

EQUIPMENT LIST

RADIOGRAPHY (postsecondary)

Students in this program should have access to the following equipment:

aprons, lead	film, positive
arm board	filters, wedge
AV equipment	floating top table, 90 degree to 90 degree
AV materials	fluorographic unit
badge, exposure monitoring	fluorographic unit, automatic
bag, bolus	fluoroscope
bench, work	fluid, transducer
bin, film	forceps
blocks, beam	foil, lead
blocks, styrofoam	formatter, multi-image
bolus	freezer, lead lined
box, radiograph plate storage	geiger counters
box, view	generator, 109Cd-109mAg
cable, ECG	generator, three pulse 800 to 1000 MA stations
calibrator, radiopharmaceutical dose	glover, rubber
calipers	gowns
camera, image intensifier scintillation	grid
camera, scintillation	hammer, ballpeen
card, ID	heating unit, processing
carrying case, radiopharmaceutical	holder, tool
cart, emergency	illuminator, radiographic
cassettes, film	injectors, pressure (automatic)
cassettes, x-ray	intercom
catheter, balloon	isotopes, radioactive
catheter, urethra	IV tubing
chair, examination	lamp, goose-neck procedure
chair, pneumoencephlogram	machine, portable x-ray
charts, rad exposure	machine, stationary x-ray
chest changer, vertical wall mounted	machine, suction
clamps, various	mammographic paddles and sponges
collimator	markers, dye
collimator, strip field	markers, graduated radiopaque
cones	markers, metal
connector, ECG	markers, radiopaque ID
copier, film	markers, radiopaque R or L
crash cart, (emergency life support equip)	markers, wax
cup, lead-shielded	mask
densitometer	media, contrast
detectors, scintillation	media, radiograph contrast
device, immobilization	meter, survey (GM tubes)
device, positioning	monitor, TV
device, positioning mechanical	needle, injection
diagnostic x-ray unit	oscilloscope, display
distance indicator	oxygen equipment, in wall
dosimeter, pocket	oxygen equipment, portable
dryer, film	oxygen tank
duplicator, radiographic	pelvimeter
filer, compenstor	phantom
filer, membrane	phantom bar
film changer, automatic	phone
film, emulsion	processor, automatic x-ray film
film, negative	radiograph plates

radiographs, diagnostic
refrigeration unit, processing tank
refrigerator, lead lined
safelights
scales/rulers
scanner, B-mode
scanner, contact ultrasound
scanner, M-mode
scanner, tomography (computerized)
scissors
screen, viewing
sensitometer
shield, lead
shield, male gonadal
silver recovery unit
spinning top
spotview, high intensity
stool, examination
storage cabinets
stretcher
strips, lead
syringe
table, examination
table, imaging
tanks, developing
test pattern, focal spot
tomography unit
transmitter, ultrasound unit
tunnel, cassette
ultrasonogram
transducer
tray, catheterization
tray, emergency
tray, IVP procedure
tray, procedure
tube support for collimator, overhead
typewriter
ultrasonogram
ultrasound, A-mode unit
ultrasound, B-mode unit
ultrasound, Doppler unit
ultrasound, M-mode unit
ultrasound, real time unit
vial, sterile
view boxes, wall mounted
watch/clock
wedge, form rubber (positioning)
wedge, step
wedges, form
wheelchair
wire mesh
