the federal bureaucracy. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.
SS.912.C.3.6:	Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting Make sense of problems and persevere in solving them.

MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Visions and Their Pursuits: An American Tradition-U.S.History to 1920 - The grade 9-12 Visions and Their Pursuits course consists of the following content area strands: World History, American History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of the United States during the period of European exploration through World War I and the collective vision of historical time periods. Content will include, but is not limited to, the foundation and early development of the United States as organized by the visions of those who participated in the revolutions leading to the establishment and early success of the United States, the political, social, cultural, intellectual, and technological revolutions of the United States, the structure and function of political divisions, the organization of the federal government as outlined in the U.S. Constitution, the impact of economic, social, and political changes on traditional American values, reactions to changes, and growth of sectionalism, the failure of previous visions, and the emergence of an industrial, urban and pluralistic society that demands new visions to carry the nation forward.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.

5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100380

Number of Credits: One (1) credit

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric

Histories >

Abbreviated Title: VISIONS & PURSUITS

Course Length: Year (Y)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Visions and Their Pursuits: An American Tradition- U.S. History to 1920 (#2100380) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found</p>

	on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.3:	<p>Examine the impact of United States foreign economic policy during the 1920s.</p> <p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the</p>

SS.912.A.5.5:	Nobel Prize. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.6:	Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.8:	Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.9:	Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas. Clarifications: Examples may include, but are not limited to, 100 Percent Americanism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.11:	Examine causes, course, and consequences of the Great Depression and the New Deal. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.12:	Examine key events and people in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.1.1:	Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.
SS.912.C.1.2:	Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.
SS.912.C.1.3:	Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.
SS.912.C.1.4:	Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.
SS.912.C.1.5:	Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.
SS.912.C.3.2:	Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.
SS.912.C.3.3:	Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.
SS.912.C.3.4:	Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.
SS.912.C.3.5:	Identify the impact of independent regulatory agencies in the federal bureaucracy. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.
SS.912.C.3.6:	Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses.

- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.

	<ul style="list-style-type: none"> Indicate how various concepts can be applied to other disciplines.
ELA.K.12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Visions and Their Pursuits: An American Tradition-U.S.History to 1920 - The grade 9-12 Visions and Their Pursuits course consists of the following content area strands: World History, American History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of the United States during the period of European exploration through World War I and the collective vision of historical time periods. Content will include, but is not limited to, the foundation and early development of the United States as organized by the visions of those who participated in the revolutions leading to the establishment and early success of the United States, the political, social, cultural, intellectual, and technological revolutions of the United States, the structure and function of political divisions, the organization of the federal government as outlined in the U.S. Constitution, the impact of economic, social, and political changes on traditional American values, reactions to changes, and growth of sectionalism, the failure of previous visions, and the emergence of an industrial, urban and pluralistic society that demands new visions to carry the nation forward.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.

5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100380

Course Path: Section: Grades PreK to 12 Education
Courses > **Grade Group:** Grades 9 to 12 and Adult
Education Courses > **Subject:** Social Studies >
SubSubject: American and Western Hemispheric
Histories >

Number of Credits: One (1) credit

Abbreviated Title: VISIONS & PURSUITS

Course Type: Elective Course

Course Length: Year (Y)

Course Status: State Board Approved

Course Level: 2

Grade Level(s): 9,10,11,12

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Visions and Their Pursuits: An American Tradition- U.S. History to 1920 (#2100380) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found</p>

	on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.3:	<p>Examine the impact of United States foreign economic policy during the 1920s.</p> <p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the</p>

SS.912.A.5.5:	<p>Nobel Prize.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.11:	<p>Examine causes, course, and consequences of the Great Depression and the New Deal.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.12:	<p>Examine key events and people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.1.2:	<p>Explain the influence of Enlightenment ideas on the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract. Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence. Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.
SS.912.CG.1.3:	<p>Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.</p> <ul style="list-style-type: none"> Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens. Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.
SS.912.CG.1.4:	<p>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.</p> <ul style="list-style-type: none"> Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States. Students will evaluate how the documents are connected to one another. Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10, No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution. Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).
	<p>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and</p>

SS.912.CG.1.5:	<p>separation of powers.</p> <ul style="list-style-type: none"> • Students will explain how the structure and function of the U.S. government reflects these political principles. • Students will differentiate between republicanism and democracy, and discuss how the United States reflects both. • Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).
SS.912.CG.3.3:	<p>Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate. • Students will identify the methods for determining the number of members in the House of Representatives and the Senate. • Students will identify and describe the “enumerated powers” delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws). • Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government. • Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).
SS.912.CG.3.4:	<p>Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will explain the qualifications one must have to seek the office of president and the process of presidential elections. • Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law). • Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government. • Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II. • Students will describe the impeachment process.
SS.912.CG.3.5:	<p>Describe how independent regulatory agencies interact with the three branches of government and with citizens.</p> <ul style="list-style-type: none"> • Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect. • Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.
SS.912.CG.3.7:	<p>Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.</p> <ul style="list-style-type: none"> • Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government. • Students will describe the role of the Supreme Court and lesser federal courts. • Students will explain what Article III says about judicial tenure, appointment and salaries. • Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.
SS.912.CG.3.12:	<p>Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.</p> <ul style="list-style-type: none"> • Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government. • Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states. • Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition). • Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	<p>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</p>
SS.912.W.1.6:	<p>Evaluate the role of history in shaping identity and character.</p> <p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.11:	<p>Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Visions and Their Pursuits: An American Tradition-U.S.History to 1920 - The grade 9-12 Visions and Their Pursuits course consists of the following content area strands: World History, American History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of the United States during the period of European exploration through World War I and the collective vision of historical time periods. Content will include, but is not limited to, the foundation and early development of the United States as organized by the visions of those who participated in the revolutions leading to the establishment and early success of the United States, the political, social, cultural, intellectual, and technological revolutions of the United States, the structure and function of political divisions, the organization of the federal government as outlined in the U.S. Constitution, the impact of economic, social, and political changes on traditional American values, reactions to changes, and growth of sectionalism, the failure of previous visions, and the emergence of an industrial, urban and pluralistic society that demands new visions to carry the nation forward.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100380	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: American and Western Hemispheric Histories >
Number of Credits: One (1) credit	Abbreviated Title: VISIONS & PURSUITS
Course Type: Elective Course	Course Length: Year (Y)
Course Status: Draft - Course Pending Approval	Course Level: 2
Grade Level(s): 9,10,11,12	

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

The History of The Vietnam War (#2100400) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.11:	Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.13:	Analyze significant foreign policy events during the Truman, Eisenhower, Kennedy, Johnson, and Nixon administrations. Clarifications: Examples may include, but are not limited to, the Domino Theory, Sputnik, space race, Korean Conflict, Vietnam Conflict, U-2 and Gary Powers, Bay of Pigs invasion, Cuban Missile Crisis, Berlin Wall, Ping Pong Diplomacy, opening of China. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.14:	Analyze causes, course, and consequences of the Vietnam War. Clarifications: Examples may include, but are not limited to, Geneva Accords, Gulf of Tonkin Resolution, the draft, escalating protest at home, Vietnamization, the War Powers Act. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.15:	Examine key events and peoples in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Mosquito Fleet, "Double V Campaign", construction of military bases and WWII training centers, 1959 Cuban coup and its impact on Florida, development of the space program and NASA. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.1:	Identify causes for Post-World War II prosperity and its effects on American society. Clarifications: Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

	Compare the relative prosperity between different ethnic groups and social classes in the post-World War II period.
SS.912.A.7.2:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine the changing status of women in the United States from post-World War II to present.
SS.912.A.7.3:	<p>Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i>, National Organization for Women, <i>Roe v. Wade</i>, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Evaluate the success of 1960s era presidents' foreign and domestic policies.
SS.912.A.7.4:	<p>Clarifications: Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.
	Analyze the significance of Vietnam and Watergate on the government and people of the United States.
SS.912.A.7.10:	<p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances.</p> <p>Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.
SS.912.A.7.11:	<p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.
SS.912.A.7.12:	<p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).
SS.912.A.7.14:	<p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine changes in immigration policy and attitudes toward immigration since 1950.
SS.912.A.7.16:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	Examine key events and key people in Florida history as they relate to United States history.
SS.912.A.7.17:	<p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.4:	Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.

SS.912.C.4.1:	Explain how the world's nations are governed differently.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.G.5.3:	Analyze case studies of the effects of human use of technology on the environment of places.
SS.912.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time.
SS.912.H.1.1:	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created. Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.
SS.912.H.1.3:	Relate works in the arts to various cultures. Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.6.3:	Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.

LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task. Write arguments focused on <i>discipline-specific content</i> . a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.1:	
LAFS.910.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the

MAFS.K12.MP.1.1:	original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
Construct viable arguments and critique the reasoning of others.	
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
Use appropriate tools strategically.	
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
Attend to precision.	
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

The History of Vietnam - The grade 9-12 The History of Vietnam course consists of the following content area strands: United States History, World History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the chronological development of the Vietnam War by examining the political, economic, social, religious, military and cultural events that affected the war. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of the war including, but not limited to, an analysis of the United States military effort and makeup in the war, an evaluation of the role of the United States homefront, interpretations of the effects of the media, film and literature during and after the war, a judgment of crucial decisions made during the Vietnam War and an analysis of the resulting impact of the conflict.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled

course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100400

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: HIST OF VIETNAM WAR

Course Length: Semester (S)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

The History of The Vietnam War (#2100400) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.11:	Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.13:	Analyze significant foreign policy events during the Truman, Eisenhower, Kennedy, Johnson, and Nixon administrations. Clarifications: Examples may include, but are not limited to, the Domino Theory, Sputnik, space race, Korean Conflict, Vietnam Conflict, U-2 and Gary Powers, Bay of Pigs invasion, Cuban Missile Crisis, Berlin Wall, Ping Pong Diplomacy, opening of China. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.14:	Analyze causes, course, and consequences of the Vietnam War. Clarifications: Examples may include, but are not limited to, Geneva Accords, Gulf of Tonkin Resolution, the draft, escalating protest at home, Vietnamization, the War Powers Act. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.15:	Examine key events and peoples in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Mosquito Fleet, "Double V Campaign", construction of military bases and WWII training centers, 1959 Cuban coup and its impact on Florida, development of the space program and NASA. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.1:	Identify causes for Post-World War II prosperity and its effects on American society. Clarifications: Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

	Compare the relative prosperity between different ethnic groups and social classes in the post-World War II period.
SS.912.A.7.2:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.3:	<p>Examine the changing status of women in the United States from post-World War II to present.</p> <p>Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i>, National Organization for Women, <i>Roe v. Wade</i>, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.4:	<p>Evaluate the success of 1960s era presidents' foreign and domestic policies.</p> <p>Clarifications: Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.
SS.912.A.7.10:	<p>Analyze the significance of Vietnam and Watergate on the government and people of the United States.</p> <p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances. Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.4:	Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.
SS.912.C.4.1:	Explain how the world's nations are governed differently.

SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.G.5.3:	Analyze case studies of the effects of human use of technology on the environment of places.
SS.912.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time.
SS.912.H.1.1:	Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created. Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.
SS.912.H.1.3:	Relate works in the arts to various cultures. Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.
SS.912.H.1.5:	Examine artistic response to social issues and new ideas in various cultures. Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.6.3:	Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
	Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency: <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context.

MA.K12.MTR.3.1:

- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

ELA.K.12.EE.1.1:	<p>2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.</p> <p>4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.</p> <p>6-8 Students continue with previous skills and use a style guide to create a proper citation.</p> <p>9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

The History of Vietnam - The grade 9-12 The History of Vietnam course consists of the following content area strands: United States History, World History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the chronological development of the Vietnam War by examining the political, economic, social, religious, military and cultural events that affected the war. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of the war including, but not limited to, an analysis of the United States military effort and makeup in the war, an evaluation of the role of the United States homefront, interpretations of the effects of the media, film and literature during and after the war, a judgment of crucial decisions made during the Vietnam War and an analysis of the resulting impact of the conflict.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100400	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: American and Western Hemispheric Histories >
Number of Credits: Half credit (.5)	Abbreviated Title: HIST OF VIETNAM WAR
Course Type: Elective Course	Course Length: Semester (S)
Course Status: State Board Approved	Course Level: 2
Grade Level(s): 9,10,11,12	

Educator Certifications

History (Grades 6-12)
Social Science (Grades 6-12)

The History of The Vietnam War (#2100400) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.11:	Examine the controversy surrounding the proliferation of nuclear technology in the United States and the world. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.13:	Analyze significant foreign policy events during the Truman, Eisenhower, Kennedy, Johnson, and Nixon administrations. Clarifications: Examples may include, but are not limited to, the Domino Theory, Sputnik, space race, Korean Conflict, Vietnam Conflict, U-2 and Gary Powers, Bay of Pigs invasion, Cuban Missile Crisis, Berlin Wall, Ping Pong Diplomacy, opening of China. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.14:	Analyze causes, course, and consequences of the Vietnam War. Clarifications: Examples may include, but are not limited to, Geneva Accords, Gulf of Tonkin Resolution, the draft, escalating protest at home, Vietnamization, the War Powers Act. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 45-46. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.15:	Examine key events and peoples in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Mosquito Fleet, "Double V Campaign", construction of military bases and WWII training centers, 1959 Cuban coup and its impact on Florida, development of the space program and NASA. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.1:	Identify causes for Post-World War II prosperity and its effects on American society. Clarifications: Examples may include, but are not limited to, G.I. Bill, Baby Boom, growth of suburbs, Beatnik movement, youth culture, religious revivalism (e.g., Billy Graham and Bishop Fulton J. Sheen), conformity of the 1950s and the protest in the 1960s. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.

SS.912.A.7.2:	<p>Compare the relative prosperity between different ethnic groups and social classes in the post-World War II period.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.3:	<p>Examine the changing status of women in the United States from post-World War II to present.</p> <p>Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i>, National Organization for Women, <i>Roe v. Wade</i>, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.4:	<p>Evaluate the success of 1960s era presidents' foreign and domestic policies.</p> <p>Clarifications: Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.10:	<p>Analyze the significance of Vietnam and Watergate on the government and people of the United States.</p> <p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances. Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.</p>

SS.912.CG.2.4:	<ul style="list-style-type: none"> Students will examine situations when individuals' rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act). Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good. Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).
SS.912.CG.4.1:	<p>Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.</p> <ul style="list-style-type: none"> Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy). Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism). Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.
SS.912.CG.4.2:	<p>Explain how the United States uses foreign policy to influence other nations.</p> <ul style="list-style-type: none"> Students will explain how the policies of other nations influence U.S. policy and society. Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency). Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International). Students will explain how U.S. trade policy influences its relationships with other nations (e.g., China, Saudi Arabia). Students will explain how the use of embargos and economic sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria). Students will explain the U.S. response to international conflicts.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.CG.4.4:	<p>Identify indicators of democratization in foreign countries.</p> <ul style="list-style-type: none"> Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.G.5.3:	Analyze case studies of the effects of human use of technology on the environment of places.
SS.912.G.6.1:	Use appropriate maps and other graphic representations to analyze geographic problems and changes over time.
SS.912.H.1.1:	<p>Relate works in the arts (architecture, dance, music, theatre, and visual arts) of varying styles and genre according to the periods in which they were created.</p> <p>Clarifications: Examples are Bronze Age, Ming Dynasty, Classical, Renaissance, Modern, and Contemporary.</p>
SS.912.H.1.3:	<p>Relate works in the arts to various cultures.</p> <p>Clarifications: Examples are African, Asian, Oceanic, European, the Americas, Middle Eastern, Egyptian, Greek, Roman.</p>
SS.912.H.1.5:	<p>Examine artistic response to social issues and new ideas in various cultures.</p> <p>Clarifications: Examples are Victor Hugo's Les Miserables, Langston Hughes' poetry, Pete Seeger's Bring 'Em Home.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.6.3:	Compare the philosophies of capitalism, socialism, and communism as described by Adam Smith, Robert Owen, and Karl Marx.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p>

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

MA.K12.MTR.2.1:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

MA.K12.MTR.3.1:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

	<p>Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

The History of Vietnam - The grade 9-12 The History of Vietnam course consists of the following content area strands: United States History, World History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the chronological development of the Vietnam War by examining the political, economic, social, religious, military and cultural events that affected the war. Students will be exposed to the historical, geographic, political, economic, and sociological events which influenced the progression of the war including, but not limited to, an analysis of the United States military effort and makeup in the war, an evaluation of the role of the United States homefront, interpretations of the effects of the media, film and literature during and after the war, a judgment of crucial decisions made during the Vietnam War and an analysis of the resulting impact of the conflict.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100400

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: HIST OF VIETNAM WAR

Course Length: Semester (S)

Course Level: 2

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Holocaust Honors (#2100405) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.6.3:	Analyze the impact of the Holocaust during World War II on Jews as well as other groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.7:	Describe the attempts to promote international justice through the Nuremberg Trials. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but aren't limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.1.3:	Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.
SS.912.C.4.1:	Explain how the world's nations are governed differently.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.P.10.3:	Discuss the relationship between culture and conceptions of self and identity.
SS.912.P.10.4:	Discuss psychological research examining race and ethnicity.
SS.912.P.10.6:	Discuss how privilege and social power structures relate to stereotypes, prejudice, and discrimination.
SS.912.P.10.14:	Examine societal treatment of people with disabilities and the effect of treatment by others on individual identity/status.
SS.912.S.1.6:	Distinguish fact from opinion in data sources to analyze various points of view about a social issue.
SS.912.S.2.10:	Identify both rights and responsibilities the individual has to the group.
SS.912.S.7.5:	Examine how individual and group responses are often associated with social problems. Clarifications: Examples may include, but are not limited to, "But everyone else is doing it" and "If I ignore it, it will go away."
	Define propaganda and discuss the methods of propaganda and discuss the methods of propaganda used to influence social behavior.

SS.912.S.8.7:	Clarifications: Examples may include, but are not limited to, news media and advertisements.
	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
	Summarize significant effects of World War I.
SS.912.W.7.3:	Clarifications: Examples are collapse of the Romanov dynasty, creation of the Weimar Republic, dissolution of the German, Russian, Austro-Hungarian and Ottoman empires, Armenian Genocide, Balfour Declaration, Treaty of Versailles.
SS.912.W.7.4:	Describe the causes and effects of the German economic crisis of the 1920s and the global depression of the 1930s, and analyze how governments responded to the Great Depression.
SS.912.W.7.5:	Describe the rise of authoritarian governments in the Soviet Union, Italy, Germany, and Spain, and analyze the policies and main ideas of Vladimir Lenin, Joseph Stalin, Benito Mussolini, Adolf Hitler, and Francisco Franco.
SS.912.W.7.6:	Analyze the restriction of individual rights and the use of mass terror against populations in the Soviet Union, Nazi Germany, and occupied territories.
SS.912.W.7.7:	Trace the causes and key events related to World War II.
SS.912.W.7.8:	Explain the causes, events, and effects of the Holocaust (1933-1945) including its roots in the long tradition of antisemitism, 19th century ideas about race and nation, and Nazi dehumanization of the Jews and other victims.
	Identify the wartime strategy and post-war plans of the Allied leaders.
SS.912.W.7.9:	Clarifications: Examples are Churchill, Roosevelt, Stalin.
	Describe the effects of World War II.
SS.912.W.7.11:	Clarifications: Examples are human toll, financial cost, physical destruction, emergence of the United States and Soviet Union as superpowers, creation of the United Nations.
SS.912.W.8.6:	Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.
	Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.
SS.912.W.9.3:	Clarifications: Examples are prejudice, racism, stereotyping, economic competition.
	Describe the causes and effects of twentieth century nationalist conflicts.
SS.912.W.9.4:	Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently. Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence

LAFS.910.SL.1.1:	<p>from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.</p> <ul style="list-style-type: none"> b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.SL.2.5:	Make strategic use of digital media (e.g., textual, graphical, audio, visual, and interactive elements) in presentations to enhance understanding of findings, reasoning, and evidence and to add interest.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ul style="list-style-type: none"> a. Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. c. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ul style="list-style-type: none"> a. Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. d. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. e. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. f. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★
	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★
MAFS.912.S-ID.1.1:	<p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p>

MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

General Course Information and Notes

GENERAL NOTES

This grades 9-12 Holocaust course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the examination of the events of the Holocaust (1933-1945), the systemic, planned annihilation of European Jews and other groups by Nazi Germany. Content will include, but is not limited to, the examination of twentieth century programs and of twentieth century and twenty-first century genocides, investigation of human behavior during this period, and an understanding of the ramifications of prejudice, racism and stereotyping.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematical Benchmark Guidance: Social studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts and graphs.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, more complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.

5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100405

Number of Credits: Half credit (.5)

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12,30,31

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: World and Eastern Hemispheric Histories >

Abbreviated Title: HOLOCAUST HONORS

Course Length: Semester (S)

Course Attributes:

- Honors

Course Level: 3

Educator Certifications

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Holocaust Honors (#2100405) 2022 - 2023

Course Standards

Name	Description
SS.912.A.6.3:	Analyze the impact of the Holocaust during World War II on Jews as well as other groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.6.7:	Describe the attempts to promote international justice through the Nuremberg Trials. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 40-42. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.11:	Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East. Clarifications: Examples may include, but aren't limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.1.3:	Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.
SS.912.C.4.1:	Explain how the world's nations are governed differently.
SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.P.10.3:	Discuss the relationship between culture and conceptions of self and identity.
SS.912.P.10.4:	Discuss psychological research examining race and ethnicity.
SS.912.P.10.6:	Discuss how privilege and social power structures relate to stereotypes, prejudice, and discrimination.
SS.912.P.10.14:	Examine societal treatment of people with disabilities and the effect of treatment by others on individual identity/status.
SS.912.S.1.6:	Distinguish fact from opinion in data sources to analyze various points of view about a social issue.
SS.912.S.2.10:	Identify both rights and responsibilities the individual has to the group.
SS.912.S.7.5:	Examine how individual and group responses are often associated with social problems. Clarifications: Examples may include, but are not limited to, "But everyone else is doing it" and "If I ignore it, it will go away."
	Define propaganda and discuss the methods of propaganda and discuss the methods of propaganda used to influence social behavior.

SS.912.S.8.7:	Clarifications: Examples may include, but are not limited to, news media and advertisements.
	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
	Summarize significant effects of World War I.
SS.912.W.7.3:	Clarifications: Examples are collapse of the Romanov dynasty, creation of the Weimar Republic, dissolution of the German, Russian, Austro-Hungarian and Ottoman empires, Armenian Genocide, Balfour Declaration, Treaty of Versailles.
SS.912.W.7.4:	Describe the causes and effects of the German economic crisis of the 1920s and the global depression of the 1930s, and analyze how governments responded to the Great Depression.
SS.912.W.7.5:	Describe the rise of authoritarian governments in the Soviet Union, Italy, Germany, and Spain, and analyze the policies and main ideas of Vladimir Lenin, Joseph Stalin, Benito Mussolini, Adolf Hitler, and Francisco Franco.
SS.912.W.7.6:	Analyze the restriction of individual rights and the use of mass terror against populations in the Soviet Union, Nazi Germany, and occupied territories.
SS.912.W.7.7:	Trace the causes and key events related to World War II.
SS.912.W.7.8:	Explain the causes, events, and effects of the Holocaust (1933-1945) including its roots in the long tradition of antisemitism, 19th century ideas about race and nation, and Nazi dehumanization of the Jews and other victims.
	Identify the wartime strategy and post-war plans of the Allied leaders.
SS.912.W.7.9:	Clarifications: Examples are Churchill, Roosevelt, Stalin.
	Describe the effects of World War II.
SS.912.W.7.11:	Clarifications: Examples are human toll, financial cost, physical destruction, emergence of the United States and Soviet Union as superpowers, creation of the United Nations.
SS.912.W.8.6:	Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.
	Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.
SS.912.W.9.3:	Clarifications: Examples are prejudice, racism, stereotyping, economic competition.
	Describe the causes and effects of twentieth century nationalist conflicts.
SS.912.W.9.4:	Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.

MA.K12.MTR.2.1:	<ul style="list-style-type: none"> • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Help students make connections between concepts and representations. • Provide opportunities for students to use manipulatives when investigating concepts. • Guide students from concrete to pictorial to abstract representations as understanding progresses. • Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Select efficient and appropriate methods for solving problems within the given context. • Maintain flexibility and accuracy while performing procedures and mental calculations. • Complete tasks accurately and with confidence. • Adapt procedures to apply them to a new context. • Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> • Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. • Offer multiple opportunities for students to practice efficient and generalizable methods. • Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers.
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences.

MA.K12.MTR.7.1:	<ul style="list-style-type: none"> • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>

General Course Information and Notes

GENERAL NOTES

This grades 9-12 Holocaust course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the examination of the events of the Holocaust (1933-1945), the systemic, planned annihilation of European Jews and other groups by Nazi Germany. Content will include, but is not limited to, the examination of twentieth century programs and of twentieth century and twenty-first century genocides, investigation of human behavior during this period, and an understanding of the ramifications of prejudice, racism and stereotyping.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, more complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

Holocaust Education Honors (#2100405) 2023 - And Beyond

Course Standards

Name	Description
SS.912.CG.2.13:	<p>Analyze the influence and effects of various forms of media and the internet in political communication.</p> <ul style="list-style-type: none"> Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media). Students will describe how the methods used by political officials to communicate with the public has changed over time. Students will discuss the strengths and weaknesses of different methods of political communication.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.HE.1.1:	<p>Define the Holocaust as the planned and systematic state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators between 1933 and 1945.</p> <ul style="list-style-type: none"> Students will explain why the Holocaust is history's most extreme example of antisemitism.
SS.912.HE.1.2:	<p>Analyze how the Nazi regime utilized and built on historical antisemitism to create a common enemy of the Jews.</p> <ul style="list-style-type: none"> Students will explain the origins of antisemitism and trace it from the Ancient World through the twenty-first century (e.g., Pagan, Christian, Muslim, Middle Ages, Modern era). Students will explain the political, social and economic applications of antisemitism that led to the organized pogroms against Jewish people. Students will examine propaganda (e.g., the Protocols of the Elders of Zion; The Poisonous Mushroom) that was and still is utilized against Jewish people both in Europe and around the world.
SS.912.HE.1.3:	<p>Analyze how the Treaty of Versailles was a causal factor leading the rise of the Nazis, and how the increasing spread of antisemitism was manipulated to the Nazis' advantage.</p> <ul style="list-style-type: none"> Students will explain how the Nazis used antisemitism to foment hate and create a shared enemy in order to gain power prior to World War II. Students will explain how events during the Weimar Republic led to the rise of Nazism (e.g., Dolchstoß, Ruhr Crisis, hyperinflation, the Great Depression, unemployment, the 1920's Nazi platform, the Dawes Plan, the Golden Age, the failure of the Weimar Republic). Students will recognize German culpability, reparations and military downsizing as effects of the Treaty of Versailles.
SS.912.HE.1.4:	<p>Explain how the National Socialist German Workers' Party, or Nazi Party, grew into a mass movement and gained and maintained power in Germany through totalitarian means from 1933 to 1945 under the leadership of Adolf Hitler.</p> <ul style="list-style-type: none"> Students will compare Germany's political parties and their system of proportional representation in national elections from 1920 to 1932. Students will explain how the Sturmabteilung (SA), the Schutzstaffel (SS), the Wehrmacht, the Gestapo and Hitler's inner circle helped him gain and maintain power after 1933. Students will explain how the following contributed to Hitler's rise to power: Adolf Hitler's Munich Beer Hall Putsch, Hitler's arrest and trial, Mein Kampf, the Reichstag fire, the Enabling Act, the Concordat of 1933, the Night of the Long Knives (the Rohm Purge), Hindenburg's death and Hitler as Fuhrer.
SS.912.HE.1.5:	<p>Describe how the Nazis utilized various forms of propaganda to indoctrinate the German population.</p> <ul style="list-style-type: none"> Students will explain how opposing views were eliminated (e.g., book burnings, censorship, state control over the media). Students will explain how identification, legal status, economic status and pseudoscience supported propaganda that was used to perpetuate the Nazi ideology of the "Master Race."
SS.912.HE.1.6:	<p>Examine how the Nazis used education and youth programs to indoctrinate young people into the Nazi ideology.</p> <ul style="list-style-type: none"> Students will explain the impact of the Hitler Youth Program and Band of German Maidens (German: Bund Deutscher Mädel). Students will examine how the Nazis used the public education system to indoctrinate youth and children. Students will explain how Nazi ideology supplanted prior beliefs.
SS.912.HE.1.7:	<p>Explain what is meant by "the Aryan Race" and why this terminology was used.</p> <ul style="list-style-type: none"> Students will compare the meaning of Aryan to the Nazi meaning of Aryan Race. Students will explain how the Nazis used propaganda, pseudoscience and the law to transform Judaism from a religion to a race. Students will examine the manipulation of the international community to obtain the votes to host the 1936 Olympics and how the Berlin Games were utilized as propaganda for Nazi ideology to bolster the "superiority" of the Aryan race. Students will explain how eugenics, scientific racism and Social Darwinism provided a foundation for Nazi racial beliefs.
SS.912.HE.2.1:	<p>Describe how the life of Jews deteriorated under the Third Reich and the Nuremberg Laws in Germany and its annexed territories (e.g., the Rhineland, Sudetenland, Austria) from 1933 to 1938.</p> <ul style="list-style-type: none"> Students will analyze the Nuremberg Laws and describe their effects. Students will explain how the Nazis used birth records, religious symbols and practices to identify and target Jews.
SS.912.HE.2.2:	<p>Analyze the causes and effects of Kristallnacht and how it became a watershed event in the transition from targeted persecution and anti-Jewish policy to open, public violence against Jews in Nazi-controlled Europe.</p> <ul style="list-style-type: none"> Students will understand the reasons for Herschel Grynszpan's actions at the German embassy in Paris and how the assassination of Ernst vom Rath was a pretext used by the Nazis for Kristallnacht. Students will describe the different types of persecution that were utilized during Kristallnacht, both inside and outside Germany. Students will analyze the effects of Kristallnacht on European and world Jewry using primary sources (e.g., newspapers, images, video, survivor testimony). Students will analyze the effects of Kristallnacht on the international community using primary sources (e.g., newspapers, images, video, survivor testimony).

