AUTOMATED STUDENT DATA ELEMENTS

Implementation Date:
Fiscal Year 1994-95
July 1, 1994

Element Name:	Student Number Identifier, Florida

Definition/Domain

A ten-character code used to uniquely identify a student. The number must be maintained for all PK-12 students, adult general education students and postsecondary vocational students.

If the student provides a social security number, the Student Number Identifier, Florida equals the social security number followed by an "X."

      nnnnnnnnnX   Example: 123456789X

If a student <u>does not</u> provide a social security number, the school district should assign a number using the common method statewide.

First Two Digits

    NN   For any student entering a Florida school district for the first time who does not have a social security number, the first two digits will represent the district of initial entry into the Florida school system.

Last Eight Digits

    NNNNNNNN   The last eight digits are district-defined in such a way as to result in a unique student number within the district where the number is originally assigned.

If a student does not provide a social security number at the time of entry, but later provides a social security number, the district must update the Student Number Identifier, Florida with the verified social security number.

See Student Number Identifier - Alias, Florida data element for more information concerning changes to the Student Number Identifier, Florida.

NOTE: Section 1008.386, F.S. requires school districts to request a social security number for each student in grades PK - Adult who enroll or who are enrolled in school. However, a student is not required to provide his or her social security number as a condition for enrollment or graduation.

NOTE: Districts may maintain a separate local student number identifier.
