

Average Annualized Earnings by Education Level

2023-24 Graduates/Completers Not Continuing Education
with Florida Full-Time Employment - Fall 2024

Data includes only full-time employed who are not in continuing education.

Annualized earnings are based on Q4 2024 wages.

Full-time employment is based on Q4 2024 wages at least equal to the minimum quarterly wage of \$6,760 or minimum annualized wage of \$27,040. The minimum quarterly wage is calculated by multiplying the Q4 2024 minimum wage (\$13.00) by 13 - 40 hour work weeks ($\$13.00 \times 40 \times 13 = \$6,760$).

The 2024 minimum wage threshold of \$27,040 is calculated by multiplying the minimum quarterly wage by four quarters ($\$6,760 \times 4 = \$27,040$).

The 2024 High Skill/High Wage threshold of \$54,163 is obtained using the same calculation as the minimum wage threshold using an hourly minimum wage of \$26.04 ($\$26.04 \times 40 \times 13 \times 4 = \$54,163$).