SS.912.HE.2.3:	<p>Analyze Hitler's motivations for the annexations of Austria and the Sudetenland, and the invasion of Poland.</p> <ul style="list-style-type: none"> Students will define the term lebensraum, or living space, as an essential piece of Nazi ideology and explain how it led to territorial expansion and invasion. Students will analyze Hitler's use of the Munich Pact to expand German territory and the Molotov-Ribbentrop Pact to keep the Soviet Union out of the war.
SS.912.HE.2.4:	<p>Describe how Jewish immigration was perceived and restricted by various nations from 1933 to 1939.</p> <ul style="list-style-type: none"> Students will examine why immigration was difficult for Jewish people (e.g., MS St. Louis, the Evian Conference, immigration quota systems). Students will explain how the Kindertransport saved the lives of Jewish children.
SS.912.HE.2.5:	<p>Explain the effect Nazi policies had on other groups targeted by the government of Nazi Germany.</p> <ul style="list-style-type: none"> Students will explain the effects of Nazi "racial hygiene" policies on various groups including, but not limited to, ethnic (e.g., Roma-Sinti, Slavs) and religious groups (e.g., Jehovah's Witnesses), political opposition, the physically and mentally disabled and homosexuals.
SS.912.HE.2.6:	<p>Identify the various armed and unarmed resistance efforts in Europe from 1933 to 1945.</p> <ul style="list-style-type: none"> Students will recognize resistance efforts including, but not limited to, the White Rose, the Rosenstrasse Protest, Bishop Clemens von Galen, the Swing Movement, Reverend Niemöller, Dietrich Bonhoeffer, the Bielski Brothers and the Partisans in Eastern and Western Europe. Students will discuss resistance and uprisings in the ghettos using primary sources (e.g., newspapers, images, video, survivor testimony).
SS.912.HE.2.7:	<p>Examine the role that bystanders, collaborators and perpetrators played in the implementation of Nazi policies against Jewish people and other targeted groups, as well as the role of rescuers in opposing the Nazis and their policies.</p> <ul style="list-style-type: none"> Students will discuss the choices and actions of heroes and heroines in defying Nazi policy at great personal risk, to help rescue Jews (e.g., the Righteous Among the Nations designation).
SS.912.HE.2.8:	<p>Analyze how corporate complicity aided Nazi goals.</p> <ul style="list-style-type: none"> Students will analyze corporate complicity as including, but not limited to, supporting methods of identification and record keeping, continuing trade relationships, financial resources, the use of slave labor, production for the war effort and moral and ethical corporate decisions (1930–1945).
SS.912.HE.2.9:	<p>Explain how killing squads, including the Einsatzgruppen, conducted mass shooting operations in Eastern Europe with the assistance of the Schutzstaffel (SS), police units, the army and local collaborators.</p> <ul style="list-style-type: none"> Students will discuss major events of the killing squads to include, but not be limited to, Babi Yar, Vilnius, Rumbula, Kovno, Ponar and the Palmiry Forest. Students will describe the psychological and physical impact on the Einsatzgruppen and how it led to the implementation of the Final Solution. Students will explain the purpose of the Wannsee Conference and how it impacted the Final Solution.
SS.912.HE.2.10:	<p>Explain the origins and purpose of ghettos in Europe.</p> <ul style="list-style-type: none"> Students will trace the use of ghettos in Europe prior to World War II. Students will explain the methods used for the identification, displacement and deportation of Jews to ghettos. Students will explain what ghettos were in context of World War II and Nazi ideology.
SS.912.HE.2.11:	<p>Discuss life in the various ghettos.</p> <ul style="list-style-type: none"> Students will explain the origins and purpose of the Judenrat. Students will explain the effects of the Judenrat on daily life in ghettos, specifically students should recognize Adam Czerniakow (Warsaw) and Mordechai Chaim Rumkowski (Lodz) and how these men differed in their approach to leading the Judenrat in their respective ghettos. Students will discuss the difference between open ghettos and closed ghettos and how that impacted life within those ghettos. Students will describe various attempts at escape and forms of armed and unarmed resistance (before liquidation and liberation) including, but not limited to, the Warsaw Ghetto Uprising. Students will explain how and why the Nazis liquidated the ghettos, including the forced decisions of the Judenrat to select individuals for deportation transports to the camps.
SS.912.HE.2.12:	<p>Define "partisan" and explain the role partisans played in World War II.</p> <ul style="list-style-type: none"> Students will identify countries that had partisan groups who fought the Nazis. Students will explain the warfare tactics utilized by the resistance movements against the Nazis. Students will recognize that not all resistance movements accepted Jews.
SS.912.HE.2.13:	<p>Examine the origins, purpose and conditions associated with various types of camps.</p> <ul style="list-style-type: none"> Students will explain the differences between forced labor camps, concentration camps, transit camps and death camps, including the geographic location, physical structure, camp commandants and SS leadership and mechanics of murder. Students will describe the daily routines within the camps to include food intake, showers, bathrooms, sleeping arrangements, roll call, work details, illness, environmental conditions, clothing, selection process, torture, medical experiments, public executions, suicides and other aspects of daily life. Students will describe various attempts at escape and forms of resistance within the camps. Students will discuss how the use of existing transportation infrastructure facilitated the deportation of Jewish people to the camps, including the non-Aryan management of the transportation system that collaborated with the Nazis. Students will describe life in Terezin, including its function as a transit camp, its unique culture that generated art, music, literature, poetry, opera (notably Brundibar) and the production of Vedem Magazine as a form of resistance; its use by the Nazis as propaganda to fool the International Red Cross; and the creation of the film "Terezin: A Documentary Film of Jewish Resettlement." Students will identify and examine the 6 death camps (e.g., Auschwitz-Birkenau, Belzec, Chelmno, Majdanek, Sobibor, Treblinka) and their locations. Students will explain why the 6 death camps were only in Nazi-occupied Poland. Students will describe the significance of Auschwitz-Birkenau as the most prolific site of mass murder in the history of mankind.
SS.912.HE.2.14:	<p>Explain the purpose of the death marches.</p> <ul style="list-style-type: none"> Students will recognize death marches as the forcible movement of prisoners by Nazis with the dual purpose of removing evidence and murdering as many people as possible (toward the end of World War II and the Holocaust) from Eastern Europe to Germany proper.
SS.912.HE.2.15:	<p>Describe the experience of Holocaust survivors following World War II.</p> <ul style="list-style-type: none"> Students will explain how Allied Forces liberated camps, including the relocation and treatment of the survivors. Students will discuss the experiences of survivors after liberation (e.g., repatriations, displaced persons camps, pogroms, relocation). Students will explain the various ways that Holocaust survivors lived through the state-sponsored persecution and murder of European Jews by Nazi Germany and its collaborators (e.g., became partisans, escaped from Nazi controlled territory, went into hiding).

	<ul style="list-style-type: none"> Students will describe the psychological and physical struggles of Holocaust survivors. Students will examine the settlement patterns of Holocaust survivors after World War II, including immigration to the United States and other countries, and the establishment of the modern state of Israel.
SS.912.HE.3.1:	<p>Analyze the international community's efforts to hold perpetrators responsible for their involvement in the Holocaust.</p> <ul style="list-style-type: none"> Students will discuss the purpose and outcomes of the Nuremberg Trials and other subsequent trials related to the Holocaust. Students will compare arguments by the prosecution and recognize the falsehoods offered by the defense during the Nuremberg Trials (e.g., Justice Robert Jackson's opening statement, Prosecutor Ben Ferencz's opening statement, ex post facto laws, non-existent terminology, crimes against humanity, genocide, statute of limitations, jurisdictional issues). Students will discuss how members of the international community were complicit in assisting perpetrators' escape from both Germany and justice following World War II.
SS.912.HE.3.2:	<p>Explain the impact of the Eichmann Trial on policy concerning crimes against humanity, capital punishment, accountability, the testimony of survivors and acknowledgment of the international community.</p> <ul style="list-style-type: none"> Students will recognize the Eichmann Trial as the first time that Israel held a Nazi war criminal accountable.
SS.912.HE.3.3:	<p>Explain the effects of Holocaust denial on contemporary society.</p> <ul style="list-style-type: none"> Students will explain how Holocaust denial has helped contribute to the creation of contemporary propaganda and the facile denial of political and social realities.
SS.912.HE.3.4:	<p>Explain why it is important for current and future generations to learn from the Holocaust.</p> <ul style="list-style-type: none"> Students will explain the significance of learning from Holocaust era primary sources created by Jews who perished and those who survived. Students will explain the significance of listening to the testimony of Holocaust survivors (e.g., live and through organizations that offer pre-recorded digital testimony). Students will describe the contributions of the Jews (e.g., arts, culture, medicine, sciences) to the United States and the world. Students will explain the significance of "Never Again."
SS.912.HE.3.5:	<p>Recognize that antisemitism includes a certain perception of the Jewish people, which may be expressed as hatred toward Jewish people, rhetorical and physical manifestations of antisemitism directed toward a person or his or her property or toward Jewish community institutions or religious facilities.</p> <ul style="list-style-type: none"> Students will analyze examples of antisemitism (e.g., calling for, aiding, or justifying the killing or harming of Jews, often in the name of a radical ideology or an extremist view of religion; making mendacious, dehumanizing, demonizing or stereotypical allegations about Jews as such or the power of Jews as a collective, especially, but not exclusively, the myth about a world Jewish conspiracy or of Jews controlling the media, economy, government or other societal institutions; accusing Jews as a people of being responsible for real or imagined wrongdoing committed by a single Jewish person or group, the State of Israel, or even for acts committed by non-Jews; accusing Jews as a people or the State of Israel of inventing or exaggerating the Holocaust; accusing Jewish citizens of being more loyal to Israel, or the alleged priorities of Jews worldwide, than to the interest of their own nations). Students will analyze examples of antisemitism related to Israel (e.g., demonizing Israel by using the symbols and images associated with classic antisemitism to characterize Israel or Israelis, drawing comparisons of contemporary Israeli policy to that of the Nazis, or blaming Israel for all inter-religious or political tensions; applying a double standard to Israel by requiring behavior of Israel that is not expected or demanded of any other democratic nation or focusing peace or human rights investigations only on Israel; delegitimizing Israel by denying the Jewish people their right to self-determination and denying Israel the right to exist).
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p> </div>
SS.912.W.8.6:	<p>Explain the 20th century background for the establishment of the modern state of Israel in 1948, including the Zionist movement led by Theodor Herzl, and the ongoing military and political conflicts between Israel and the Arab-Muslim world.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems. </div>
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations. </div>
	<p>Complete tasks with mathematical fluency.</p>

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:	<p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>

General Course Information and Notes

GENERAL NOTES

The grade 9-12 Holocaust course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the examination of the events of the Holocaust (1933-1945), the systematic, methodically planned, and annihilation of European Jews. Students will explain the effect Nazi policies had on other groups targeted by the government of Nazi Germany. Students will analyze the circumstances from the end of the First World War, the effects of the Treaty of Versailles, the duration of the Weimar Republic and Hitler's rise to and consolidation of power. Students will explore the pseudoscientific and eugenic roots of Nazi ideology, the development of anti-Jewish policies and the Nazi propaganda campaign.

Content will include, but is not limited to, understanding Jewish history, an investigation of human behavior in the lead up and duration of the Holocaust, the Nazi creation of ghettos for European Jews, experiences of Jews in hiding, deportations to concentration/death camps and the eventual liberation or liquidation of the camps. There will be an examination of historical and modern-day antisemitism in all its forms, and the understanding of the ramifications of antisemitism. This course will also emphasize the resilience of the Jewish people.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices: Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, more complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.

5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards:

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>.

GENERAL INFORMATION

Course Number: 2100405	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: World and Eastern Hemispheric Histories >
Number of Credits: Half credit (.5)	Abbreviated Title: HOLOCAUST ED HONORS
Course Type: Elective Course	Course Length: Semester (S)
Course Status: Draft - Course Pending Approval	Course Attributes: <ul style="list-style-type: none">• Honors
Grade Level(s): 9,10,11,12	Course Level: 3

Educator Certifications

History (Grades 6-12)
Social Science (Grades 5-9)
Social Science (Grades 6-12)

Eastern and Western Heritage Honors (#2100460) 2017 -

2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications:

	Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.1:	Locate the extent of Byzantine territory at the height of the empire.
SS.912.W.2.2:	Describe the impact of Constantine the Great's establishment of "New Rome" (Constantinople) and his recognition of Christianity as a legal religion.
SS.912.W.2.3:	Analyze the extent to which the Byzantine Empire was a continuation of the old Roman Empire and in what ways it was a departure. Identify key figures associated with the Byzantine Empire.
SS.912.W.2.4:	Clarifications: Examples are Justinian the Great, Theodora, Belisarius, John of Damascus, Anna Comnena, Cyril and Methodius.
SS.912.W.2.5:	Explain the contributions of the Byzantine Empire. Clarifications: Examples are Justinian's Code, the preservation of ancient Greek and Roman learning and culture, artistic and architectural achievements, the empire's impact on the development of Western Europe, Islamic civilization, and Slavic peoples.
SS.912.W.2.6:	Describe the causes and effects of the Iconoclast controversy of the 8th and 9th centuries and the 11th century Christian schism between the churches of Constantinople and Rome.
SS.912.W.2.7:	Analyze causes (Justinian's Plague, ongoing attacks from the "barbarians," the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.
SS.912.W.2.8:	Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman empire under the sultanate including Mehmet the Conqueror and Suleyman the Magnificent.
SS.912.W.2.9:	Analyze the impact of the collapse of the Western Roman Empire on Europe.
SS.912.W.2.10:	Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.
SS.912.W.2.11:	Describe the rise and achievements of significant rulers in medieval Europe. Clarifications: Examples are Charles Martel, Charlemagne, Otto the Great, William the Conqueror.
SS.912.W.2.12:	Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.14:	Describe the causes and effects of the Great Famine of 1315-1316, The Black Death, The Great Schism of 1378, and the Hundred Years War on Western Europe. Determine the factors that contributed to the growth of a modern economy.
SS.912.W.2.15:	Clarifications: Examples are growth of banking, technological and agricultural improvements, commerce, towns, guilds, rise of a merchant class.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain. Identify key figures, artistic, and intellectual achievements of the medieval period in Western Europe.
SS.912.W.2.17:	Clarifications: Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.
SS.912.W.2.18:	Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures. Clarifications: Examples are Magna Carta, parliament, habeas corpus.
SS.912.W.2.19:	Describe the impact of Japan's physiography on its economic and political development. Summarize the major cultural, economic, political, and religious developments in medieval Japan.
SS.912.W.2.20:	Clarifications: Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.
SS.912.W.2.21:	Compare Japanese feudalism with Western European feudalism during the Middle Ages.
SS.912.W.2.22:	Describe Japan's cultural and economic relationship to China and Korea. Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.3:	Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.
SS.912.W.3.4:	Describe the expansion of Islam into India and the relationship between Muslims and Hindus. Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5:	Clarifications: Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.
SS.912.W.3.7:	Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century. Clarifications: Examples are Crusades, Reconquista.

	Identify important figures associated with the Crusades.
SS.912.W.3.8:	Clarifications: Examples are Alexius Comnenus, Pope Urban, Bernard of Clairvaux, Godfrey of Bouillon, Saladin, Richard the Lionheart, Baybars, Louis IX.
	Trace the growth of major sub-Saharan African kingdoms and empires.
SS.912.W.3.9:	Clarifications: Examples are Ghana, Mali, Songhai.
	Identify key significant economic, political, and social characteristics of Ghana.
SS.912.W.3.10:	Clarifications: Examples are salt and gold trade, taxation system, gold monopoly, matrilineal inheritance, griots, ancestral worship, rise of Islam, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Mali.
SS.912.W.3.11:	Clarifications: Examples are Sundiata, Epic of Sundiata, Mansa Musa, Ibn Battuta, gold mining and salt trade, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Songhai.
SS.912.W.3.12:	Clarifications: Examples are Sunni Ali, Askia Mohammad the Great, gold, salt trade, cowries as a medium of exchange, Sankore University, slavery, professional army, provincial political structure.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
	Examine the internal and external factors that led to the fall of the empires of Ghana, Mali, and Songhai.
SS.912.W.3.14:	Clarifications: Examples are disruption of trade, internal political struggles, Islamic invasions.
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations.
	Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	Clarifications: Examples are Maya, Aztec, Inca.
	Describe the roles of people in the Maya, Inca, and Aztec societies.
SS.912.W.3.17:	Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.
	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America.
SS.912.W.3.18:	Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.1:	Identify the economic and political causes for the rise of the Italian city-states (Florence, Milan, Naples, Rome, Venice).
SS.912.W.4.2:	Recognize major influences on the architectural, artistic, and literary developments of Renaissance Italy (Classical, Byzantine, Islamic, Western European).
	Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.
SS.912.W.4.3:	Clarifications: Examples are Petrarch, Brunelleschi, Giotto, the Medici Family, Michelangelo, Leonardo da Vinci, Erasmus, Thomas More, Machiavelli, Shakespeare, Gutenberg, El Greco, Artemisia Gentileschi, Van Eyck.
	Identify characteristics of Renaissance humanism in works of art.
SS.912.W.4.4:	Clarifications: Examples are influence of classics, School of Athens.
SS.912.W.4.5:	Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.
SS.912.W.4.6:	Describe how scientific theories and methods of the Scientific Revolution challenged those of the early classical and medieval periods.
SS.912.W.4.7:	Identify criticisms of the Roman Catholic Church by individuals such as Wycliffe, Hus and Erasmus and their impact on later reformers.
	Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.
SS.912.W.4.8:	Clarifications: Examples are Catholic and Counter Reformation, political and religious fragmentation, military conflict, expansion of capitalism.
	Analyze the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation.
SS.912.W.4.9:	Clarifications: Examples are Council of Trent, Thomas More, Ignatius of Loyola and the Jesuits, Teresa of Avila, Charles V.
	Identify the major contributions of individuals associated with the Scientific Revolution.
SS.912.W.4.10:	Clarifications: Examples are Francis Bacon, Nicholas Copernicus, Rene Descartes, Galileo Galilei, Johannes Kepler, Isaac Newton, Blaise Pascal, Vesalius.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.

LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>

MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p>
MAFS.912.S-ID.1.3:	<p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.K12.MP.1.1:	<p>Make sense of problems and persevere in solving them.</p> <p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p>
MAFS.K12.MP.3.1:	<p>Construct viable arguments and critique the reasoning of others.</p> <p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p>
MAFS.K12.MP.5.1:	<p>Use appropriate tools strategically.</p> <p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p>
MAFS.K12.MP.6.1:	<p>Attend to precision.</p> <p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Eastern and Western Heritage - The grade 9-12 Eastern and Western Heritage course consists of the following content area strands: World History, United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the world’s earliest civilizations to the ancient and classical civilizations of Africa, Asia, and Europe. Content will include, but is not limited to, the birth of civilizations throughout the world, including the origins of societies from Mesopotamia,

Africa, China, India, and Mesoamerica from the perspective of cultural geography, growth, dissemination, and decline of four classic civilizations of India, China, Greece, and Rome, the role of isolation and interaction in the development of the Byzantine Empire, African and Mesoamerican civilizations, India, China, Japan, and Europe, and the emergence of social, political, economic, and religious institutions and ideas.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices - Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities(claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications:

	Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.2.1:	Locate the extent of Byzantine territory at the height of the empire.
SS.912.W.2.2:	Describe the impact of Constantine the Great's establishment of "New Rome" (Constantinople) and his recognition of Christianity as a legal religion.
SS.912.W.2.3:	Analyze the extent to which the Byzantine Empire was a continuation of the old Roman Empire and in what ways it was a departure. Identify key figures associated with the Byzantine Empire.
SS.912.W.2.4:	Clarifications: Examples are Justinian the Great, Theodora, Belisarius, John of Damascus, Anna Comnena, Cyril and Methodius.
SS.912.W.2.5:	Explain the contributions of the Byzantine Empire. Clarifications: Examples are Justinian's Code, the preservation of ancient Greek and Roman learning and culture, artistic and architectural achievements, the empire's impact on the development of Western Europe, Islamic civilization, and Slavic peoples.
SS.912.W.2.6:	Describe the causes and effects of the Iconoclast controversy of the 8th and 9th centuries and the 11th century Christian schism between the churches of Constantinople and Rome.
SS.912.W.2.7:	Analyze causes (Justinian's Plague, ongoing attacks from the "barbarians," the Crusades, and internal political turmoil) of the decline of the Byzantine Empire.
SS.912.W.2.8:	Describe the rise of the Ottoman Turks, the conquest of Constantinople in 1453, and the subsequent growth of the Ottoman empire under the sultanate including Mehmet the Conqueror and Suleyman the Magnificent.
SS.912.W.2.9:	Analyze the impact of the collapse of the Western Roman Empire on Europe.
SS.912.W.2.10:	Describe the orders of medieval social hierarchy, the changing role of the Church, the emergence of feudalism, and the development of private property as a distinguishing feature of Western Civilization.
SS.912.W.2.11:	Describe the rise and achievements of significant rulers in medieval Europe. Clarifications: Examples are Charles Martel, Charlemagne, Otto the Great, William the Conqueror.
SS.912.W.2.12:	Recognize the importance of Christian monasteries and convents as centers of education, charitable and missionary activity, economic productivity, and political power.
SS.912.W.2.13:	Explain how Western civilization arose from a synthesis of classical Greco-Roman civilization, Judeo-Christian influence, and the cultures of northern European peoples promoting a cultural unity in Europe.
SS.912.W.2.14:	Describe the causes and effects of the Great Famine of 1315-1316, The Black Death, The Great Schism of 1378, and the Hundred Years War on Western Europe. Determine the factors that contributed to the growth of a modern economy.
SS.912.W.2.15:	Clarifications: Examples are growth of banking, technological and agricultural improvements, commerce, towns, guilds, rise of a merchant class.
SS.912.W.2.16:	Trace the growth and development of a national identity in the countries of England, France, and Spain. Identify key figures, artistic, and intellectual achievements of the medieval period in Western Europe.
SS.912.W.2.17:	Clarifications: Examples are Anselm of Canterbury, Chaucer, Thomas Aquinas, Roger Bacon, Hildegard of Bingen, Dante, Code of Chivalry, Gothic architecture, illumination, universities, Natural Law Philosophy, Scholasticism.
SS.912.W.2.18:	Describe developments in medieval English legal and constitutional history and their importance to the rise of modern democratic institutions and procedures. Clarifications: Examples are Magna Carta, parliament, habeas corpus.
SS.912.W.2.19:	Describe the impact of Japan's physiography on its economic and political development. Summarize the major cultural, economic, political, and religious developments in medieval Japan.
SS.912.W.2.20:	Clarifications: Examples are Pillow Book, Tale of Genji, Shinto and Japanese Buddhism, the rise of feudalism, the development of the shogunate, samurai, and social hierarchy.
SS.912.W.2.21:	Compare Japanese feudalism with Western European feudalism during the Middle Ages.
SS.912.W.2.22:	Describe Japan's cultural and economic relationship to China and Korea. Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.3.3:	Determine the causes, effects, and extent of Islamic military expansion through Central Asia, North Africa, and the Iberian Peninsula.
SS.912.W.3.4:	Describe the expansion of Islam into India and the relationship between Muslims and Hindus. Describe the achievements, contributions, and key figures associated with the Islamic Golden Age.
SS.912.W.3.5:	Clarifications: Examples are Al-Ma'mun, Avicenna, Averroes, Algebra, Al-Razi, Alhambra, The Thousand and One Nights.
SS.912.W.3.7:	Analyze the causes, key events, and effects of the European response to Islamic expansion beginning in the 7th century. Clarifications: Examples are Crusades, Reconquista.

	Identify important figures associated with the Crusades.
SS.912.W.3.8:	Clarifications: Examples are Alexius Comnenus, Pope Urban, Bernard of Clairvaux, Godfrey of Bouillon, Saladin, Richard the Lionheart, Baybars, Louis IX.
	Trace the growth of major sub-Saharan African kingdoms and empires.
SS.912.W.3.9:	Clarifications: Examples are Ghana, Mali, Songhai.
	Identify key significant economic, political, and social characteristics of Ghana.
SS.912.W.3.10:	Clarifications: Examples are salt and gold trade, taxation system, gold monopoly, matrilineal inheritance, griots, ancestral worship, rise of Islam, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Mali.
SS.912.W.3.11:	Clarifications: Examples are Sundiata, Epic of Sundiata, Mansa Musa, Ibn Battuta, gold mining and salt trade, slavery.
	Identify key figures and significant economic, political, and social characteristics associated with Songhai.
SS.912.W.3.12:	Clarifications: Examples are Sunni Ali, Askia Mohammad the Great, gold, salt trade, cowries as a medium of exchange, Sankore University, slavery, professional army, provincial political structure.
SS.912.W.3.13:	Compare economic, political, and social developments in East, West, and South Africa.
	Examine the internal and external factors that led to the fall of the empires of Ghana, Mali, and Songhai.
SS.912.W.3.14:	Clarifications: Examples are disruption of trade, internal political struggles, Islamic invasions.
SS.912.W.3.15:	Analyze the legacies of the Olmec, Zapotec, and Chavin on later Meso and South American civilizations.
	Locate major civilizations of Mesoamerica and Andean South America.
SS.912.W.3.16:	Clarifications: Examples are Maya, Aztec, Inca.
	Describe the roles of people in the Maya, Inca, and Aztec societies.
SS.912.W.3.17:	Clarifications: Examples are class structure, family life, warfare, religious beliefs and practices, slavery.
	Compare the key economic, cultural, and political characteristics of the major civilizations of Meso and South America.
SS.912.W.3.18:	Clarifications: Examples are agriculture, architecture, astronomy, literature, mathematics, trade networks, government.
SS.912.W.3.19:	Determine the impact of significant Meso and South American rulers such as Pacal the Great, Moctezuma I, and Huayna Capac.
SS.912.W.4.1:	Identify the economic and political causes for the rise of the Italian city-states (Florence, Milan, Naples, Rome, Venice).
SS.912.W.4.2:	Recognize major influences on the architectural, artistic, and literary developments of Renaissance Italy (Classical, Byzantine, Islamic, Western European).
	Identify the major artistic, literary, and technological contributions of individuals during the Renaissance.
SS.912.W.4.3:	Clarifications: Examples are Petrarch, Brunelleschi, Giotto, the Medici Family, Michelangelo, Leonardo da Vinci, Erasmus, Thomas More, Machiavelli, Shakespeare, Gutenberg, El Greco, Artemisia Gentileschi, Van Eyck.
	Identify characteristics of Renaissance humanism in works of art.
SS.912.W.4.4:	Clarifications: Examples are influence of classics, School of Athens.
SS.912.W.4.5:	Describe how ideas from the Middle Ages and Renaissance led to the Scientific Revolution.
SS.912.W.4.6:	Describe how scientific theories and methods of the Scientific Revolution challenged those of the early classical and medieval periods.
SS.912.W.4.7:	Identify criticisms of the Roman Catholic Church by individuals such as Wycliffe, Hus and Erasmus and their impact on later reformers.
	Summarize religious reforms associated with Luther, Calvin, Zwingli, Henry VIII, and John of Leyden and the effects of the Reformation on Europe.
SS.912.W.4.8:	Clarifications: Examples are Catholic and Counter Reformation, political and religious fragmentation, military conflict, expansion of capitalism.
	Analyze the Roman Catholic Church's response to the Protestant Reformation in the forms of the Counter and Catholic Reformation.
SS.912.W.4.9:	Clarifications: Examples are Council of Trent, Thomas More, Ignatius of Loyola and the Jesuits, Teresa of Avila, Charles V.
	Identify the major contributions of individuals associated with the Scientific Revolution.
SS.912.W.4.10:	Clarifications: Examples are Francis Bacon, Nicholas Copernicus, Rene Descartes, Galileo Galilei, Johannes Kepler, Isaac Newton, Blaise Pascal, Vesalius.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach.
MA.K12.MTR.1.1:	Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging.

- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

MA.K12.MTR.2.1:

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.

	<ul style="list-style-type: none"> • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Eastern and Western Heritage - The grade 9-12 Eastern and Western Heritage course consists of the following content area strands: World History, United States History, Geography, and Humanities. The primary content emphasis for this course pertains to the study of the world's earliest civilizations to the ancient and classical civilizations

of Africa, Asia, and Europe. Content will include, but is not limited to, the birth of civilizations throughout the world, including the origins of societies from Mesopotamia, Africa, China, India, and Mesoamerica from the perspective of cultural geography, growth, dissemination, and decline of four classic civilizations of India, China, Greece, and Rome, the role of isolation and interaction in the development of the Byzantine Empire, African and Mesoamerican civilizations, India, China, Japan, and Europe, and the emergence of social, political, economic, and religious institutions and ideas.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices - Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities(claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. 	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the</p>

SS.912.A.5.5:	Nobel Prize. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.6:	Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.8:	Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.9:	Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas. Clarifications: Examples may include, but are not limited to, 100 Percent Americanism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.11:	Examine causes, course, and consequences of the Great Depression and the New Deal. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.12:	Examine key events and people in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.1.1:	Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.
SS.912.C.1.2:	Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.
SS.912.C.1.3:	Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.
SS.912.C.1.4:	Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.
SS.912.C.1.5:	Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.
SS.912.C.3.2:	Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.
SS.912.C.3.3:	Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.
SS.912.C.3.4:	Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.
SS.912.C.3.5:	Identify the impact of independent regulatory agencies in the federal bureaucracy. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.
SS.912.C.3.6:	Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. c. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. d. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.

LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).
LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p> <p>Make sense of problems and persevere in solving them.</p>

MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
Construct viable arguments and critique the reasoning of others.	
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
Use appropriate tools strategically.	
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
Attend to precision.	
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Visions and Their Pursuits: An American Tradition-U.S.History to 1920 - The grade 9-12 Visions and Their Pursuits course consists of the following content area strands: World History, American History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of the United States during the period of European exploration through World War I and the collective vision of historical time periods. Content will include, but is not limited to, the foundation and early development of the United States as organized by the visions of those who participated in the revolutions leading to the establishment and early success of the United States, the political, social, cultural, intellectual, and technological revolutions of the United States, the structure and function of political divisions, the organization of the federal government as outlined in the U.S. Constitution, the impact of economic, social, and political changes on traditional American values, reactions to changes, and growth of sectionalism, the failure of previous visions, and the emergence of an industrial, urban and pluralistic society that demands new visions to carry the nation forward.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer,

complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100470

Number of Credits: One (1) credit

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: VISIONS/PURSUIITS HON

Course Length: Year (Y)

Course Attributes:

- Honors

Course Level: 3

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Visions & Their Pursuits: An AmerTrad-U.S. Hist to 1920 Honors (#2100470) 2022 - 2023

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found</p>

	on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.3:	<p>Examine the impact of United States foreign economic policy during the 1920s.</p> <p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the</p>

SS.912.A.5.5:	Nobel Prize. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.6:	Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.7:	Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.8:	Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.9:	Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas. Clarifications: Examples may include, but are not limited to, 100 Percent Americanism. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.10:	Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.11:	Examine causes, course, and consequences of the Great Depression and the New Deal. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.5.12:	Examine key events and people in Florida history as they relate to United States history. Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.C.1.1:	Evaluate, take, and defend positions on the founding ideals and principles in American Constitutional government.
SS.912.C.1.2:	Explain how the Declaration of Independence reflected the political principles of popular sovereignty, social contract, natural rights, and individual rights.
SS.912.C.1.3:	Evaluate the ideals and principles of the founding documents (Declaration of Independence, Articles of Confederation, Federalist Papers) that shaped American Democracy.
SS.912.C.1.4:	Analyze and categorize the diverse viewpoints presented by the Federalists and the Anti-Federalists concerning ratification of the Constitution and inclusion of a bill of rights.
SS.912.C.1.5:	Evaluate how the Constitution and its amendments reflect the political principles of rule of law, checks and balances, separation of powers, republicanism, democracy, and federalism.
SS.912.C.3.2:	Define federalism, and identify examples of the powers granted and denied to states and the national government in the American federal system of government.
SS.912.C.3.3:	Analyze the structures, functions, and processes of the legislative branch as described in Article I of the Constitution.
SS.912.C.3.4:	Analyze the structures, functions, and processes of the executive branch as described in Article II of the Constitution.
SS.912.C.3.5:	Identify the impact of independent regulatory agencies in the federal bureaucracy. Clarifications: Examples are Federal Reserve, Food and Drug Administration, Federal Communications Commission.
SS.912.C.3.6:	Analyze the structures, functions, and processes of the judicial branch as described in Article III of the Constitution.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.

SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events. Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography). Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
MA.K12.MTR.1.1:	Mathematicians who participate in effortful learning both individually and with others: <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others: <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways: <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses.

- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

MA.K12.MTR.3.1:

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.

	<ul style="list-style-type: none"> Indicate how various concepts can be applied to other disciplines.
ELA.K.12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K.12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Visions and Their Pursuits: An American Tradition-U.S.History to 1920 - The grade 9-12 Visions and Their Pursuits course consists of the following content area strands: World History, American History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of the United States during the period of European exploration through World War I and the collective vision of historical time periods. Content will include, but is not limited to, the foundation and early development of the United States as organized by the visions of those who participated in the revolutions leading to the establishment and early success of the United States, the political, social, cultural, intellectual, and technological revolutions of the United States, the structure and function of political divisions, the organization of the federal government as outlined in the U.S. Constitution, the impact of economic, social, and political changes on traditional American values, reactions to changes, and growth of sectionalism, the failure of previous visions, and the emergence of an industrial, urban and pluralistic society that demands new visions to carry the nation forward.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer,

complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100470

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: American and Western Hemispheric Histories >

Abbreviated Title: VISIONS/PURSUIITS HON

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Type: Elective Course

Course Level: 3

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Visions & Their Pursuits: An AmerTrad-U.S. Hist to 1920 Honors (#2100470) 2023 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fldoe.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.8:	<p>Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, Socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p>

	<p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.11:	<p>Examine causes, course, and consequences of the Great Depression and the New Deal.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.12:	<p>Examine key events and people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, Rosewood, land boom, speculation, impact of climate and natural disasters on the end of the land boom, invention of modern air conditioning in 1929, Alfred DuPont, Majorie Kinnan Rawlings, Zora Neale Hurston, James Weldon Johnson.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.CG.1.2:	<p>Explain the influence of Enlightenment ideas on the Declaration of Independence.</p> <ul style="list-style-type: none"> Students will identify grievances listed in the Declaration of Independence in terms of due process of law, individual rights, natural rights, popular sovereignty and social contract. Students will explain national sovereignty, natural law, self-evident truth, equality of all persons, due process of law, limited government, popular sovereignty, and unalienable rights of life, liberty and property as they relate to Enlightenment ideas in the Declaration of Independence. Students will recognize that national sovereignty, due process of law, natural law, self-evident truth, equality of all persons, limited government, popular sovereignty, and unalienable rights of life, liberty and property form the philosophical foundation of our government.
SS.912.CG.1.3:	<p>Explain arguments presented in the Federalist Papers in support of ratifying the U.S. Constitution and a republican form of government.</p> <ul style="list-style-type: none"> Students will recognize that the Federalist Papers argued for a federal system of government, separation of powers and a representative form of government that is accountable to its citizens. Students will analyze Federalist and Anti-Federalist arguments concerning ratification of the U.S. Constitution and inclusion of a bill of rights.
SS.912.CG.1.4:	<p>Analyze how the ideals and principles expressed in the founding documents shape America as a constitutional republic.</p> <ul style="list-style-type: none"> Students will differentiate among the documents and determine how each one was individually significant to the founding of the United States. Students will evaluate how the documents are connected to one another. Documents include, but are not limited to, the Declaration of Independence, Articles of Confederation, Federalist Papers (e.g., No. 10, No. 14, No. 31, No. 39, No. 51) and the U.S. Constitution. Students will identify key individuals who contributed to the founding documents (e.g., Thomas Jefferson, Alexander Hamilton, John Jay, James Madison, George Mason).
	<p>Explain how the U.S. Constitution and its amendments uphold the following political principles: checks and balances, consent of the governed, democracy, due process of law, federalism, individual rights, limited government, representative government, republicanism, rule of law and</p>

SS.912.CG.1.5:	<p>separation of powers.</p> <ul style="list-style-type: none"> Students will explain how the structure and function of the U.S. government reflects these political principles. Students will differentiate between republicanism and democracy, and discuss how the United States reflects both. Students will describe compromises made during the Constitutional Convention (e.g., the Great Compromise, the Three-Fifths Compromise, the Electoral College).
SS.912.CG.3.3:	<p>Analyze the structures, functions and processes of the legislative branch as described in Article I of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain why Article I of the U.S. Constitution established a bicameral legislative body and how the House of Representatives functions differently from the Senate. Students will identify the methods for determining the number of members in the House of Representatives and the Senate. Students will identify and describe the “enumerated powers” delegated to Congress (e.g., assess taxes, borrow money, declare war, make laws). Students will analyze the role of the legislative branch in terms of its relationship with the judicial and executive branch of the government. Students will describe constitutional amendments that changed the role of Congress from its original description in Article I of the U.S. Constitution (i.e., 10th, 14th, 16th, 17th and 27th Amendments).
SS.912.CG.3.4:	<p>Analyze the structures, functions and processes of the executive branch as described in Article II of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will explain the qualifications one must have to seek the office of president and the process of presidential elections. Students will explain different presidential responsibilities outlined in Article II (e.g., receiving foreign heads of state, delivering the State of the Union address, carrying out faithful execution of the law). Students will examine the role of the executive branch in terms of its relationship with the judicial and legislative branches of the government. Students will describe constitutional amendments (i.e., 12th, 20th, 22nd and 25th) that have changed the role of the executive branch from its original description in Article II. Students will describe the impeachment process.
SS.912.CG.3.5:	<p>Describe how independent regulatory agencies interact with the three branches of government and with citizens.</p> <ul style="list-style-type: none"> Students will identify independent regulatory agencies (e.g., Federal Communications Commission, Federal Election Commission, National Labor Relations Board) and explain their purpose and effect. Students will describe the advantages and disadvantages of delegating power to independent regulatory agencies.
SS.912.CG.3.7:	<p>Analyze the structures, functions and processes of the judicial branch as described in Article III of the U.S. Constitution.</p> <ul style="list-style-type: none"> Students will examine the role of the judicial branch in terms of its relationship with the legislative and executive branches of the government. Students will describe the role of the Supreme Court and lesser federal courts. Students will explain what Article III says about judicial tenure, appointment and salaries. Students will describe the powers delegated to the courts by Article III including, but not limited to, treason, jurisdiction and trial by jury.
SS.912.CG.3.12:	<p>Analyze the concept of federalism in the United States and its role in establishing the relationship between the state and national governments.</p> <ul style="list-style-type: none"> Students will identify examples of the powers reserved and shared among state and the national governments in the American federal system of government. Students will examine the role the Great Compromise had on the eventual establishment of a federal system of fifty equal states. Students will explain specific rights that are granted to the states in the language of the U.S. Constitution and its amendments (e.g., 10th Amendment, defense and extradition). Students will analyze how states have challenged the national government regarding states’ rights (e.g., Civil War, the New Deal, No Child Left Behind, Affordable Health Care Act, Civil Rights Movement).
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.

SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	<p>Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).</p>
SS.912.W.1.6:	<p>Evaluate the role of history in shaping identity and character.</p> <p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.11:	<p>Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

ELA.K12.EE.2.1:

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

ELA.K12.EE.3.1:

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

ELA.K12.EE.4.1:

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

	Use the accepted rules governing a specific format to create quality work.
ELA.K12.EE.5.1:	Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
	Evaluate how public health policies and government regulations can influence health promotion and disease prevention.
HE.912.C.2.4:	Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Visions and Their Pursuits: An American Tradition-U.S.History to 1920 - The grade 9-12 Visions and Their Pursuits course consists of the following content area strands: World History, American History, Civics and Government, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of the United States during the period of European exploration through World War I and the collective vision of historical time periods. Content will include, but is not limited to, the foundation and early development of the United States as organized by the visions of those who participated in the revolutions leading to the establishment and early success of the United States, the political, social, cultural, intellectual, and technological revolutions of the United States, the structure and function of political divisions, the organization of the federal government as outlined in the U.S. Constitution, the impact of economic, social, and political changes on traditional American values, reactions to changes, and growth of sectionalism, the failure of previous visions, and the emergence of an industrial, urban and pluralistic society that demands new visions to carry the nation forward.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100470

Course Path: Section: Grades PreK to 12 Education
Courses > Grade Group: Grades 9 to 12 and Adult
Education Courses > Subject: Social Studies >
SubSubject: American and Western Hemispheric
 Histories >
Abbreviated Title: VISIONS/PURSUIITS HON

Number of Credits: One (1) credit

Course Length: Year (Y)

Course Attributes:

- Honors

Course Level: 3

Course Type: Elective Course

Course Status: Draft - Course Pending Approval

Grade Level(s): 9,10,11,12

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Visions and Countervisions: Europe, U.S. and the World from 1848 Honors (#2100480) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.5:	<p>Identify significant inventors of the Industrial Revolution including African Americans and women.</p> <p>Clarifications: Examples may include, but are not limited to, Lewis Howard Latimer, Jan E. Matzeliger, Sarah E. Goode, Granville T. Woods, Alexander Graham Bell, Thomas Edison, George Pullman, Henry Ford, Orville and Wilbur Wright, Elijah McCoy, Garrett Morgan, Madame C.J. Walker, George Westinghouse.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.6:	<p>Analyze changes that occurred as the United States shifted from agrarian to an industrial society.</p> <p>Clarifications: Examples may include, but are not limited to, Social Darwinism, laissez-faire, government regulations of food and drugs, migration to cities, urbanization, changes to the family structure, Ellis Island, Angel Island, push-pull factors.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.7:	<p>Compare the experience of European immigrants in the east to that of Asian immigrants in the west (the Chinese Exclusion Act, Gentlemen's Agreement with Japan).</p> <p>Clarifications: Examples may include, but are not limited to nativism, integration of immigrants into society when comparing "Old" [before 1890] and "New" immigrants [after 1890], Immigration Act of 1924.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

Examine the importance of social change and reform in the late 19th and early 20th centuries (class system, migration from farms to cities, Social

SS.912.A.3.8:	<p>Gospel movement, role of settlement houses and churches in providing services to the poor).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.9:	<p>Examine causes, course, and consequences of the labor movement in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, unions, Knights of Labor, American Federation of Labor, socialist Party, labor laws.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.10:	<p>Review different economic and philosophic ideologies.</p> <p>Clarifications: Economic examples may include, but are not limited to, market economy, mixed economy, planned economy and philosophic examples are capitalism, socialism, communism, anarchy.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.11:	<p>Analyze the impact of political machines in United States cities in the late 19th and early 20th centuries.</p> <p>Clarifications: Examples may include, but are not limited to, Boss Tweed, Tammany Hall, George Washington Plunkitt, Washington Gladden, Thomas Nast.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.12:	<p>Compare how different nongovernmental organizations and progressives worked to shape public policy, restore economic opportunities, and correct injustices in American life.</p> <p>Clarifications: Examples may include, but are not limited to, NAACP, YMCA, Women's Christian Temperance Union, National Women's Suffrage Association, National Women's Party, Robert LaFollette, Florence Kelley, Ida M. Tarbell, Eugene Debs, Carrie Chapman Catt, Alice Paul, Theodore Roosevelt, William Taft, Woodrow Wilson, Upton Sinclair, Booker T. Washington, W.E.B. DuBois, Gifford Pinchot, William Jennings Bryan.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.13:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the railroad industry, bridge construction in the Florida Keys, the cattle industry, the cigar industry, the influence of Cuban, Greek and Italian immigrants, Henry B. Plant, William Chipley, Henry Flagler, George Proctor, Thomas DeSaille Tucker, Hamilton Disston.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.1:	<p>Analyze the major factors that drove United States imperialism.</p> <p>Clarifications: Examples may include, but are not limited to, the Monroe Doctrine, Manifest Destiny, <i>The Influence of Sea Power Upon History</i>, <i>Turner's thesis</i>, <i>the Roosevelt Corollary</i>, <i>natural resources</i>, <i>markets for resources</i>, <i>elimination of spheres of influence in China</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.2:	<p>Explain the motives of the United States acquisition of the territories.</p> <p>Clarifications: Examples may include, but are not limited to, Alaska, Hawaii, Puerto Rico, Philippines, Guam, Samoa, Marshall Islands, Midway Island, Virgin Islands.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.3:	<p>Examine causes, course, and consequences of the Spanish American War.</p> <p>Clarifications: Examples may include, but are not limited to, Cuba as a protectorate, Yellow Journalism, sinking of the <i>Maine</i>, <i>the Philippines</i>, <i>Commodore Dewey</i>, <i>the Rough Riders</i>, <i>acquisition of territories</i>, <i>the Treaty of Paris</i>.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>

SS.912.A.4.4:	<p>Analyze the economic, military, and security motivations of the United States to complete the Panama Canal as well as major obstacles involved in its construction.</p> <p>Clarifications: Examples may include, but are not limited to, disease, environmental impact, challenges faced by various ethnic groups such as Africans and indigenous populations, shipping routes, increased trade, defense and independence for Panama.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 27-28. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.5:	<p>Examine causes, course, and consequences of United States involvement in World War I.</p> <p>Clarifications: Examples may include, but are not limited to, nationalism, imperialism, militarism, entangling alliances vs. neutrality, Zimmerman Note, the <i>Lusitania</i>, the Selective Service Act, the homefront, the American Expeditionary Force, Wilson's Fourteen Points, the Treaty of Versailles (and opposition to it), isolationism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.6:	<p>Examine how the United States government prepared the nation for war with war measures (Selective Service Act, War Industries Board, war bonds, Espionage Act, Sedition Act, Committee of Public Information).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.7:	<p>Examine the impact of airplanes, battleships, new weaponry and chemical warfare in creating new war strategies (trench warfare, convoys).</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.8:	<p>Compare the experiences Americans (African Americans, Hispanics, Asians, women, conscientious objectors) had while serving in Europe.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.9:	<p>Compare how the war impacted German Americans, Asian Americans, African Americans, Hispanic Americans, Jewish Americans, Native Americans, women and dissenters in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.10:	<p>Examine the provisions of the Treaty of Versailles and the failure of the United States to support the League of Nations.</p> <p>Clarifications: Examples may include, but are not limited to, self-determination, boundaries, demilitarized zone, sanctions reparations, and the League of Nations (including Article X of the Covenant).</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.4.11:	<p>Examine key events and peoples in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, the Spanish-American War, Ybor City, Jose Marti.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 29-31. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.1:	<p>Discuss the economic outcomes of demobilization.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.2:	<p>Explain the causes of the public reaction (Sacco and Vanzetti, labor, racial unrest) associated with the Red Scare.</p> <p>Clarifications: Examples may also include, but are not limited to, Palmer Raids, FBI, J. Edgar Hoover.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Examine the impact of United States foreign economic policy during the 1920s.</p>

SS.912.A.5.3:	<p>Clarifications: Examples may include, but are not limited to, the Depression of 1920-21, "The Business of America is Business," assembly line, installment buying, consumerism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 32-33. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.4:	<p>Evaluate how the economic boom during the Roaring Twenties changed consumers, businesses, manufacturing, and marketing practices.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.5:	<p>Describe efforts by the United States and other world powers to avoid future wars.</p> <p>Clarifications: Examples may include, but are not limited to, League of Nations, Washington Naval Conference, London Conference, Kellogg-Briand Pact, the Nobel Prize.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 34. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.6:	<p>Analyze the influence that Hollywood, the Harlem Renaissance, the Fundamentalist movement, and prohibition had in changing American society in the 1920s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.7:	<p>Examine the freedom movements that advocated civil rights for African Americans, Latinos, Asians, and women.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.8:	<p>Compare the views of Booker T. Washington, W.E.B. DuBois, and Marcus Garvey relating to the African American experience.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.9:	<p>Explain why support for the Ku Klux Klan varied in the 1920s with respect to issues such as anti-immigration, anti-African American, anti-Catholic, anti-Jewish, anti-women, and anti-union ideas.</p> <p>Clarifications: Examples may include, but are not limited to, 100 Percent Americanism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.10:	<p>Analyze support for and resistance to civil rights for women, African Americans, Native Americans, and other minorities.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 35-36. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.5.11:	<p>Examine causes, course, and consequences of the Great Depression and the New Deal.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 37-39. SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is</p>

	evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.1.6:	<p>Evaluate the role of history in shaping identity and character.</p> <p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.11:	Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.

LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively. <ul style="list-style-type: none"> a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
LAFS.1112.WHST.1.1:	Write arguments focused on <i>discipline-specific content</i> . <ul style="list-style-type: none"> a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence. b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases. c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. e. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.1112.WHST.1.2:	Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes. <ul style="list-style-type: none"> a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts. d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers. e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting

MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting Represent data with plots on the real number line (dot plots, histograms, and box plots). ★
MAFS.912.S-ID.1.1:	Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
MAFS.K12.MP.6.1:	Attend to precision. Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

GENERAL NOTES

Visions and Countervisions: Europe, the U.S. and the World from 1848 - The grade 9-12 Visions and Countervisions course consists of the following content area strands: World History, American History, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of major concepts and trends evidenced in the United States, Europe, and the world from 1848 to the present. Content should include, but is not limited to, the visions of revolution, nationalism, and imperialism evidenced in European history from 1848 to 1918, international politics from 1918 to 1945 emphasizing post-war Europe, cultural identities following nationalist and independent movements, the development and rise of communism, domestic issues affecting the United States from 1880 to the present, and the United States economic, political, and social policies and their effects on the world from 1898 to the present.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2100480	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: American and Western Hemispheric Histories >
Number of Credits: One (1) credit	Abbreviated Title: VISIONS/COUNTER HON
Course Type: Core Academic Course	Course Length: Year (Y)
Course Status: Course Approved	Course Attributes:
Grade Level(s): 9,10,11,12	<ul style="list-style-type: none">• Honors• Class Size Core Required
Graduation Requirement: United States History	Course Level: 3

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Visions and Countervisions: Europe, U.S. and the World from 1848 Honors (#2100480) 2022 - And Beyond

Course Standards

Name	Description
SS.912.A.1.1:	Describe the importance of historiography, which includes how historical knowledge is obtained and transmitted, when interpreting events in history.
SS.912.A.1.2:	Utilize a variety of primary and secondary sources to identify author, historical significance, audience, and authenticity to understand a historical period. Clarifications: Examples of primary and secondary sources may be found on various websites such as the site for The Kinsey Collection.
SS.912.A.1.3:	Utilize timelines to identify the time sequence of historical data.
SS.912.A.1.4:	Analyze how images, symbols, objects, cartoons, graphs, charts, maps, and artwork may be used to interpret the significance of time periods and events from the past.
SS.912.A.1.5:	Evaluate the validity, reliability, bias, and authenticity of current events and Internet resources. Clarifications: Students should be encouraged to utilize FINDS (Focus, Investigate, Note, Develop, Score), Florida's research process model accessible at: http://www.fl DOE.org/bii/library_media/pdf/12totalfinds.pdf
SS.912.A.1.6:	Use case studies to explore social, political, legal, and economic relationships in history.
SS.912.A.1.7:	Describe various socio-cultural aspects of American life including arts, artifacts, literature, education, and publications.
SS.912.A.2.1:	Review causes and consequences of the Civil War. Clarifications: Examples may include, but are not limited to, slavery, states' rights, territorial claims, abolitionist movement, regional differences, Reconstruction, 13th, 14th, and 15th amendments. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is assessed view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.2:	Assess the influence of significant people or groups on Reconstruction. Clarifications: Examples may include, but are not limited to, Alexander H. Stephens, Andrew Johnson, carpetbaggers, Charles Sumner, Elizabeth Cady Stanton, Frederick Douglass, Hiram Revels, Hiram Rhodes Revels, Jefferson Davis, Ku Klux Klan, Oliver O. Howard, Radical Republicans, Rutherford B. Hayes, scalawags, Thaddeus Stevens, Ulysses S. Grant, and William T. Sherman. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.3:	Describe the issues that divided Republicans during the early Reconstruction era. Clarifications: Examples may include, but are not limited to, the impeachment of Andrew Johnson, southern whites, blacks, black legislators and white extremist organizations such as the KKK, Knights of the White Camellia, The White League, Red Shirts, and Pale Faces. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.4:	Distinguish the freedoms guaranteed to African Americans and other groups with the 13th, 14th, and 15th Amendments to the Constitution. Clarifications: Examples may include, but are not limited to, abolition of slavery, citizenship, suffrage, equal protection. This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.2.5:	Assess how Jim Crow Laws influenced life for African Americans and other racial/ethnic minority groups. Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
	Compare the effects of the Black Codes and the Nadir on freed people, and analyze the sharecropping system and debt peonage as practiced in the United States.

SS.912.A.2.6:	<p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.2.7:	<p>Review the Native American experience.</p> <p>Clarifications: Examples may include, but are not limited to, westward expansion, reservation system, the Dawes Act, Wounded Knee Massacre, Sand Creek Massacre, Battle of Little Big Horn, Indian Schools, government involvement in the killing of the buffalo.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 19-21. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.1:	<p>Analyze the economic challenges to American farmers and farmers' responses to these challenges in the mid to late 1800s.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications page 22. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, creation of agricultural colleges, Morrill Land Grant Act, gold standard and Bimetallism, the creation of the Populist Party.</p>
SS.912.A.3.2:	<p>Examine the social, political, and economic causes, course, and consequences of the second Industrial Revolution that began in the late 19th century.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.3.3:	<p>Compare the first and second Industrial Revolutions in the United States.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage. Examples may include, but are not limited to, trade, development of new industries.</p>
SS.912.A.3.4:	<p>Determine how the development of steel, oil, transportation, communication, and business practices affected the United States economy.</p> <p>Clarifications: Examples may include, but are not limited to, railroads, the telegraph, pools, holding companies, trusts, corporations, contributed to westward expansion, expansion of trade and development of new industries, vertical and horizontal integration.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 23-26. SS.912.A.7.3:	<p>Examine the changing status of women in the United States from post-World War II to present.</p> <p>Clarifications: Examples may include, but are not limited to, increased numbers of women in the workforce, Civil Rights Act of 1964, <i>The Feminine Mystique</i>, National Organization for Women, <i>Roe v. Wade</i>, Equal Rights Amendment, Title IX, Betty Freidan, Gloria Steinem, Phyllis Schlafly, Billie Jean King, feminism.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-48. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.4:	<p>Evaluate the success of 1960s era presidents' foreign and domestic policies.</p> <p>Clarifications: Examples may include, but are not limited to, civil rights legislation, Space Race, Great Society, War on Poverty.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.5:	<p>Compare nonviolent and violent approaches utilized by groups (African Americans, women, Native Americans, Hispanics) to achieve civil rights.</p> <p>Clarifications: Examples may include, but are not limited to, sit-ins, Freedom Rides, boycotts, riots, protest marches.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
	<p>Assess key figures and organizations in shaping the Civil Rights Movement and Black Power Movement.</p> <p>Clarifications: Examples may include, but are not limited to, the NAACP, National Urban League, SNCC, CORE, James Farmer, Charles Houston, Thurgood Marshall, Rosa Parks, Constance Baker Motley, the Little Rock Nine, Roy Wilkins, Whitney M. Young, A. Philip Randolph, Dr. Martin Luther King, Jr.,</p>

SS.912.A.7.6:	<p>Robert F. Williams, Fannie Lou Hamer, Malcolm X [El-Hajj Malik El-Shabazz], Stokely Carmichael [Kwame Ture], H. Rap Brown [Jamil Abdullah Al-Amin], the Black Panther Party [e.g., Huey P. Newton, Bobby Seale].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.7:	<p>Assess the building of coalitions between African Americans, whites, and other groups in achieving integration and equal rights.</p> <p>Clarifications: Examples may include, but are not limited to, Freedom Summer, Freedom Rides, Montgomery Bus Boycott, Tallahassee Bus Boycott of 1956, March on Washington.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 51-52. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.8:	<p>Analyze significant Supreme Court decisions relating to integration, busing, affirmative action, the rights of the accused, and reproductive rights.</p> <p>Clarifications: Examples may include, but are not limited to, Plessy v. Ferguson [1896], Brown v. Board of Education [1954], Swann v. Charlotte-Mecklenburg Board of Education [1971], Regents of the University of California v. Bakke [1978], Miranda v. Arizona [1966], Gideon v. Wainwright [1963], Mapp v. Ohio [1961], and Roe v. Wade [1973].</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 53-54. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.9:	<p>Examine the similarities of social movements (Native Americans, Hispanics, women, anti-war protesters) of the 1960s and 1970s.</p>
SS.912.A.7.10:	<p>Analyze the significance of Vietnam and Watergate on the government and people of the United States.</p> <p>Clarifications: Examples may include, but are not limited to, mistrust of government, reinforcement of freedom of the press, as well as checks and balances. Examples may include, but are not limited to, mistrust of government and reinforcement of freedom of the press.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.13:	<p>Analyze the attempts to extend New Deal legislation through the Great Society and the successes and failures of these programs to promote social and economic stability.</p> <p>Clarifications: Examples may include, but are not limited to, Civil Rights Act of 1964, Voting Rights Act of 1965, War on Poverty, Medicare, Medicaid, Headstart.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 49-50 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is</p>

	evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p> <p>Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	<p>Explain how historians use historical inquiry and other sciences to understand the past.</p> <p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.1.6:	<p>Evaluate the role of history in shaping identity and character.</p> <p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.4.11:	<p>Summarize the causes that led to the Age of Exploration, and identify major voyages and sponsors.</p> <p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks.

MA.K12.MTR.1.1:

- Help and support each other when attempting a new method or approach.

Clarifications:

Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1:

Demonstrate understanding by representing problems in multiple ways.

Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1:

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.

MA.K12.MTR.6.1:	<ul style="list-style-type: none"> • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications.
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines.
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p>
ELA.K12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

GENERAL NOTES

Visions and Countervisions: Europe, the U.S. and the World from 1848 - The grade 9-12 Visions and Countervisions course consists of the following content area strands: World History, American History, Geography, and Humanities. The primary content emphasis for this course pertains to the chronological study of major concepts and trends evidenced in the United States, Europe, and the world from 1848 to the present. Content should include, but is not limited to, the visions of revolution, nationalism, and imperialism evidenced in European history from 1848 to 1918, international politics from 1918 to 1945 emphasizing post-war Europe, cultural identities following nationalist and independent movements, the development and rise of communism, domestic issues affecting the United States from 1880 to the present, and the United States economic, political, and social policies and their effects on the world from 1898 to the present.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

VERSION DESCRIPTION

For more information about this Cambridge course, visit <http://www.cie.org.uk/programmes-and-qualifications/cambridge-advanced/cambridge-international-as-and-a-levels/curriculum/>.

GENERAL INFORMATION

Course Number: 2100505

Number of Credits: One (1) credit

Course Type: Core Academic Course

Course Status: Course Approved

Graduation Requirement: United States History

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** American and Western Hemispheric Histories >

Abbreviated Title: AICE U.S. HIST 2 AL

Course Length: Year (Y)

Course Attributes:

- Advanced International Certificate of Education (AICE)

Course Level: 3

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

International Baccalaureate History of the Americas (#2100800) 2014 - And Beyond (current)

General Course Information and Notes

GENERAL NOTES

The curriculum description for this IB course is provided at <http://www.ibo.org/en/programmes/>.

GENERAL INFORMATION

Course Number: 2100800	Course Path: Section: Grades PreK to 12 Education Courses > Grade Group: Grades 9 to 12 and Adult Education Courses > Subject: Social Studies > SubSubject: American and Western Hemispheric Histories >
Number of Credits: One (1) credit	Abbreviated Title: IB HISTORY OF AMER Course Length: Year (Y) Course Attributes: <ul style="list-style-type: none">• International Baccalaureate (IB)
Course Type: Core Academic Course	Course Level: 3
Course Status: Course Approved	
Grade Level(s): 9,10,11,12	
Graduation Requirement: United States History	

Educator Certifications

History (Grades 6-12)

Social Science (Grades 6-12)

Social Studies Transfer (#2100990) 2015 - 2022 (current)

General Course Information and Notes

VERSION DESCRIPTION

SUBJECT AREA TRANSFER NUMBERS

Each course transferred into a Florida public school by an out-of-state or non-public school student should be matched with a course title and number when such course provides substantially the same content. However, a few transfer courses may not be close enough in content to be matched. For those courses a subject area transfer number is provided.

GENERAL INFORMATION

Course Number: 2100990

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** World and Eastern Hemispheric Histories > **Abbreviated Title:** SOC STUDIES TRAN
Course Length: Not Applicable

Course Type: Transfer Course

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Social Studies Transfer (#2100990) 2022 - And Beyond

Course Standards

Name	Description
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways. Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency. Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.
MA.K12.MTR.4.1:	<p>Engage in discussions that reflect on the mathematical thinking of self and others. Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Communicate mathematical ideas, vocabulary and methods effectively. Analyze the mathematical thinking of others. Compare the efficiency of a method to those expressed by others. Recognize errors and suggest how to correctly solve the task. Justify results by explaining methods and processes. Construct possible arguments based on evidence. <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. Create opportunities for students to discuss their thinking with peers. Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. Develop students' ability to justify methods and compare their responses to the responses of their peers.
	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> Focus on relevant details within a problem. Create plans and procedures to logically order events, steps or ideas to solve problems. Decompose a complex problem into manageable parts.

MA.K12.MTR.5.1:

- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.

ELA.K12.EE.4.1:

Use the accepted rules governing a specific format to create quality work.

Clarifications:

Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to

ELA.K12.EE.5.1:

	do quality work.
	Use appropriate voice and tone when speaking or writing.
ELA.K12.EE.6.1:	Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.

Anthropology (#2101300) 2015 - 2022 (current)

Course Standards

Name	Description
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but aren't limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.2:	<p>Evaluate the importance of political participation and civic participation.</p>
SS.912.C.2.3:	<p>Experience the responsibilities of citizens at the local, state, or federal levels.</p> <p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.912.C.2.4:	<p>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</p>
SS.912.C.2.10:	<p>Monitor current public issues in Florida.</p>
SS.912.C.2.12:	<p>Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</p>
SS.912.C.2.13:	<p>Explain the changing roles of television, radio, press, and Internet in political communication.</p>
SS.912.C.2.13:	<p>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</p> <p>Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</p>
SS.912.C.4.1:	<p>Explain how the world's nations are governed differently.</p>

SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.3.5:	Compare the current United States economy with other developed and developing nations. Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
SS.912.G.1.4:	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps. Clarifications: Examples are thematic, contour, and dot-density.
SS.912.G.2.1:	Identify the physical characteristics and the human characteristics that define and differentiate regions. Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications. Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	Explain philosophical beliefs as they relate to works in the arts. Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	Compare time measurement systems used by different cultures. Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
SS.912.W.1.3:	Interpret and evaluate primary and secondary sources. Clarifications: Examples are artifacts, images, auditory and written sources.
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past. Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.1.6:	Evaluate the role of history in shaping identity and character. Clarifications: Examples are ethnic, cultural, personal, national, religious.
SS.912.W.3.1:	Discuss significant people and beliefs associated with Islam. Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.6.4:	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America. Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
SS.912.W.8.10:	Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades. Clarifications:

	Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.
	Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.
SS.912.W.9.1:	<p>Clarifications: Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.</p>
	Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.
SS.912.W.9.3:	<p>Clarifications: Examples are prejudice, racism, stereotyping, economic competition.</p>
	Describe the causes and effects of twentieth century nationalist conflicts.
SS.912.W.9.4:	<p>Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.</p>
SS.912.W.9.5:	Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.
SS.912.W.9.6:	Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.
SS.912.W.9.7:	Describe the impact of and global response to international terrorism.
LAFS.910.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, attending to such features as the date and origin of the information.
LAFS.910.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary of how key events or ideas develop over the course of the text.
LAFS.910.RH.1.3:	Analyze in detail a series of events described in a text; determine whether earlier events caused later ones or simply preceded them.
LAFS.910.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including vocabulary describing political, social, or economic aspects of history/social science.
LAFS.910.RH.2.5:	Analyze how a text uses structure to emphasize key points or advance an explanation or analysis.
LAFS.910.RH.2.6:	Compare the point of view of two or more authors for how they treat the same or similar topics, including which details they include and emphasize in their respective accounts.
LAFS.910.RH.3.7:	Integrate quantitative or technical analysis (e.g., charts, research data) with qualitative analysis in print or digital text.
LAFS.910.RH.3.8:	Assess the extent to which the reasoning and evidence in a text support the author's claims.
LAFS.910.RH.3.9:	Compare and contrast treatments of the same topic in several primary and secondary sources.
LAFS.910.RH.4.10:	By the end of grade 10, read and comprehend history/social studies texts in the grades 9–10 text complexity band independently and proficiently.
LAFS.910.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 9–10 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to set rules for collegial discussions and decision-making (e.g., informal consensus, taking votes on key issues, presentation of alternate views), clear goals and deadlines, and individual roles as needed. Propel conversations by posing and responding to questions that relate the current discussion to broader themes or larger ideas; actively incorporate others into the discussion; and clarify, verify, or challenge ideas and conclusions. Respond thoughtfully to diverse perspectives, summarize points of agreement and disagreement, and, when warranted, qualify or justify their own views and understanding and make new connections in light of the evidence and reasoning presented.
LAFS.910.SL.1.2:	Integrate multiple sources of information presented in diverse media or formats (e.g., visually, quantitatively, orally) evaluating the credibility and accuracy of each source.
LAFS.910.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, identifying any fallacious reasoning or exaggerated or distorted evidence.
LAFS.910.SL.2.4:	Present information, findings, and supporting evidence clearly, concisely, and logically such that listeners can follow the line of reasoning and the organization, development, substance, and style are appropriate to purpose, audience, and task.
LAFS.910.WHST.1.1:	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that establishes clear relationships among the claim(s), counterclaims, reasons, and evidence. Develop claim(s) and counterclaims fairly, supplying data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form and in a manner that anticipates the audience's knowledge level and concerns. Use words, phrases, and clauses to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from or supports the argument presented.
LAFS.910.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <ol style="list-style-type: none"> Introduce a topic and organize ideas, concepts, and information to make important connections and distinctions; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension. Develop the topic with well-chosen, relevant, and sufficient facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among ideas and concepts. Use precise language and domain-specific vocabulary to manage the complexity of the topic and convey a style appropriate to the discipline and context as well as to the expertise of likely readers. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing. Provide a concluding statement or section that follows from and supports the information or explanation presented (e.g., articulating implications or the significance of the topic).

LAFS.910.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.910.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.910.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products, taking advantage of technology's capacity to link to other information and to display information flexibly and dynamically.
LAFS.910.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.910.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the usefulness of each source in answering the research question; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and following a standard format for citation.
LAFS.910.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.910.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
MAFS.K12.MP.1.1:	Make sense of problems and persevere in solving them. Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
MAFS.K12.MP.3.1:	Construct viable arguments and critique the reasoning of others. Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
MAFS.K12.MP.5.1:	Use appropriate tools strategically. Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other

mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Attend to precision.

MAFS.K12.MP.6.1:

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

ELD.K12.ELL.SI.1:

English language learners communicate for social and instructional purposes within the school setting.

ELD.K12.ELL.SS.1:

English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.

HE.912.C.2.7:

Analyze how culture supports and challenges health beliefs, practices, and behaviors.

Clarifications:

Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

General Course Information and Notes

GENERAL NOTES

The grade 9-12 Anthropology course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the differences and similarities, both biological and cultural, in human populations. Students recognize the characteristics that define their culture and gain an appreciation for the culture of others. Content should include, but is not limited to, human biological and cultural origins, adaptation to the physical environment, the diversity of human behavior, the evolution of social and cultural institutions, patterns of language development, family and kinship relationships, and the effect of change on cultural institutions.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Course Standards

Name	Description
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but are not limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p> <p>Clarifications: Examples may include, but are not limited to, NAFTA, World Trade Organization.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.15:	<p>Analyze the effects of foreign and domestic terrorism on the American people.</p> <p>Clarifications: Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.16:	<p>Examine changes in immigration policy and attitudes toward immigration since 1950.</p> <p>Clarifications: This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.17:	<p>Examine key events and key people in Florida history as they relate to United States history.</p> <p>Clarifications: Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 47-52 and pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.C.2.2:	<p>Evaluate the importance of political participation and civic participation.</p> <p>Experience the responsibilities of citizens at the local, state, or federal levels.</p>
SS.912.C.2.3:	<p>Clarifications: Examples are registering or pre-registering to vote, volunteering, communicating with government officials, informing others about current issues, participating in a political campaign/mock election.</p>
SS.912.C.2.4:	<p>Evaluate, take, and defend positions on issues that cause the government to balance the interests of individuals with the public good.</p> <p>Monitor current public issues in Florida.</p>
SS.912.C.2.10:	<p>Clarifications: Examples are On-line Sunshine, media, e-mails to government officials, political text messaging.</p>
SS.912.C.2.12:	<p>Explain the changing roles of television, radio, press, and Internet in political communication.</p> <p>Analyze various forms of political communication and evaluate for bias, factual accuracy, omission, and emotional appeal.</p>
SS.912.C.2.13:	<p>Clarifications: Examples are political cartoons, propaganda, campaign advertisements, political speeches, electronic bumper stickers, blogs, media.</p>
SS.912.C.4.1:	<p>Explain how the world's nations are governed differently.</p>

SS.912.C.4.2:	Evaluate the influence of American foreign policy on other nations and the influences of other nations on American policies and society.
SS.912.C.4.3:	Assess human rights policies of the United States and other countries.
SS.912.C.4.4:	Compare indicators of democratization in multiple countries.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
	Compare the current United States economy with other developed and developing nations.
SS.912.E.3.5:	Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.G.1.1:	Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.
SS.912.G.1.2:	Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.
SS.912.G.1.3:	Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.
	Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.
SS.912.G.1.4:	Clarifications: Examples are thematic, contour, and dot-density.
	Identify the physical characteristics and the human characteristics that define and differentiate regions.
SS.912.G.2.1:	Clarifications: Examples of physical characteristics are climate, terrain, resources. Examples of human characteristics are religion, government, economy, demography.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
	Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.
SS.912.G.2.3:	Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
	Explain philosophical beliefs as they relate to works in the arts.
SS.912.H.1.4:	Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
	Compare time measurement systems used by different cultures.
SS.912.W.1.2:	Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.
	Interpret and evaluate primary and secondary sources.
SS.912.W.1.3:	Clarifications: Examples are artifacts, images, auditory and written sources.
	Explain how historians use historical inquiry and other sciences to understand the past.
SS.912.W.1.4:	Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
	Evaluate the role of history in shaping identity and character.
SS.912.W.1.6:	Clarifications: Examples are ethnic, cultural, personal, national, religious.
	Discuss significant people and beliefs associated with Islam.
SS.912.W.3.1:	Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
	Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.
SS.912.W.6.4:	Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
	Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.
SS.912.W.8.10:	Clarifications:

Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.

SS.912.W.9.1: Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.
Clarifications:
Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.

SS.912.W.9.3: Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.
Clarifications:
Examples are prejudice, racism, stereotyping, economic competition.

SS.912.W.9.4: Describe the causes and effects of twentieth century nationalist conflicts.
Clarifications:
Examples are Cyprus, Kashmir, Tibet, Northern Ireland.

SS.912.W.9.5: Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.

SS.912.W.9.6: Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.

SS.912.W.9.7: Describe the impact of and global response to international terrorism.

MA.K12.MTR.1.1: Mathematicians who participate in effortful learning both individually and with others:

- Analyze the problem in a way that makes sense given the task.
- Ask questions that will help with solving the task.
- Build perseverance by modifying methods as needed while solving a challenging task.
- Stay engaged and maintain a positive mindset when working to solve tasks.
- Help and support each other when attempting a new method or approach.

Clarifications:
Teachers who encourage students to participate actively in effortful learning both individually and with others:

- Cultivate a community of growth mindset learners.
- Foster perseverance in students by choosing tasks that are challenging.
- Develop students' ability to analyze and problem solve.
- Recognize students' effort when solving challenging problems.

MA.K12.MTR.2.1: Demonstrate understanding by representing problems in multiple ways.
Mathematicians who demonstrate understanding by representing problems in multiple ways:

- Build understanding through modeling and using manipulatives.
- Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations.
- Progress from modeling problems with objects and drawings to using algorithms and equations.
- Express connections between concepts and representations.
- Choose a representation based on the given context or purpose.

Clarifications:
Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

MA.K12.MTR.3.1: Complete tasks with mathematical fluency.
Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

Clarifications:
Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1: Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:
Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.

- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

Clarifications:

See Text Complexity for grade-level complexity bands and a text complexity rubric.

ELA.K12.EE.2.1:

Make inferences to support comprehension.

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

ELA.K12.EE.3.1:

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations.

ELA.K12.EE.4.1:

	In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.7:	Analyze how culture supports and challenges health beliefs, practices, and behaviors. Clarifications: Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.

General Course Information and Notes

GENERAL NOTES

The grade 9-12 Anthropology course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the differences and similarities, both biological and cultural, in human populations. Students recognize the characteristics that define their culture and gain an appreciation for the culture of others. Content should include, but is not limited to, human biological and cultural origins, adaptation to the physical environment, the diversity of human behavior, the evolution of social and cultural institutions, patterns of language development, family and kinship relationships, and the effect of change on cultural institutions.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.912.A.7.11:	<p>Analyze the foreign policy of the United States as it relates to Africa, Asia, the Caribbean, Latin America, and the Middle East.</p> <p>Clarifications: Examples may include, but aren't limited to, Haiti, Bosnia-Kosovo, Rwanda, Grenada, Camp David Accords, Iran Hostage Crisis, Lebanon, Iran-Iraq War, Reagan Doctrine, Iran-Contra Affair, Persian Gulf War.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 55-56. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.12:	<p>Analyze political, economic, and social concerns that emerged at the end of the 20th century and into the 21st century.</p> <p>Clarifications: Examples may include, but are not limited to, AIDS, Green Revolution, outsourcing of jobs, global warming, human rights violations.</p> <p>This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages 57-59. Additional resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.</p>
SS.912.A.7.14:	<p>Review the role of the United States as a participant in the global economy (trade agreements, international competition, impact on American labor, environmental concerns).</p>

Clarifications:

Examples may include, but are not limited to, NAFTA, World Trade Organization.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages [57-59](#). Additional resources may be found on the [FLDOE End-of-Course \(EOC\) Assessments](#) webpage and the [FLDOE Social Studies](#) webpage.

[SS.912.A.7.15:](#)

Analyze the effects of foreign and domestic terrorism on the American people.

Clarifications:

Examples may include, but are not limited to, Oklahoma City bombing, attack of September 11, 2001, Patriot Act, wars in Afghanistan and Iraq.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages [57-59](#). Additional resources may be found on the [FLDOE End-of-Course \(EOC\) Assessments](#) webpage and the [FLDOE Social Studies](#) webpage.

[SS.912.A.7.16:](#)

Examine changes in immigration policy and attitudes toward immigration since 1950.

Clarifications:

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages [57-59](#). Additional resources may be found on the [FLDOE End-of-Course \(EOC\) Assessments](#) webpage and the [FLDOE Social Studies](#) webpage.

[SS.912.A.7.17:](#)

Examine key events and key people in Florida history as they relate to United States history.

Clarifications:

Examples may include, but are not limited to, selection of Central Florida as a location for Disney, growth of the citrus and cigar industries, construction of Interstates, Harry T. Moore, Pork Chop Gang, Claude Pepper, changes in the space program, use of DEET, Hurricane Andrew, the Election of 2000, migration and immigration, Sunbelt state.

This benchmark is annually evaluated on the United States History End-of-Course Assessment. For more information on how this benchmark is evaluated view the United States History End-of-Course Assessment Test Item Specifications pages [47-52](#) and pages [57-59](#). Additional

	resources may be found on the FLDOE End-of-Course (EOC) Assessments webpage and the FLDOE Social Studies webpage.
SS.912.CG.2.2:	<p>Explain the importance of political and civic participation to the success of the United States’ constitutional republic.</p> <ul style="list-style-type: none"> • Students will discuss various ways in which U.S. citizens can exercise political and civic participation. • Students will identify historical examples of political and civic participation (e.g., Civil Rights Movement, Women’s Suffrage Movement). • Students will describe the ways in which individuals can be denied and limited in their right to practice political and civic participation (e.g., losing voting rights for felony conviction, limitations on political contributions, limits on the type of protesting).
SS.912.CG.2.3:	<p>Explain the responsibilities of citizens at the local, state and national levels.</p> <ul style="list-style-type: none"> • Students will identify various responsibilities held by citizens (e.g., voting, volunteering and being informed, respecting laws). • Students will understand the process of registering and preregistering to vote and how to complete a ballot in Florida (e.g., uniform primary and general election ballot). • Students will discuss appropriate methods of communication with public officials (e.g., corresponding, attending public meetings, requesting a meeting and providing information). • Students will participate in classroom activities that simulate exercising the responsibilities of citizenship.
SS.912.CG.2.4:	<p>Evaluate, take and defend objective, evidence-based positions on issues that cause the government to balance the interests of individuals with the public good.</p> <ul style="list-style-type: none"> • Students will examine situations when individuals’ rights have been restricted for the public good (e.g., limits on speech or rationing of goods during wartime, enactment of the Patriot Act). • Students will analyze how environmental and financial policies place limitations on citizens and private industry for the public good. • Students will explain different services provided by local, state and national governments to citizens to ensure their rights are protected (e.g., social services, law enforcement, defense, emergency response).
SS.912.CG.2.12:	<p>Explain how interest groups, the media and public opinion influence local, state and national decision-making related to public issues.</p> <ul style="list-style-type: none"> • Students will objectively discuss current public issues in Florida and use both the U.S. and Florida Constitutions to justify pro and con positions.

	<ul style="list-style-type: none"> • Students will examine the relationship and responsibilities of both the state and national governments regarding these public issues. • Students will analyze public policy solutions related to local, state and national issues.
SS.912.CG.2.13:	<p>Analyze the influence and effects of various forms of media and the internet in political communication.</p> <ul style="list-style-type: none"> • Students will explain how the methods of political communication has changed over time (e.g., television, radio, press, social media). • Students will describe how the methods used by political officials to communicate with the public has changed over time. • Students will discuss the strengths and weaknesses of different methods of political communication.
SS.912.CG.2.11:	<p>Evaluate political communication for bias, factual accuracy, omission and emotional appeal.</p> <ul style="list-style-type: none"> • Students will compare the reporting on the same political event or issue from multiple perspectives. • Students will identify various forms of propaganda (e.g., plain folks, glittering generalities, testimonial, fear, logical fallacies). • Students will discuss the historical impact of political communication on American political process and public opinion. • Examples of political communication may include, but are not limited to, political cartoons, propaganda, campaign advertisements, political speeches, bumper stickers, blogs, press and social media.
SS.912.CG.4.1:	<p>Analyze how liberty and economic freedom generate broad-based opportunity and prosperity in the United States.</p> <ul style="list-style-type: none"> • Students will differentiate between government systems (e.g., autocracy, democracy, monarchy, oligarchy republic, theocracy). • Students will differentiate between economic systems (e.g., capitalism, communism, mixed market, socialism). • Students will analyze the disadvantages of authoritarian control over the economy (e.g., communism and socialism) in generating broad-based economic prosperity for their population.
SS.912.CG.4.2:	<p>Explain how the United States uses foreign policy to influence other nations.</p> <ul style="list-style-type: none"> • Students will explain how the policies of other nations influence U.S. policy and society. • Students will identify agencies of the U.S. government that contribute to its foreign policy agenda (e.g., National Security Agency, Central Intelligence Agency).

	<ul style="list-style-type: none"> • Students will explain the advantages and disadvantages of how nongovernmental organizations (NGOs) influence foreign policy (e.g., United States Agency for International Development, Red Cross, American Woman Suffrage Association, Amnesty International). • Students will explain how U.S. trade policy influences its relationship with other nations (e.g., China, Saudi Arabia). • Students will explain how the use of embargos and economics sanctions by the United States has affected other nations (e.g., Cuba, Iran, Syria). • Students will explain the U.S. response to international conflicts.
SS.912.CG.4.3:	<p>Explain how U.S. foreign policy supports democratic principles and protects human rights around the world.</p> <ul style="list-style-type: none"> • Students will explain how U.S. foreign policy aims to protect liberty around the world and describe how the founding documents support the extension of liberty to all mankind.
SS.912.CG.4.4:	<p>Identify indicators of democratization in foreign countries.</p> <ul style="list-style-type: none"> • Students will recognize indicators of democratization as a system of free and fair elections, active civic participation, the protection of human rights, and the rule of law.
SS.912.E.2.2:	<p>Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.G.1.1:	<p>Design maps using a variety of technologies based on descriptive data to explain physical and cultural attributes of major world regions.</p>
SS.912.G.1.2:	<p>Use spatial perspective and appropriate geographic terms and tools, including the Six Essential Elements, as organizational schema to describe any given place.</p>
SS.912.G.1.3:	<p>Employ applicable units of measurement and scale to solve simple locational problems using maps and globes.</p>
SS.912.G.1.4:	<p>Analyze geographic information from a variety of sources including primary sources, atlases, computer, and digital sources, Geographic Information Systems (GIS), and a broad variety of maps.</p> <p>Clarifications: Examples are thematic, contour, and dot-density.</p>
SS.912.G.2.1:	<p>Identify the physical characteristics and the human characteristics that define and differentiate regions.</p>

	<p>Clarifications: Examples of physical characteristics are climate, terrain, resources.</p> <p>Examples of human characteristics are religion, government, economy, demography.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.2.3:	<p>Use geographic terms and tools to analyze case studies of regional issues in different parts of the world that have critical economic, physical, or political ramifications.</p> <p>Clarifications: Examples are desertification, global warming, cataclysmic natural disasters.</p>
SS.912.G.4.1:	Interpret population growth and other demographic data for any given place.
SS.912.G.4.2:	Use geographic terms and tools to analyze the push/pull factors contributing to human migration within and among places.
SS.912.G.4.3:	Use geographic terms and tools to analyze the effects of migration both on the place of origin and destination, including border areas.
SS.912.G.4.7:	Use geographic terms and tools to explain cultural diffusion throughout places, regions, and the world.
SS.912.G.4.9:	Use political maps to describe the change in boundaries and governments within continents over time.
SS.912.H.1.4:	<p>Explain philosophical beliefs as they relate to works in the arts.</p> <p>Clarifications: Examples are classical architecture, protest music, Native American dance, Japanese Noh.</p>
SS.912.H.3.1:	Analyze the effects of transportation, trade, communication, science, and technology on the preservation and diffusion of culture.
SS.912.H.3.2:	Identify social, moral, ethical, religious, and legal issues arising from technological and scientific developments, and examine their influence on works of arts within a culture.
SS.912.W.1.1:	Use timelines to establish cause and effect relationships of historical events.
SS.912.W.1.2:	<p>Compare time measurement systems used by different cultures.</p> <p>Clarifications: Examples are Chinese, Gregorian, and Islamic calendars, dynastic periods, decade, century, era.</p>
SS.912.W.1.3:	<p>Interpret and evaluate primary and secondary sources.</p> <p>Clarifications: Examples are artifacts, images, auditory and written sources.</p>
SS.912.W.1.4:	Explain how historians use historical inquiry and other sciences to understand the past.

	<p>Clarifications: Examples are archaeology, economics, geography, forensic chemistry, political science, physics.</p>
SS.912.W.1.5:	Compare conflicting interpretations or schools of thought about world events and individual contributions to history (historiography).
SS.912.W.1.6:	<p>Evaluate the role of history in shaping identity and character.</p> <p>Clarifications: Examples are ethnic, cultural, personal, national, religious.</p>
SS.912.W.3.1:	<p>Discuss significant people and beliefs associated with Islam.</p> <p>Clarifications: Examples are the prophet Muhammad, the early caliphs, the Pillars of Islam, Islamic law, the relationship between government and religion in Islam.</p>
SS.912.W.3.2:	Compare the major beliefs and principles of Judaism, Christianity, and Islam.
SS.912.W.6.4:	<p>Describe the 19th and early 20th century social and political reforms and reform movements and their effects in Africa, Asia, Europe, the United States, the Caribbean, and Latin America.</p> <p>Clarifications: Examples are Meiji Reforms, abolition of slavery in the British Empire, expansion of women's rights, labor laws.</p>
SS.912.W.8.7:	Compare post-war independence movements in African, Asian, and Caribbean countries.
SS.912.W.8.9:	Analyze the successes and failures of democratic reform movements in Africa, Asia, the Caribbean, and Latin America.
SS.912.W.8.10:	<p>Explain the impact of religious fundamentalism in the last half of the 20th century, and identify related events and forces in the Middle East over the last several decades.</p> <p>Clarifications: Examples are Iranian Revolution, Mujahideen in Afghanistan, Persian Gulf War.</p>
SS.912.W.9.1:	<p>Identify major scientific figures and breakthroughs of the 20th century, and assess their impact on contemporary life.</p> <p>Clarifications: Examples are Marie Curie, Albert Einstein, Enrico Fermi, Sigmund Freud, Wright Brothers, Charles R. Drew, mass vaccination, atomic energy, transistor, microchip, space exploration, Internet, discovery of DNA, Human Genome Project.</p>
SS.912.W.9.3:	<p>Explain cultural, historical, and economic factors and governmental policies that created the opportunities for ethnic cleansing or genocide in Cambodia, the Balkans, Rwanda, and Darfur, and describe various governmental and non-governmental responses to them.</p> <p>Clarifications: Examples are prejudice, racism, stereotyping, economic competition.</p>

<u>SS.912.W.9.4:</u>	<p>Describe the causes and effects of twentieth century nationalist conflicts.</p> <p>Clarifications: Examples are Cyprus, Kashmir, Tibet, Northern Ireland.</p>
<u>SS.912.W.9.5:</u>	<p>Assess the social and economic impact of pandemics on a global scale, particularly within the developing and under-developed world.</p>
<u>SS.912.W.9.6:</u>	<p>Analyze the rise of regional trade blocs such as the European Union and NAFTA, and predict the impact of increased globalization in the 20th and 21st centuries.</p>
<u>SS.912.W.9.7:</u>	<p>Describe the impact of and global response to international terrorism.</p>
<u>MA.K12.MTR.1.1:</u>	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Analyze the problem in a way that makes sense given the task. • Ask questions that will help with solving the task. • Build perseverance by modifying methods as needed while solving a challenging task. • Stay engaged and maintain a positive mindset when working to solve tasks. • Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> • Cultivate a community of growth mindset learners. • Foster perseverance in students by choosing tasks that are challenging. • Develop students' ability to analyze and problem solve. • Recognize students' effort when solving challenging problems.
	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> • Build understanding through modeling and using manipulatives. • Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. • Progress from modeling problems with objects and drawings to using algorithms and equations. • Express connections between concepts and representations. • Choose a representation based on the given context or purpose.
<u>MA.K12.MTR.2.1:</u>	

Clarifications:

Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:

- Help students make connections between concepts and representations.
- Provide opportunities for students to use manipulatives when investigating concepts.
- Guide students from concrete to pictorial to abstract representations as understanding progresses.
- Show students that various representations can have different purposes and can be useful in different situations.

Complete tasks with mathematical fluency.

Mathematicians who complete tasks with mathematical fluency:

- Select efficient and appropriate methods for solving problems within the given context.
- Maintain flexibility and accuracy while performing procedures and mental calculations.
- Complete tasks accurately and with confidence.
- Adapt procedures to apply them to a new context.
- Use feedback to improve efficiency when performing calculations.

[MA.K12.MTR.3.1:](#)

Clarifications:

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.

[MA.K12.MTR.4.1:](#)

Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students’ ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.

Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

[MA.K12.MTR.5.1:](#)

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.

- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students’ ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.

Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

[MA.K12.MTR.6.1:](#)

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, “Does this solution make sense? How do you know?”
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students’ ability to verify solutions through justifications.

Apply mathematics to real-world contexts.

Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

[MA.K12.MTR.7.1:](#)

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.

- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

[ELA.K12.EE.1.1:](#)

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they’ve directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

Read and comprehend grade-level complex texts proficiently.

[ELA.K12.EE.2.1:](#)

Clarifications:

See [Text Complexity](#) for grade-level complexity bands and a text complexity rubric.

Make inferences to support comprehension.

[ELA.K12.EE.3.1:](#)

Clarifications:

Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.

[ELA.K12.EE.4.1:](#)

Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.

Clarifications:

In kindergarten, students learn to listen to one another respectfully.

	<p>In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations.</p> <p>In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K12.ELL.SI.1:	<p>English language learners communicate for social and instructional purposes within the school setting.</p>
ELD.K12.ELL.SS.1:	<p>English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.</p>
HE.912.C.2.7:	<p>Analyze how culture supports and challenges health beliefs, practices, and behaviors.</p> <p>Clarifications: Various cultures' dietary patterns, rites of passage, courtship practices, family roles, personal relationships, ethics, and parenting.</p>

General Course Information and Notes

GENERAL NOTES

The grade 9-12 Anthropology course consists of the following content area strands: American History, World History, Geography, Humanities, Civics and Government. The primary content emphasis for this course pertains to the study of the differences and similarities, both biological and cultural, in human populations. Students recognize the characteristics that define their

culture and gain an appreciation for the culture of others. Content should include, but is not limited to, human biological and cultural origins, adaptation to the physical environment, the diversity of human behavior, the evolution of social and cultural institutions, patterns of language development, family and kinship relationships, and the effect of change on cultural institutions.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Type: Elective Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: Anthropology >

Abbreviated Title: IB SOCIAL ANTHROP 3

Course Length: Year (Y)

Course Attributes:

- International Baccalaureate (IB)

Course Level: 3

Educator Certifications

Social Science (Grades 6-12)

Economics (#2102310) 2019 - 2022 (current)

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls.
SS.912.E.2.4:	Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System. Assess the economic impact of negative and positive externalities on the local, state, and national environment.

SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	<p>Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.</p> <p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p>
SS.912.E.3.3:	<p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
	Write arguments focused on <i>discipline-specific content</i> .

LAFS.1112.WHST.1.1:	<p>a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.N-Q.1.1:	<p>Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.2:	<p>Define appropriate quantities for the purpose of descriptive modeling. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Algebra 1 Content Notes: Working with quantities and the relationships between them provides grounding for work with expressions, equations, and functions.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.3:	<p>Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>

	Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics- The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes: Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL’s need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Economics (#2102310) 2022 - And Beyond

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls.
SS.912.E.2.4:	Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System. Assess the economic impact of negative and positive externalities on the local, state, and national environment.

SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	<p>Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.</p> <p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p>
SS.912.E.3.3:	<p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications:</p>

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

MA.K12.MTR.4.1:

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

MA.K12.MTR.5.1:

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

MA.K12.MTR.6.1:

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

MA.K12.MTR.7.1:

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

ELA.K12.EE.1.1:

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics- The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Special Notes:

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2102310

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: Economics >

Abbreviated Title: ECON

Number of Credits: Half credit (.5)

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Economics

Educator Certifications

Economics (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Economics for Credit Recovery (#2102315) 2019 - 2022 (current)

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls.
SS.912.E.2.4:	Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System. Assess the economic impact of negative and positive externalities on the local, state, and national environment.

SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	<p>Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.</p> <p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p>
SS.912.E.3.3:	<p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
	Write arguments focused on <i>discipline-specific content</i> .

LAFS.1112.WHST.1.1:	<p>a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.N-Q.1.1:	<p>Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.2:	<p>Define appropriate quantities for the purpose of descriptive modeling. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Algebra 1 Content Notes: Working with quantities and the relationships between them provides grounding for work with expressions, equations, and functions.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.3:	<p>Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>

	Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should

ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

GENERAL INFORMATION

Course Number: 2102315

Number of Credits: Half credit (.5)

Course Type: Core Academic Course

Course Status: Course Approved

Economics for Credit Recovery (#2102315) 2022 - And Beyond

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls.
SS.912.E.2.4:	Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System. Assess the economic impact of negative and positive externalities on the local, state, and national environment.

SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications:</p>

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and

concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls.
SS.912.E.2.4:	Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System. Assess the economic impact of negative and positive externalities on the local, state, and national environment.

SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	<p>Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.</p> <p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p>
SS.912.E.3.3:	<p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
LAFS.1112.RH.1.1:	Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.
LAFS.1112.RH.1.2:	Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.
LAFS.1112.RH.1.3:	Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.
LAFS.1112.RH.2.4:	Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).
LAFS.1112.RH.2.5:	Analyze in detail how a complex primary source is structured, including how key sentences, paragraphs, and larger portions of the text contribute to the whole.
LAFS.1112.RH.2.6:	Evaluate authors' differing points of view on the same historical event or issue by assessing the authors' claims, reasoning, and evidence.
LAFS.1112.RH.3.7:	Integrate and evaluate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, as well as in words) in order to address a question or solve a problem.
LAFS.1112.RH.3.8:	Evaluate an author's premises, claims, and evidence by corroborating or challenging them with other information.
LAFS.1112.RH.3.9:	Integrate information from diverse sources, both primary and secondary, into a coherent understanding of an idea or event, noting discrepancies among sources.
LAFS.1112.RH.4.10:	By the end of grade 12, read and comprehend history/social studies texts in the grades 11–CCR text complexity band independently and proficiently.
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.
LAFS.1112.SL.1.3:	Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.
LAFS.1112.SL.2.4:	Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.
	Write arguments focused on <i>discipline-specific content</i> .

LAFS.1112.WHST.1.1:	<p>a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
LAFS.1112.WHST.3.7:	Conduct short as well as more sustained research projects to answer a question (including a self-generated question) or solve a problem; narrow or broaden the inquiry when appropriate; synthesize multiple sources on the subject, demonstrating understanding of the subject under investigation.
LAFS.1112.WHST.3.8:	Gather relevant information from multiple authoritative print and digital sources, using advanced searches effectively; assess the strengths and limitations of each source in terms of the specific task, purpose, and audience; integrate information into the text selectively to maintain the flow of ideas, avoiding plagiarism and overreliance on any one source and following a standard format for citation.
LAFS.1112.WHST.3.9:	Draw evidence from informational texts to support analysis, reflection, and research.
LAFS.1112.WHST.4.10:	Write routinely over extended time frames (time for reflection and revision) and shorter time frames (a single sitting or a day or two) for a range of discipline-specific tasks, purposes, and audiences.
MAFS.912.N-Q.1.1:	<p>Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.2:	<p>Define appropriate quantities for the purpose of descriptive modeling. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Algebra 1 Content Notes: Working with quantities and the relationships between them provides grounding for work with expressions, equations, and functions.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.3:	<p>Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> </div>

	Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting
	Make sense of problems and persevere in solving them.
MAFS.K12.MP.1.1:	Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.
	Construct viable arguments and critique the reasoning of others.
MAFS.K12.MP.3.1:	Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.
	Use appropriate tools strategically.
MAFS.K12.MP.5.1:	Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.
	Attend to precision.
MAFS.K12.MP.6.1:	Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:
<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

GENERAL INFORMATION

Course Number: 2102320

Number of Credits: Half credit (.5)

Course Type: Core Academic Course

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Economics

Course Path: Section: Grades PreK to 12 Education

Courses > **Grade Group:** Grades 9 to 12 and Adult

Education Courses > **Subject:** Social Studies >

SubSubject: Economics >

Abbreviated Title: ECON HON

Course Length: Semester (S)

Course Attributes:

- Honors
- Class Size Core Required

Course Level: 3

Educator Certifications

Economics (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Economics Honors (#2102320) 2022 - And Beyond

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States. Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls.
SS.912.E.2.4:	Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System. Assess the economic impact of negative and positive externalities on the local, state, and national environment.

SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications:</p>

Teachers who encourage students to complete tasks with mathematical fluency:

- Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately.
- Offer multiple opportunities for students to practice efficient and generalizable methods.
- Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

MA.K12.MTR.4.1:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

MA.K12.MTR.5.1:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

MA.K12.MTR.6.1:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

MA.K12.MTR.7.1:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

ELA.K12.EE.1.1:

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.
2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.
4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

	6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.
ELA.K.12.EE.2.1:	Read and comprehend grade-level complex texts proficiently. Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Honors and Advanced Level Course Note: Advanced courses require a greater demand on students through increased academic rigor. Academic rigor is obtained through the application, analysis, evaluation, and creation of complex ideas that are often abstract and multi-faceted. Students are challenged to think and collaborate critically on the content they are learning. Honors level rigor will be achieved by increasing text complexity through text selection, focus on high-level qualitative measures, and complexity of task. Instruction will be structured to give students a deeper understanding of conceptual themes and organization within and across disciplines. Academic rigor is more than simply assigning to students a greater quantity of work.

Special Notes:

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Economics with Financial Literacy (#2102335) 2018 - 2022 (current)

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?: (2) How to produce?: and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place.
SS.912.E.1.5:	Compare different forms of business organizations. Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.E.2.4:	Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls. Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System.

	Assess the economic impact of negative and positive externalities on the local, state, and national environment.
SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.FL.1.1:	<p>Discuss that people choose jobs or careers for which they are qualified based on non-income factors, such as job satisfaction, independence, risk, family, or location.</p> <p>Clarifications: Identify non-income factors that influence career or job choice by interviewing three individuals who work at different jobs.</p>
SS.912.FL.1.2:	<p>Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer.</p> <p>Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.</p>
SS.912.FL.1.3:	<p>Evaluate ways people can make more informed education, job, or career decisions by evaluating the benefits and costs of different choices.</p> <p>Clarifications: Compare the benefits and costs of a college education to those of a technical school. Compare the unemployment rates of workers with different levels of education.</p>
SS.912.FL.1.4:	<p>Analyze the reasons why the wage or salary paid to workers in jobs is usually determined by the labor market and that businesses are generally willing to pay more productive workers higher wages or salaries than less productive workers.</p> <p>Clarifications: Explain why wages or salaries vary among workers in different types of jobs and among workers in the same jobs. Discuss why the productivity of workers is important to businesses.</p>
SS.912.FL.1.5:	<p>Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment.</p> <p>Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.</p>
SS.912.FL.1.6:	<p>Explain that taxes are paid to federal, state, and local governments to fund government goods and services and transfer payments from government to individuals and that the major types of taxes are income taxes, payroll (Social Security) taxes, property taxes, and sales taxes.</p> <p>Clarifications: Calculate the amount of taxes a person is likely to pay when given information or data about the person's sources of income and amount of spending. Identify which level of government receives the tax revenue for a particular tax and describe what is done with the tax revenue.</p>
SS.912.FL.1.7:	<p>Discuss how people's sources of income, amount of income, as well as the amount and type of spending affect the types and amounts of taxes paid.</p> <p>Clarifications: Investigate the tax rates on different sources of income and on different types of goods that are purchased.</p>
SS.912.FL.2.1:	<p>Compare consumer decisions as they are influenced by the price of a good or service, the price of alternatives, and the consumer's income as well as his or her preferences.</p> <p>Clarifications: Write scenarios explaining how an individual's decision to buy athletic shoes may have been influenced by various factors.</p>

	Analyze situations in which when people consume goods and services, their consumption can have positive and negative effects on others.
SS.912.FL.2.2:	<p>Clarifications: Explain the positive or negative impacts of an activity such as smoking cigarettes or attending school, etc., might have on other individuals and the community.</p>
SS.912.FL.2.3:	<p>Discuss that when buying a good, consumers may consider various aspects of the product including the product's features. Explain why for goods that last for a longer period of time, the consumer should consider the product's durability and maintenance costs.</p> <p>Clarifications: Explain the factors that a consumer who is buying an automobile should consider before making a choice.</p>
SS.912.FL.2.4:	<p>Describe ways that consumers may be influenced by how the price of a good is expressed.</p> <p>Clarifications: Write a paragraph explaining why a store might advertise the price of a flat screen TV expressed as an amount per day or week rather than the actual full price. List different ways retailers use to express the prices of their products.</p>
SS.912.FL.2.5:	<p>Discuss ways people incur costs and realize benefits when searching for information related to their purchases of goods and services and describe how the amount of information people should gather depends on the benefits and costs of the information.</p> <p>Clarifications: Write a newspaper column, "Tips for Consumers," explaining why searching for information may be more important when purchasing expensive, durable goods and services than for inexpensive and nondurable products. Include an explanation of how impulse buying can be avoided by sleeping on a decision before making a big purchase.</p>
SS.912.FL.2.6:	<p>Explain that people may choose to donate money to charitable organizations and other not-for-profits because they gain satisfaction from donating.</p> <p>Clarifications: Brainstorm a list of charitable organizations that are operating in the students' community. For each organization, list a possible reason that a donor might want to give to that charitable organization.</p>
SS.912.FL.2.7:	<p>Examine governments establishing laws and institutions to provide consumers with information about goods or services being purchased and to protect consumers from fraud.</p> <p>Clarifications: Draft a complaint letter to an appropriate firm or agency about a problem the consumer has encountered with a purchase.</p>
SS.912.FL.3.1:	<p>Discuss the reasons why some people have a tendency to be impatient and choose immediate spending over saving for the future.</p> <p>Clarifications: Identify instances in their lives where they decided to buy something immediately and then wished they had instead saved the money for future purchases.</p>
SS.912.FL.3.2:	<p>Examine the ideas that inflation reduces the value of money, including savings, that the real interest rate expresses the rate of return on savings, taking into account the effect of inflation and that the real interest rate is calculated as the nominal interest rate minus the rate of inflation.</p> <p>Clarifications: Explain why savers expect a higher nominal interest rate when inflation is expected to be high.</p>
SS.912.FL.3.3:	<p>Compare the difference between the nominal interest rate which tells savers how the dollar value of their savings or investments will grow, and the real interest rate which tells savers how the purchasing power of their savings or investments will grow.</p> <p>Clarifications: Given the nominal interest rate and the rate of inflation over the course of one year, explain what will happen to the purchasing power of savings.</p>
SS.912.FL.3.4:	<p>Describe ways that money received (or paid) in the future can be compared to money held today by discounting the future value based on the rate of interest.</p> <p>Clarifications: Use spreadsheet software to calculate the amount a 10-year-old would need to save today in order to pay for one year of college tuition eight years from now.</p>
SS.912.FL.3.5:	<p>Explain ways that government agencies supervise and regulate financial institutions to help protect the safety, soundness, and legal compliance of the nation's banking and financial system.</p> <p>Clarifications: : Explain the role that government agencies charged with regulating financial institutions play in helping to protect the safety, soundness, and legal compliance of the nation's banking system. These agencies include the Federal Reserve System, the Office of the Comptroller of the Currency, the Consumer Financial Protection Bureau, the FDIC, and state banking departments.</p>
SS.912.FL.3.6:	<p>Describe government policies that create incentives and disincentives for people to save.</p> <p>Clarifications: Explain why traditional IRAs (individual retirement accounts), Roth IRAs, and educational savings accounts provide incentives for people to save.</p>
SS.912.FL.3.7:	<p>Explain how employer benefit programs create incentives and disincentives to save and how an employee's decision to save can depend on how the alternatives are presented by the employer.</p> <p>Clarifications: Explain why matches of retirement savings by employers substantially change the incentives for employees to save. Explain why having employees "opt out" of savings programs results in a higher level of saving than having them "opt in."</p>
SS.912.FL.4.1:	<p>Discuss ways that consumers can compare the cost of credit by using the annual percentage rate (APR), initial fees charged, and fees charged for late payment or missed payments.</p> <p>Clarifications: Use the APR, initial fees, late fees, nonpayment fees, and other relevant information to compare the cost of credit from various sources for the purchase of a product.</p>
SS.912.FL.4.2:	<p>Discuss that banks and financial institutions sometimes compete by offering credit at low introductory rates, which increase after a set period of time or when the borrower misses a payment or makes a late payment.</p> <p>Clarifications:</p>

	Explain why a bank may offer low-rate introductory credit offers.
SS.912.FL.4.3:	Explain that loans can be unsecured or secured with collateral, that collateral is a piece of property that can be sold by the lender to recover all or part of a loan if the borrower fails to repay. Explain why secured loans are viewed as having less risk and why lenders charge a lower interest rate than they charge for unsecured loans.
SS.912.FL.4.4:	Describe why people often make a cash payment to the seller of a good—called a down payment—in order to reduce the amount they need to borrow. Describe why lenders may consider loans made with a down payment to have less risk because the down payment gives the borrower some equity or ownership right away and why these loans may carry a lower interest rate. Clarifications: Explain how a down payment reduces the total amount financed and why this reduces the monthly payment and/or the length of the loan. Explain why a borrower who has made a down payment has an incentive to repay a loan or make payments on time.
SS.912.FL.4.5:	Explain that lenders make credit decisions based in part on consumer payment history. Credit bureaus record borrowers' credit and payment histories and provide that information to lenders in credit reports. Clarifications: List factors from an individual's credit history or credit application that may cause a lender to deny credit. Explain what credit bureaus do.
SS.912.FL.4.6:	Discuss that lenders can pay to receive a borrower's credit score from a credit bureau and that a credit score is a number based on information in a credit report and assesses a person's credit risk. Clarifications: Explain the concept of a credit score and what it indicates about a borrower. Explain why certain factors, such as having many credit cards with large lines of credit and large balances, might hurt a credit score.
SS.912.FL.4.7:	Describe that, in addition to assessing a person's credit risk, credit reports and scores may be requested and used by employers in hiring decisions, landlords in deciding whether to rent apartments, and insurance companies in charging premiums. Clarifications: Provide two examples of how having a good credit score can benefit a person financially. Explain why employers find it useful to hire someone with a better credit score.
SS.912.FL.4.8:	Examine the fact that failure to repay a loan has significant consequences for borrowers such as negative entries on their credit report, repossession of property (collateral), garnishment of wages, and the inability to obtain loans in the future. Clarifications: Write a scenario about the future opportunities a person can lose by failing to repay loans as agreed.
SS.912.FL.4.9:	Explain that consumers who have difficulty repaying debt can seek assistance through credit counseling services and by negotiating directly with creditors. Clarifications: Identify the costs and benefits associated with using different credit counseling services.
SS.912.FL.4.10:	Analyze the fact that, in extreme cases, bankruptcy may be an option for consumers who are unable to repay debt, and although bankruptcy provides some benefits, filing for bankruptcy also entails considerable costs, including having notice of the bankruptcy appear on a consumer's credit report for up to 10 years. Clarifications: Investigate the costs of bankruptcy by examining the bankruptcy laws in Florida.
SS.912.FL.4.11:	Explain that people often apply for a mortgage to purchase a home and identify a mortgage is a type of loan that is secured by real estate property as collateral. Clarifications: Predict what might happen should a homeowner fail to make his or her mortgage payments.
SS.912.FL.4.12:	Discuss that consumers who use credit should be aware of laws that are in place to protect them and that these include requirements to provide full disclosure of credit terms such as APR and fees, as well as protection against discrimination and abusive marketing or collection practices. Clarifications: Explain why it is important that consumers have full information about loans. Explain the information on a credit disclosure statement.
SS.912.FL.4.13:	Explain that consumers are entitled to a free copy of their credit report annually so that they can verify that no errors were made that might increase their cost of credit. Clarifications: Explain why it is important to check the accuracy of the information recorded on a credit report and know what steps to take to correct errors on credit reports.
SS.912.FL.5.1:	Compare the ways that federal, state, and local tax rates vary on different types of investments. Describe the taxes effect on the after-tax rate of return of an investment. Clarifications: Given tax rates and inflation rates, calculate the real, after-tax rates of return for groups of stocks and bonds.
SS.912.FL.5.2:	Explain how the expenses of buying, selling, and holding financial assets decrease the rate of return from an investment. Clarifications: Identify and compare the administrative costs of several mutual funds and estimate the differences in the total amount accumulated after 10 years for each mutual fund, assuming identical market performance.
SS.912.FL.5.3:	Discuss that buyers and sellers in financial markets determine prices of financial assets and therefore influence the rates of return on those assets. Clarifications: Predict what will happen to the price and rate of return on a bond if buyers believe that the bond has increased in risk.
SS.912.FL.5.4:	Explain that an investment with greater risk than another investment will commonly have a lower market price, and therefore a higher rate of return, than the other investment. Clarifications: Explain why the expected rate of return on a "blue chip" stock is likely to be lower than that of an Internet start-up company.

SS.912.FL.5.5:	<p>Explain that shorter-term investments will likely have lower rates of return than longer-term investments.</p> <p>Clarifications: Explain how markets will determine the rates of return for two bonds if one is a long-term bond and the other a short-term bond, assuming each bond pays the same rate of interest.</p>
SS.912.FL.5.6:	<p>Describe how diversifying investments in different types of financial assets can lower investment risk.</p> <p>Clarifications: Compare the risk faced by two investors, both of whom own two businesses on a beach. One investor owns a suntan lotion business and a rain umbrella business. The other investor owns two suntan lotion businesses. Explain why a financial advisor might encourage a client to include stocks, bonds, and real estate assets in his or her portfolio.</p>
SS.912.FL.5.7:	<p>Describe how financial markets adjust to new financial news and that prices in those markets reflect what is known about those financial assets.</p> <p>Clarifications: Explain how prices of financial investments can adjust when given specific news about a company's or industry's future profitability.</p>
SS.912.FL.5.8:	<p>Discuss ways that the prices of financial assets are affected by interest rates and explain that the prices of financial assets are also affected by changes in domestic and international economic conditions, monetary policy, and fiscal policy.</p> <p>Clarifications: Give an example of a change in interest rates affecting the current value of a financial asset that pays returns in the future. Explain why the current value increases when interest rates fall. Explain how a change in economic growth might change the value of a stock held by an investor.</p>
SS.912.FL.5.9:	<p>Examine why investors should be aware of tendencies that people have that may result in poor choices, which may include avoiding selling assets at a loss because they weigh losses more than they weigh gains and investing in financial assets with which they are familiar, such as their own employer's stock or domestic rather than international stocks.</p> <p>Clarifications: Explain why investors may sell stocks that have gained in value, but hold ones that have lost value. Explain why this may not make sense. Identify an example of why an investor may have a bias toward familiar investments and why this may or may not be a rational decision.</p>
SS.912.FL.5.10:	<p>Explain that people vary in their willingness to take risks because the willingness to take risks depends on factors such as personality, income, and family situation.</p> <p>Clarifications: Explain how the portfolio of a retiree might differ from that of a young, single person.</p>
SS.912.FL.5.11:	<p>Describe why an economic role for a government may exist if individuals do not have complete information about the nature of alternative investments or access to competitive financial markets.</p> <p>Clarifications: Explain why it is important for individuals to have accurate information about a company's sales and profits when investing in that company.</p>
SS.912.FL.5.12:	<p>Compare the Securities and Exchange Commission (SEC), the Federal Reserve, and other government agencies that regulate financial markets.</p> <p>Clarifications: Conduct research to learn about the SEC or the Federal Reserve and identify their roles in regulating financial markets.</p>
SS.912.FL.6.1:	<p>Describe how individuals vary with respect to their willingness to accept risk and why most people are willing to pay a small cost now if it means they can avoid a possible larger loss later.</p> <p>Clarifications: Discuss whether or not a premium paid to insure against an accident that never happens is wasted.</p>
SS.912.FL.6.2:	<p>Analyze how judgment regarding risky events is subject to errors because people tend to overestimate the probability of infrequent events, often because they've heard of or seen a recent example.</p> <p>Clarifications: Discuss how an extended warranty on a consumer product is like insurance. Evaluate the cost-effectiveness of extended warranties on three consumer products: a new automobile, a smart phone, and a dishwasher, considering the likelihood that the product will fail, the cost of replacing the item, and the price of the warranty.</p>
SS.912.FL.6.3:	<p>Describe why people choose different amounts of insurance coverage based on their willingness to accept risk, as well as their occupation, lifestyle, age, financial profile, and the price of insurance.</p> <p>Clarifications: Given hypothetical profiles for three types of individuals who differ with respect to occupation, age, lifestyle, marital status, and financial profile, assess the types and levels of personal financial risk faced by each and make recommendations for appropriate insurance.</p>
SS.912.FL.6.4:	<p>Explain that people may be required by governments or by certain types of contracts (e.g., home mortgages) to purchase some types of insurance.</p> <p>Clarifications: Explain why homeowners insurance is required by a lender when a homeowner takes out a mortgage. Investigate Florida's regulations regarding the amount of auto insurance that drivers are required to purchase as well as federal health insurance regulations.</p>
SS.912.FL.6.5:	<p>Describe how an insurance contract can increase the probability or size of a potential loss because having the insurance results in the person taking more risks, and that policy features such as deductibles and copayments are cost-sharing features that encourage the policyholder to take steps to reduce the potential size of a loss (claim).</p> <p>Clarifications: Given an accident scenario, calculate the amount that would be paid on an insurance claim after applying exclusions and deductibles.</p>
SS.912.FL.6.6:	<p>Explain that people can lower insurance premiums by behaving in ways that show they pose a lower risk.</p> <p>Clarifications: Explain why taking a safe-driving course can lower an auto insurance premium and why not smoking can lower the health insurance premium.</p> <p>Compare the purposes of various types of insurance, including that health insurance provides for funds to pay for health care in the event of illness and may also pay for the cost of preventative care; disability insurance is income insurance that provides funds to replace income lost while an</p>

SS.912.FL.6.7:	individual is ill or injured and unable to work; property and casualty insurance pays for damage or loss to the insured's property; life insurance benefits are paid to the insured's beneficiaries in the event of the policyholder's death.
	Clarifications: Compare the coverage and costs of hypothetical plans for a set of scenarios for various types of insurance.
SS.912.FL.6.8:	Discuss the fact that, in addition to privately purchased insurance, some government benefit programs provide a social safety net to protect individuals from economic hardship created by unexpected events.
	Clarifications: Describe examples of government transfer programs that compensate for unexpected losses, including Social Security Disability benefits, Medicare, Medicaid, unemployment insurance, and workers' compensation.
SS.912.FL.6.9:	Explain that loss of assets, wealth, and future opportunities can occur if an individual's personal information is obtained by others through identity theft and then used fraudulently, and that by managing their personal information and choosing the environment in which it is revealed, individuals can accept, reduce, and insure against the risk of loss due to identity theft.
	Clarifications: Describe problems that can occur when an individual is a victim of identity theft. Give specific examples of how online transactions, online banking, email scams, and telemarketing calls can make consumers vulnerable to identity theft. Describe the conditions under which individuals should and should not disclose their Social Security number, account numbers, or other sensitive personal information.
SS.912.FL.6.10:	Compare federal and state regulations that provide some remedies and assistance for victims of identity theft.
	Clarifications: Recommend actions a victim of identity theft should take to limit losses and restore personal security.
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	Use geographic terms and tools to analyze case studies of issues in globalization.
	Clarifications: Examples are cultural imperialism, outsourcing.
MAFS.912.N-Q.1.1:	Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★ Standard Relation to Course: Supporting
MAFS.912.N-Q.1.2:	Define appropriate quantities for the purpose of descriptive modeling. ★ Clarifications: Algebra 1 Content Notes: Working with quantities and the relationships between them provides grounding for work with expressions, equations, and functions. Standard Relation to Course: Supporting
MAFS.912.N-Q.1.3:	Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.3:	Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.4:	Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.5:	Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★ Standard Relation to Course: Supporting
MAFS.912.S-IC.2.6:	Evaluate reports based on data. ★ Standard Relation to Course: Supporting
MAFS.912.S-ID.1.1:	Represent data with plots on the real number line (dot plots, histograms, and box plots). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.2:	Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.3:	Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★ Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points. Standard Relation to Course: Supporting
MAFS.912.S-ID.1.4:	Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★ Standard Relation to Course: Supporting Make sense of problems and persevere in solving them.

MAFS.K12.MP.1.1:	<p>Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, “Does this make sense?” They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.</p> <p>Standard Relation to Course: Supporting Construct viable arguments and critique the reasoning of others.</p>
MAFS.K12.MP.3.1:	<p>Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.</p> <p>Standard Relation to Course: Supporting Use appropriate tools strategically.</p>
MAFS.K12.MP.5.1:	<p>Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.</p> <p>Standard Relation to Course: Supporting Attend to precision.</p>
MAFS.K12.MP.6.1:	<p>Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.</p> <p>Standard Relation to Course: Supporting</p>
LAFS.1112.RH.1.1:	<p>Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.</p>
LAFS.1112.RH.1.2:	<p>Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.</p>
LAFS.1112.RH.1.3:	<p>Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.</p>
LAFS.1112.RH.2.4:	<p>Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines <i>faction</i> in <i>Federalist</i> No. 10).</p>
LAFS.1112.SL.1.1:	<p>Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others’ ideas and expressing their own clearly and persuasively.</p> <ol style="list-style-type: none"> Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.
LAFS.1112.SL.1.2:	<p>Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.</p>
LAFS.1112.SL.1.3:	<p>Evaluate a speaker’s point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.</p>
LAFS.1112.SL.2.4:	<p>Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.</p>
	<p>Write arguments focused on <i>discipline-specific content</i>.</p> <ol style="list-style-type: none"> Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims, and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.

LAFS.1112.WHST.1.1:	<p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Special Notes:

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

<https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Success Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Finance Your Future

The Division of Consumer Services at the Florida Department of Financial Services offers a free financial literacy resource designed for middle and high students. Finance Your Future is comprised of eight main modules on the topics of: Budgeting & Saving, Credit Cards, Banking, Credit Report & Score, Debt, Frauds & Scams, Insurance & Benefits and Life Events. Each module includes lessons, activities, games and a comprehensive knowledge check at the end. Visit the Finance Your Future website to access this resource. It should be noted that this resource does not include all of the financial literacy content needed to satisfy the standard high school diploma requirement per s. 1003.4282, Florida Statutes. A crosswalk of Financial Literacy standards and benchmarks can be found here.

GENERAL INFORMATION

Course Number: 2102335

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** Economics >

Number of Credits: Half credit (.5)

Abbreviated Title: ECON FIN LIT

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Economics

Educator Certifications

Economics (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Economics with Financial Literacy (#2102335) 2022 - And Beyond

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?: (2) How to produce?: and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place.
SS.912.E.1.5:	Compare different forms of business organizations. Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition.
SS.912.E.1.9:	Describe how the earnings of workers are determined. Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions.
SS.912.E.1.15:	Describe the risk and return profiles of various investment vehicles and the importance of diversification. Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.E.2.4:	Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls. Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society.
SS.912.E.2.8:	Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive). Clarifications: Examples are income, sales, social security.
SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System.

	Assess the economic impact of negative and positive externalities on the local, state, and national environment.
SS.912.E.2.11:	<p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	<p>Demonstrate the impact of inflation on world economies.</p> <p>Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.</p>
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	<p>Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones.</p> <p>Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.</p>
SS.912.E.3.4:	<p>Assess the economic impact of negative and positive externalities on the international environment.</p> <p>Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.</p>
SS.912.E.3.5:	<p>Compare the current United States economy with other developed and developing nations.</p> <p>Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.</p>
SS.912.E.3.6:	<p>Differentiate and draw conclusions about historical economic thought theorized by economists.</p> <p>Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.</p>
SS.912.FL.1.1:	<p>Discuss that people choose jobs or careers for which they are qualified based on non-income factors, such as job satisfaction, independence, risk, family, or location.</p> <p>Clarifications: Identify non-income factors that influence career or job choice by interviewing three individuals who work at different jobs.</p>
SS.912.FL.1.2:	<p>Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer.</p> <p>Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.</p>
SS.912.FL.1.3:	<p>Evaluate ways people can make more informed education, job, or career decisions by evaluating the benefits and costs of different choices.</p> <p>Clarifications: Compare the benefits and costs of a college education to those of a technical school. Compare the unemployment rates of workers with different levels of education.</p>
SS.912.FL.1.4:	<p>Analyze the reasons why the wage or salary paid to workers in jobs is usually determined by the labor market and that businesses are generally willing to pay more productive workers higher wages or salaries than less productive workers.</p> <p>Clarifications: Explain why wages or salaries vary among workers in different types of jobs and among workers in the same jobs. Discuss why the productivity of workers is important to businesses.</p>
SS.912.FL.1.5:	<p>Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment.</p> <p>Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.</p>
SS.912.FL.1.6:	<p>Explain that taxes are paid to federal, state, and local governments to fund government goods and services and transfer payments from government to individuals and that the major types of taxes are income taxes, payroll (Social Security) taxes, property taxes, and sales taxes.</p> <p>Clarifications: Calculate the amount of taxes a person is likely to pay when given information or data about the person's sources of income and amount of spending. Identify which level of government receives the tax revenue for a particular tax and describe what is done with the tax revenue.</p>
SS.912.FL.1.7:	<p>Discuss how people's sources of income, amount of income, as well as the amount and type of spending affect the types and amounts of taxes paid.</p> <p>Clarifications: Investigate the tax rates on different sources of income and on different types of goods that are purchased.</p>
SS.912.FL.2.1:	<p>Compare consumer decisions as they are influenced by the price of a good or service, the price of alternatives, and the consumer's income as well as his or her preferences.</p> <p>Clarifications: Write scenarios explaining how an individual's decision to buy athletic shoes may have been influenced by various factors.</p>

	Analyze situations in which when people consume goods and services, their consumption can have positive and negative effects on others.
SS.912.FL.2.2:	<p>Clarifications: Explain the positive or negative impacts of an activity such as smoking cigarettes or attending school, etc., might have on other individuals and the community.</p>
SS.912.FL.2.3:	<p>Discuss that when buying a good, consumers may consider various aspects of the product including the product's features. Explain why for goods that last for a longer period of time, the consumer should consider the product's durability and maintenance costs.</p> <p>Clarifications: Explain the factors that a consumer who is buying an automobile should consider before making a choice.</p>
SS.912.FL.2.4:	<p>Describe ways that consumers may be influenced by how the price of a good is expressed.</p> <p>Clarifications: Write a paragraph explaining why a store might advertise the price of a flat screen TV expressed as an amount per day or week rather than the actual full price. List different ways retailers use to express the prices of their products.</p>
SS.912.FL.2.5:	<p>Discuss ways people incur costs and realize benefits when searching for information related to their purchases of goods and services and describe how the amount of information people should gather depends on the benefits and costs of the information.</p> <p>Clarifications: Write a newspaper column, "Tips for Consumers," explaining why searching for information may be more important when purchasing expensive, durable goods and services than for inexpensive and nondurable products. Include an explanation of how impulse buying can be avoided by sleeping on a decision before making a big purchase.</p>
SS.912.FL.2.6:	<p>Explain that people may choose to donate money to charitable organizations and other not-for-profits because they gain satisfaction from donating.</p> <p>Clarifications: Brainstorm a list of charitable organizations that are operating in the students' community. For each organization, list a possible reason that a donor might want to give to that charitable organization.</p>
SS.912.FL.2.7:	<p>Examine governments establishing laws and institutions to provide consumers with information about goods or services being purchased and to protect consumers from fraud.</p> <p>Clarifications: Draft a complaint letter to an appropriate firm or agency about a problem the consumer has encountered with a purchase.</p>
SS.912.FL.3.1:	<p>Discuss the reasons why some people have a tendency to be impatient and choose immediate spending over saving for the future.</p> <p>Clarifications: Identify instances in their lives where they decided to buy something immediately and then wished they had instead saved the money for future purchases.</p>
SS.912.FL.3.2:	<p>Examine the ideas that inflation reduces the value of money, including savings, that the real interest rate expresses the rate of return on savings, taking into account the effect of inflation and that the real interest rate is calculated as the nominal interest rate minus the rate of inflation.</p> <p>Clarifications: Explain why savers expect a higher nominal interest rate when inflation is expected to be high.</p>
SS.912.FL.3.3:	<p>Compare the difference between the nominal interest rate which tells savers how the dollar value of their savings or investments will grow, and the real interest rate which tells savers how the purchasing power of their savings or investments will grow.</p> <p>Clarifications: Given the nominal interest rate and the rate of inflation over the course of one year, explain what will happen to the purchasing power of savings.</p>
SS.912.FL.3.4:	<p>Describe ways that money received (or paid) in the future can be compared to money held today by discounting the future value based on the rate of interest.</p> <p>Clarifications: Use spreadsheet software to calculate the amount a 10-year-old would need to save today in order to pay for one year of college tuition eight years from now.</p>
SS.912.FL.3.5:	<p>Explain ways that government agencies supervise and regulate financial institutions to help protect the safety, soundness, and legal compliance of the nation's banking and financial system.</p> <p>Clarifications: : Explain the role that government agencies charged with regulating financial institutions play in helping to protect the safety, soundness, and legal compliance of the nation's banking system. These agencies include the Federal Reserve System, the Office of the Comptroller of the Currency, the Consumer Financial Protection Bureau, the FDIC, and state banking departments.</p>
SS.912.FL.3.6:	<p>Describe government policies that create incentives and disincentives for people to save.</p> <p>Clarifications: Explain why traditional IRAs (individual retirement accounts), Roth IRAs, and educational savings accounts provide incentives for people to save.</p>
SS.912.FL.3.7:	<p>Explain how employer benefit programs create incentives and disincentives to save and how an employee's decision to save can depend on how the alternatives are presented by the employer.</p> <p>Clarifications: Explain why matches of retirement savings by employers substantially change the incentives for employees to save. Explain why having employees "opt out" of savings programs results in a higher level of saving than having them "opt in."</p>
SS.912.FL.4.1:	<p>Discuss ways that consumers can compare the cost of credit by using the annual percentage rate (APR), initial fees charged, and fees charged for late payment or missed payments.</p> <p>Clarifications: Use the APR, initial fees, late fees, nonpayment fees, and other relevant information to compare the cost of credit from various sources for the purchase of a product.</p>
SS.912.FL.4.2:	<p>Discuss that banks and financial institutions sometimes compete by offering credit at low introductory rates, which increase after a set period of time or when the borrower misses a payment or makes a late payment.</p> <p>Clarifications:</p>

	Explain why a bank may offer low-rate introductory credit offers.
SS.912.FL.4.3:	Explain that loans can be unsecured or secured with collateral, that collateral is a piece of property that can be sold by the lender to recover all or part of a loan if the borrower fails to repay. Explain why secured loans are viewed as having less risk and why lenders charge a lower interest rate than they charge for unsecured loans.
SS.912.FL.4.4:	Describe why people often make a cash payment to the seller of a good—called a down payment—in order to reduce the amount they need to borrow. Describe why lenders may consider loans made with a down payment to have less risk because the down payment gives the borrower some equity or ownership right away and why these loans may carry a lower interest rate. Clarifications: Explain how a down payment reduces the total amount financed and why this reduces the monthly payment and/or the length of the loan. Explain why a borrower who has made a down payment has an incentive to repay a loan or make payments on time.
SS.912.FL.4.5:	Explain that lenders make credit decisions based in part on consumer payment history. Credit bureaus record borrowers' credit and payment histories and provide that information to lenders in credit reports. Clarifications: List factors from an individual's credit history or credit application that may cause a lender to deny credit. Explain what credit bureaus do.
SS.912.FL.4.6:	Discuss that lenders can pay to receive a borrower's credit score from a credit bureau and that a credit score is a number based on information in a credit report and assesses a person's credit risk. Clarifications: Explain the concept of a credit score and what it indicates about a borrower. Explain why certain factors, such as having many credit cards with large lines of credit and large balances, might hurt a credit score.
SS.912.FL.4.7:	Describe that, in addition to assessing a person's credit risk, credit reports and scores may be requested and used by employers in hiring decisions, landlords in deciding whether to rent apartments, and insurance companies in charging premiums. Clarifications: Provide two examples of how having a good credit score can benefit a person financially. Explain why employers find it useful to hire someone with a better credit score.
SS.912.FL.4.8:	Examine the fact that failure to repay a loan has significant consequences for borrowers such as negative entries on their credit report, repossession of property (collateral), garnishment of wages, and the inability to obtain loans in the future. Clarifications: Write a scenario about the future opportunities a person can lose by failing to repay loans as agreed.
SS.912.FL.4.9:	Explain that consumers who have difficulty repaying debt can seek assistance through credit counseling services and by negotiating directly with creditors. Clarifications: Identify the costs and benefits associated with using different credit counseling services.
SS.912.FL.4.10:	Analyze the fact that, in extreme cases, bankruptcy may be an option for consumers who are unable to repay debt, and although bankruptcy provides some benefits, filing for bankruptcy also entails considerable costs, including having notice of the bankruptcy appear on a consumer's credit report for up to 10 years. Clarifications: Investigate the costs of bankruptcy by examining the bankruptcy laws in Florida.
SS.912.FL.4.11:	Explain that people often apply for a mortgage to purchase a home and identify a mortgage is a type of loan that is secured by real estate property as collateral. Clarifications: Predict what might happen should a homeowner fail to make his or her mortgage payments.
SS.912.FL.4.12:	Discuss that consumers who use credit should be aware of laws that are in place to protect them and that these include requirements to provide full disclosure of credit terms such as APR and fees, as well as protection against discrimination and abusive marketing or collection practices. Clarifications: Explain why it is important that consumers have full information about loans. Explain the information on a credit disclosure statement.
SS.912.FL.4.13:	Explain that consumers are entitled to a free copy of their credit report annually so that they can verify that no errors were made that might increase their cost of credit. Clarifications: Explain why it is important to check the accuracy of the information recorded on a credit report and know what steps to take to correct errors on credit reports.
SS.912.FL.5.1:	Compare the ways that federal, state, and local tax rates vary on different types of investments. Describe the taxes effect on the after-tax rate of return of an investment. Clarifications: Given tax rates and inflation rates, calculate the real, after-tax rates of return for groups of stocks and bonds.
SS.912.FL.5.2:	Explain how the expenses of buying, selling, and holding financial assets decrease the rate of return from an investment. Clarifications: Identify and compare the administrative costs of several mutual funds and estimate the differences in the total amount accumulated after 10 years for each mutual fund, assuming identical market performance.
SS.912.FL.5.3:	Discuss that buyers and sellers in financial markets determine prices of financial assets and therefore influence the rates of return on those assets. Clarifications: Predict what will happen to the price and rate of return on a bond if buyers believe that the bond has increased in risk.
SS.912.FL.5.4:	Explain that an investment with greater risk than another investment will commonly have a lower market price, and therefore a higher rate of return, than the other investment. Clarifications: Explain why the expected rate of return on a "blue chip" stock is likely to be lower than that of an Internet start-up company.

SS.912.FL.5.5:	<p>Explain that shorter-term investments will likely have lower rates of return than longer-term investments.</p> <p>Clarifications: Explain how markets will determine the rates of return for two bonds if one is a long-term bond and the other a short-term bond, assuming each bond pays the same rate of interest.</p>
SS.912.FL.5.6:	<p>Describe how diversifying investments in different types of financial assets can lower investment risk.</p> <p>Clarifications: Compare the risk faced by two investors, both of whom own two businesses on a beach. One investor owns a suntan lotion business and a rain umbrella business. The other investor owns two suntan lotion businesses. Explain why a financial advisor might encourage a client to include stocks, bonds, and real estate assets in his or her portfolio.</p>
SS.912.FL.5.7:	<p>Describe how financial markets adjust to new financial news and that prices in those markets reflect what is known about those financial assets.</p> <p>Clarifications: Explain how prices of financial investments can adjust when given specific news about a company's or industry's future profitability.</p>
SS.912.FL.5.8:	<p>Discuss ways that the prices of financial assets are affected by interest rates and explain that the prices of financial assets are also affected by changes in domestic and international economic conditions, monetary policy, and fiscal policy.</p> <p>Clarifications: Give an example of a change in interest rates affecting the current value of a financial asset that pays returns in the future. Explain why the current value increases when interest rates fall. Explain how a change in economic growth might change the value of a stock held by an investor.</p>
SS.912.FL.5.9:	<p>Examine why investors should be aware of tendencies that people have that may result in poor choices, which may include avoiding selling assets at a loss because they weigh losses more than they weigh gains and investing in financial assets with which they are familiar, such as their own employer's stock or domestic rather than international stocks.</p> <p>Clarifications: Explain why investors may sell stocks that have gained in value, but hold ones that have lost value. Explain why this may not make sense. Identify an example of why an investor may have a bias toward familiar investments and why this may or may not be a rational decision.</p>
SS.912.FL.5.10:	<p>Explain that people vary in their willingness to take risks because the willingness to take risks depends on factors such as personality, income, and family situation.</p> <p>Clarifications: Explain how the portfolio of a retiree might differ from that of a young, single person.</p>
SS.912.FL.5.11:	<p>Describe why an economic role for a government may exist if individuals do not have complete information about the nature of alternative investments or access to competitive financial markets.</p> <p>Clarifications: Explain why it is important for individuals to have accurate information about a company's sales and profits when investing in that company.</p>
SS.912.FL.5.12:	<p>Compare the Securities and Exchange Commission (SEC), the Federal Reserve, and other government agencies that regulate financial markets.</p> <p>Clarifications: Conduct research to learn about the SEC or the Federal Reserve and identify their roles in regulating financial markets.</p>
SS.912.FL.6.1:	<p>Describe how individuals vary with respect to their willingness to accept risk and why most people are willing to pay a small cost now if it means they can avoid a possible larger loss later.</p> <p>Clarifications: Discuss whether or not a premium paid to insure against an accident that never happens is wasted.</p>
SS.912.FL.6.2:	<p>Analyze how judgment regarding risky events is subject to errors because people tend to overestimate the probability of infrequent events, often because they've heard of or seen a recent example.</p> <p>Clarifications: Discuss how an extended warranty on a consumer product is like insurance. Evaluate the cost-effectiveness of extended warranties on three consumer products: a new automobile, a smart phone, and a dishwasher, considering the likelihood that the product will fail, the cost of replacing the item, and the price of the warranty.</p>
SS.912.FL.6.3:	<p>Describe why people choose different amounts of insurance coverage based on their willingness to accept risk, as well as their occupation, lifestyle, age, financial profile, and the price of insurance.</p> <p>Clarifications: Given hypothetical profiles for three types of individuals who differ with respect to occupation, age, lifestyle, marital status, and financial profile, assess the types and levels of personal financial risk faced by each and make recommendations for appropriate insurance.</p>
SS.912.FL.6.4:	<p>Explain that people may be required by governments or by certain types of contracts (e.g., home mortgages) to purchase some types of insurance.</p> <p>Clarifications: Explain why homeowners insurance is required by a lender when a homeowner takes out a mortgage. Investigate Florida's regulations regarding the amount of auto insurance that drivers are required to purchase as well as federal health insurance regulations.</p>
SS.912.FL.6.5:	<p>Describe how an insurance contract can increase the probability or size of a potential loss because having the insurance results in the person taking more risks, and that policy features such as deductibles and copayments are cost-sharing features that encourage the policyholder to take steps to reduce the potential size of a loss (claim).</p> <p>Clarifications: Given an accident scenario, calculate the amount that would be paid on an insurance claim after applying exclusions and deductibles.</p>
SS.912.FL.6.6:	<p>Explain that people can lower insurance premiums by behaving in ways that show they pose a lower risk.</p> <p>Clarifications: Explain why taking a safe-driving course can lower an auto insurance premium and why not smoking can lower the health insurance premium.</p> <p>Compare the purposes of various types of insurance, including that health insurance provides for funds to pay for health care in the event of illness and may also pay for the cost of preventative care; disability insurance is income insurance that provides funds to replace income lost while an</p>

SS.912.FL.6.7:	<p>individual is ill or injured and unable to work; property and casualty insurance pays for damage or loss to the insured's property; life insurance benefits are paid to the insured's beneficiaries in the event of the policyholder's death.</p> <p>Clarifications: Compare the coverage and costs of hypothetical plans for a set of scenarios for various types of insurance.</p>
SS.912.FL.6.8:	<p>Discuss the fact that, in addition to privately purchased insurance, some government benefit programs provide a social safety net to protect individuals from economic hardship created by unexpected events.</p> <p>Clarifications: Describe examples of government transfer programs that compensate for unexpected losses, including Social Security Disability benefits, Medicare, Medicaid, unemployment insurance, and workers' compensation.</p>
SS.912.FL.6.9:	<p>Explain that loss of assets, wealth, and future opportunities can occur if an individual's personal information is obtained by others through identity theft and then used fraudulently, and that by managing their personal information and choosing the environment in which it is revealed, individuals can accept, reduce, and insure against the risk of loss due to identity theft.</p> <p>Clarifications: Describe problems that can occur when an individual is a victim of identity theft. Give specific examples of how online transactions, online banking, email scams, and telemarketing calls can make consumers vulnerable to identity theft. Describe the conditions under which individuals should and should not disclose their Social Security number, account numbers, or other sensitive personal information.</p>
SS.912.FL.6.10:	<p>Compare federal and state regulations that provide some remedies and assistance for victims of identity theft.</p> <p>Clarifications: Recommend actions a victim of identity theft should take to limit losses and restore personal security.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	Use geographic terms and tools to analyze case studies of issues in globalization.
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used. <p>Engage in discussions that reflect on the mathematical thinking of self and others.</p> <p>Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:</p>

MA.K12.MTR.4.1:	<ul style="list-style-type: none"> • Communicate mathematical ideas, vocabulary and methods effectively. • Analyze the mathematical thinking of others. • Compare the efficiency of a method to those expressed by others. • Recognize errors and suggest how to correctly solve the task. • Justify results by explaining methods and processes. • Construct possible arguments based on evidence. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:</p> <ul style="list-style-type: none"> • Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning. • Create opportunities for students to discuss their thinking with peers. • Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods. • Develop students' ability to justify methods and compare their responses to the responses of their peers. </div>
MA.K12.MTR.5.1:	<p>Use patterns and structure to help understand and connect mathematical concepts. Mathematicians who use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Focus on relevant details within a problem. • Create plans and procedures to logically order events, steps or ideas to solve problems. • Decompose a complex problem into manageable parts. • Relate previously learned concepts to new concepts. • Look for similarities among problems. • Connect solutions of problems to more complicated large-scale situations. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:</p> <ul style="list-style-type: none"> • Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts. • Support students to develop generalizations based on the similarities found among problems. • Provide opportunities for students to create plans and procedures to solve problems. • Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking. </div>
MA.K12.MTR.6.1:	<p>Assess the reasonableness of solutions. Mathematicians who assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Estimate to discover possible solutions. • Use benchmark quantities to determine if a solution makes sense. • Check calculations when solving problems. • Verify possible solutions by explaining the methods used. • Evaluate results based on the given context. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to assess the reasonableness of solutions:</p> <ul style="list-style-type: none"> • Have students estimate or predict solutions prior to solving. • Prompt students to continually ask, "Does this solution make sense? How do you know?" • Reinforce that students check their work as they progress within and after a task. • Strengthen students' ability to verify solutions through justifications. </div>
MA.K12.MTR.7.1:	<p>Apply mathematics to real-world contexts. Mathematicians who apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Connect mathematical concepts to everyday experiences. • Use models and methods to understand, represent and solve problems. • Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency. <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: Teachers who encourage students to apply mathematics to real-world contexts:</p> <ul style="list-style-type: none"> • Provide opportunities for students to create models, both concrete and abstract, and perform investigations. • Challenge students to question the accuracy of their models and methods. • Support students as they validate conclusions by comparing them to the given situation. • Indicate how various concepts can be applied to other disciplines. </div>
ELA.K12.EE.1.1:	<p>Cite evidence to explain and justify reasoning.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing. 2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations. 4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor. 6-8 Students continue with previous skills and use a style guide to create a proper citation. 9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.</p> </div>
ELA.K12.EE.2.1:	<p>Read and comprehend grade-level complex texts proficiently.</p> <div style="border: 1px solid black; padding: 5px;"> <p>Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.</p> </div>

ELA.K.12.EE.3.1:	<p>Make inferences to support comprehension.</p> <p>Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like “Why is the girl smiling?” or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.</p>
ELA.K.12.EE.4.1:	<p>Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations.</p> <p>Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: “I think _____ because _____.” The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.</p>
ELA.K.12.EE.5.1:	<p>Use the accepted rules governing a specific format to create quality work.</p> <p>Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.</p>
ELA.K.12.EE.6.1:	<p>Use appropriate voice and tone when speaking or writing.</p> <p>Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.</p>
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Special Notes:

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaproduct.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Additional Instructional Resources:

A.V.E. for Inclusion Collection is provided by the Florida Association of School Administrators: [http://www.fasa.net/4DCGI/cms/review.html?](http://www.fasa.net/4DCGI/cms/review.html?Action=CMS_Document&DocID=139)

Action=CMS_Document&DocID=139. Please be aware that these resources have not been reviewed by CPALMS and there may be a charge for the use of some of them in this collection.

Finance Your Future

The Division of Consumer Services at the Florida Department of Financial Services offers a free financial literacy resource designed for middle and high students. Finance Your Future is comprised of eight main modules on the topics of: Budgeting & Saving, Credit Cards, Banking, Credit Report & Score, Debt, Frauds & Scams, Insurance & Benefits and Life Events. Each module includes lessons, activities, games and a comprehensive knowledge check at the end. Visit the Finance Your Future website to access

this resource. It should be noted that this resource does not include all of the financial literacy content needed to satisfy the standard high school diploma requirement per s. 1003.4282, Florida Statutes. A crosswalk of Financial Literacy standards and benchmarks can be found here.

GENERAL INFORMATION

Course Number: 2102335

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** Economics >

Number of Credits: Half credit (.5)

Abbreviated Title: ECON FIN LIT

Course Length: Semester (S)

Course Attributes:

- Class Size Core Required

Course Type: Core Academic Course

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Graduation Requirement: Economics

Educator Certifications

Economics (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Economics with Financial Literacy for Credit Recovery (#2102340) 2018 - 2022 (current)

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?; (2) How to produce?; and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place.
SS.912.E.1.5:	Compare different forms of business organizations. Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition.
SS.912.E.1.9:	Describe how the earnings of workers are determined. Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions.
SS.912.E.1.15:	Describe the risk and return profiles of various investment vehicles and the importance of diversification. Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.E.2.4:	Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls. Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society.
SS.912.E.2.8:	Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive). Clarifications: Examples are income, sales, social security.

SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System.
SS.912.E.2.11:	Assess the economic impact of negative and positive externalities on the local, state, and national environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	Demonstrate the impact of inflation on world economies. Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones. Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.
SS.912.E.3.4:	Assess the economic impact of negative and positive externalities on the international environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.3.5:	Compare the current United States economy with other developed and developing nations. Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.E.3.6:	Differentiate and draw conclusions about historical economic thought theorized by economists. Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.
SS.912.FL.1.1:	Discuss that people choose jobs or careers for which they are qualified based on non-income factors, such as job satisfaction, independence, risk, family, or location. Clarifications: Identify non-income factors that influence career or job choice by interviewing three individuals who work at different jobs.
SS.912.FL.1.2:	Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer. Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.
SS.912.FL.1.3:	Evaluate ways people can make more informed education, job, or career decisions by evaluating the benefits and costs of different choices. Clarifications: Compare the benefits and costs of a college education to those of a technical school. Compare the unemployment rates of workers with different levels of education.
SS.912.FL.1.4:	Analyze the reasons why the wage or salary paid to workers in jobs is usually determined by the labor market and that businesses are generally willing to pay more productive workers higher wages or salaries than less productive workers. Clarifications: Explain why wages or salaries vary among workers in different types of jobs and among workers in the same jobs. Discuss why the productivity of workers is important to businesses.
SS.912.FL.1.5:	Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment. Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.
SS.912.FL.1.6:	Explain that taxes are paid to federal, state, and local governments to fund government goods and services and transfer payments from government to individuals and that the major types of taxes are income taxes, payroll (Social Security) taxes, property taxes, and sales taxes. Clarifications: Calculate the amount of taxes a person is likely to pay when given information or data about the person's sources of income and amount of spending. Identify which level of government receives the tax revenue for a particular tax and describe what is done with the tax revenue.
SS.912.FL.1.7:	Discuss how people's sources of income, amount of income, as well as the amount and type of spending affect the types and amounts of taxes paid. Clarifications: Investigate the tax rates on different sources of income and on different types of goods that are purchased.
	Compare consumer decisions as they are influenced by the price of a good or service, the price of alternatives, and the consumer's income as well as

SS.912.FL.2.1:	his or her preferences. Clarifications: Write scenarios explaining how an individual's decision to buy athletic shoes may have been influenced by various factors.
SS.912.FL.2.2:	Analyze situations in which when people consume goods and services, their consumption can have positive and negative effects on others. Clarifications: Explain the positive or negative impacts of an activity such as smoking cigarettes or attending school, etc., might have on other individuals and the community.
SS.912.FL.2.3:	Discuss that when buying a good, consumers may consider various aspects of the product including the product's features. Explain why for goods that last for a longer period of time, the consumer should consider the product's durability and maintenance costs. Clarifications: Explain the factors that a consumer who is buying an automobile should consider before making a choice.
SS.912.FL.2.4:	Describe ways that consumers may be influenced by how the price of a good is expressed. Clarifications: Write a paragraph explaining why a store might advertise the price of a flat screen TV expressed as an amount per day or week rather than the actual full price. List different ways retailers use to express the prices of their products.
SS.912.FL.2.5:	Discuss ways people incur costs and realize benefits when searching for information related to their purchases of goods and services and describe how the amount of information people should gather depends on the benefits and costs of the information. Clarifications: Write a newspaper column, "Tips for Consumers," explaining why searching for information may be more important when purchasing expensive, durable goods and services than for inexpensive and nondurable products. Include an explanation of how impulse buying can be avoided by sleeping on a decision before making a big purchase.
SS.912.FL.2.6:	Explain that people may choose to donate money to charitable organizations and other not-for-profits because they gain satisfaction from donating. Clarifications: Brainstorm a list of charitable organizations that are operating in the students' community. For each organization, list a possible reason that a donor might want to give to that charitable organization.
SS.912.FL.2.7:	Examine governments establishing laws and institutions to provide consumers with information about goods or services being purchased and to protect consumers from fraud. Clarifications: Draft a complaint letter to an appropriate firm or agency about a problem the consumer has encountered with a purchase.
SS.912.FL.3.1:	Discuss the reasons why some people have a tendency to be impatient and choose immediate spending over saving for the future. Clarifications: Identify instances in their lives where they decided to buy something immediately and then wished they had instead saved the money for future purchases.
SS.912.FL.3.2:	Examine the ideas that inflation reduces the value of money, including savings, that the real interest rate expresses the rate of return on savings, taking into account the effect of inflation and that the real interest rate is calculated as the nominal interest rate minus the rate of inflation. Clarifications: Explain why savers expect a higher nominal interest rate when inflation is expected to be high.
SS.912.FL.3.3:	Compare the difference between the nominal interest rate which tells savers how the dollar value of their savings or investments will grow, and the real interest rate which tells savers how the purchasing power of their savings or investments will grow. Clarifications: Given the nominal interest rate and the rate of inflation over the course of one year, explain what will happen to the purchasing power of savings.
SS.912.FL.3.4:	Describe ways that money received (or paid) in the future can be compared to money held today by discounting the future value based on the rate of interest. Clarifications: Use spreadsheet software to calculate the amount a 10-year-old would need to save today in order to pay for one year of college tuition eight years from now.
SS.912.FL.3.5:	Explain ways that government agencies supervise and regulate financial institutions to help protect the safety, soundness, and legal compliance of the nation's banking and financial system. Clarifications: : Explain the role that government agencies charged with regulating financial institutions play in helping to protect the safety, soundness, and legal compliance of the nation's banking system. These agencies include the Federal Reserve System, the Office of the Comptroller of the Currency, the Consumer Financial Protection Bureau, the FDIC, and state banking departments.
SS.912.FL.3.6:	Describe government policies that create incentives and disincentives for people to save. Clarifications: Explain why traditional IRAs (individual retirement accounts), Roth IRAs, and educational savings accounts provide incentives for people to save.
SS.912.FL.3.7:	Explain how employer benefit programs create incentives and disincentives to save and how an employee's decision to save can depend on how the alternatives are presented by the employer. Clarifications: Explain why matches of retirement savings by employers substantially change the incentives for employees to save. Explain why having employees "opt out" of savings programs results in a higher level of saving than having them "opt in."
SS.912.FL.4.1:	Discuss ways that consumers can compare the cost of credit by using the annual percentage rate (APR), initial fees charged, and fees charged for late payment or missed payments. Clarifications: Use the APR, initial fees, late fees, nonpayment fees, and other relevant information to compare the cost of credit from various sources for the purchase of a product.

SS.912.FL.4.2:	<p>Discuss that banks and financial institutions sometimes compete by offering credit at low introductory rates, which increase after a set period of time or when the borrower misses a payment or makes a late payment.</p> <p>Clarifications: Explain why a bank may offer low-rate introductory credit offers.</p>
SS.912.FL.4.3:	<p>Explain that loans can be unsecured or secured with collateral, that collateral is a piece of property that can be sold by the lender to recover all or part of a loan if the borrower fails to repay. Explain why secured loans are viewed as having less risk and why lenders charge a lower interest rate than they charge for unsecured loans.</p>
SS.912.FL.4.4:	<p>Describe why people often make a cash payment to the seller of a good—called a down payment—in order to reduce the amount they need to borrow. Describe why lenders may consider loans made with a down payment to have less risk because the down payment gives the borrower some equity or ownership right away and why these loans may carry a lower interest rate.</p> <p>Clarifications: Explain how a down payment reduces the total amount financed and why this reduces the monthly payment and/or the length of the loan. Explain why a borrower who has made a down payment has an incentive to repay a loan or make payments on time.</p>
SS.912.FL.4.5:	<p>Explain that lenders make credit decisions based in part on consumer payment history. Credit bureaus record borrowers' credit and payment histories and provide that information to lenders in credit reports.</p> <p>Clarifications: List factors from an individual's credit history or credit application that may cause a lender to deny credit. Explain what credit bureaus do.</p>
SS.912.FL.4.6:	<p>Discuss that lenders can pay to receive a borrower's credit score from a credit bureau and that a credit score is a number based on information in a credit report and assesses a person's credit risk.</p> <p>Clarifications: Explain the concept of a credit score and what it indicates about a borrower. Explain why certain factors, such as having many credit cards with large lines of credit and large balances, might hurt a credit score.</p>
SS.912.FL.4.7:	<p>Describe that, in addition to assessing a person's credit risk, credit reports and scores may be requested and used by employers in hiring decisions, landlords in deciding whether to rent apartments, and insurance companies in charging premiums.</p> <p>Clarifications: Provide two examples of how having a good credit score can benefit a person financially. Explain why employers find it useful to hire someone with a better credit score.</p>
SS.912.FL.4.8:	<p>Examine the fact that failure to repay a loan has significant consequences for borrowers such as negative entries on their credit report, repossession of property (collateral), garnishment of wages, and the inability to obtain loans in the future.</p> <p>Clarifications: Write a scenario about the future opportunities a person can lose by failing to repay loans as agreed.</p>
SS.912.FL.4.9:	<p>Explain that consumers who have difficulty repaying debt can seek assistance through credit counseling services and by negotiating directly with creditors.</p> <p>Clarifications: Identify the costs and benefits associated with using different credit counseling services.</p>
SS.912.FL.4.10:	<p>Analyze the fact that, in extreme cases, bankruptcy may be an option for consumers who are unable to repay debt, and although bankruptcy provides some benefits, filing for bankruptcy also entails considerable costs, including having notice of the bankruptcy appear on a consumer's credit report for up to 10 years.</p> <p>Clarifications: Investigate the costs of bankruptcy by examining the bankruptcy laws in Florida.</p>
SS.912.FL.4.11:	<p>Explain that people often apply for a mortgage to purchase a home and identify a mortgage is a type of loan that is secured by real estate property as collateral.</p> <p>Clarifications: Predict what might happen should a homeowner fail to make his or her mortgage payments.</p>
SS.912.FL.4.12:	<p>Discuss that consumers who use credit should be aware of laws that are in place to protect them and that these include requirements to provide full disclosure of credit terms such as APR and fees, as well as protection against discrimination and abusive marketing or collection practices.</p> <p>Clarifications: Explain why it is important that consumers have full information about loans. Explain the information on a credit disclosure statement.</p>
SS.912.FL.4.13:	<p>Explain that consumers are entitled to a free copy of their credit report annually so that they can verify that no errors were made that might increase their cost of credit.</p> <p>Clarifications: Explain why it is important to check the accuracy of the information recorded on a credit report and know what steps to take to correct errors on credit reports.</p>
SS.912.FL.5.1:	<p>Compare the ways that federal, state, and local tax rates vary on different types of investments. Describe the taxes effect on the after-tax rate of return of an investment.</p> <p>Clarifications: Given tax rates and inflation rates, calculate the real, after-tax rates of return for groups of stocks and bonds.</p>
SS.912.FL.5.2:	<p>Explain how the expenses of buying, selling, and holding financial assets decrease the rate of return from an investment.</p> <p>Clarifications: Identify and compare the administrative costs of several mutual funds and estimate the differences in the total amount accumulated after 10 years for each mutual fund, assuming identical market performance.</p>
SS.912.FL.5.3:	<p>Discuss that buyers and sellers in financial markets determine prices of financial assets and therefore influence the rates of return on those assets.</p> <p>Clarifications: Predict what will happen to the price and rate of return on a bond if buyers believe that the bond has increased in risk.</p>
	<p>Explain that an investment with greater risk than another investment will commonly have a lower market price, and therefore a higher rate of return,</p>

SS.912.FL.5.4:	than the other investment. Clarifications: Explain why the expected rate of return on a "blue chip" stock is likely to be lower than that of an Internet start-up company.
SS.912.FL.5.5:	Explain that shorter-term investments will likely have lower rates of return than longer-term investments. Clarifications: Explain how markets will determine the rates of return for two bonds if one is a long-term bond and the other a short-term bond, assuming each bond pays the same rate of interest.
SS.912.FL.5.6:	Describe how diversifying investments in different types of financial assets can lower investment risk. Clarifications: Compare the risk faced by two investors, both of whom own two businesses on a beach. One investor owns a suntan lotion business and a rain umbrella business. The other investor owns two suntan lotion businesses. Explain why a financial advisor might encourage a client to include stocks, bonds, and real estate assets in his or her portfolio.
SS.912.FL.5.7:	Describe how financial markets adjust to new financial news and that prices in those markets reflect what is known about those financial assets. Clarifications: Explain how prices of financial investments can adjust when given specific news about a company's or industry's future profitability.
SS.912.FL.5.8:	Discuss ways that the prices of financial assets are affected by interest rates and explain that the prices of financial assets are also affected by changes in domestic and international economic conditions, monetary policy, and fiscal policy. Clarifications: Give an example of a change in interest rates affecting the current value of a financial asset that pays returns in the future. Explain why the current value increases when interest rates fall. Explain how a change in economic growth might change the value of a stock held by an investor.
SS.912.FL.5.9:	Examine why investors should be aware of tendencies that people have that may result in poor choices, which may include avoiding selling assets at a loss because they weigh losses more than they weigh gains and investing in financial assets with which they are familiar, such as their own employer's stock or domestic rather than international stocks. Clarifications: Explain why investors may sell stocks that have gained in value, but hold ones that have lost value. Explain why this may not make sense. Identify an example of why an investor may have a bias toward familiar investments and why this may or may not be a rational decision.
SS.912.FL.5.10:	Explain that people vary in their willingness to take risks because the willingness to take risks depends on factors such as personality, income, and family situation. Clarifications: Explain how the portfolio of a retiree might differ from that of a young, single person.
SS.912.FL.5.11:	Describe why an economic role for a government may exist if individuals do not have complete information about the nature of alternative investments or access to competitive financial markets. Clarifications: Explain why it is important for individuals to have accurate information about a company's sales and profits when investing in that company.
SS.912.FL.5.12:	Compare the Securities and Exchange Commission (SEC), the Federal Reserve, and other government agencies that regulate financial markets. Clarifications: Conduct research to learn about the SEC or the Federal Reserve and identify their roles in regulating financial markets.
SS.912.FL.6.1:	Describe how individuals vary with respect to their willingness to accept risk and why most people are willing to pay a small cost now if it means they can avoid a possible larger loss later. Clarifications: Discuss whether or not a premium paid to insure against an accident that never happens is wasted.
SS.912.FL.6.2:	Analyze how judgment regarding risky events is subject to errors because people tend to overestimate the probability of infrequent events, often because they've heard of or seen a recent example. Clarifications: Discuss how an extended warranty on a consumer product is like insurance. Evaluate the cost-effectiveness of extended warranties on three consumer products: a new automobile, a smart phone, and a dishwasher, considering the likelihood that the product will fail, the cost of replacing the item, and the price of the warranty.
SS.912.FL.6.3:	Describe why people choose different amounts of insurance coverage based on their willingness to accept risk, as well as their occupation, lifestyle, age, financial profile, and the price of insurance. Clarifications: Given hypothetical profiles for three types of individuals who differ with respect to occupation, age, lifestyle, marital status, and financial profile, assess the types and levels of personal financial risk faced by each and make recommendations for appropriate insurance.
SS.912.FL.6.4:	Explain that people may be required by governments or by certain types of contracts (e.g., home mortgages) to purchase some types of insurance. Clarifications: Explain why homeowners insurance is required by a lender when a homeowner takes out a mortgage. Investigate Florida's regulations regarding the amount of auto insurance that drivers are required to purchase as well as federal health insurance regulations.
SS.912.FL.6.5:	Describe how an insurance contract can increase the probability or size of a potential loss because having the insurance results in the person taking more risks, and that policy features such as deductibles and copayments are cost-sharing features that encourage the policyholder to take steps to reduce the potential size of a loss (claim). Clarifications: Given an accident scenario, calculate the amount that would be paid on an insurance claim after applying exclusions and deductibles.
SS.912.FL.6.6:	Explain that people can lower insurance premiums by behaving in ways that show they pose a lower risk. Clarifications: Explain why taking a safe-driving course can lower an auto insurance premium and why not smoking can lower the health insurance premium.

SS.912.FL.6.7:	<p>Compare the purposes of various types of insurance, including that health insurance provides for funds to pay for health care in the event of illness and may also pay for the cost of preventative care; disability insurance is income insurance that provides funds to replace income lost while an individual is ill or injured and unable to work; property and casualty insurance pays for damage or loss to the insured's property; life insurance benefits are paid to the insured's beneficiaries in the event of the policyholder's death.</p> <p>Clarifications: Compare the coverage and costs of hypothetical plans for a set of scenarios for various types of insurance.</p>
SS.912.FL.6.8:	<p>Discuss the fact that, in addition to privately purchased insurance, some government benefit programs provide a social safety net to protect individuals from economic hardship created by unexpected events.</p> <p>Clarifications: Describe examples of government transfer programs that compensate for unexpected losses, including Social Security Disability benefits, Medicare, Medicaid, unemployment insurance, and workers' compensation.</p>
SS.912.FL.6.9:	<p>Explain that loss of assets, wealth, and future opportunities can occur if an individual's personal information is obtained by others through identity theft and then used fraudulently, and that by managing their personal information and choosing the environment in which it is revealed, individuals can accept, reduce, and insure against the risk of loss due to identity theft.</p> <p>Clarifications: Describe problems that can occur when an individual is a victim of identity theft. Give specific examples of how online transactions, online banking, email scams, and telemarketing calls can make consumers vulnerable to identity theft. Describe the conditions under which individuals should and should not disclose their Social Security number, account numbers, or other sensitive personal information.</p>
SS.912.FL.6.10:	<p>Compare federal and state regulations that provide some remedies and assistance for victims of identity theft.</p> <p>Clarifications: Recommend actions a victim of identity theft should take to limit losses and restore personal security.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
MAFS.912.N-Q.1.1:	<p>Use units as a way to understand problems and to guide the solution of multi-step problems; choose and interpret units consistently in formulas; choose and interpret the scale and the origin in graphs and data displays. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.2:	<p>Define appropriate quantities for the purpose of descriptive modeling. ★</p> <p>Clarifications: Algebra 1 Content Notes: Working with quantities and the relationships between them provides grounding for work with expressions, equations, and functions.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.N-Q.1.3:	<p>Choose a level of accuracy appropriate to limitations on measurement when reporting quantities. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.3:	<p>Recognize the purposes of and differences among sample surveys, experiments, and observational studies; explain how randomization relates to each. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.4:	<p>Use data from a sample survey to estimate a population mean or proportion; develop a margin of error through the use of simulation models for random sampling. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.5:	<p>Use data from a randomized experiment to compare two treatments; use simulations to decide if differences between parameters are significant. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-IC.2.6:	<p>Evaluate reports based on data. ★</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.1:	<p>Represent data with plots on the real number line (dot plots, histograms, and box plots). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.2:	<p>Use statistics appropriate to the shape of the data distribution to compare center (median, mean) and spread (interquartile range, standard deviation) of two or more different data sets. ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.3:	<p>Interpret differences in shape, center, and spread in the context of the data sets, accounting for possible effects of extreme data points (outliers). ★</p> <p>Clarifications: In grades 6 – 8, students describe center and spread in a data distribution. Here they choose a summary statistic appropriate to the characteristics of the data distribution, such as the shape of the distribution or the existence of extreme data points.</p> <p>Standard Relation to Course: Supporting</p>
MAFS.912.S-ID.1.4:	<p>Use the mean and standard deviation of a data set to fit it to a normal distribution and to estimate population percentages. Recognize that there are data sets for which such a procedure is not appropriate. Use calculators, spreadsheets, and tables to estimate areas under the normal curve. ★</p> <p>Standard Relation to Course: Supporting</p>

Make sense of problems and persevere in solving them.

MAFS.K12.MP.1.1:

Mathematically proficient students start by explaining to themselves the meaning of a problem and looking for entry points to its solution. They analyze givens, constraints, relationships, and goals. They make conjectures about the form and meaning of the solution and plan a solution pathway rather than simply jumping into a solution attempt. They consider analogous problems, and try special cases and simpler forms of the original problem in order to gain insight into its solution. They monitor and evaluate their progress and change course if necessary. Older students might, depending on the context of the problem, transform algebraic expressions or change the viewing window on their graphing calculator to get the information they need. Mathematically proficient students can explain correspondences between equations, verbal descriptions, tables, and graphs or draw diagrams of important features and relationships, graph data, and search for regularity or trends. Younger students might rely on using concrete objects or pictures to help conceptualize and solve a problem. Mathematically proficient students check their answers to problems using a different method, and they continually ask themselves, "Does this make sense?" They can understand the approaches of others to solving complex problems and identify correspondences between different approaches.

Standard Relation to Course: Supporting

Construct viable arguments and critique the reasoning of others.

MAFS.K12.MP.3.1:

Mathematically proficient students understand and use stated assumptions, definitions, and previously established results in constructing arguments. They make conjectures and build a logical progression of statements to explore the truth of their conjectures. They are able to analyze situations by breaking them into cases, and can recognize and use counterexamples. They justify their conclusions, communicate them to others, and respond to the arguments of others. They reason inductively about data, making plausible arguments that take into account the context from which the data arose. Mathematically proficient students are also able to compare the effectiveness of two plausible arguments, distinguish correct logic or reasoning from that which is flawed, and—if there is a flaw in an argument—explain what it is. Elementary students can construct arguments using concrete referents such as objects, drawings, diagrams, and actions. Such arguments can make sense and be correct, even though they are not generalized or made formal until later grades. Later, students learn to determine domains to which an argument applies. Students at all grades can listen or read the arguments of others, decide whether they make sense, and ask useful questions to clarify or improve the arguments.

Standard Relation to Course: Supporting

Use appropriate tools strategically.

MAFS.K12.MP.5.1:

Mathematically proficient students consider the available tools when solving a mathematical problem. These tools might include pencil and paper, concrete models, a ruler, a protractor, a calculator, a spreadsheet, a computer algebra system, a statistical package, or dynamic geometry software. Proficient students are sufficiently familiar with tools appropriate for their grade or course to make sound decisions about when each of these tools might be helpful, recognizing both the insight to be gained and their limitations. For example, mathematically proficient high school students analyze graphs of functions and solutions generated using a graphing calculator. They detect possible errors by strategically using estimation and other mathematical knowledge. When making mathematical models, they know that technology can enable them to visualize the results of varying assumptions, explore consequences, and compare predictions with data. Mathematically proficient students at various grade levels are able to identify relevant external mathematical resources, such as digital content located on a website, and use them to pose or solve problems. They are able to use technological tools to explore and deepen their understanding of concepts.

Standard Relation to Course: Supporting

Attend to precision.

MAFS.K12.MP.6.1:

Mathematically proficient students try to communicate precisely to others. They try to use clear definitions in discussion with others and in their own reasoning. They state the meaning of the symbols they choose, including using the equal sign consistently and appropriately. They are careful about specifying units of measure, and labeling axes to clarify the correspondence with quantities in a problem. They calculate accurately and efficiently, express numerical answers with a degree of precision appropriate for the problem context. In the elementary grades, students give carefully formulated explanations to each other. By the time they reach high school they have learned to examine claims and make explicit use of definitions.

Standard Relation to Course: Supporting

LAFS.1112.RH.1.1:

Cite specific textual evidence to support analysis of primary and secondary sources, connecting insights gained from specific details to an understanding of the text as a whole.

LAFS.1112.RH.1.2:

Determine the central ideas or information of a primary or secondary source; provide an accurate summary that makes clear the relationships among the key details and ideas.

LAFS.1112.RH.1.3:

Evaluate various explanations for actions or events and determine which explanation best accords with textual evidence, acknowledging where the text leaves matters uncertain.

LAFS.1112.RH.2.4:

Determine the meaning of words and phrases as they are used in a text, including analyzing how an author uses and refines the meaning of a key term over the course of a text (e.g., how Madison defines *faction* in *Federalist* No. 10).

LAFS.1112.SL.1.1:

Initiate and participate effectively in a range of collaborative discussions (one-on-one, in groups, and teacher-led) with diverse partners on grades 11–12 topics, texts, and issues, building on others' ideas and expressing their own clearly and persuasively.

- a. Come to discussions prepared, having read and researched material under study; explicitly draw on that preparation by referring to evidence from texts and other research on the topic or issue to stimulate a thoughtful, well-reasoned exchange of ideas.
- b. Work with peers to promote civil, democratic discussions and decision-making, set clear goals and deadlines, and establish individual roles as needed.
- c. Propel conversations by posing and responding to questions that probe reasoning and evidence; ensure a hearing for a full range of positions on a topic or issue; clarify, verify, or challenge ideas and conclusions; and promote divergent and creative perspectives.
- d. Respond thoughtfully to diverse perspectives; synthesize comments, claims, and evidence made on all sides of an issue; resolve contradictions when possible; and determine what additional information or research is required to deepen the investigation or complete the task.

LAFS.1112.SL.1.2:

Integrate multiple sources of information presented in diverse formats and media (e.g., visually, quantitatively, orally) in order to make informed decisions and solve problems, evaluating the credibility and accuracy of each source and noting any discrepancies among the data.

LAFS.1112.SL.1.3:

Evaluate a speaker's point of view, reasoning, and use of evidence and rhetoric, assessing the stance, premises, links among ideas, word choice, points of emphasis, and tone used.

LAFS.1112.SL.2.4:

Present information, findings, and supporting evidence, conveying a clear and distinct perspective, such that listeners can follow the line of reasoning, alternative or opposing perspectives are addressed, and the organization, development, substance, and style are appropriate to purpose, audience, and a range of formal and informal tasks.

Write arguments focused on *discipline-specific content*.

- a. Introduce precise, knowledgeable claim(s), establish the significance of the claim(s), distinguish the claim(s) from alternate or opposing claims,

LAFS.1112.WHST.1.1:	<p>and create an organization that logically sequences the claim(s), counterclaims, reasons, and evidence.</p> <p>b. Develop claim(s) and counterclaims fairly and thoroughly, supplying the most relevant data and evidence for each while pointing out the strengths and limitations of both claim(s) and counterclaims in a discipline-appropriate form that anticipates the audience's knowledge level, concerns, values, and possible biases.</p> <p>c. Use words, phrases, and clauses as well as varied syntax to link the major sections of the text, create cohesion, and clarify the relationships between claim(s) and reasons, between reasons and evidence, and between claim(s) and counterclaims.</p> <p>d. Establish and maintain a formal style and objective tone while attending to the norms and conventions of the discipline in which they are writing.</p> <p>e. Provide a concluding statement or section that follows from or supports the argument presented.</p>
LAFS.1112.WHST.1.2:	<p>Write informative/explanatory texts, including the narration of historical events, scientific procedures/ experiments, or technical processes.</p> <p>a. Introduce a topic and organize complex ideas, concepts, and information so that each new element builds on that which precedes it to create a unified whole; include formatting (e.g., headings), graphics (e.g., figures, tables), and multimedia when useful to aiding comprehension.</p> <p>b. Develop the topic thoroughly by selecting the most significant and relevant facts, extended definitions, concrete details, quotations, or other information and examples appropriate to the audience's knowledge of the topic.</p> <p>c. Use varied transitions and sentence structures to link the major sections of the text, create cohesion, and clarify the relationships among complex ideas and concepts.</p> <p>d. Use precise language, domain-specific vocabulary and techniques such as metaphor, simile, and analogy to manage the complexity of the topic; convey a knowledgeable stance in a style that responds to the discipline and context as well as to the expertise of likely readers.</p> <p>e. Provide a concluding statement or section that follows from and supports the information or explanation provided (e.g., articulating implications or the significance of the topic).</p>
LAFS.1112.WHST.2.4:	Produce clear and coherent writing in which the development, organization, and style are appropriate to task, purpose, and audience.
LAFS.1112.WHST.2.5:	Develop and strengthen writing as needed by planning, revising, editing, rewriting, or trying a new approach, focusing on addressing what is most significant for a specific purpose and audience.
LAFS.1112.WHST.2.6:	Use technology, including the Internet, to produce, publish, and update individual or shared writing products in response to ongoing feedback, including new arguments or information.
ELD.K12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	<p>Evaluate how public health policies and government regulations can influence health promotion and disease prevention.</p> <p>Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.</p>

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Mathematics Benchmark Guidance - Social Studies instruction should include opportunities for students to interpret and create representations of historical events and concepts using mathematical tables, charts, and graphs.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Literacy Standards in Social Studies

Secondary social studies courses include reading standards for literacy in history/social studies 6-12, and writing standards for literacy in history/social studies, science, and technical subjects 6-12. This course also includes speaking and listening standards. For a complete list of standards required for this course click on the blue tile labeled course standards. You may also download the complete course including all required standards and notes sections using the export function located at the top of this page.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard

should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link: <https://cpalmsmediaprod.blob.core.windows.net/uploads/docs/standards/eld/ss.pdf>

Finance Your Future

The Division of Consumer Services at the Florida Department of Financial Services offers a free financial literacy resource designed for middle and high students. Finance Your Future is comprised of eight main modules on the topics of: Budgeting & Saving, Credit Cards, Banking, Credit Report & Score, Debt, Frauds & Scams, Insurance & Benefits and Life Events. Each module includes lessons, activities, games and a comprehensive knowledge check at the end. Visit the Finance Your Future website to access this resource. It should be noted that this resource does not include all of the financial literacy content needed to satisfy the standard high school diploma requirement per s. 1003.4282, Florida Statutes. A crosswalk of Financial Literacy standards and benchmarks can be found here.

GENERAL INFORMATION

Course Number: 2102340

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** Economics >

Number of Credits: Half credit (.5)

Abbreviated Title: ECON FIN LIT CR

Course Length: Credit Recovery (R)

Course Attributes:

- Class Size Core Required

Course Type: Credit Recovery

Course Level: 2

Course Status: Course Approved

Grade Level(s): 9,10,11,12

Educator Certifications

Economics (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Economics with Financial Literacy for Credit Recovery (#2102340) 2022 - And Beyond

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?; (2) How to produce?; and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.E.2.4:	Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls. Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.

SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System.
SS.912.E.2.11:	Assess the economic impact of negative and positive externalities on the local, state, and national environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	Demonstrate the impact of inflation on world economies. Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones. Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.
SS.912.E.3.4:	Assess the economic impact of negative and positive externalities on the international environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.3.5:	Compare the current United States economy with other developed and developing nations. Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.E.3.6:	Differentiate and draw conclusions about historical economic thought theorized by economists. Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.
SS.912.FL.1.1:	Discuss that people choose jobs or careers for which they are qualified based on non-income factors, such as job satisfaction, independence, risk, family, or location. Clarifications: Identify non-income factors that influence career or job choice by interviewing three individuals who work at different jobs.
SS.912.FL.1.2:	Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer. Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.
SS.912.FL.1.3:	Evaluate ways people can make more informed education, job, or career decisions by evaluating the benefits and costs of different choices. Clarifications: Compare the benefits and costs of a college education to those of a technical school. Compare the unemployment rates of workers with different levels of education.
SS.912.FL.1.4:	Analyze the reasons why the wage or salary paid to workers in jobs is usually determined by the labor market and that businesses are generally willing to pay more productive workers higher wages or salaries than less productive workers. Clarifications: Explain why wages or salaries vary among workers in different types of jobs and among workers in the same jobs. Discuss why the productivity of workers is important to businesses.
SS.912.FL.1.5:	Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment. Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.
SS.912.FL.1.6:	Explain that taxes are paid to federal, state, and local governments to fund government goods and services and transfer payments from government to individuals and that the major types of taxes are income taxes, payroll (Social Security) taxes, property taxes, and sales taxes. Clarifications: Calculate the amount of taxes a person is likely to pay when given information or data about the person's sources of income and amount of spending. Identify which level of government receives the tax revenue for a particular tax and describe what is done with the tax revenue.
SS.912.FL.1.7:	Discuss how people's sources of income, amount of income, as well as the amount and type of spending affect the types and amounts of taxes paid. Clarifications: Investigate the tax rates on different sources of income and on different types of goods that are purchased.
	Compare consumer decisions as they are influenced by the price of a good or service, the price of alternatives, and the consumer's income as well as

SS.912.FL.2.1:	his or her preferences. Clarifications: Write scenarios explaining how an individual's decision to buy athletic shoes may have been influenced by various factors.
SS.912.FL.2.2:	Analyze situations in which when people consume goods and services, their consumption can have positive and negative effects on others. Clarifications: Explain the positive or negative impacts of an activity such as smoking cigarettes or attending school, etc., might have on other individuals and the community.
SS.912.FL.2.3:	Discuss that when buying a good, consumers may consider various aspects of the product including the product's features. Explain why for goods that last for a longer period of time, the consumer should consider the product's durability and maintenance costs. Clarifications: Explain the factors that a consumer who is buying an automobile should consider before making a choice.
SS.912.FL.2.4:	Describe ways that consumers may be influenced by how the price of a good is expressed. Clarifications: Write a paragraph explaining why a store might advertise the price of a flat screen TV expressed as an amount per day or week rather than the actual full price. List different ways retailers use to express the prices of their products.
SS.912.FL.2.5:	Discuss ways people incur costs and realize benefits when searching for information related to their purchases of goods and services and describe how the amount of information people should gather depends on the benefits and costs of the information. Clarifications: Write a newspaper column, "Tips for Consumers," explaining why searching for information may be more important when purchasing expensive, durable goods and services than for inexpensive and nondurable products. Include an explanation of how impulse buying can be avoided by sleeping on a decision before making a big purchase.
SS.912.FL.2.6:	Explain that people may choose to donate money to charitable organizations and other not-for-profits because they gain satisfaction from donating. Clarifications: Brainstorm a list of charitable organizations that are operating in the students' community. For each organization, list a possible reason that a donor might want to give to that charitable organization.
SS.912.FL.2.7:	Examine governments establishing laws and institutions to provide consumers with information about goods or services being purchased and to protect consumers from fraud. Clarifications: Draft a complaint letter to an appropriate firm or agency about a problem the consumer has encountered with a purchase.
SS.912.FL.3.1:	Discuss the reasons why some people have a tendency to be impatient and choose immediate spending over saving for the future. Clarifications: Identify instances in their lives where they decided to buy something immediately and then wished they had instead saved the money for future purchases.
SS.912.FL.3.2:	Examine the ideas that inflation reduces the value of money, including savings, that the real interest rate expresses the rate of return on savings, taking into account the effect of inflation and that the real interest rate is calculated as the nominal interest rate minus the rate of inflation. Clarifications: Explain why savers expect a higher nominal interest rate when inflation is expected to be high.
SS.912.FL.3.3:	Compare the difference between the nominal interest rate which tells savers how the dollar value of their savings or investments will grow, and the real interest rate which tells savers how the purchasing power of their savings or investments will grow. Clarifications: Given the nominal interest rate and the rate of inflation over the course of one year, explain what will happen to the purchasing power of savings.
SS.912.FL.3.4:	Describe ways that money received (or paid) in the future can be compared to money held today by discounting the future value based on the rate of interest. Clarifications: Use spreadsheet software to calculate the amount a 10-year-old would need to save today in order to pay for one year of college tuition eight years from now.
SS.912.FL.3.5:	Explain ways that government agencies supervise and regulate financial institutions to help protect the safety, soundness, and legal compliance of the nation's banking and financial system. Clarifications: : Explain the role that government agencies charged with regulating financial institutions play in helping to protect the safety, soundness, and legal compliance of the nation's banking system. These agencies include the Federal Reserve System, the Office of the Comptroller of the Currency, the Consumer Financial Protection Bureau, the FDIC, and state banking departments.
SS.912.FL.3.6:	Describe government policies that create incentives and disincentives for people to save. Clarifications: Explain why traditional IRAs (individual retirement accounts), Roth IRAs, and educational savings accounts provide incentives for people to save.
SS.912.FL.3.7:	Explain how employer benefit programs create incentives and disincentives to save and how an employee's decision to save can depend on how the alternatives are presented by the employer. Clarifications: Explain why matches of retirement savings by employers substantially change the incentives for employees to save. Explain why having employees "opt out" of savings programs results in a higher level of saving than having them "opt in."
SS.912.FL.4.1:	Discuss ways that consumers can compare the cost of credit by using the annual percentage rate (APR), initial fees charged, and fees charged for late payment or missed payments. Clarifications: Use the APR, initial fees, late fees, nonpayment fees, and other relevant information to compare the cost of credit from various sources for the purchase of a product.

SS.912.FL.4.2:	Discuss that banks and financial institutions sometimes compete by offering credit at low introductory rates, which increase after a set period of time or when the borrower misses a payment or makes a late payment. Clarifications: Explain why a bank may offer low-rate introductory credit offers.
SS.912.FL.4.3:	Explain that loans can be unsecured or secured with collateral, that collateral is a piece of property that can be sold by the lender to recover all or part of a loan if the borrower fails to repay. Explain why secured loans are viewed as having less risk and why lenders charge a lower interest rate than they charge for unsecured loans.
SS.912.FL.4.4:	Describe why people often make a cash payment to the seller of a good—called a down payment—in order to reduce the amount they need to borrow. Describe why lenders may consider loans made with a down payment to have less risk because the down payment gives the borrower some equity or ownership right away and why these loans may carry a lower interest rate. Clarifications: Explain how a down payment reduces the total amount financed and why this reduces the monthly payment and/or the length of the loan. Explain why a borrower who has made a down payment has an incentive to repay a loan or make payments on time.
SS.912.FL.4.5:	Explain that lenders make credit decisions based in part on consumer payment history. Credit bureaus record borrowers' credit and payment histories and provide that information to lenders in credit reports. Clarifications: List factors from an individual's credit history or credit application that may cause a lender to deny credit. Explain what credit bureaus do.
SS.912.FL.4.6:	Discuss that lenders can pay to receive a borrower's credit score from a credit bureau and that a credit score is a number based on information in a credit report and assesses a person's credit risk. Clarifications: Explain the concept of a credit score and what it indicates about a borrower. Explain why certain factors, such as having many credit cards with large lines of credit and large balances, might hurt a credit score.
SS.912.FL.4.7:	Describe that, in addition to assessing a person's credit risk, credit reports and scores may be requested and used by employers in hiring decisions, landlords in deciding whether to rent apartments, and insurance companies in charging premiums. Clarifications: Provide two examples of how having a good credit score can benefit a person financially. Explain why employers find it useful to hire someone with a better credit score.
SS.912.FL.4.8:	Examine the fact that failure to repay a loan has significant consequences for borrowers such as negative entries on their credit report, repossession of property (collateral), garnishment of wages, and the inability to obtain loans in the future. Clarifications: Write a scenario about the future opportunities a person can lose by failing to repay loans as agreed.
SS.912.FL.4.9:	Explain that consumers who have difficulty repaying debt can seek assistance through credit counseling services and by negotiating directly with creditors. Clarifications: Identify the costs and benefits associated with using different credit counseling services.
SS.912.FL.4.10:	Analyze the fact that, in extreme cases, bankruptcy may be an option for consumers who are unable to repay debt, and although bankruptcy provides some benefits, filing for bankruptcy also entails considerable costs, including having notice of the bankruptcy appear on a consumer's credit report for up to 10 years. Clarifications: Investigate the costs of bankruptcy by examining the bankruptcy laws in Florida.
SS.912.FL.4.11:	Explain that people often apply for a mortgage to purchase a home and identify a mortgage is a type of loan that is secured by real estate property as collateral. Clarifications: Predict what might happen should a homeowner fail to make his or her mortgage payments.
SS.912.FL.4.12:	Discuss that consumers who use credit should be aware of laws that are in place to protect them and that these include requirements to provide full disclosure of credit terms such as APR and fees, as well as protection against discrimination and abusive marketing or collection practices. Clarifications: Explain why it is important that consumers have full information about loans. Explain the information on a credit disclosure statement.
SS.912.FL.4.13:	Explain that consumers are entitled to a free copy of their credit report annually so that they can verify that no errors were made that might increase their cost of credit. Clarifications: Explain why it is important to check the accuracy of the information recorded on a credit report and know what steps to take to correct errors on credit reports.
SS.912.FL.5.1:	Compare the ways that federal, state, and local tax rates vary on different types of investments. Describe the taxes effect on the after-tax rate of return of an investment. Clarifications: Given tax rates and inflation rates, calculate the real, after-tax rates of return for groups of stocks and bonds.
SS.912.FL.5.2:	Explain how the expenses of buying, selling, and holding financial assets decrease the rate of return from an investment. Clarifications: Identify and compare the administrative costs of several mutual funds and estimate the differences in the total amount accumulated after 10 years for each mutual fund, assuming identical market performance.
SS.912.FL.5.3:	Discuss that buyers and sellers in financial markets determine prices of financial assets and therefore influence the rates of return on those assets. Clarifications: Predict what will happen to the price and rate of return on a bond if buyers believe that the bond has increased in risk.
	Explain that an investment with greater risk than another investment will commonly have a lower market price, and therefore a higher rate of return,

SS.912.FL.5.4:	than the other investment. Clarifications: Explain why the expected rate of return on a "blue chip" stock is likely to be lower than that of an Internet start-up company.
SS.912.FL.5.5:	Explain that shorter-term investments will likely have lower rates of return than longer-term investments. Clarifications: Explain how markets will determine the rates of return for two bonds if one is a long-term bond and the other a short-term bond, assuming each bond pays the same rate of interest.
SS.912.FL.5.6:	Describe how diversifying investments in different types of financial assets can lower investment risk. Clarifications: Compare the risk faced by two investors, both of whom own two businesses on a beach. One investor owns a suntan lotion business and a rain umbrella business. The other investor owns two suntan lotion businesses. Explain why a financial advisor might encourage a client to include stocks, bonds, and real estate assets in his or her portfolio.
SS.912.FL.5.7:	Describe how financial markets adjust to new financial news and that prices in those markets reflect what is known about those financial assets. Clarifications: Explain how prices of financial investments can adjust when given specific news about a company's or industry's future profitability.
SS.912.FL.5.8:	Discuss ways that the prices of financial assets are affected by interest rates and explain that the prices of financial assets are also affected by changes in domestic and international economic conditions, monetary policy, and fiscal policy. Clarifications: Give an example of a change in interest rates affecting the current value of a financial asset that pays returns in the future. Explain why the current value increases when interest rates fall. Explain how a change in economic growth might change the value of a stock held by an investor.
SS.912.FL.5.9:	Examine why investors should be aware of tendencies that people have that may result in poor choices, which may include avoiding selling assets at a loss because they weigh losses more than they weigh gains and investing in financial assets with which they are familiar, such as their own employer's stock or domestic rather than international stocks. Clarifications: Explain why investors may sell stocks that have gained in value, but hold ones that have lost value. Explain why this may not make sense. Identify an example of why an investor may have a bias toward familiar investments and why this may or may not be a rational decision.
SS.912.FL.5.10:	Explain that people vary in their willingness to take risks because the willingness to take risks depends on factors such as personality, income, and family situation. Clarifications: Explain how the portfolio of a retiree might differ from that of a young, single person.
SS.912.FL.5.11:	Describe why an economic role for a government may exist if individuals do not have complete information about the nature of alternative investments or access to competitive financial markets. Clarifications: Explain why it is important for individuals to have accurate information about a company's sales and profits when investing in that company.
SS.912.FL.5.12:	Compare the Securities and Exchange Commission (SEC), the Federal Reserve, and other government agencies that regulate financial markets. Clarifications: Conduct research to learn about the SEC or the Federal Reserve and identify their roles in regulating financial markets.
SS.912.FL.6.1:	Describe how individuals vary with respect to their willingness to accept risk and why most people are willing to pay a small cost now if it means they can avoid a possible larger loss later. Clarifications: Discuss whether or not a premium paid to insure against an accident that never happens is wasted.
SS.912.FL.6.2:	Analyze how judgment regarding risky events is subject to errors because people tend to overestimate the probability of infrequent events, often because they've heard of or seen a recent example. Clarifications: Discuss how an extended warranty on a consumer product is like insurance. Evaluate the cost-effectiveness of extended warranties on three consumer products: a new automobile, a smart phone, and a dishwasher, considering the likelihood that the product will fail, the cost of replacing the item, and the price of the warranty.
SS.912.FL.6.3:	Describe why people choose different amounts of insurance coverage based on their willingness to accept risk, as well as their occupation, lifestyle, age, financial profile, and the price of insurance. Clarifications: Given hypothetical profiles for three types of individuals who differ with respect to occupation, age, lifestyle, marital status, and financial profile, assess the types and levels of personal financial risk faced by each and make recommendations for appropriate insurance.
SS.912.FL.6.4:	Explain that people may be required by governments or by certain types of contracts (e.g., home mortgages) to purchase some types of insurance. Clarifications: Explain why homeowners insurance is required by a lender when a homeowner takes out a mortgage. Investigate Florida's regulations regarding the amount of auto insurance that drivers are required to purchase as well as federal health insurance regulations.
SS.912.FL.6.5:	Describe how an insurance contract can increase the probability or size of a potential loss because having the insurance results in the person taking more risks, and that policy features such as deductibles and copayments are cost-sharing features that encourage the policyholder to take steps to reduce the potential size of a loss (claim). Clarifications: Given an accident scenario, calculate the amount that would be paid on an insurance claim after applying exclusions and deductibles.
SS.912.FL.6.6:	Explain that people can lower insurance premiums by behaving in ways that show they pose a lower risk. Clarifications: Explain why taking a safe-driving course can lower an auto insurance premium and why not smoking can lower the health insurance premium.

SS.912.FL.6.7:	<p>Compare the purposes of various types of insurance, including that health insurance provides for funds to pay for health care in the event of illness and may also pay for the cost of preventative care; disability insurance is income insurance that provides funds to replace income lost while an individual is ill or injured and unable to work; property and casualty insurance pays for damage or loss to the insured's property; life insurance benefits are paid to the insured's beneficiaries in the event of the policyholder's death.</p> <p>Clarifications: Compare the coverage and costs of hypothetical plans for a set of scenarios for various types of insurance.</p>
SS.912.FL.6.8:	<p>Discuss the fact that, in addition to privately purchased insurance, some government benefit programs provide a social safety net to protect individuals from economic hardship created by unexpected events.</p> <p>Clarifications: Describe examples of government transfer programs that compensate for unexpected losses, including Social Security Disability benefits, Medicare, Medicaid, unemployment insurance, and workers' compensation.</p>
SS.912.FL.6.9:	<p>Explain that loss of assets, wealth, and future opportunities can occur if an individual's personal information is obtained by others through identity theft and then used fraudulently, and that by managing their personal information and choosing the environment in which it is revealed, individuals can accept, reduce, and insure against the risk of loss due to identity theft.</p> <p>Clarifications: Describe problems that can occur when an individual is a victim of identity theft. Give specific examples of how online transactions, online banking, email scams, and telemarketing calls can make consumers vulnerable to identity theft. Describe the conditions under which individuals should and should not disclose their Social Security number, account numbers, or other sensitive personal information.</p>
SS.912.FL.6.10:	<p>Compare federal and state regulations that provide some remedies and assistance for victims of identity theft.</p> <p>Clarifications: Recommend actions a victim of identity theft should take to limit losses and restore personal security.</p>
SS.912.G.2.2:	Describe the factors and processes that contribute to the differences between developing and developed regions of the world.
SS.912.G.3.3:	Use geographic terms and tools to explain differing perspectives on the use of renewable and non-renewable resources in Florida, the United States, and the world.
SS.912.G.4.4:	<p>Use geographic terms and tools to analyze case studies of issues in globalization.</p> <p>Clarifications: Examples are cultural imperialism, outsourcing.</p>
MA.K12.MTR.1.1:	<p>Mathematicians who participate in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Analyze the problem in a way that makes sense given the task. Ask questions that will help with solving the task. Build perseverance by modifying methods as needed while solving a challenging task. Stay engaged and maintain a positive mindset when working to solve tasks. Help and support each other when attempting a new method or approach. <p>Clarifications: Teachers who encourage students to participate actively in effortful learning both individually and with others:</p> <ul style="list-style-type: none"> Cultivate a community of growth mindset learners. Foster perseverance in students by choosing tasks that are challenging. Develop students' ability to analyze and problem solve. Recognize students' effort when solving challenging problems.
MA.K12.MTR.2.1:	<p>Demonstrate understanding by representing problems in multiple ways.</p> <p>Mathematicians who demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Build understanding through modeling and using manipulatives. Represent solutions to problems in multiple ways using objects, drawings, tables, graphs and equations. Progress from modeling problems with objects and drawings to using algorithms and equations. Express connections between concepts and representations. Choose a representation based on the given context or purpose. <p>Clarifications: Teachers who encourage students to demonstrate understanding by representing problems in multiple ways:</p> <ul style="list-style-type: none"> Help students make connections between concepts and representations. Provide opportunities for students to use manipulatives when investigating concepts. Guide students from concrete to pictorial to abstract representations as understanding progresses. Show students that various representations can have different purposes and can be useful in different situations.
MA.K12.MTR.3.1:	<p>Complete tasks with mathematical fluency.</p> <p>Mathematicians who complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Select efficient and appropriate methods for solving problems within the given context. Maintain flexibility and accuracy while performing procedures and mental calculations. Complete tasks accurately and with confidence. Adapt procedures to apply them to a new context. Use feedback to improve efficiency when performing calculations. <p>Clarifications: Teachers who encourage students to complete tasks with mathematical fluency:</p> <ul style="list-style-type: none"> Provide students with the flexibility to solve problems by selecting a procedure that allows them to solve efficiently and accurately. Offer multiple opportunities for students to practice efficient and generalizable methods. Provide opportunities for students to reflect on the method they used and determine if a more efficient method could have been used.

Engage in discussions that reflect on the mathematical thinking of self and others.
Mathematicians who engage in discussions that reflect on the mathematical thinking of self and others:

- Communicate mathematical ideas, vocabulary and methods effectively.
- Analyze the mathematical thinking of others.
- Compare the efficiency of a method to those expressed by others.
- Recognize errors and suggest how to correctly solve the task.
- Justify results by explaining methods and processes.
- Construct possible arguments based on evidence.

MA.K12.MTR.4.1:

Clarifications:

Teachers who encourage students to engage in discussions that reflect on the mathematical thinking of self and others:

- Establish a culture in which students ask questions of the teacher and their peers, and error is an opportunity for learning.
- Create opportunities for students to discuss their thinking with peers.
- Select, sequence and present student work to advance and deepen understanding of correct and increasingly efficient methods.
- Develop students' ability to justify methods and compare their responses to the responses of their peers.

Use patterns and structure to help understand and connect mathematical concepts.
Mathematicians who use patterns and structure to help understand and connect mathematical concepts:

- Focus on relevant details within a problem.
- Create plans and procedures to logically order events, steps or ideas to solve problems.
- Decompose a complex problem into manageable parts.
- Relate previously learned concepts to new concepts.
- Look for similarities among problems.
- Connect solutions of problems to more complicated large-scale situations.

MA.K12.MTR.5.1:

Clarifications:

Teachers who encourage students to use patterns and structure to help understand and connect mathematical concepts:

- Help students recognize the patterns in the world around them and connect these patterns to mathematical concepts.
- Support students to develop generalizations based on the similarities found among problems.
- Provide opportunities for students to create plans and procedures to solve problems.
- Develop students' ability to construct relationships between their current understanding and more sophisticated ways of thinking.

Assess the reasonableness of solutions.
Mathematicians who assess the reasonableness of solutions:

- Estimate to discover possible solutions.
- Use benchmark quantities to determine if a solution makes sense.
- Check calculations when solving problems.
- Verify possible solutions by explaining the methods used.
- Evaluate results based on the given context.

MA.K12.MTR.6.1:

Clarifications:

Teachers who encourage students to assess the reasonableness of solutions:

- Have students estimate or predict solutions prior to solving.
- Prompt students to continually ask, "Does this solution make sense? How do you know?"
- Reinforce that students check their work as they progress within and after a task.
- Strengthen students' ability to verify solutions through justifications.

Apply mathematics to real-world contexts.
Mathematicians who apply mathematics to real-world contexts:

- Connect mathematical concepts to everyday experiences.
- Use models and methods to understand, represent and solve problems.
- Perform investigations to gather data or determine if a method is appropriate. • Redesign models and methods to improve accuracy or efficiency.

MA.K12.MTR.7.1:

Clarifications:

Teachers who encourage students to apply mathematics to real-world contexts:

- Provide opportunities for students to create models, both concrete and abstract, and perform investigations.
- Challenge students to question the accuracy of their models and methods.
- Support students as they validate conclusions by comparing them to the given situation.
- Indicate how various concepts can be applied to other disciplines.

Cite evidence to explain and justify reasoning.

Clarifications:

K-1 Students include textual evidence in their oral communication with guidance and support from adults. The evidence can consist of details from the text without naming the text. During 1st grade, students learn how to incorporate the evidence in their writing.

2-3 Students include relevant textual evidence in their written and oral communication. Students should name the text when they refer to it. In 3rd grade, students should use a combination of direct and indirect citations.

4-5 Students continue with previous skills and reference comments made by speakers and peers. Students cite texts that they've directly quoted, paraphrased, or used for information. When writing, students will use the form of citation dictated by the instructor or the style guide referenced by the instructor.

6-8 Students continue with previous skills and use a style guide to create a proper citation.

9-12 Students continue with previous skills and should be aware of existing style guides and the ways in which they differ.

ELA.K12.EE.1.1:

Read and comprehend grade-level complex texts proficiently.

ELA.K.12.EE.2.1:	Clarifications: See Text Complexity for grade-level complexity bands and a text complexity rubric.
ELA.K.12.EE.3.1:	Make inferences to support comprehension. Clarifications: Students will make inferences before the words infer or inference are introduced. Kindergarten students will answer questions like "Why is the girl smiling?" or make predictions about what will happen based on the title page. Students will use the terms and apply them in 2nd grade and beyond.
ELA.K.12.EE.4.1:	Use appropriate collaborative techniques and active listening skills when engaging in discussions in a variety of situations. Clarifications: In kindergarten, students learn to listen to one another respectfully. In grades 1-2, students build upon these skills by justifying what they are thinking. For example: "I think _____ because _____." The collaborative conversations are becoming academic conversations. In grades 3-12, students engage in academic conversations discussing claims and justifying their reasoning, refining and applying skills. Students build on ideas, propel the conversation, and support claims and counterclaims with evidence.
ELA.K.12.EE.5.1:	Use the accepted rules governing a specific format to create quality work. Clarifications: Students will incorporate skills learned into work products to produce quality work. For students to incorporate these skills appropriately, they must receive instruction. A 3rd grade student creating a poster board display must have instruction in how to effectively present information to do quality work.
ELA.K.12.EE.6.1:	Use appropriate voice and tone when speaking or writing. Clarifications: In kindergarten and 1st grade, students learn the difference between formal and informal language. For example, the way we talk to our friends differs from the way we speak to adults. In 2nd grade and beyond, students practice appropriate social and academic language to discuss texts.
ELD.K.12.ELL.SI.1:	English language learners communicate for social and instructional purposes within the school setting.
ELD.K.12.ELL.SS.1:	English language learners communicate information, ideas and concepts necessary for academic success in the content area of Social Studies.
HE.912.C.2.4:	Evaluate how public health policies and government regulations can influence health promotion and disease prevention. Clarifications: Seat-belt enforcement, underage alcohol sales, reporting communicable diseases, child care, and AED availability.

General Course Information and Notes

GENERAL NOTES

Economics - The grade 9-12 Economics course consists of the following content area strands: Economics and Geography. The primary content emphasis for this course pertains to the study of the concepts and processes of the national and international economic systems. Content should include, but is not limited to, currency, banking, and monetary policy, the fundamental concepts relevant to the major economic systems, the global market and economy, major economic theories and economists, the role and influence of the government and fiscal policies, economic measurements, tools, and methodology, financial and investment markets, and the business cycle.

Special Notes:

Credit Recovery courses are credit bearing courses with specific content requirements defined by Next Generation Sunshine State Standards and/or Florida Standards. Students enrolled in a Credit Recovery course must have previously attempted the corresponding course (and/or End-of-Course assessment) since the course requirements for the Credit Recovery course are exactly the same as the previously attempted corresponding course. For example, Geometry (1206310) and Geometry for Credit Recovery (1206315) have identical content requirements. It is important to note that Credit Recovery courses are not bound by Section 1003.436(1)(a), Florida Statutes, requiring a minimum of 135 hours of bona fide instruction (120 hours in a school/district implementing block scheduling) in a designed course of study that contains student performance standards, since the students have previously attempted successful completion of the corresponding course. Additionally, Credit Recovery courses should ONLY be used for credit recovery, grade forgiveness, or remediation for students needing to prepare for an End-of-Course assessment retake.

Instructional Practices

Teaching from well-written, grade-level instructional materials enhances students' content area knowledge and also strengthens their ability to comprehend longer, complex reading passages on any topic for any reason. Using the following instructional practices also helps student learning:

1. Reading assignments from longer text passages as well as shorter ones when text is extremely complex.
2. Making close reading and rereading of texts central to lessons.
3. Asking high-level, text-specific questions and requiring high-level, complex tasks and assignments.
4. Requiring students to support answers with evidence from the text.
5. Providing extensive text-based research and writing opportunities (claims and evidence).

Florida's Benchmarks for Excellent Student Thinking (B.E.S.T.) Standards

This course includes Florida's B.E.S.T. ELA Expectations (EE) and Mathematical Thinking and Reasoning Standards (MTRs) for students. Florida educators should intentionally embed these standards within the content and their instruction as applicable. For guidance on the implementation of the EEs and MTRs, please visit https://www.cpalms.org/Standards/BEST_Standards.aspx and select the appropriate B.E.S.T. Standards package.

English Language Development ELD Standards Special Notes Section:

Teachers are required to provide listening, speaking, reading and writing instruction that allows English language learners (ELL) to communicate information, ideas and concepts for academic success in the content area of Social Studies. For the given level of English language proficiency and with visual, graphic, or interactive support, students will interact with grade level words, expressions, sentences and discourse to process or produce language necessary for academic success. The ELD standard should specify a relevant content area concept or topic of study chosen by curriculum developers and teachers which maximizes an ELL's need for communication and social skills. To access an ELL supporting document which delineates performance definitions and descriptors, please click on the following link:

Finance Your Future

The Division of Consumer Services at the Florida Department of Financial Services offers a free financial literacy resource designed for middle and high students. Finance Your Future is comprised of eight main modules on the topics of: Budgeting & Saving, Credit Cards, Banking, Credit Report & Score, Debt, Frauds & Scams, Insurance & Benefits and Life Events. Each module includes lessons, activities, games and a comprehensive knowledge check at the end. Visit the Finance Your Future website to access this resource. It should be noted that this resource does not include all of the financial literacy content needed to satisfy the standard high school diploma requirement per s. 1003.4282, Florida Statutes. A crosswalk of Financial Literacy standards and benchmarks can be found here.

GENERAL INFORMATION

Course Number: 2102340

Course Path: Section: Grades PreK to 12 Education Courses > **Grade Group:** Grades 9 to 12 and Adult Education Courses > **Subject:** Social Studies > **SubSubject:** Economics >

Number of Credits: Half credit (.5)

Abbreviated Title: ECON FIN LIT CR

Course Length: Credit Recovery (R)

Course Attributes:

- Class Size Core Required

Course Type: Credit Recovery

Course Level: 2

Course Status: State Board Approved

Grade Level(s): 9,10,11,12

Educator Certifications

Economics (Grades 6-12)

Social Science (Grades 5-9)

History (Grades 6-12)

Social Science (Grades 6-12)

Economics with Financial Literacy Honors (#2102345)

2018 - 2022 (current)

Course Standards

Name	Description
SS.912.E.1.1:	Identify the factors of production and why they are necessary for the production of goods and services. Clarifications: Examples are land, labor, capital, entrepreneurship.
SS.912.E.1.2:	Analyze production possibilities curves to explain choice, scarcity, and opportunity costs.
SS.912.E.1.3:	Compare how the various economic systems (traditional, market, command, mixed) answer the questions: (1) What to produce?, (2) How to produce?, and (3) For whom to produce?
SS.912.E.1.4:	Define supply, demand, quantity supplied, and quantity demanded; graphically illustrate situations that would cause changes in each, and demonstrate how the equilibrium price of a product is determined by the interaction of supply and demand in the market place. Compare different forms of business organizations.
SS.912.E.1.5:	Clarifications: Examples are sole proprietorship, partnership, corporation, limited liability corporation.
SS.912.E.1.6:	Compare the basic characteristics of the four market structures (monopoly, oligopoly, monopolistic competition, pure competition).
SS.912.E.1.7:	Graph and explain how firms determine price and output through marginal cost analysis.
SS.912.E.1.8:	Explain ways firms engage in price and nonprice competition. Describe how the earnings of workers are determined.
SS.912.E.1.9:	Clarifications: Examples are minimum wage, the market value of the product produced, workers' productivity.
SS.912.E.1.10:	Explain the use of fiscal policy (taxation, spending) to promote price stability, full employment, and economic growth.
SS.912.E.1.11:	Explain how the Federal Reserve uses the tools of monetary policy (discount rate, reserve requirement, open market operations) to promote price stability, full employment, and economic growth.
SS.912.E.1.12:	Examine the four phases of the business cycle (peak, contraction - unemployment, trough, expansion - inflation).
SS.912.E.1.13:	Explain the basic functions and characteristics of money, and describe the composition of the money supply in the United States.
SS.912.E.1.14:	Compare credit, savings, and investment services available to the consumer from financial institutions. Describe the risk and return profiles of various investment vehicles and the importance of diversification.
SS.912.E.1.15:	Clarifications: Examples are savings accounts, certificates of deposit, stocks, bonds, mutual funds, Individual Retirement Accounts.
SS.912.E.1.16:	Construct a one-year budget plan for a specific career path including expenses and construction of a credit plan for purchasing a major item. Clarifications: Examples of a career path are university student, trade school student, food service employee, retail employee, laborer, armed forces enlisted personnel. Examples of a budget plan are housing expenses, furnishing, utilities, food costs, transportation, and personal expenses - medical, clothing, grooming, entertainment and recreation, and gifts and contributions. Examples of a credit plan are interest rates, credit scores, payment plan.
SS.912.E.2.1:	Identify and explain broad economic goals. Clarifications: Examples are freedom, efficiency, equity, security, growth, price stability, full employment.
SS.912.E.2.2:	Use a decision-making model to analyze a public policy issue affecting the student's community that incorporates defining a problem, analyzing the potential consequences, and considering the alternatives.
SS.912.E.2.3:	Research contributions of entrepreneurs, inventors, and other key individuals from various gender, social, and ethnic backgrounds in the development of the United States.
SS.912.E.2.4:	Diagram and explain the problems that occur when government institutes wage and price controls, and explain the rationale for these controls. Clarifications: Examples are shortage, surplus, other inefficiencies.
SS.912.E.2.5:	Analyze how capital investments may impact productivity and economic growth. Clarifications: Examples are factories, machinery, technology, people.
SS.912.E.2.6:	Examine the benefits of natural monopolies and the purposes of government regulation of these monopolies. Clarifications: Examples are electric, water, cable, waste management.
SS.912.E.2.7:	Identify the impact of inflation on society. Differentiate between direct and indirect taxes, and describe the progressivity of taxes (progressive, proportional, regressive).
SS.912.E.2.8:	Clarifications: Examples are income, sales, social security.

SS.912.E.2.9:	Analyze how changes in federal spending and taxation affect budget deficits and surpluses and the national debt.
SS.912.E.2.10:	Describe the organization and functions of the Federal Reserve System.
SS.912.E.2.11:	Assess the economic impact of negative and positive externalities on the local, state, and national environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.2.12:	Construct a circular flow diagram for an open-market economy including elements of households, firms, government, financial institutions, product and factor markets, and international trade.
SS.912.E.3.1:	Demonstrate the impact of inflation on world economies. Clarifications: Examples are oil prices, 1973 oil crisis, Great Depression, World War II.
SS.912.E.3.2:	Examine absolute and comparative advantage, and explain why most trade occurs because of comparative advantage.
SS.912.E.3.3:	Discuss the effect of barriers to trade and why nations sometimes erect barriers to trade or establish free trade zones. Clarifications: Examples are NAFTA, CAFTA. Examples are quotas, tariffs.
SS.912.E.3.4:	Assess the economic impact of negative and positive externalities on the international environment. Clarifications: Examples of negative are pollution, global warming. Examples of positive are pure water, better air quality.
SS.912.E.3.5:	Compare the current United States economy with other developed and developing nations. Clarifications: Examples are standard of living, exchange rates, productivity, gross domestic product.
SS.912.E.3.6:	Differentiate and draw conclusions about historical economic thought theorized by economists. Clarifications: Examples are Adam Smith, Malthus, Ricardo, Keynes, Friedman, Say, Gilder.
SS.912.FL.1.1:	Discuss that people choose jobs or careers for which they are qualified based on non-income factors, such as job satisfaction, independence, risk, family, or location. Clarifications: Identify non-income factors that influence career or job choice by interviewing three individuals who work at different jobs.
SS.912.FL.1.2:	Explain that people vary in their willingness to obtain more education or training because these decisions involve incurring immediate costs to obtain possible future benefits. Describe how discounting the future benefits of education and training may lead some people to pass up potentially high rates of return that more education and training may offer. Clarifications: Explain how people's willingness to wait or plan for the future affects their decision to get more education or job training in a dynamic and changing labor market. Speculate how a high school student might assess the future benefits of going to college, and describe how that assessment will affect the student's decision to attend college.
SS.912.FL.1.3:	Evaluate ways people can make more informed education, job, or career decisions by evaluating the benefits and costs of different choices. Clarifications: Compare the benefits and costs of a college education to those of a technical school. Compare the unemployment rates of workers with different levels of education.
SS.912.FL.1.4:	Analyze the reasons why the wage or salary paid to workers in jobs is usually determined by the labor market and that businesses are generally willing to pay more productive workers higher wages or salaries than less productive workers. Clarifications: Explain why wages or salaries vary among workers in different types of jobs and among workers in the same jobs. Discuss why the productivity of workers is important to businesses.
SS.912.FL.1.5:	Discuss reasons why changes in economic conditions or the labor market can cause changes in a worker's income or may cause unemployment. Clarifications: Explain how an increase in the demand for mobile applications might impact the wages paid to software developers. Explain the effects of a recession on the unemployment rate.
SS.912.FL.1.6:	Explain that taxes are paid to federal, state, and local governments to fund government goods and services and transfer payments from government to individuals and that the major types of taxes are income taxes, payroll (Social Security) taxes, property taxes, and sales taxes. Clarifications: Calculate the amount of taxes a person is likely to pay when given information or data about the person's sources of income and amount of spending. Identify which level of government receives the tax revenue for a particular tax and describe what is done with the tax revenue.
SS.912.FL.1.7:	Discuss how people's sources of income, amount of income, as well as the amount and type of spending affect the types and amounts of taxes paid. Clarifications: Investigate the tax rates on different sources of income and on different types of goods that are purchased.
	Compare consumer decisions as they are influenced by the price of a good or service, the price of alternatives, and the consumer's income as well as

SS.912.FL.2.1:	his or her preferences. Clarifications: Write scenarios explaining how an individual's decision to buy athletic shoes may have been influenced by various factors.
SS.912.FL.2.2:	Analyze situations in which when people consume goods and services, their consumption can have positive and negative effects on others. Clarifications: Explain the positive or negative impacts of an activity such as smoking cigarettes or attending school, etc., might have on other individuals and the community.
SS.912.FL.2.3:	Discuss that when buying a good, consumers may consider various aspects of the product including the product's features. Explain why for goods that last for a longer period of time, the consumer should consider the product's durability and maintenance costs. Clarifications: Explain the factors that a consumer who is buying an automobile should consider before making a choice.
SS.912.FL.2.4:	Describe ways that consumers may be influenced by how the price of a good is expressed. Clarifications: Write a paragraph explaining why a store might advertise the price of a flat screen TV expressed as an amount per day or week rather than the actual full price. List different ways retailers use to express the prices of their products.
SS.912.FL.2.5:	Discuss ways people incur costs and realize benefits when searching for information related to their purchases of goods and services and describe how the amount of information people should gather depends on the benefits and costs of the information. Clarifications: Write a newspaper column, "Tips for Consumers," explaining why searching for information may be more important when purchasing expensive, durable goods and services than for inexpensive and nondurable products. Include an explanation of how impulse buying can be avoided by sleeping on a decision before making a big purchase.
SS.912.FL.2.6:	Explain that people may choose to donate money to charitable organizations and other not-for-profits because they gain satisfaction from donating. Clarifications: Brainstorm a list of charitable organizations that are operating in the students' community. For each organization, list a possible reason that a donor might want to give to that charitable organization.
SS.912.FL.2.7:	Examine governments establishing laws and institutions to provide consumers with information about goods or services being purchased and to protect consumers from fraud. Clarifications: Draft a complaint letter to an appropriate firm or agency about a problem the consumer has encountered with a purchase.
SS.912.FL.3.1:	Discuss the reasons why some people have a tendency to be impatient and choose immediate spending over saving for the future. Clarifications: Identify instances in their lives where they decided to buy something immediately and then wished they had instead saved the money for future purchases.
SS.912.FL.3.2:	Examine the ideas that inflation reduces the value of money, including savings, that the real interest rate expresses the rate of return on savings, taking into account the effect of inflation and that the real interest rate is calculated as the nominal interest rate minus the rate of inflation. Clarifications: Explain why savers expect a higher nominal interest rate when inflation is expected to be high.
SS.912.FL.3.3:	Compare the difference between the nominal interest rate which tells savers how the dollar value of their savings or investments will grow, and the real interest rate which tells savers how the purchasing power of their savings or investments will grow. Clarifications: Given the nominal interest rate and the rate of inflation over the course of one year, explain what will happen to the purchasing power of savings.
SS.912.FL.3.4:	Describe ways that money received (or paid) in the future can be compared to money held today by discounting the future value based on the rate of interest. Clarifications: Use spreadsheet software to calculate the amount a 10-year-old would need to save today in order to pay for one year of college tuition eight years from now.
SS.912.FL.3.5:	Explain ways that government agencies supervise and regulate financial institutions to help protect the safety, soundness, and legal compliance of the nation's banking and financial system. Clarifications: : Explain the role that government agencies charged with regulating financial institutions play in helping to protect the safety, soundness, and legal compliance of the nation's banking system. These agencies include the Federal Reserve System, the Office of the Comptroller of the Currency, the Consumer Financial Protection Bureau, the FDIC, and state banking departments.
SS.912.FL.3.6:	Describe government policies that create incentives and disincentives for people to save. Clarifications: Explain why traditional IRAs (individual retirement accounts), Roth IRAs, and educational savings accounts provide incentives for people to save.
SS.912.FL.3.7:	Explain how employer benefit programs create incentives and disincentives to save and how an employee's decision to save can depend on how the alternatives are presented by the employer. Clarifications: Explain why matches of retirement savings by employers substantially change the incentives for employees to save. Explain why having employees "opt out" of savings programs results in a higher level of saving than having them "opt in."
SS.912.FL.4.1:	Discuss ways that consumers can compare the cost of credit by using the annual percentage rate (APR), initial fees charged, and fees charged for late payment or missed payments. Clarifications: Use the APR, initial fees, late fees, nonpayment fees, and other relevant information to compare the cost of credit from various sources for the purchase of a product.

SS.912.FL.4.2:	Discuss that banks and financial institutions sometimes compete by offering credit at low introductory rates, which increase after a set period of time or when the borrower misses a payment or makes a late payment. Clarifications: Explain why a bank may offer low-rate introductory credit offers.
SS.912.FL.4.3:	Explain that loans can be unsecured or secured with collateral, that collateral is a piece of property that can be sold by the lender to recover all or part of a loan if the borrower fails to repay. Explain why secured loans are viewed as having less risk and why lenders charge a lower interest rate than they charge for unsecured loans.
SS.912.FL.4.4:	Describe why people often make a cash payment to the seller of a good—called a down payment—in order to reduce the amount they need to borrow. Describe why lenders may consider loans made with a down payment to have less risk because the down payment gives the borrower some equity or ownership right away and why these loans may carry a lower interest rate. Clarifications: Explain how a down payment reduces the total amount financed and why this reduces the monthly payment and/or the length of the loan. Explain why a borrower who has made a down payment has an incentive to repay a loan or make payments on time.
SS.912.FL.4.5:	Explain that lenders make credit decisions based in part on consumer payment history. Credit bureaus record borrowers' credit and payment histories and provide that information to lenders in credit reports. Clarifications: List factors from an individual's credit history or credit application that may cause a lender to deny credit. Explain what credit bureaus do.
SS.912.FL.4.6:	Discuss that lenders can pay to receive a borrower's credit score from a credit bureau and that a credit score is a number based on information in a credit report and assesses a person's credit risk. Clarifications: Explain the concept of a credit score and what it indicates about a borrower. Explain why certain factors, such as having many credit cards with large lines of credit and large balances, might hurt a credit score.
SS.912.FL.4.7:	Describe that, in addition to assessing a person's credit risk, credit reports and scores may be requested and used by employers in hiring decisions, landlords in deciding whether to rent apartments, and insurance companies in charging premiums. Clarifications: Provide two examples of how having a good credit score can benefit a person financially. Explain why employers find it useful to hire someone with a better credit score.
SS.912.FL.4.8:	Examine the fact that failure to repay a loan has significant consequences for borrowers such as negative entries on their credit report, repossession of property (collateral), garnishment of wages, and the inability to obtain loans in the future. Clarifications: Write a scenario about the future opportunities a person can lose by failing to repay loans as agreed.
SS.912.FL.4.9:	Explain that consumers who have difficulty repaying debt can seek assistance through credit counseling services and by negotiating directly with creditors. Clarifications: Identify the costs and benefits associated with using different credit counseling services.
SS.912.FL.4.10:	Analyze the fact that, in extreme cases, bankruptcy may be an option for consumers who are unable to repay debt, and although bankruptcy provides some benefits, filing for bankruptcy also entails considerable costs, including having notice of the bankruptcy appear on a consumer's credit report for up to 10 years. Clarifications: Investigate the costs of bankruptcy by examining the bankruptcy laws in Florida.
SS.912.FL.4.11:	Explain that people often apply for a mortgage to purchase a home and identify a mortgage is a type of loan that is secured by real estate property as collateral. Clarifications: Predict what might happen should a homeowner fail to make his or her mortgage payments.
SS.912.FL.4.12:	Discuss that consumers who use credit should be aware of laws that are in place to protect them and that these include requirements to provide full disclosure of credit terms such as APR and fees, as well as protection against discrimination and abusive marketing or collection practices. Clarifications: Explain why it is important that consumers have full information about loans. Explain the information on a credit disclosure statement.
SS.912.FL.4.13:	Explain that consumers are entitled to a free copy of their credit report annually so that they can verify that no errors were made that might increase their cost of credit. Clarifications: Explain why it is important to check the accuracy of the information recorded on a credit report and know what steps to take to correct errors on credit reports.
SS.912.FL.5.1:	Compare the ways that federal, state, and local tax rates vary on different types of investments. Describe the taxes effect on the after-tax rate of return of an investment. Clarifications: Given tax rates and inflation rates, calculate the real, after-tax rates of return for groups of stocks and bonds.
SS.912.FL.5.2:	Explain how the expenses of buying, selling, and holding financial assets decrease the rate of return from an investment. Clarifications: Identify and compare the administrative costs of several mutual funds and estimate the differences in the total amount accumulated after 10 years for each mutual fund, assuming identical market performance.
SS.912.FL.5.3:	Discuss that buyers and sellers in financial markets determine prices of financial assets and therefore influence the rates of return on those assets. Clarifications: Predict what will happen to the price and rate of return on a bond if buyers believe that the bond has increased in risk.
	Explain that an investment with greater risk than another investment will commonly have a lower market price, and therefore a higher rate of return,

SS.912.FL.5.4:	than the other investment. Clarifications: Explain why the expected rate of return on a "blue chip" stock is likely to be lower than that of an Internet start-up company.
SS.912.FL.5.5:	Explain that shorter-term investments will likely have lower rates of return than longer-term investments. Clarifications: Explain how markets will determine the rates of return for two bonds if one is a long-term bond and the other a short-term bond, assuming each bond pays the same rate of interest.
SS.912.FL.5.6:	Describe how diversifying investments in different types of financial assets can lower investment risk. Clarifications: Compare the risk faced by two investors, both of whom own two businesses on a beach. One investor owns a suntan lotion business and a rain umbrella business. The other investor owns two suntan lotion businesses. Explain why a financial advisor might encourage a client to include stocks, bonds, and real estate assets in his or her portfolio.
SS.912.FL.5.7:	Describe how financial markets adjust to new financial news and that prices in those markets reflect what is known about those financial assets. Clarifications: Explain how prices of financial investments can adjust when given specific news about a company's or industry's future profitability.
SS.912.FL.5.8:	Discuss ways that the prices of financial assets are affected by interest rates and explain that the prices of financial assets are also affected by changes in domestic and international economic conditions, monetary policy, and fiscal policy. Clarifications: Give an example of a change in interest rates affecting the current value of a financial asset that pays returns in the future. Explain why the current value increases when interest rates fall. Explain how a change in economic growth might change the value of a stock held by an investor.
SS.912.FL.5.9:	Examine why investors should be aware of tendencies that people have that may result in poor choices, which may include avoiding selling assets at a loss because they weigh losses more than they weigh gains and investing in financial assets with which they are familiar, such as their own employer's stock or domestic rather than international stocks. Clarifications: Explain why investors may sell stocks that have gained in value, but hold ones that have lost value. Explain why this may not make sense. Identify an example of why an investor may have a bias toward familiar investments and why this may or may not be a rational decision.
